Half Dozen in a Box

THE "HAND" OF SNIPS

There is Considerable Confusion Regarding the Meaning of Right and Left Hand Snips. Left Hand Means that the Work is at the Left of the Snips in Cutting and the Scraps at the Right. We Show Only Snips with Left Hand Cut, as they are Invariably Used by Right Hand Men, and are Always Cut unless Right Hand Snips are Specially Ordered.

Standard Bench Snips, However, are always Furnished Right Hand Cut, that is the Lower Blade is on the Right Side of the Shears

TINNERS SNIPS

BEADING MACHINES.

STOW'S PATENT.

Capacity, 26 gauge iron and lighter. Have reinforced frames and caps; guaranteed to bead accurately and to their full rated capacity. Made from highest grade materials; top castings are japanned, balance is full polished.

With Standard.

Each

No. 620—Depth to gauge 5⅛ inch. Furnished with 4 pairs rolls (¾ ogee, ⅝ triple, ⅛ single, ½ triple coffee pot); weight, 50 lbs. $36.85

No. 621—Depth to gauge 4 inch; 5 pair rolls (⅛ ogee, ⅝ triple, ⅛ single, ½ double, astragal); weight, 40 lbs. 31.60

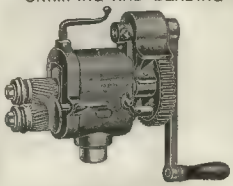
Capacity, 20 gauge iron and lighter. These machines are carefully made. Caps and frames are reinforced for maximum strength. Made from highest grade materials; well finished; top castings are japanned finish, balance of machine full polished.

Each

No. 617—Depth to gauge 12 inch; 3 pair rolls (1 inch ogee, ⅝ single, 1 inch triple); with wedge bench standard; weight, 140 lbs. $57.90

No. 619—7½ inch; 3 pair rolls (⅞ ogee, ⅛ triple, ⅛ single); with wedge bench standard; weight, 85 lbs. 47.40

CRIMPING AND BEADING MACHINES.

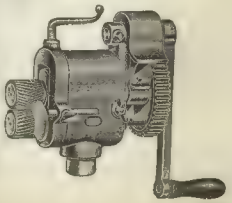


For producing a neat uniform pipe crimp or bead, will give maximum strength and can be depended upon to produce snug fitting pipe joints that will hold when put together. Capacity 20 gauge iron and lighter.

With Standard.

Each

No. 585—Crimping Machine; width crimp rolls, 1¾ inches; width bead rolls, 1 inch; weight each, 65 lbs. ..$31.60



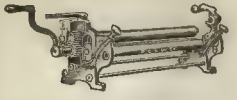
For crimping extra long length stove pipe. These machines produce a crimp or bead that prevent pipe from sagging at the joints when hung, the extra wide distance between the edge crimp and bead makes the length of pipe exceedingly stiff at joints and easy to put together. Capacity 20 gauge iron and lighter.

With Standard.

Each

No. 591—Crimping Machine; width of crimp rolls, 1¾ inches; width of bead rolls, 1 inch; weight each, 63 lbs. $31.60

FORMING MACHINES.

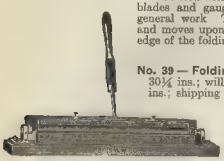


A stove pipe and tin pipe former of slip roll pattern; machine is easily set and ready for use in a very short time. Rolls are made from special rolled hard steel; forms and bearings are selected tough mixture iron.

Each

No. 382—Forming Machine; length of rolls, 31 inches; diameter of rolls, 2 inches; weight, 180 lbs. $37.05

SHEET IRON FOLDERS.



Are fitted with machined steel bending blades and gauges and constructed for general work The gauge is adjustable and moves upon a line parallel with the edge of the folding blade.

Each

No. 39 — Folding Machine; length, 30¼ ins.; will form locks ⅛ to ⅛ ins.; shipping weight, 75 lbs...$28.00

WRIGHT'S.

Each

No. 1—Wright's Patent Folding Machine; for 22 gauge iron and lighter; length, 30½ inches; will form locks ¼ and ⅛ inches; shipping weight, 85 lbs $31.60

Extra Plate—For No. 1 folder..... 4.00

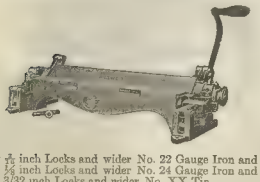
CHAMPION.

Each

No. 11—Champion Folding Machine; for 22 gauge iron and lighter; length, 32 inches; will form locks ⅛ to ⅛ inches; shipping weight, 110 lbs.....$36 85

Not in stock at present.

FOLDING MACHINES.



Capacity ⅛ inch Locks and wider No. 22 Gauge Iron and Lighter. Capacity ⅛ inch Locks and wider No. 24 Gauge Iron and Lighter Capacity 3/32 inch Locks and wider No. XX Tin.

Each

No. 62—Stow's patent, 20¾ inches, will turn locks from ⅛ to 1 inch, weight 80 pounds $63.15

No. 63—Stow's patent, 30 inches, will turn locks from ⅛ to 1 inch, weight 155 pounds..... 78.95

AUTO BRAKE BAND LINING CUTTER.

Capacity ¾-inch and lighter brake band lining.

Each

No. 252C — Auto Brake Band Lining Cutter; length of blade, 3½ inches; length of bed, 10½ inches; height of bed, 6½ inches; length over all, 18 inches; shipping weight, 17 lbs.....$16.50

LEVER SHEARS.

Each

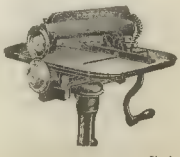
No. 253—Lever Shears; capacity, 3/32 inch and lighter; iron or steel, otherwise same as No. 252C Auto Brake Band Lining Cutter.....$16.50

SLITTING SHEARS.

Permits the most rapid means for slitting iron used in cornice, furnace, ventilation work, etc. They may be utilized for conveniently cutting irregular curves and circles when following a scribed line in a fraction of the time it takes to do the work with snips or bench shears. The cutters are forged from a special high grade tool steel, properly hardened and tempered and have two cutting edges making them reversible. The crank is adjustable to different leverages, bearings are adjustable to take up wear of the cutters and the cutting head of compact construction is mounted on heavy, cast iron legs.

Each

No. 255—Slitting Shears; diameter of cutter, 3½ inches; depth, cutting head to gauge, 18 inches; depth, cutting head to frame, 19 inches; size of table, 20x8 inches; capacity, 16 gauge or lighter; shipping weight each, 325 lbs..$90.00



A rotary slitting shear of merit, so designed that frame is exceedingly solid; cutting knives are made from best iron with high grade tool steel welded to the cutting edges properly hardened and tempered. Capacity, 20 gauge iron or lighter.

Each

No. 250—Slitting Shears; diameter of cutter, 3½ inches; depth of cutting head to gauge, 9 ins.; narrowest strip that can be cut, ½ inch; shipping weight, 100 lbs .. $55 00

WIRING MACHINES.

Solid frame wiring machines, used for rolling sheet metal compactly around wire after it has been prepared by turning machine. Made from highest grade materials insuring long service Capacity, 22 gauge iron or lighter.

With Standard. Each

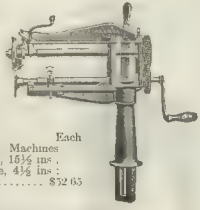
No. 525 –Wiring Machine; with standard; diam. rolls, 3 inches; will receive wire up to ⅜ inches in diam.; weight each, 31 lbs..... $26 35

ENCASED WIRING MACHINES.

Encased machines are most practical and efficient for general use. Used for rolling sheet metal compactly around wire after it is prepared by turning machine. A very efficient machine for light work. Capacity, 24 gauge iron or lighter.

	Without Standard	With Standard
Nos.	526½	526
Diam rolls, inches	3	3
Diam wire, inches	⅜	⅜
Weight each, lbs	17	28
Each	$35.55	36.85

DOUBLE SEAMING MACHINES.



Adapted for general use. The size of the lower face determines the smallest size bottom that can be double seamed. With these machines extra discs are not required. Capacity, 26 gauge iron and lighter.

Each

***No. 644**—Double Seaming Machines will receive work in depth, 15½ ins.; size of lower seaming face, 4½ ins.; shipping weight, 100 lbs..... $52 65

SETTING DOWN MACHINE.

Setting down machines are used for closing down corresponding edges tight for double seaming. A high grade machine for general use. Capacity, 24 gauge iron and lighter

Each

No. 555—With Standard; For seams up to ⅛ inch; weight each, 21 lbs. $23.15

The improvements on this machine adapts it for setting down seams of different shaped vessels to a better advantage than any other design.

Inclined position of both upper and lower faces allows work to be held up or down and seams to be started inward while setting down, facilitating the operation of double seaming.

Capacity 24 gauge iron and lighter.

Each

No. 561—Setting Down Machine; equipped with adjustable gauge up to ⅜ inch; weight packed, 34 lbs. $31 60

No. 561S—Setting Down Machine; same as No. 561, but with bench standard; weight packed, 46 lbs.... 34 25

MACHINE STANDARDS.

No. 975.

REGULAR OFFSET.

Each

No. 975—Standard; size of hole, 1⅝ inch; height overall, 9¾ inches; shipping weight, 10½ lbs..... $2.65

WIRING OFFSET.

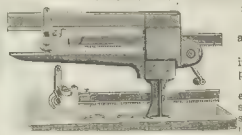
Each

No. 976—Standard; size of hole, 1⅝ inch; height overall, 9¾ inches; shipping weight, 11 lbs..... $2.65

No. 976.

GROOVING MACHINES.

STOW'S PATENT.



Capacity 24 gauge and lighter.

Serviceable for grooving seams on tin cans, pails, boilers, etc.

They are easy to operate and simple in construction. Made with steel bar and milled groove. Size of grooving horn, large end 3 inches, small end 1⅝ inches.

Each

No. 502—Grooving Machine—Furnished with three grooving rolls ⅛, 5/32, 7/32 ins.; will groove work 20 inches long; weight each, 102 lbs..... $31.60

GRANNIS' PATENT.

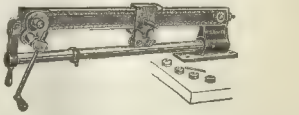
Fitted with square horn for grooving seams in square box pipe, etc Have patent devise which flattens and grooves seams of cylinder in one operation.

With Standard.

Each

No. 505 Grooving Machine—Grooves work 30 ins. long; 5/32, ⅛, ⅜ inch grooving rolls and one flattening roll; capacity 22 ga. iron and lighter; weight, each 100 lbs..... $52 90

***No. 507 Grooving Machine**—Grooves work 40 ins. long; ¾, 5/32, ⅛ ins. grooving rolls and one flattening roll; capacity 24 gauge iron and lighter; weight, each 105 lbs. 57.90



A machine adapted for grooving the longitudinal seams in stove pipe and other sheet metal cylinders. It is very rapid and permits operator standing in front of machine to insert and remove work without changing his position. Capacity, 24 gauge iron or lighter.

Each

No. 518—Grooving Machine; will groove work 30 inches in length; diameter smallest pipe that can be grooved, 2 inches; weight each, 200 lbs..... $60.00

Note—Six Rolls are furnished, one each with 3/16, 7/16 and 15/32 inch grooves, two with 5/16 inch grooves and one flattening roll.

*F. O. B. Southington, Conn.

POCKET SEAMERS.

HANDY.

A handy pocket seamer. It is adjustable for seams of different widths. Can easily be carried in pocket or tool kit. Has black finish handles, steel blades

Per Pair

No. 791—Pocket Seamers; length over all, 7¼x3½ inches; size of blades, ⅜x3½ inches, adjustable for seams ⅛ to ⅜ inches; weight per pair, 1 lb. $1.04

ROOFING DOUBLE SEAMERS.

A double seamer for tin roofing. Will do the work evenly and leaves the formed lock of uniform height. Works well over uneven roof boarding and will double seam hips and ridges with ease.

Per Set

No. 742—Roofing Double Seamers; fitted for IC tin; follows 1 and 1¼-inch tongs; finishes a lock ¾-inch high; length over all, 30 inches; width, 14 inches; weight per set of two pairs, 40 lbs. $21 20

No. 742½—Roofing Double Seamers; fitted for IC tin; follows 1¼ and 1½-inch tongs; finishes a lock 1-inch high; length over all, 14 inches; width, 30 inches; weight per set of two pairs, 40 lbs. 21 20

ROOFING TONGS.

These tongs are used for drawing together two layers of tin before clearing. Made from japanned malleable iron with steel clamps.

Per Set

No. 770¾—Roofing Tongs; will turn ¾-inch lock; length over all, 21 inches; size of blade, 1¼x18½ inches; weight per pair, 8 lbs. $4.25

No. 771—Roofing Tongs; will turn 1 inch lock; length over-all, 21 inches; size of blade, 1⅜x18½ inches; weight per pair, 8 lbs. $4.25

No. 771¼—Roofing Tongs; will turn 1¼ inch lock; length over all, 21 inches; sizes of blade, 1¾x18½ inches; weight per pair, 9 lbs. 4.25

No. 773—Roofing Tongs; adjustable; will turn ⅛, ¾, 1, 1¼ and 1½ inch lock; length over all, 21 inches; size of blade, 2x18½ inches; weight per pair, 9½ lbs. 5.80

No. 773 not in stock at present.

GUTTER TONGS.

Each

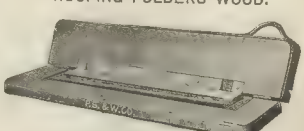
No. 777—Gutter Tongs; depth of jaws, 14 inches; length handles, 24½ inches; width of blades, 1¾ inches; length of blades, 12½ inches; weight each, 10 lbs. $5.80

COMBINATION TONGS.

Each

Roofing Tongs—For edging and squeezing $2.00

ROOFING FOLDERS—WOOD.



Each

No. 33C—Common Roof Folders; length, 30 inches; will form locks ⅞ inches; weight, 14 lbs. $4.50

WITH GAUGE.

Each

No. 113—Improved Roof Folders; length, 20 inches; will form locks ⅞ and ⅜ inches; weight, 10 lbs. $5.80

No. 123—Improved Roof Folders; length, 30 inches; will form locks ⅞ and ⅜ inches; weight, 17 lbs. 6.85

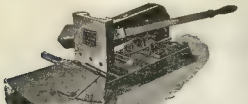
BENCH PLATES.

Each

No. 981—Bench Plate; cast iron, polished; length, 37½ inches; width, 8 inches; weight, 46 lbs. $9.50

No. 982—Bench Plate; cast iron, polished; length, 30 inches; width, 8 inches; weight, 31 lbs. 7.65

SLITTING SHEARS.



A practical shear for range manufacturers, car shops, automobile plants or where a variety of straight and irregular cutting is done. Lower blades are stationary so that when cutting to line, mark may easily be followed with accuracy. Blades made from best iron with a high grade tool steel welded to the cutting edges properly hardened and tempered.

Each

No. 248—Slitting Shears; length cutting blades, 6½ inches; depth cutting head to gauge, 9½ inches; depth cutting head to frame, 10 inches; size of table, 12x15 inches; shipping weight, 165 lbs..... $75.00

SCROLL SHEARS.

Will cut circles, ovals, ogees and all irregular shapes with the greatest ease. They are well adapted for cutting from the center of a sheet.

Mounted in a standard which screws to the bench and adjustable to any angle required

The length of cut is regulated by means of a set screw in frame back of lower blade. To shorten cut, turn screw in; to lengthen cut, turn screw out. Upper blade can be adjusted for wear by means of the two rear adjusting screws. Capacity, 20 gauge iron or lighter.

Each

No. 269 – Scroll Shears; length of cutting blade, 4¼ inches; depth of cutting head to gauge, 17 inches; depth of cutting head to frame, 18¼ inches; capacity, No. 20 gauge iron and lighter; shipping weight each, 155 lbs...$61.00

RING AND CIRCULAR SHEARS.

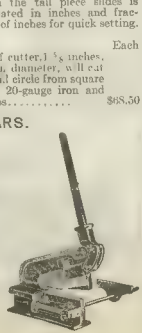
Intended for cutting circles or internal rings and irregular curves. Permits for the clamping and removing of blanks with great rapidity. The bed on which the tail piece slides is graduated in inches and fractions of inches for quick setting.

Each

No. 298 — Circular Shear; diameter of cutter, 1⅜ inches, will cut rings small as ⅜ inches in diameter, will cut rings large as 22 ins. in diameter, will circle from square blanks 3¼ to 22 inches; capacity 20-gauge iron and lighter; shipping weight each, 195 lbs..... $68.50

LEVER SHEARS.

For slitting sheet iron in any length or width as well as for cutting narrow iron bars. Patterned to allow sheets to pass freely and proportioned to obtain great strength and durability. Blades are made of high grade materials ground to true cutting edge.



Each

No. 0296—Lever Shears; length of cutting blade, 8 inches; length gauge rod, 22 inches; capacity, 10 gauge iron or lighter; will cut iron bars ⅜ inch square and ¼x½ inch; shipping weight each, 130 lbs..... $70 00

SQUARING SHEARS.

Designed for cornice work, but are equally valuable in other lines where foot power shears of great capacity are required.

Fitted with arched automatic hold down attachment which makes visible a line drawn on metal for cutting accurately. Also have weight balanced foot treadle insuring ease to operator.

Capacity, 18 gauge iron or lighter.

Each

***No. 190—Squaring Shears;** length cutting blade, 73 ins.; length of front arm, 22 inches; length of rear gauge arm, 25 inches; length of rear gauge, 70 inches; narrowest strip that can be cut, ¾ inches; width of bed plate, 18 inches; shipping weight complete, 2,100 lbs.....$365.00

***No. 191—Squaring Shears;** length cutting blade, 97 inches; length of front arm, 22 inches; length of rear gauge arm, 25 inches; length of rear gauge, 94 inches; narrowest strip that can be cut, ¾ inches; width of bed plate, 18 inches; shipping weight complete, 2,900 lbs..... 485.00

P. S. & W. ACME.

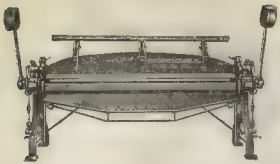
Designed for cutting metal also for special work such as cutting leather, cloth, paper, rubber, etc. Furnished with wood top shelf and complete gauge equipment. Iron cutting capacity, 18 gauge and lighter.

Each

No. 179—Squaring Shear; length, cutting blade, 31 ins.; width, bed plate, 13 ins.; approximate shipping weight 425 lbs.....$95.00

*F. O. B. Southington, Conn.

CORNICE BRAKES.



Hares patent cornice brakes are recognized by large sheet metal workers and railroad companies as being of superior quality.

They will form long sections easily and quickly and are well adapted for forming gutters, cornice work, valleys, etc.

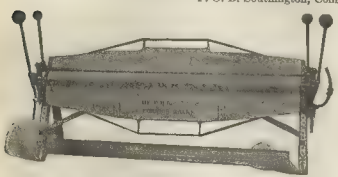
The bending leaf is properly balanced by weights and is provided with a forcing bar for bending heavy iron

Capacity, 18 gauge iron or lighter.

Each

*No. 683—**Cornice Brake;** length, 52 inches; clamping jaws open, 1 inch; shipping weight crated, 1070 lbs. . . $220.00

F. O. B. Southington, Conn.



F. O. B Buffalo, N. Y

STANDARD DOUBLE TRUSS.

This machine will bend or form sheet metal to almost any angle or curve or any combination of angles or curves, at any distance from the edge, either lengthways or crossways. Will bend No. 22 sheet metal and lighter the full length of machine.

Each brake is supplied with six half-round formers ⅞ to 2½ inches in diameter, with the necessary friction clamps to hold same in place, for forming circular bends.

* Nos.	3	4	5
Length of bending edge, feet	3 1/12	4 1/12	5 1/12
Weight on skids, pounds	250	300	525
Each	$58.00	68.00	85.00

* Nos.	6	8	10
Length of bending edge, feet	6 1/12	8 1/12	10 1/12
Weight on skids, pounds	680	875	1300
Each	$105.00	125.00	175.00

EXTRA STRONG DOUBLE TRUSS.

F. O. B. Buffalo, N. Y.

Same machine as Standard, but much stronger and will bend No. 16 sheet metal and lighter full length of machine.

Nos.	14	15	16	18
Length of bending edge, ft.	4 1/12	5 1/12	6 1/12	8 1/12
Weight on skids, lbs.	475	620	760	1035
Each	$80 00	95.00	115.00	145.00

*F. O. B. Factory

COMBINATION BRAKE AND FOLDER.

The construction of this machine is of all iron with steel bending blades and allows for easy and accurate formation of wide angles and narrow locks within the rated capacity without danger of springing.

Adjustments are provided for in the eccentric constructions allowing for a maximum pressure to bear on the work while in the process of forming, preventing the work slipping from a true line

Capacity, 16 gauge iron and lighter.

	Inches.
Will form open or closed locks in width	⅛ to 1¾
Will form open or closed locks in width	½ to 1¾ on 16 gauge iron
Will form open or closed locks in width	1/16 to ⅝ on 18 gauge iron
Will form open or closed locks in width	¼ on 20 gauge iron
Will form open or closed locks in width	1/16 on 22 gauge iron
Will form open or closed locks in width	⅛ on 24 gauge iron

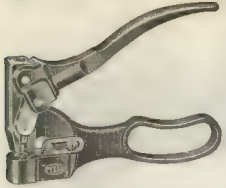
Each

*No. 93—**Combination Brake and Folder;** length, 42 inches; clamping jaws open, 1¾ inches; shipping weight crated, 950 lbs. $250.00

F. O. B Southington, Conn.

Note—Furnished with seven Formers for making circular and semi-circular bends in cornice work, etc.; viz, 3, 2½, 2, 1¾, 1½, 1¼ and 1 inch. When machine is used for 16 gauge iron two men are required to operate the machine with greater ease.

HAND PUNCHES.



Furnished with 3 sets of dies and punches, viz. ⅛, 3/16 and ¼ inch. Toggle movement works easily and rapidly. Can be carried in pocket or kit. A useful tool for outside work.

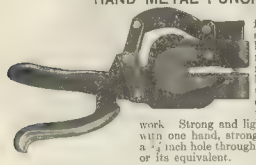
Black japanned finished.

Capacity No. 20 gauge iron and lighter.

Each

No. 790—Hand Punches; depth of throat, 1 inch; height, 4 inches; length, 7½ inches; weight each, 2½ lbs. $3 55
One pair in a box.

HAND METAL PUNCH



The most powerful punch of its size made. Used by steel and sheet metal workers in machine shops, blacksmith shops, tin shops and for out-door construction and for repair work. Strong and light, easily operated with one hand, strong enough to punch a ⅛ inch hole through No. 20 gauge iron, or its equivalent.

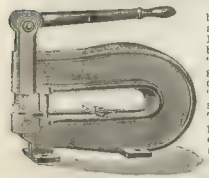
Each

No. H3—Ha Metal Punch; complete with 1 punch and die, 3/16 inch; will punch center of 3½ inches' length extreme points, 9½ inches; weight each 4½ lbs $3 75

Each

***Extra Punches**—Sizes, ⅛ and ¼ inch; punch and die $0.60
Other sizes made to order. 75
*F. O. B. factory, Rockford, Ill.

SAMSON PUNCH.

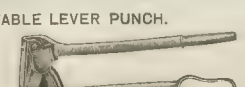


Improved Samson Punch, bolt fastened, with adjustable gauge. Will punch No. 9 iron with "stay bolts" and No. 12 without "stay bolts." Depth of gap, 15 inches; will center on 30-inch sheets without "stay bolts" and on 7-inch sheets with "stay bolts." Three sets of dies and punches accompanying each machine, viz.: ⅛, 3/16 and ¼ inch.

Each

No. 675—Improved Samson Punch; weight each, 140 lbs. $42.00

PORTABLE LEVER PUNCH.



Has a very powerful toggle movement and works easily and rapidly. The gauges, both back and side, are easily adjusted. One die and three punches accompany each machine. Can be used on No. 20 gauge material. Each

No. 780—Portable Punch; complete with one die and three punches as follows: ⅛, 3/16 and ¼ inch; wgt each, 8½ lbs. $10.00

SHEAR AND PUNCH.
COMBINATION.

Suitable for both cutting and punching metal. Will cut ⅛ in. iron and 3/16 and ¼ in. narrow bars. Will punch the centre of a circle 5½ inches.

Each

No. 679—Shear and Punch; 5½ inch shear; 5½ inch throat; 5½ inch cut, complete with 5 punches as follows: ⅛, 5/32, ⅙, 3/16 and ¼ inch; weight each, 120 lbs. $42 00

METAL PUNCH.
MARVEL.

A powerful well made tool. Punches sheet metal bars, augers, circles, etc. Will punch a ⅜ inch hole. Can be clamped to bench vise. Made entirely of steel, black finish.

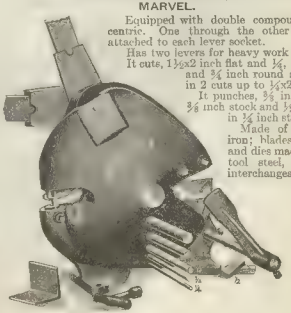
Net at list F. O. B. Chicago.
Enter on Separate Sheet.

Each

No. 20M—Capacity, ¼ inch hole in ¼ inch stock; depth of throat, 2 inches; length over all, 38 inches; shipping weight, 16 lbs; complete with one punch and die $7.00

When not otherwise specified, ¼ inch punch and die is sent with each No. 20M Punch.

COMBINED SHEAR PUNCH AND ROD CUTTERS.
MARVEL.



Equipped with double compound or eccentric. One through the other and one attached to each lever socket.

Has two levers for heavy work or light. It cuts, 1½x2 inch flat and ¼, 5/16, ⅜ and 3/4 inch round angle iron in 2 cuts up to ¼x2x2 inches.

It punches, 3/4 inch hole in 5/8 inch stock and ½ inch hole in ¼ inch stock.

Made of malleable iron; blades, punches and dies mad of best tool steel, all parts interchangeable.

Each.

No. 100M—Throat, 2⅝ in.; shear blades, 3¾ in.; equipped with 2 steel levers, 3 punches, 3 dies and gauge for flat and round shearing; complete with heavy iron legs; shipping weight, 210 lbs. $54.00

One in a box.

BICYCLE RIMS.

Experience with the demands of the trade has decided us to carry a complete assortment of stained and enameled rims
We guarantee the rims to be only of the highest grade, made of carefully selected and well seasoned maple, bent and shaped by the most improved machinery, making them absolutely true to size. Less labor for the wheel builder, hence a very great saving.
The rim makers have so designed their rims that they readily conform to the 1¼ and 1⅜ inch tires, thus doing away with the necessity of the dealers carrying two sizes of each style in stock.

WOOD FOR CEMENTED TIRES.

MORROW.

The Morrow was the first successful and satisfactory Coaster Brake for bicycles, and it is today the best known of any coaster brake in the world.

It is made of the finest material throughout, by skilled mechanics who have worked on coaster brakes since the beginning of the business.

The Morrow is absolutely reliable as a brake and as a coaster.

Made for 32 and 36 spokes; 8, 9 or 10 tooth sprockets; for ⅞ or ½ inch chain. Prices do not include spokes or nipples. Size of spokes required, 12½ inch, 14x16.

	Each
Morrow—Without rim, 1½ or 1⅝ inch chain line	**$7.50**

One in a box. Weight each, 3 lbs.

NEW DEPARTURE.

This is the latest model and will be found very much improved. The brake drum is of one solid piece of steel, no parts to be screwed in, solid hubs, both coasting and drawing bearings are adjusted by cone at sprocket side. The brake is composed of three split rings, which are expanded into frictional contact with brake drum.

Furnished with 7, 8, 9, 10x1½, ⅞ and ¼ inch sprockets; 1½, 1⅝ and 1¾ inch chain line.

	Each
New Departure	**$7.50**

One in a box. Weight each, 4 lbs.

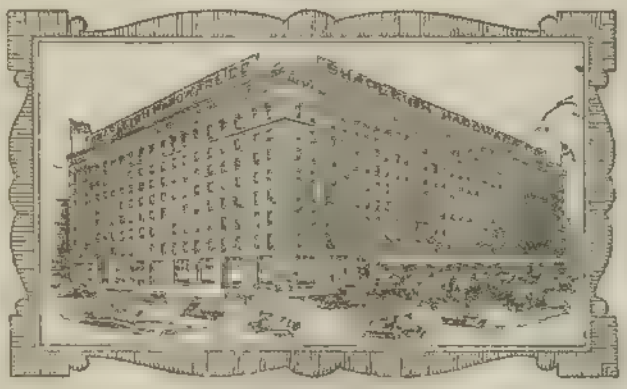
GOOD SERVICE

"DIAMOND EDGE IS A QUALITY PLEDGE"



SADDLERY

NORLEIGH DIAMOND BRAND

This BRAND is a guide for QUALITY. Select materials of highest grade, expert workmanship, modern construction and styles rank Saddlery among our most important lines.

SADDLES designed for various uses will be found particularly adapted and pleasing.

NORLEIGH DIAMOND HARNESS is made of "Union Tanned" Leather. The name is derived from the tannage which consists of two-thirds hemlock and one-third oak bark. The durable finish of this tannage is finer than straight oak or hemlock tannage. Select hides free from all cuts, scars, marks or brands are taken from native cattle. The cutting and selecting of each piece of Leather is under personal supervision of a specialist in the manufacture of Harness which, together with the equipment of latest and most accurate machinery insures merchandise which will give "GOOD SERVICE".

HORSE COLLARS—"Mike Kinney" Horse Collars have a reputation and are recognized readily where the best is wanted. The other numbers in our line are proportionately good values; our aim being to produce the best quality goods and reduce the cost of same to a minimum. We have our Collars made by one of the best manufacturers whose facilities to meet our views are unexcelled.

In this section will be found Saddlery Accessories, Lap Robes, Dusters, Blankets, Pads, Whips and Saddlery Hardware embracing everything from the exclusive specialties to the most staple items.

MAIL ORDERS GIVEN ESPECIAL ATTENTION.

★NORLEIGH DIAMOND

★SECURITY BULGE

"ORIGINATED BY US"

The advantage of the Security Bulge Saddle over all other Saddles, lies in the Shape and Build of the Fork. The Saddle of the Fork extends outward over the Base of it and forms a small, strong Natural Hook for the Right Leg, just where it is best for riding. This gives the Knee a grip which the most violent shaking cannot dislodge. The Fork also sweeps backward, which prevents Rider from striking Horn, and averts any injury from this cause. These Saddles are made by Skilled Workmen of the Best Materials and are guaranteed to be the best in all respects that can be produced for the price.

★NEW TEXAS

Cut shows Rear View of Security Bulge.

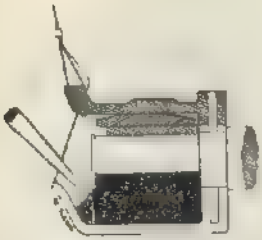
Aycock Positive Oiler

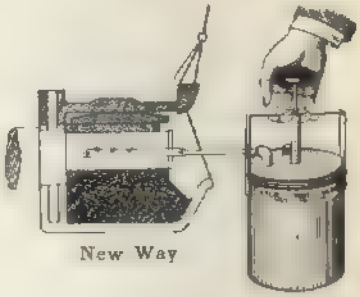
Journal Lubrication

Proper lubrication of journal bearings is an important factor in operation of trains. Eliminates hot box troubles, creates efficiency, avoids waste of oil and expense of cutting out cars

Application of Oil



Old Way



New Way

Present Method of Lubrication

1 The oil is not applied where needed but must find its way to the point of friction best it may.

2 It is entirely dependent upon the action of gravity and in cold or freezing weather this objection is increased.

3 There is no gauge upon the quantity of oil used, and there is either a waste or a deficiency

4 A hot bearing or one showing evidence of becoming hot cannot be reached The car must be cut out with frequently great delay and inconvenience if not demoralization of traffic

It is evident that this method is a crude relic of ancient practice and should be superseded by a better one if such can be found.

A very positive need exists for an appliance which will do away with these objections and be simple of operation.

We have that appliance and its universal adoption is merely a question of time The more progressive will adopt it first and be followed by the others in due course.

The Aycock Positive Oiler

A journal oiler in which the oil is measured Applied just where it is needed In less time No waste of oil.

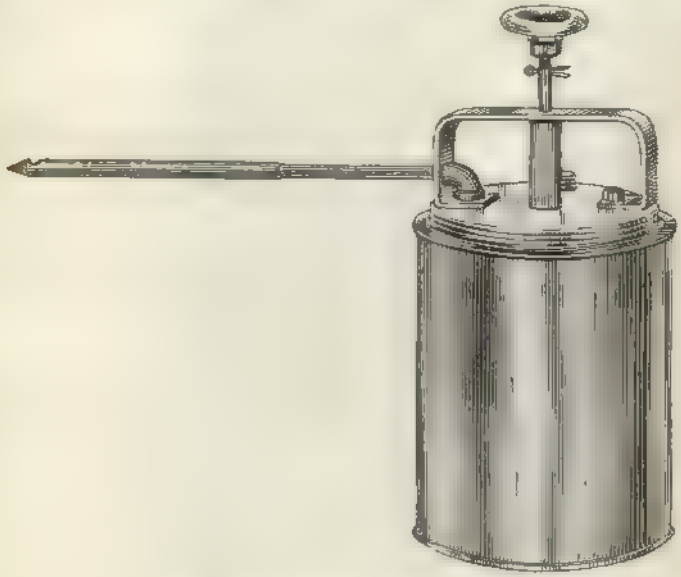
The Aycock Oiler is simple and thoroughly effective.

1 By means of the flat spout the oil is applied to the bearing the full length of journal

2 The pressure of the hand that carries the oiler forces the oil through the spout. No waiting for gravity.

3 Each pressure of the hand forces through the spout exactly one ounce of oil No more no less This adjustment may be changed if desired, but in any case the quantity is uniform)

4 An Aycock Oiler on every train as well as at each oiling station will effectually reduce if not eliminate hot box trouble as long as any life remains in the packing.



No. 133 Aycock Positive Oiler

The construction of the Aycock Oiler is as follows

A 1 gallon can extra heavy A screw over from which a pump is suspended The piston protrudes through the cover and through the bale and is capped with a knob At the bottom of the pump cylinder are two valves As the piston is forced upward by a spring between the bale and the cover one ounce of oil is drawn into the cylinder.

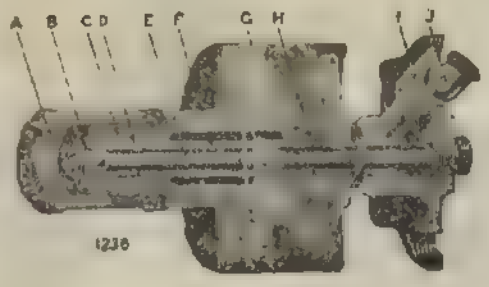
Then as the pressure is applied to the knob the oil is forced out through the other valve and through the spout The travel of the piston is fixed, therefore the amount of oil is fixed as there can be no leakage

FAN MOTORS

EMERSON

Emerson 1915 Model Desk Fans and Oscillators are packed one in a Box and are supplied by the Factory complete with Ten-Foot Parallel Cord and Rotating Edison Plug, attached to Motor, with Direction Sheet, ¼ Pint Can of Oil and Five Year Guarantee Coupon attached to Motor.

The Illustration Herewith is a Photograph of an actual Cross Section of the Emerson Induction Armature, Fan Hub and Shaft. This Bearing is Entirely Different in principle from the Bearings of Ordinary Types of Desk Fans. Instead of a Rotating Shaft of Soft Steel, to which the Armature is Pinned, the Shaft of the Emerson Fan is a Hollow Steel Spindle (F) Pressed Firmly into the Rear Housing of the Motor (I). The Armature (G) Rotates upon this Shaft and is Entirely Separate from the Shaft. A Stud (E) passes through this Shaft and Holds a Retaining Screw with Washers (B) at the Front end to keep the Armature in position.



The Armature Hub (C) is threaded at the Front End to Receive the Fan Hub (A) which is Screwed on Firmly Against a Leather Washer which makes an Oil-Tight Joint Between the Solid Fan Hub and the Armature Hub. Thus, the Front end of this Bearing is Sealed Oil-tight, Eliminating any Possibility of Oil Reaching the Fan Blades to be Scattered Over Furnishings or Decorations.

The Simple and Wonderfully Effective arrangement for Lubricating this Bearing has been Largely Responsible for its Success During the Fifteen Years it has been in Use. Oil is Inserted through the Oil-Cup (J) and Runs into the Center of the Hollow Shaft, through the Slotted Holes (D-H) in the Shaft, Directly to the Bearing Surfaces of the Armature, where it is needed

The Combination of Wearing Surfaces in this Bearing has been proven by Experience to be Highly Satisfactory for a Bearing of this Character. The Hollow Shaft or Spindle is of Case Hardened Steel, while the Armature Hub Running on this Spindle is of Soft Cast Iron. It Seems that no Better Combination of Wearing Surfaces can be Procured.

The Soft Porous Iron Absorbs the Oil, and in a Short Time the action of the Hardened Steel Surface of the Shaft Develops a Glaze on the Iron which is an Ideal Bearing Surface. Tests made on Fans which have seen many years of Continuous Service show this Bearing to be in even Better Condition than when the Fans left the Factory.

It will be noted that the Armature Hub Midway Between the Bearing Surfaces is Recessed, Leaving a space between the Shaft and the Cast Iron Hub. This Recess is Filled with Lubricating Grease when the Fan Motor is Shipped, Insuring Perfect Lubrication for Some considerable Time, Even should the User Fail in the Ordinary Precaution of Supplying Oil to the Bearing.

One of the Secrets of the Success of this Bearing is the fact that it is Sealed at the Front End, and Practically Sealed so far as the Entrance of Dirt is Concerned, at the Rear End. Oil Remains on the Bearing Surfaces Until its Lubricating Qualities are Exhausted, and Dirt, Sand and Dust Floating in the Air Cannot Enter the Bearing to Cut and Grind it.

All Types and Sizes of Emerson Alternating Current Desk and Oscillating Fans are Equipped with the Hardened Steel Oil-Tight, Dust-Proof Bearing Described Above.

All Sizes of Emerson Desk and Oscillating Fans for Both Alternating and Direct Currents are Equipped with Fan Blades of a Patented Design Selected after Exhaustive Experiments with Blades of Different Characteristics. The Original Parker Design used on Emerson 12-inch Fans has been Successfully Modified to Meet the Requirements of 8-inch Fans and 16-inch Fans, but Retains the Essential Features which have Made this Design so Valuable.

The Parker Blade is a Rigid Sheet of Brass with a Curved Cutting Edge. The Rear Edge is so Shaped as to Minimize the Vioration which Results in the Hum of Ordinary Desk Fan Blades.

Where Necessary this Blade is Made unusually wide near the Hub to Project Air from the Center as well as from the Outer Circumference of the Fan. The Pitch or Dip of Parker Fan Blades is Considerably Greater than Found in a majority of Competitive Makes, Enabling these Fans to Project Air to a Great Distance without Objectionable Noise.

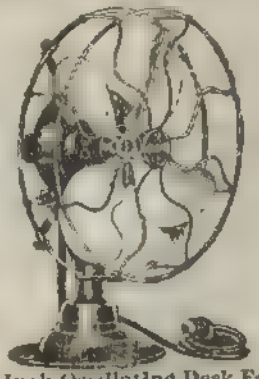
The Smallest Emerson Fan May be Converted to the Bracket Position without Extra Parts

All Emerson Fans for Alternating Current are Fan Motors of the Induction Type. This is the Simplest Known Form of Motor and, in the Design Employed for Emerson Fan Motors, has Neither Brushes nor Commutator, nor Moving Contacts of any Kind.

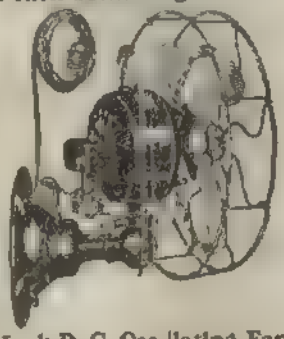
Emerson 1915 Models Oscillators have valuable Improvements in the Mechanism, by which the Range of Oscillation may be varied from 150 to 90°, of the stationary position secured by adjusting a Single Thumb Lever below the Gear Case. The Mechanism has been greatly Simplified and all loose parts eliminated.

A new feature is the Adjusting Collar beneath the Motor, by which the direction in which the breeze is thrown may be instantly changed to put the breeze where it is wanted without re-adjusting the Base. This feature is particularly valuable where the Motor is installed as a Bracket Fan with Base fastened to the Wall. The Adjusting Handle in the Collar points in the direction in which the breeze will be thrown.

These Oscillators are Equipped with a Hinged Base Permitting the Blades to be Tilted Up or Deflected as may be Desirable. By Withdrawing the Thumb Screw at the Hinge, this base may be Adjusted to the Angular Position, and the Base Fastened Directly to the Wall. The Hinged Joint is so Designed that the Motor would not be Damaged by Falling Forward, Even Should the Thumb Screw be Fastened Insecurely. When Used as a Bracket Fan the Blades May be Tilted Up or Deflected as well as when Used as a Desk Fan, Permitting the Oscillators to be Placed Well Above the Occupants of a Room, and Tilted Down to Distribute the Breeze over Many Persons, without Annoyance to those Nearest to the Fan.



12-Inch Oscillating Desk Fan



12-Inch D. C. Oscillating Fan in Bracket Position
Blades may be Deflected to Throw Breeze Down when Mounted on Wall

Owing to the Wide Diffusion of Air Secured with Oscillating Fans, the Blades of Emerson Oscillators are Adjusted to Throw a Stronger Breeze than Thrown by Non-Oscillating Fans of Corresponding Styles. As a Result, Emerson Oscillating Fans Consume a slightly Larger Amount of Current than Corresponding Sizes of Emerson Swivel-Trunnion Fans, but for an Extra Current Required by the Motor the User Receives Full Value in Increased Volume of Air Delivered.

All Emerson Oscillating Fans are Three-Speed Positive-Acting Geared Types, not Dependent on air Reactions for their Swinging Movement. As a Result these Fans Oscillate Steadily in any Position as Desk or Bracket Fans.

Emerson Oscillators have all the Other Valuable Features of Emerson Swivel-Trunnion Fans, Described on Previous Pages. They are Induction Fans without Brushes, Commutator or moving contacts of any kind. Motors of this kind, Equipped with the Oil-Tight, Dust-proof Bearing of the Emerson Fan, are sure to give long Service.

These Fans Should not be Confused with Oscillators Depending on Moving Vanes and Uncertain Air Reactions for their Swinging Movement.

Handlan Train Indicators

For Safety and Accuracy in Train Movements

Train Identification

The question of safety in train identification has always been a matter of important consideration on American railways principally due to the necessity of handling trains by telegraphic instructions in order to secure expeditious movement of traffic

Locomotive Numbers

The various methods used by different railways to display engine numbers at night by illumination from the headlight and the experimenting still going on indicate the imperfections which exist with an absolutely perfect display of engine numbers We do not believe they will ever reach the acme of successful operation because they are only an intermediary means of arriving at the proper identification or in other words, a means to an end Besides engine numbers embodied in orders entail upon employes the necessity of remembering both engine and train numbers which creates confusion and makes them more liable to forget or transpose the engine number with resultant possibilities of disaster Another serious fault to be found with this auxiliary mode of identification is that engine numbers are of absolutely no use in identifying trains except when the number of the locomotive is embodied in a train order.

Train Numbers

As the years go by, they bring ever increasing demands for improvements to meet changing conditions and secure greater safety in the operation of trains and one of these seems to be the question of a simple safe means of identification of trains at ALL TIMES regardless of their class, without the necessity of the intermediary confusing means used at present to identify them. The great increase in the number of trains to be moved both freight and passenger, the high speed at which the latter are run, the numerous cases of mistaken identity in the past with the possibility of a recurrance in the future has caused us to endeavor to perfect a train number indicator that would convey a positive identification concerning ALL TRAINS, combined with simplicity of operation clearness of information, and the future prospect of doing away with the necessity of inserting locomotive numbers in train orders with their complicated movements and attendant evils

This indicator being an innovation in railway usage, and train identification being of such vital importance in securing safe operation of trains, we bespeak for this device an opportunity of demonstrating its worth by a practical service test, believing it will simplify movements and make assurance doubly sure and materially assist in obtaining greater Safety in Train Identification

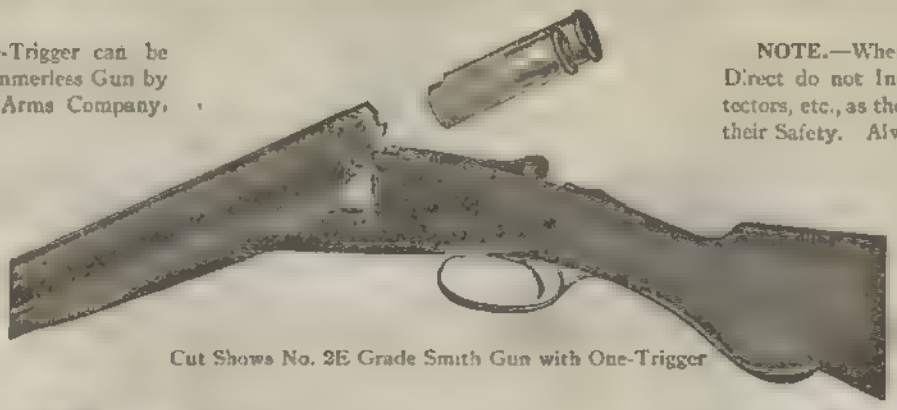
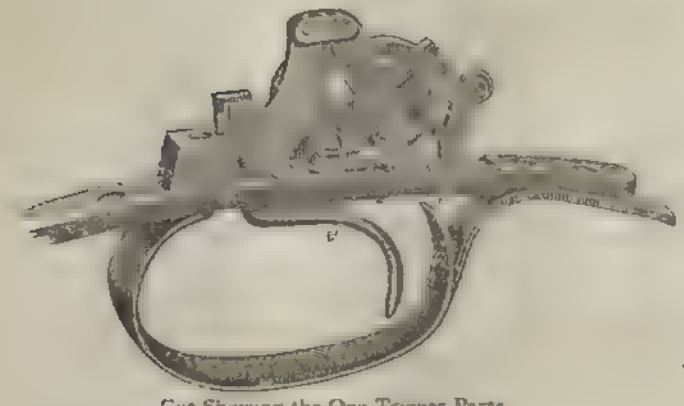
THE HUNTER ONE-TRIGGER ON L. C. SMITH HAMMERLESS SHOT GUNS

NOTE.—The Hunter One-Trigger can be Fitted to any L. C. Smith Hammerless Gun by having Gun Sent to Hunter Arms Company, Fulton, N. Y.

NOTE.—When Sending Guns to Factory Direct do not Include Gun Cases, Hand Protectors, etc., as they will Not be Responsible for their Safety. Always Prepay Express Charges.



Cut Shows No. 2E Grade Smith Gun with One-Trigger



Cut Showing the One-Trigger Parts

Mechanism, Exaggerated Size

The Hunter One-Trigger is Exceedingly Strong, the Parts are Large and Strong, is Independent of any Recoil, is Set Frictional and will never Hang when Pulling for the Second Barrel.

Operation of Mechanism—The Post "D" forms a Hook for the Engagement of the Spur "B." This Post is not an Additional Piece, but is used in both the One and the Two-Trigger Guns to Support the usual Top Safety Mechanism. The Pulling of the Trigger Causes the Firing Plate "A" to Rise and Fire the First Barrel; at the Same Time the Spur "B" Disengages the Hook of the Post "D" and Presents the Second Barrel for Firing. When the First Barrel is Fired the Recoil Carries the Gun [illegible] Finger, and if the Gun be held [illegible] Mechanism Assumes its Original Position and Remains [illegible] Trigger and Finger Takes Place. If the Gun be held Tightly, this Impact Occurs while the Spur "B" is on its way to its Original Position. In Either Case the Spur "B" Engages the Hook "D" under the Rebound and Prevents the Premature or Double Discharge. Thus it is Evident that it makes no Difference Whatever how the Gun is Held; whether the Recoil [illegible] Spur "B" is Always in Position to Prevent Double Discharge.

The Operation of Firing the Second Barrel [illegible] Mechanism [illegible] Double Discharge. After the Recoil and Rebound Cease, the Slight [illegible] of the Trigger will Permit the Spur "B" to Disengage from [illegible] and Rest upon the Elevated Stud "F," thus Bringing the Parts into Position to Fire the Second Barrel Instantly. In order to meet Certain Peculiar Actions of Recoil and Incorrect Methods of Holding a Gun, a Pivoted Weight, "C," is Employed, which is Operated by [illegible] on the Lower End of this Weight Lever is a Stud, "L," which, on the Recoils, Drives the Spur "B" into its Blocking Position, Regardless of the Recoil and Methods Alluded to Above.

Trigger Pull and Speed—The Trigger Pull of the Hunter One-Trigger is Short, Clean and Quick. There is no Drag or Creep; the Speed of the Mechanism Far Exceeds that of the Firing Finger, therefore Both Barrels can be Discharged just as Fast as the Trigger can be Pulled, a Feature which will be Greatly Appreciated by both Brush and Trap Shooters

Selective Action—This Action is Simplicity Itself. The Selective Button Controlling the Order of Firing is Conveniently Located at the Side of the Trigger. Pushing the Button Backwards Exposes the Letter "L," Indicating "Left First." Moving it Forward, Concealing "L" and Exposing "R," Indicates "Right First." The Sportsman can [illegible] at Left, Left and Right, all Rights, all Lefts. As the Button is Moved unless the Order of Firing is to be Reversed, there is Exactly the same Control over the Firing as in a Two-Trigger Gun.

Misfits—In all Two-Trigger Guns, Changing from One Trigger to the Other either Shortens or Lengthens the Stock about an Inch. If a 14 inch Stock Fits a Sportsman, a 13 inch certainly does not; hence, One Shot is Fired from a Gun that Fits Perfectly, and the Next Shot from a Gun that does not Fit at all. In other Words, a Two-Trigger makes it Necessary for a Shooter to Constantly Try to Get Accustomed to Two Lengths of Stock, while he does not get used to Either. That is why so many Second Shots are Missed.

Numbness—The Sportsman can Shoot the Hunter One-Trigger just as well with Thick Gloves as with the Bare Hands, Owing to the very Short Release and the Ample Space in Front of the Trigger. This Special Feature makes Shooting from a Duck Blind Decidedly Comfortable.

Fiddling—In the Hunter One-Trigger One Firm, Steady Grip is Maintained for Both Barrels. There is no Relaxing, no Regripping, no Reaccommodating Oneself to the Different Lengths of Stock, nor to a Different Trigger in a Different Place and of Different Shape. A Sportsman can Hardly Appreciate, until he has Tried the Hunter One-Trigger, just How much of a Benefit this Firm, Steady Grip is. In other words, while he is "Fiddling" around, Adapting himself to these Changes in the Two-Trigger Gun, his Bird is Rapidly Moving out of Range, while, on the other hand, the One-Trigger so Completely Removes all these Handicaps that in every case it Means a Better and Surer Shot.

What You Think—When a Quick, Double Shot is Made with a Two-Trigger Gun, the Sportsman Probably thinks that he Moves only the Firing Finger of the Right Hand, while Instantaneous Photography Shows that the Entire Hand is Moved and that it is Unclasped and Regripped. This Delay is another Fruitful Source of Missing with the Second Barrel.

Lacerations—Sportsmen have had Experience in Padding the Rear Curve of the Trigger Guard [illegible] to Protect Front Finger [illegible] Two-Trigger Gun the Second Finger is Brought much Nearer the Guard than it should be, with the Result that the Recoil Jams the Guard into the Finger. Sometimes the Front Trigger is Wrapped, because when Pulling the Rear Trigger the Gun Recoils and Jams the Front Trigger into the Trigger Finger. The Result is that Flinching Becomes a Habit the Moment the Finger gets Sore. Neither Sore Fingers nor Flinching are Calculated to Improve the Sportsman's Shooting. The Hunter One-Trigger Renders these Conditions Impossible.

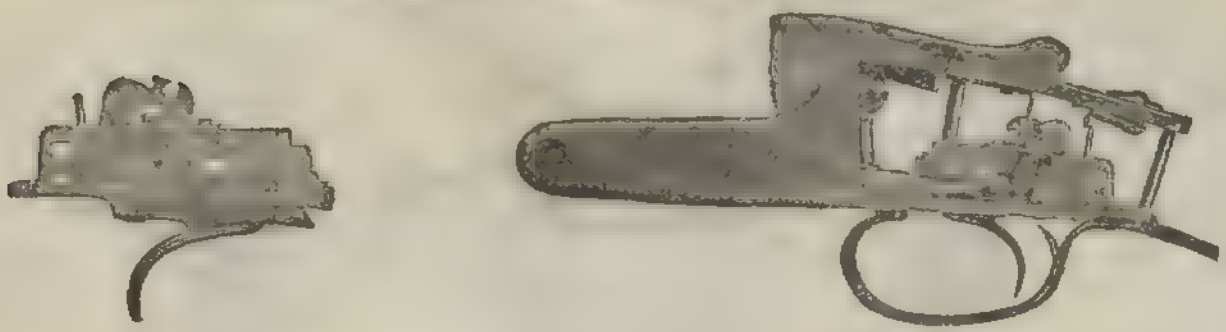
SINGLE TRIGGERS FOR DOUBLE BARREL SHOT GUNS



Cut shows Infallible Single Trigger applied to Parker Gun

INFALLIBLE

Description and Claims

1. The Infallible Single Trigger will fit and can be put in any regular Hammerless Double Gun, old or new, without marring the Gun.
2. It is the only Single Trigger that requires no perceptible release to fire the second shot. Just don't pull until ready to shoot. It is the quickest Trigger on earth.
3. It will double the efficiency of your Gun as the second shot is almost invariably a "Clean Kill." You do not lose your aim in reaching for the other Trigger, or in releasing as with a Double Trigger Gun.
4. It is the only Trigger that will fire both Barrels at one pull, it is fired making a flash impossible.
5. It will last as long as your Gun and the Factory will keep it in repair free. Transportation not included.
6. All Parts are Interchangeable and easily replaced.
7. The Mechanism for each side is independent, and your Gun is not entirely disabled by accident to one side. Same advantage as with the Double Trigger Gun.
8. The Indicator is on top of the Gun and you can fire either Barrel at will for Long or Short Shots.
9. Either Right or Left Barrel can be fired consecutively by a Pull of the Trigger for Each Barrel. This feature is most important, as it can be changed instantly with Fingers Still on Grip and Trigger, to suit the conditions of the Shoot.
10. It does not require taking away of the weight as it is in replacing a Double Trigger, as its location in the frame stiffens the Gun.
11. Double Triggers set in the long recoiling and slide of the Gun, caused by the recoil. Injury to the hand results in flinching which in turn is an obstacle to making a good score. **Not so with the Infallible Single Trigger.**
12. The Infallible Single Trigger affords more room within the Trigger Guard, so that in cold weather you can shoot as well with Gloves as with the naked Hand.

	Each
Infallible Single Trigger	**$30 00**
Infallible Single Trigger fitted to any make of Double Barrel Shot Gun	**35 00**

FOX-KAUTZKY

The latest notable attraction to Fox superior Features is acknowledged to be the Premier of Single Triggers. It stands the Fox Test. It is recommended and guaranteed by the A. H. Fox Gun Company; it exceedingly simple, mechanically perfect and operated by the locks of the Gun. There is no part that can wear or break. Your Locks being in Order, the Trigger will always operate Perfectly.

It Will Never Balk

And being absolutely independent of Recoil, no matter how fast you shoot the Single Trigger will not engage the Lugs of the Second Barrel unless you release it. In other words—

It Cannot Double

Just release the Trigger finger and you Engage the Trigger for the Second Shot. Then all is ready "to let her go!" There add to this advantage the Fact that with this Trigger there is

No Creep Possible

Guaranteed to be perfect in all parts demanded of a Single Trigger.
An examination of the working parts of the FOX-KAUTZKY Single Trigger. It has been successfully applied to FOX Guns for the last [illegible] years. It is a [illegible] device that gives the shooter the [illegible] possible to obtain. It is the FOX method of [illegible] the single trigger have been met by a mechanism so startling in its simplicity that one wonders upon examining it why it was not thought of and used long ago.

The recoil of a gun from a fired shot, after firing, sets the trigger against the firing finger. This is the cause of doubling. It is easy to see how the pressure of the finger also resists the recoil. By the use of a [illegible] in the FOX-KAUTZKY Single Trigger, as the finger presses it and firing gun, it is the only single trigger that corresponds is released by a positive mechanical trigger lock.

The value of the automatic safety is quite generally recognized by all manufacturers and users of fire arms. Yet the FOX-KAUTZKY is the only single trigger having the automatic safety on the market today. In these days of "Safety First" this appeals strongly to the experienced sportsman who knows the value of proper precautions.

It is absolutely selective by means of the simple safety convenient to the finger, which is provided with indications by the letters L and R which barrel is set to fire first. It will shoot right and left or left and right, as desired. When one barrel has been fired, it returns automatically to that barrel without action on from the shooter. Thus it will fire all right and left, as it is up to the trigger, when it is through the safety.

The single trigger fits easily in the space required by the ordinary two trigger mechanism, so that there is no extra cutting away or weakening of stock or frame.

	Each
Fox-Kautzky Single Trigger, Fitted to any **Fox Gun**	**$33.00**

NOTE—When ordering us to have Triggers fitted, be sure to mark name and address clearly and **prepay** Transportation Charges.

Acetylene Gas Headlights for Locomotives

We show herewith a few styles of acetylene gas headlights. Any oil headlight shown on preceding pages can be converted into acetylene burning headlights.

No. 545B

No. 545B

12½-inch. For traction or narrow gauge engines. Gas generator for above, shown on page 225.

For prices, see page 228.

No. 6B

Made in 14-inch size only. Gas generator for above shown on page 225.

For prices, see page 228.

No. 6B

Acetylene Gas Headlights for Locomotives

No. 584B

No 484B made in sizes 16, 18, 20 and 23-inch

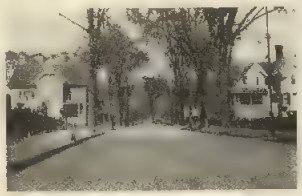
No. 583B same as above, except has side number frames

A low priced but substantial gas headlight for light road engines, or switching engines A suitable headlight for lumber or logging roads

We manufacture other styles of small gas headlights suitable for small locomotives, wrecking cars, cranes, dredges and other equipment desiring a strong and inexpensive lighting system.

Gas generator for above shown on page 225.

For prices, see page 228.



ROADWAY ECONOMY

SOLVAY Granulated Calcium Chloride keeps roads clean, dustless, durable and sanitary at a minimum expense.

SOLVAY
Granulated
Calcium Chloride

can be applied by ordinary road-laborers, and a few applications a season are sufficient to keep the road in perfect condition all the year round.

Solvay Granulated Calcium Chloride is a dry, stainless, colorless, odorless chemical salt — unquestionably the most economical and satisfactory dust preventive and road binder.

All interested in good roads are invited to write for the "Solvay Road Book", mailed free upon request.

SEMET-SOLVAY CO.
410 Milton Ave. :: Solvay, N. Y.

Adams Grader Building an Illinois Road

Maintains Better Streets At Less Cost

For grading and shaping-up gravel or macadam streets at a saving in time and money, use the Adams Grader or Grader-Scarifier. It leans its weight against the load, thereby moving *more* dirt with *less* power.
The

ADAMS
ADJUSTABLE
Leaning-Wheel
GRADER

is guaranteed in actual road building or maintenance, to move more dirt with less power (mold board scouring and without side draft on the power) than any other grader of same length blade.

The economy and efficiency of the ADAMS Adjustable Leaning-Wheel Grader can be PROVED by TEST on your own road, before a sale is made. Write for free illustrated catalog showing ADAMS Adjustable Leaning-Wheel Graders at work under various conditions. Ask for Catalog C.

The ADAMS Leaning-Wheel Grader leans against the load just as you'd do if you were pushing a wheel-barrow up a hill. Catalog C gives full information.

and so does the ADAMS grader

DIXON'S SILICA-GRAPHITE PAINT

Pigment Flake Silica-Graphite
Nature's own product, mined from the same bed. The silica is hard, the graphite is soft, each helps the other, both practically indestructible—an ideal pigment for protective purposes.
Vehicle-Boiled Linseed Oil
No paint vehicle has yet been found to equal linseed oil—the only improvement is to boil it.
Our Part
We blend the silica-graphite and best quality boiled linseed oil by long, careful and scientific grinding, into a harmonious, protective paint that for over 80 years has been making long time records for endurance and low cost.

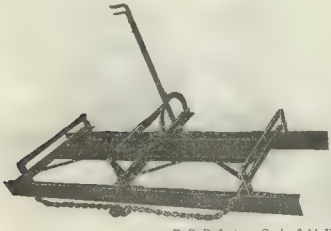
STEEL ROAD DRAGS.

A necessary tool for the maintenance of good earth and gravel roads. To keep a road in first-class condition, it should be gone over once or twice a year with a light grader and frequently with a drag, preferably after each rain. With the lever drag, roads can be successfully dragged when quite dry by pulling lever back and so inclining blades that they will cut in the earth much better than when perpendicular.

ILLINOIS.



F. O. B. factory, Springfield, Ill.

Each

***Illinois—2-blade, adjustable steel drag;** all steel except the platform; blades, 8 feet long, 6 inches high; made of open hearth steel, reinforced entire length by stiff, high carbon, steel angles; width of drag, 36 inches; weight, including chain, 320 lbs. **$28.00**

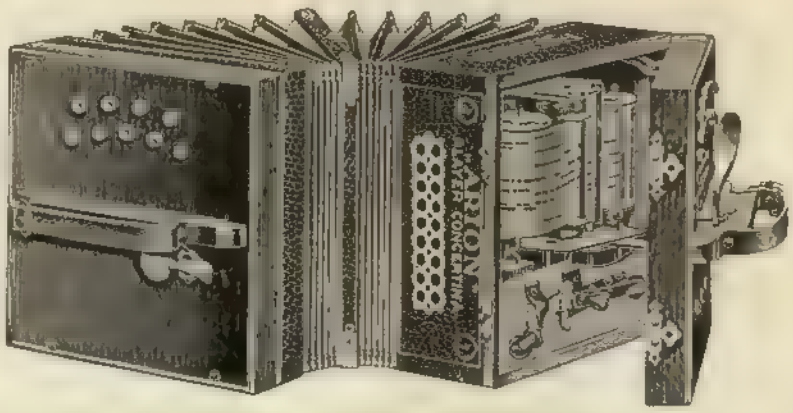
	Extra rolls, each	1 55
No. 2	9¼ inches square has 80 brass reeds including 3 rolls, price	$77 00
	Extra rolls, each	1.70
No. 5	9¼ inches square has 112 steel reeds including 3 rolls, price	$101.00
	Extra rolls, each	2.20



These Instruments are Beautifully Made and highly finished in imitation Rosewood. Large rich tone, extra strong bellows and a well made motor. Three rolls of music with each instrument gratis. Below we give the partial list of music rolls for these Concertinas.

No.	Title and Composer.
1001	King Charles-March—Unrath
1002	March of volunteers—Sousa.
1003	Waltz from the operette: "The waltz dream"—Lehar.
1004	Waltz from the operette: "The Earl of Luxemburg"—Lehar.
1005	The little Tonkin girl—Scotto u. Christine.
1006	Rhenish dance from the operette: "The dollar princess"—Fall.
1007	Cavalleria Rusticana, Intermezzo—Mascagni.
1008	Air from the opera: "Rigoletto"—Verdi.
1009	March of the regiment No. 107—Hauschild.
1010	March of the regiment No. 108.
1011	Waltz from the operette: "The divorced wife"—Fall.
1012	Roses from the South, waltz—Strauss
1013	Our Colors, March—Forster
1014	Tyrolienne march—I. F. Wagner.
1015	Tannhäuser march—Kretschmar.
1016	March from the opera "Carmen"—Bizet.
1017	Rhenish dance from the operette: "The merry countryman"—Fall.
1018	"Do you know the land" air from the opera "Mignon"—Thomas
1019	Waves of the Danube, waltz—Ivanovici.
1020	Choral Song
1021	"Bride Chorus" from the opera "Lohengrin"—Rich Wagner
1022	Miserere from Troubadour—Verdi
1023	The Skaters, waltz—Waldteufel
1024	Barcarole from Hoffman's tales—Offenbach
1025	Morning papers, waltz—Strauss.
1026	Vienna blood, waltz—Strauss
1027	Under the banner of victory, march—V Blon
1028	Over the waves, waltz—Rosas
1029	Polka from the operette: "The Earl of Luxemburg"—Lehar
1030	Tales from the Vienna Wood, waltz—Strauss
1031	Wine waltz—S Gross
1032	March from the opera: "Tannhauser"—Rich Wagner
1033	Love me and the world is mine—Ernst R Ball

1035	Air from the opera: "The Master singers"—Rich. Wagner
1036	Soldiers' Chorus from "Faust"—Gounod
1037	Kiss Rensh dance from the operette: "The Autumn manuever"—E Kalman
1038	Waltz from the operette: "The merry widow"—Lehar
1039	The cherries in the neighbour s garden—Hollander.
1040	Waltz from the operette: "The flitter-mouse"—Strauss.
1041	Comedy overture—Keler Bela
1042	Let us enjoy the life, march—M Simon
1043	The Honeymoon, march—G. Rosey
1044	The American Patrol, march—A. S Kreymborg
1045	Wine, Woman and Song, waltz—Straub
1046	"To our home" Air from Troubadour—Verdi.
1047	Air from "Martha"—Flotow.
1048	La Gran Via, Spanish waltz—Chuesa y Valverde.
1049	Bavarian dance
1050	Hungarish Czardas
1051	Christmas Songs
1052	Prayer from "Tell"—Rossini
1053	Tyrolienne from "Tell"—Rossini
1054	Spring my girl—John Flinn.
1055	Song from the operette: "The Gipsy baron"—Strauss.
1056	"German flag" song—Rich Thiele
1057	Hymno Do Minho—Maria da Fonte
1058	A Portuguesa—A. Keil.
1059	Parade of the tin-soldiers—Leon Jessel
1060	In the stork-nest, waltz—A. Behling.
1061	At the Borporus—Paul Lincke
1062	German song
1063	"Who is responsible," waltz of Polish house keeping—Jan Gilbert.
1064	Country-music, waltz of Polish house keeping—Jan Gilbert.
1065	El Torero—Lopez
1066	When the father with his son, march from "The virtuous Susanna"—Oscar Fetras.
1067	Bavarian dance
1068	When they [illegible] the small feets, waltz from "The virtuous Susanna"—Oscar Fetras.
1069	Troika, Russian waltz
1070	Love dance from "Madame Sherry"—Intermezzo—Karl Hoschna.
1071	Bohemian dance—Jan Schuster.
1072	Bohemian dance—Jan Schuster.
1073	Jota La Manchegutta.
1074	Bohemian national hymn.
1075	Iota Aragonesa—Arista
1076	La alegria del batallon Americana Al mismito Rey del Moro—Lorenzo Ruiz
1077	Robert the Devil, Cavatine—G. Meyerbeer.
1078	Norma, "Sec o Norma"—G Meyerbeer
1079	La Traviata, drink air—G Verdi
1080	La Traviata, waltz—G. Verdi
1081	Aida, triumph march—G. Verdi
1082	Norma, chorus—G. Meyerbeer
1083	Waltz from the beloved Auguetin—Leo Fall.
1084	Girls like that so much, from "auto love"—Gilbert
1085	Troubadour, air—G. Verdi
1086	Troubadour Cavatine—G Verdi
1087	Rastelbinder, waltz—Lehar.
1088	Robert the Devil, Sicilienne—G. Meyerbeer
1089	Molinos de Viento, Schotis de los Zuecos—Mtre. Luna
1090	El Principe Casto, Schotis de los Perfumadores—Matre Valverde.
1091	El Vito, Pasodoble Torero—Mtre. S. Lope.
1092	Ven y Ven y Ven, Habanera Mexicana-Espanola—Meller y Paquita.
1093	The Belle of the Barber's Hall—Geo. M. Cohan.
1094	My lady can you dance round to the left, from "auto love"—Gilbert
1095	Child, I am sleeping so badly, waltz from "Flimmagie"—W. Kollo
1096	Pauline is going to dance, waltz from "High rosins"—W. Kollo
1097	Little dear, you are my pupil, from "Little dear"—Gilbert
1098	Let us go to Hagenbeck, from "Little dear"—Gilbert.
1099	Aisha, two step—John Lindsay.
1100	If love is dying—Octave Cremieux.

New Music Issued from Time to Time

American Dead Weight Gauge Tester

Standard Type

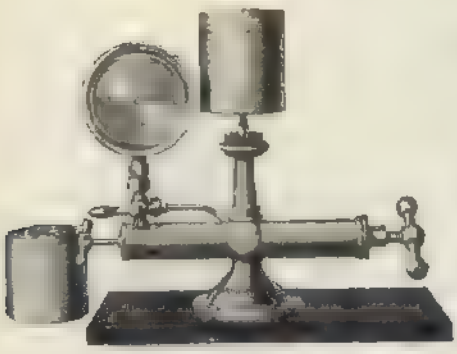

Fig 944

To a person accustomed to testing steam gauges with the apparatus generally used for that purpose, the great advantages of the American Dead Weight Gauge Tester are readily apparent

Weights are used in various units from 5 to 20 pounds, and it is a simple matter to accurately compare the reading of the gauge at all points on the dial without the trouble usually experienced with the old-fashioned testing apparatus, where in a great many cases it is impossible to hold the pressure on the gauges long enough to compare them

The American Dead Weight Tester is as accurate as a mercury column, occupies a great deal less space, and the cost is but slight when compared to that of the mercury column

It is the one and only instrument by which gauges can be tested accurately without the use of the mercury column

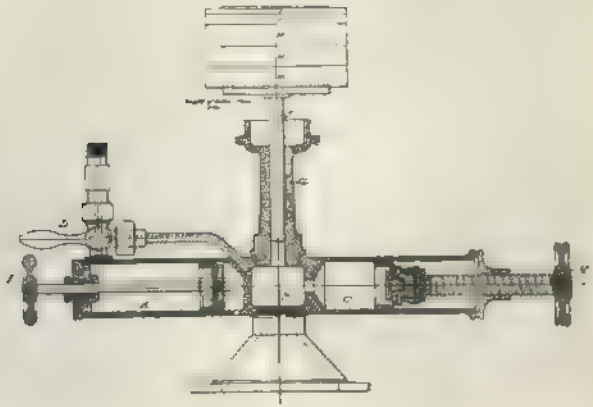

Fig 945

Mechanical Description

This pump consists [illegible] Cylinder G and Piston I of a known area operated by weights and multiplying [illegible] the area of the piston

Cylinder G has a screw plunger for [illegible] the [illegible] gauge and pump cylinder through three way cock H. The object [illegible] that the pump may be used for testing the accuracy of gauges without removing them after testing

The improved design of this tester especially adapts it for testing all types of pressure gauges [illegible] railroad shops [illegible] and [illegible] or may be set up anywhere as [illegible] of gauges are [illegible]

The auxiliary chamber is operated by a plunger which is independent of the main pump cylinder and is so connected [illegible] three way cock. By operating this plunger the gauge spring and connection to gauge may be filled before connecting the gauge and may be drained after the test is completed, in this manner preventing any spilling of oil

American Trainagraph

Patented

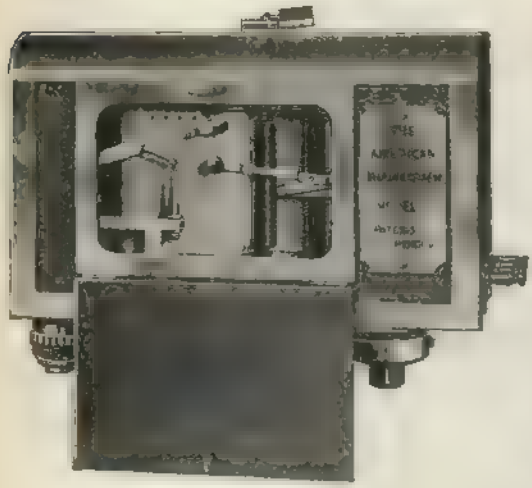

Fig 946

The American Trainagraph is a graphic recording instrument showing accurately and in detail every application of air brakes, both service and emergency, train line pressure, brake cylinder pressure mileage, time and speed at all times

The Trainagraph is made in three types: A—Showing train line pressure; B—showing train line pressure, mileage, time and speed C—showing train line pressure, mileage, speed and car brake cylinder pressure

It shows the exact reduction made with each movement of the operator's hand; it is a complete story of what the operator did and its exact effect on the entire train line showing as follows

It shows. Train line pressure always; the reduction in pressure on each application, how much time is required to recharge the train line whether there is leakage in train line or brake cylinder whether pump governor is properly adjusted or not

We will confine our description to the following facsimile of a section of a diagram taken by a Model C, as this contains all the records made by the various types

The instrument is operated and controlled by a powerful seven-day clock movement of the best-known make

The record chart is divided vertically into minutes and hours, and horizontally into ten-pound units or brake cylinder pressure and five pound units for train line pressure

The mileage record is made in tenths and is recorded by opposite indentations at each mile. These records are made in relation to the time line shown, hence the speed is instantly evident at any point on the record

Records begin when train starts and continue until it has reached its destination, whether that be at a head station or at the end of a day's run, it being necessary to rewind every twenty four hours. When the train has reached its destination and stopped the chart is renewed and the instrument is again ready for instant service

The Trainagraph may be applied to any car in a train or to the locomotive itself if so desired its application is very simple and quickly accomplished and its operation is not only automatic but beyond the power of human hand to change or tamper with

The train line and brake cylinder pressures are operated by direct air pressure and the speed indicator by electrical power. Records are not affected by variations and are absolutely steady, excepting under conditions as changed by the slightest amount of condensation in the brakes

The mileage record shows the retarding effect of every brake application

The brake cylinder record shows the exact results and value of every reduction in pressure on train line

The train line record shows every application made by the engineer, whether in test service or emergency

The American Trainagraph is guaranteed to accurately perform the services hereinbefore mentioned and is sold upon the understanding that it may be returned for refund, if, after being properly installed, it fails to perform as specified

Complete descriptive circular will be mailed on request

All records show time in minutes and hours

We will confine our description to the following facsimile of a section of a diagram taken by a Model C as this contains all the records made by the various types

The instrument is operated and controlled by a powerful seven day clock movement of the best known make

The record chart is divided vertically into minutes and hours, and horizontally into ten-pound units for brake cylinder pressure and five pound units for train line pressure

American LaFrance Motor Fire Apparatus at Camp Dix Wrightstown N J

THE NATION'S EFFICIENCY IN THE PRESENT CRISIS

The nation's efficiency in the present crisis depends upon the ability of its industries to produce war materials and supplies, and to continue to do so without interruption.

The burden of protecting the industries of the country against delays and stoppage of production by fires rests upon the Fire Departments. Fire Departments efficiency depends largely upon the reliability and quality of its Fire Fighting Apparatus. *The Best is None too Good.*

Up to this date this company has furnished the United States Government with the following motor fire apparatus:

18 Pumping Cars
38 Chemical Engines
6 Combination Cars
1 Service Truck

—as well as some 200 hand-drawn chemical engines and several thousand hand extinguishers.

AMERICAN-LAFRANCE FIRE ENGINE COMPANY, INC.

The American Trackbarrow

Fig. 251

There is no surer, easier, less expensive way to accomplish results than by the use of the

American Trackbarrow

If you chose to use this simple little trackbarrow you will be pleased with its magic results in economy, speeding work and safety.

Its great merit is that the man who runs it can walk beside the rail as the wheel is set at that angle. The wheel is of rolled steel, flanges fit any rail. Its frame is of hardwood, steel braced throughout. Gauge of tray, No. 10, top 28 inches long, 31 inches wide.

The Carbarrow

All steel; weight, 100 pounds; tray, 30 inches long, 28 inches deep, 9-inch bottom, 15 inches square, [illegible] steels.

Man walks best between rails.
Inside or outside of the rail.
Dumps load inside or outside rail.
The rail carries all the load.

Fig. 252

For greater efficiency and your personal work by using the carbarrow. It eliminates waste of valuable energy and carries your freight to and fro. Always ready.

The carbarrow is extra strong. The tray is solid No. 14 steel welded seams, water tight; sets near rail, making center of gravity low. The wheel is set in, keeping the car in track, have pressed steel tires 11 inches in diameter and have [illegible] inches face. The [illegible] bars run under the whole bottom. The handles are right at a slight angle.

Wheelbarrows

Patented Coal Barrows

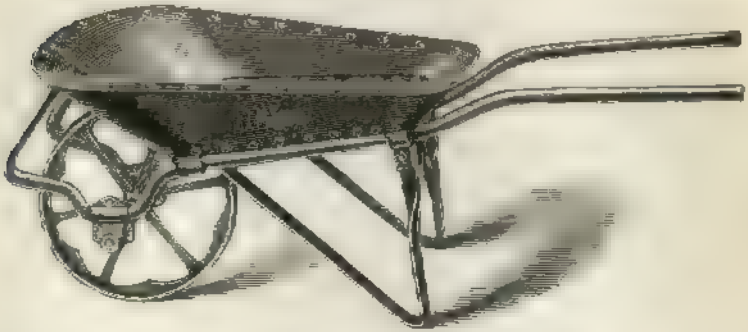

Fig. 249

No. 4. Greatest width of tray, 28 inches, greatest length of tray, 32 inches, capacity, 150 pounds of coal, 16-inch wheel, tray of Nos. 16 and 12 steel, each $12 25

No. 5. Greatest width of tray, 34½ inches, greatest length of tray, 36 inches, capacity, 200 pounds of coal, 16-inch wheel, tray of Nos. 16 and 12 steel, each $14 25

No. 6. Greatest width of tray, 32 inches, greatest length of tray, 38 inches; capacity, 225 pounds of coal, 16-inch wheel, tray of Nos. 14 and 12 steel, each $15 00

No. 7. Greatest width of tray, 36 inches; greatest length of tray, 39 inches; capacity, 300 pounds of coal, 16-inch wheel, tray of Nos. 16 and 12 steel, each $18 00

No. 8. Greatest width of tray, 40 inches, greatest length of tray, 45 inches; capacity, 450 pounds of coal, 16-inch wheel, tray of Nos. 16 and 12 steel, each $20 00

With Two Wheels

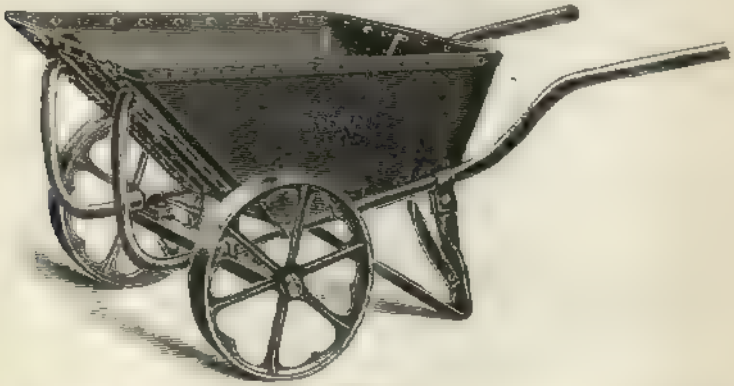

Fig. 250

No. 11½. Capacity, 340 pounds, each 30 00
No. 12½. Capacity, 400 pounds, each 32 00
No. 13½. Capacity, 480 pounds, each 34 00
No. 15½. Capacity, 800 pounds, each 36 00

Angle Bending Tool

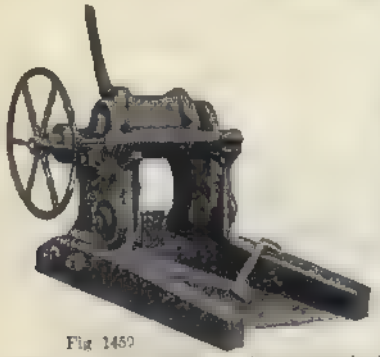

Fig 1459

Size No. 3 (For Railroad Shops, Etc.)

This machine will bend iron of any thickness up to 1½ inch, and of any width up to 12 inches. Light iron is worked cold, while heavy iron must be heated. By means of a die (one of which is supplied with each machine) for making the proper angle, a variety of shapes and forms can be produced.

The iron is put into the machine and clamped fast by operating a hand-wheel which is on the side of the machine and then by pulling down the lever the piece is bent to the shape required. This machine is regularly fitted with a die for bending up to a right angle, but will be supplied with the machine, without extra cost, a die that will bend to an angle of 45 degrees, and this covers a wide range of work.

The machine is operated by hand and one man operates it, except in the case of very heavy work, when two men are required. It is so simple that any man can readily learn to operate it to advantage.

Dimensions, etc. The machine is compactly constructed and requires very little floor space. Width over all 25 inches, weight, 23 pounds, length (not including hand-wheel, 21 inches. Length of table to which machine is attached, 4 feet 3 inches.

Gross weight, 950 pounds net weight, 800 pounds

Price, including one style of forming die ..... each $150 00

Separate dies for forming special shapes furnished at an extra price.
Discount upon application

Pipe Bending Machine

It will bend an infinite variety of shapes without leaving any mark or disfigurement on the work.

The quadrants furnished with the machine are for 1-inch pipe, with a radius of 6 inches; 1½-inch pipe, with a radius of 9 inches; 1½-inch pipe, with a radius of 12 inches, and 2-inch pipe, with a radius of 14 inches. While these four sizes are furnished with the machine, the fact that the smaller sizes of pipe can be bent in the larger quadrants makes changing the quadrants unnecessary, unless a shorter radius than the larger quadrant will give is desired.

Fig 1460

Portable Hydraulic Press No. 3

Showing Pump

For pressing on or off cranks, crank pins, tires, wheels, couplings, etc.

The cylinder is made of cast steel, with a cast iron ram, oil or water tank, bronze pump with hydraulic gauge and hand lever, and a rack and pinion with lever for drawing back the ram, all self-contained and ready for use without making any pipe connections. It is built in a very strong and durable manner, with good factor of safety.

It is designed to be lifted and carried about the shop by means of a crane.

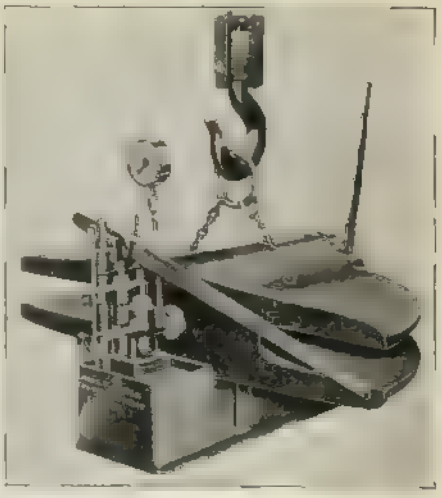

Fig. 1461

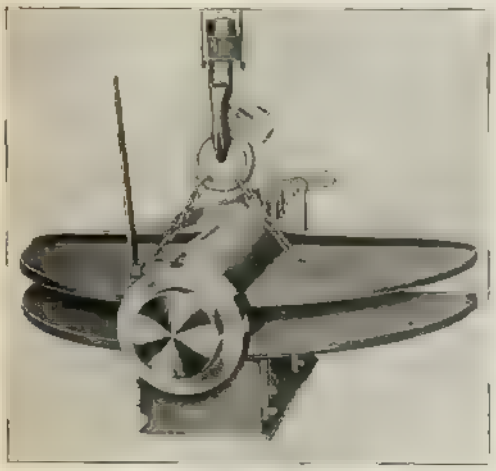

Fig. 1462

Portable Hydraulic Press No. 3

Showing Ram

We will furnish a print showing beams and side bars, if you wish to make them.

We can build any size and pressure to design desired. One of 250 tons capacity is the most commonly used.

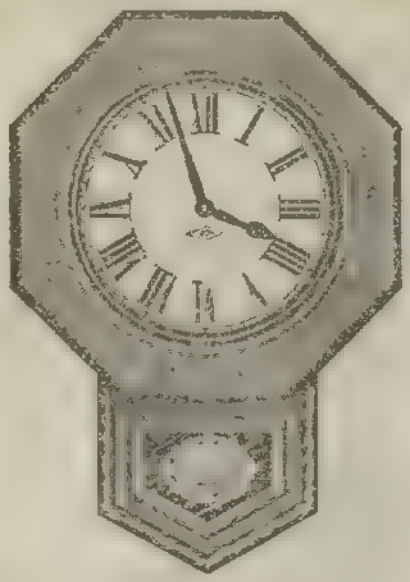
REGULATOR C

8 Day Time; 12 inch Dial; Plain Round Polished Veneer Case; Glass Doors; Roman Numerals; Ht. 32 inches.

	Each
No. RCO—Golden Oak	$14 00
No. RCR—Rosewood	14 00

Three in a Case; Weight 90 lbs.
(Made by Ansonia Clock Co.)

OFFICE CLOCKS



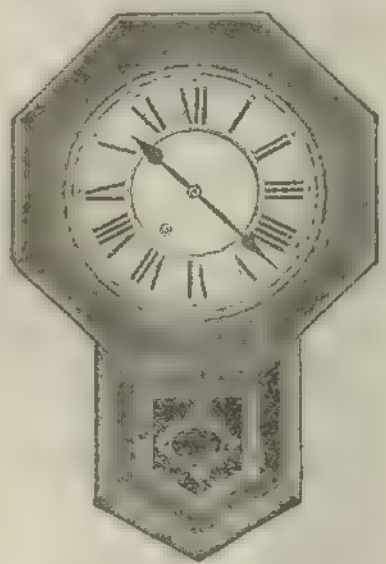
★NORLEIGH DIAMOND OCTAGON DROP

A Perfect Time Piece for Railroad Stations, Offices, Stores, Factories, Government Buildings, Schools, Hotels and General Hardware.

	Each
No. ND250—8 Day Time; 12 inch Dial, Polished Golden Oak Glass Doors, Roman Numerals; Height 17 inches	$11 00

Pendulum Perfectly Oak must be Hung Before Run. Should it Run too fast, Lengthen the Pendulum Rod, Shorten the Rod. Occupies Case, Weighs 20 lbs.

Made for and Guaranteed by Shapleigh Hardware Co.



OCTAGON DROP

8 Day Time; 12 inch Dial; Polished Veneer Case, Glass Doors; Roman Numerals; Height 24 inches

	Each
No. ODO12 Golden Oak	$13 00
No. ODR12 Rosewood	13 00

Six in a Case; Case Weighs 105 lbs.
(Made by Ansonia Clock Co.)

OFFICE CLOCKS

CABLE LEVER

8 Day Time; Round Cable Oak Case, Golden Finish, Glass Door; Roman Numerals; Second Hand

	Each
No. 68C—6 inch Dial	$8.50

One in a Cardboard Box; Twelve in a Case; Case Weighs 62 lbs.

(Made by Ansonia Clock Co.)

GRESHAM PENDULUM

8 Day Time; Round Oak Polished Veneer Case, Golden Finish; Glass Door; Roman Numerals; Without Second Hand.

	Each
No. G12—12 inch Dial	$12.00

One in a Box; Six in a Case; Case Weighs 84 lbs.

(Made by Ansonia Clock Co.)

PINEAPPLE SNIPS

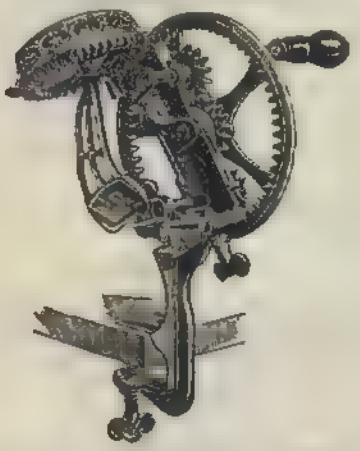
Works like a pair of shears, has spoon on one side, knife on the other. Can also be used for coring apples, shredding pineapples and potatoes, taking eyes from potatoes and the stem end from tomatoes

Pineapple Eye Snips.....Per dozen $4.00
One Dozen in a Box

APPLE PARERS

Cast iron frame and gear, tempered blue finished steel adjustable knife, coppered steel wire coil spring on knife arm, rust-proof, lacquered finish **Reading**

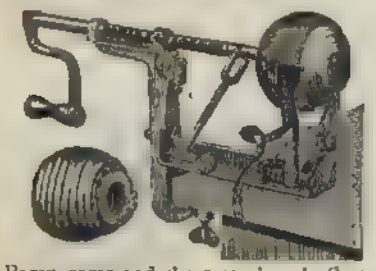
No. 72—Without push-off....Per dozen $10.50
One Dozen in a Case



Cast iron frame and gear, tempered blue finished steel adjustable knife, coppered steel wire coil spring on knife arm, finished in rust proof blue lacquer

Reading

No. 78—With automatic push-off.
Per dozen $15.00
One Dozen in a Box

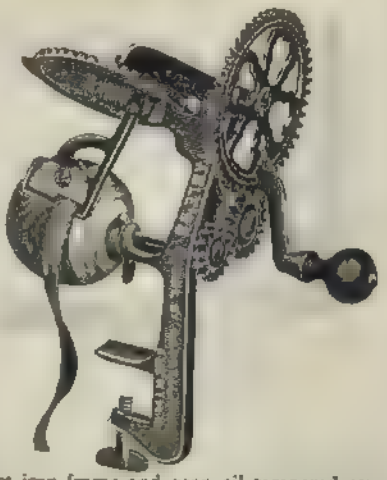


Parer, corer and slicer combined. Cast iron frame with automatic push-off, tempered blue finish steel adjustable knives, brass coil spring on knife arm and feed lever. Finished throughout with rust-proof blue lacquer.

White Mountain

No. 99.....Per dozen $9.50
One Dozen in a Case

APPLE PARERS



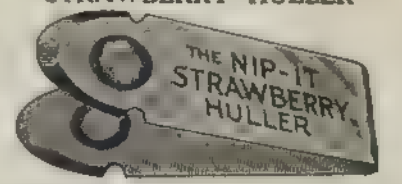
Cast iron frame and gear, oil tempered crucible steel adjustable blade, coppered steel wire coil spring on knife arm, finished in dark rust-proof lacquer.

No. 98—With automatic push-off.
Per dozen $15.00
One Dozen in a Case

APPLE CORERS

No. 1—IC tin plate, plain, seamed and soldered, size 3⅝ x 6 in
Per dozen $1.00
One Dozen in a Package

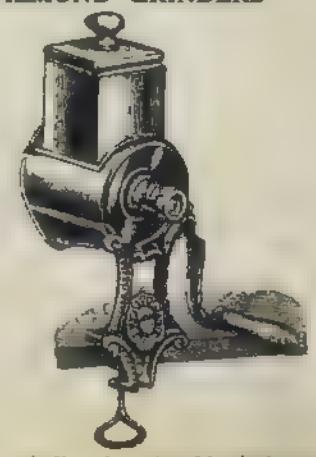
STRAWBERRY HULLER



Made of steel, nickel plated. Removes hull and keeps berries whole for table use, avoids stained fingers.

Nip-It—Strawberry Huller...Per dozen $0.75
One Dozen on a Display Card

ALMOND GRINDERS



Used for grinding almonds. May be fastened to table.

No. 3197—Height 13 in., diameter 3⅝ in.
Per dozen $18.00
Twelfth Dozen in a Case

COFFEE MILLS

Cast iron, nickel plated hoppers, finished in blue and buff and handsomely decorated. Hardened cast grinders, ball bearing with thumb screw adjustment on side of wheel. Easily opened for cleaning.

Nos.	Capacity of Hopper	Capacity per Minute	Height Over all Inches	Each
20½	7 oz	6 oz	15	$ 7.50
40	1 lb	½ lb	20½	12.00

One in a Case

Cast iron finished in blue and buff and handsomely decorated. Hardened cast grinders, ball bearing with thumb screw adjustment on side of wheel.

Nos.	Capacity of Hopper	Capacity per Minute	Height Over all Inches	Each
20	4 oz	6 oz	12½	$5.50
30	½ lb	½ lb	15	8.25

One in a Case

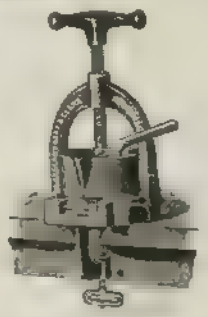
Cast iron, ball bearing, with slide cover and drawer, hardwood base. Height over all 12½ in., width 5 in

No. 11—Capacity of hopper, 4 oz..Each $3.50
Three in a Case

MEAT JUICE PRESSES

Cast iron japanned base, arch and T handled, deep threaded screw rod. Removable cast iron tinned cup, with lip and convex ribbed bottom

No. 1—Capacity ¼ pint . . . . . Each, $1.00
No. 2—Capacity ½ pint . . . . . Each, 1.50



Cast iron japanned base, arch and T handled, deep threaded screw rod. Removable cast iron tinned cup, with lip and convex ribbed bottom

No. 20—Capacity ½ pint, with table clamp . . . . . Each, $2.00
No. 30—Capacity 1 pint, with table clamp . . . . . Each 3.50

One in a Box

FRUIT AND VEGETABLE PRESSES

Japanned malleable iron handles, retinned stem, removable cup made of heavy tin plate. Besides being a fruit press, it serves equally well as a potato masher.

Silver's

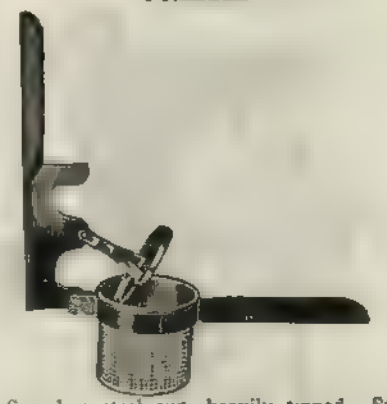
No. 4. . . . . Per dozen $6.50

Made of good material, cup is of IC tin plate

Silver's Pattern

No. 40 . . . . . Per dozen $5.50
Extra cups, ... Per dozen 2.50

FRUIT AND VEGETABLE PRESSES



Seamless steel cup, heavily tinned. Steel handles

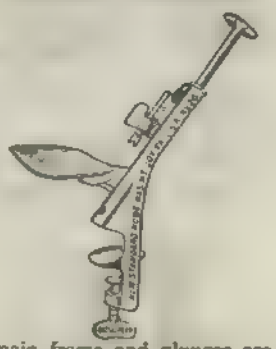
Universal

No. 1 . . . . . Per dozen $6.00
One Dozen in a Case

Double seamed cup, stamped steel handles 10 inches long, securely riveted to body. Perforated, 10 mesh both front and back. All parts nicely tinned.

No. 25—Regular size. . . . . Per dozen $3.50
Three Dozen in a Carton.

CHERRY STONERS



The main frame and plunger are of one piece construction. The spring is extra long, made of special wire guaranteed not to rust. Suitable for any size of cherries. All parts heavily tinned.

No. 30. . . . . Per dozen $10.00
One Dozen in a Box

Quick acting and efficient. Removes the stones and leaves the cherries the same as if opened by hand. Adjustable to any size cherry. Has clamp for attaching to table. Japanned finish

No. 20. . . . . Per dozen $8.25
Twelfth Dozen in a Carton
Twelve Cartons in a Case

CHERRY STONERS

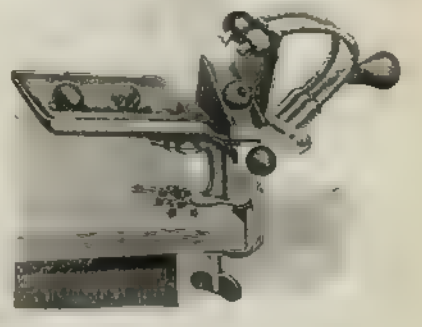
A very rapid stoner, may be quickly adjusted for any size cherries, rust proof, easily cleaned

No. 1—Japanned finish . Per dozen $16.00

No. 2—Tinned. . . . . Per dozen 17.00
Two Dozen in a Case

One piece steel plunger no springs The plunger is positively operated (both forward and returning movement) by a crank mechanism. Has extra large roomy hopper. The extended shute separates the pits from the seeded fruit, allowing ample room for receptacles.

No. 50—Tinned. . . . . Per dozen $19.00
One Dozen in a Box



Stones two cherries at each stroke without waste. Pits and fruit discharge separately.

Family

No. 2—Lacquered, height 5½ in.
Per dozen $6.00
One Dozen in a Box

Consists of two parts only, easy to operate, takes out stem and seed at same time, does not soil the hands, cherries are left in their round natural shape.

No. 10. . . . . Per dozen $1.75
One Dozen in a Box

Carbon-Proof Plug

The Champion Ignition Co., Flint, Mich., makes the AC Carbon-Proof Plug for Ford, Overland and Studebaker cars. It is claimed that this plug does not short circuit from soot or oil. The saw-tooth edges get hot

AC Carbon-Proof Plug

quickly and burn the soot or oil, thereby breaking the circuit and allowing full spark, so cleaning is not necessary.

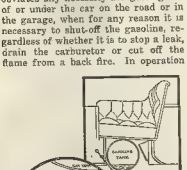
These plugs are said to be gas-tight, giving full power to the motor, quicker pick-up, can drive on fully advanced spark without motor knocking, causing the motor to speed up and allowing one to slightly retard gas throttle, with the result, a saving in gas. They retail at $1.

Dealers who order 500 plugs are offered a "silent salesman" in the shape of a showcase, the back of oak, with front and two sides glass. It is 39 in. high, 20½ in. wide and 20¼ in. deep.

Dealer's Showcase

Gasoline Shut-Off for Fords

The Sunderman Gasoline Shut-Off for Ford cars, patent applied for, is made by the Sunderman Corp., 9-11 Chambers Street, Newburgh, N. Y., and so designed that all that is necessary to cut off or restore the gas line is to pull or push the lever. To install this device it is only necessary to bore a hole in the floor board of the car, lift it, slip the shut-off over the handle of the gasoline pet cock, tighten the setscrew, attach the shut off handle to the shut-off with a cotter pin and slip it through the floor board. This obviates any necessity for getting out of or under the car on the road or in the garage, when for any reason it is necessary to shut-off the gasoline, regardless of whether it is to stop a leak, drain the carburetor or cut off the flame from a back fire. In operation



Sunderman Gasoline Shut-off for Ford cars

a pull of the handle shuts off and a push in the opposite direction starts the flow again of gasoline. It retails for 50 cents.

Molded Tubes

The Palmer Tire & Rubber Co., St. Joseph, Mo., has recently placed on the market a molded gum tube. They claim their tube is superior to the gum tube made on a straight mandrel. They have eliminated possible trouble at the splice and valve stem by curing the tube in a mold the same shape as the inside of the casing, thus making a splice in the same operation as curing or vulcanizing the tube. They also place the valve stem in the tube before curing, making a perfect valve seat. The molded tube when inflated in a casing is in its natural position or shape, and is not required to stretch more than a fraction of an inch because it is made almost the size of the inside of the casing.

The Palmer tube is made in two kinds of stock, a red and a gray. The

Reading matter continues on page 90

red stock on the inside serves for an air bag and the gray stock on the outside, which possesses wearing quality, also does its part as an air bag.

Tri-Co. Universal Rain Rubber

The Tri-Continental Corp., Sidway Building, Buffalo, N. Y., has improved its Tri-Co. Rain Rubber since first put on the market about a year ago. As now made, in different models, it is designed to fit every type of two-piece windshield. It slides with ease across

Tri-Co Universal Umbrella for Windshields

between the upper and lower glass, and is held firmly by spring pressure, which enables it to clear the whole shield the entire way across. A separate view of the Tri-Co. Universal Rain Rubber for windshields is shown distinct from its application to the shield.

Lectroflater

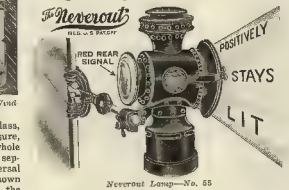
The Black & Decker Manufacturing Company, 107 South Street, Baltimore, Md., manufactures the Carriage Lectroflater. This portable device enables the air to be taken direct to the tire that needs inflation without moving car or tire. It will carry jack or wrench and saves much time and labor. It merely needs to be attached to the nearest electric light socket and in a very short time, it is claimed, the tire will be pumped from flat to full pressure, at a cost of about

Carriage Lectroflater

1/10c. for current. It has a standard tire chuck attached to 25 ft. of high pressure hose. The grease lubrication is automatically supplied by its capillary system. The movable carriage has a steel flange for holding tools on tray. The wheels have solid rubber tires. The plug will fit any standard socket and the motor will operate on either direct or alternating current. Prices range from $65 up.

Auto Standing Light

An auto standing light for attaching to windshield, or to dash on carriages, is made by the Rose Manufacturing Co., Philadelphia, Pa. The Neverout Lamp, No. 55, is made of drawn brass of heavy gage. It burns kerosene, but is entirely free from grease, it is asserted, because of the insulated kerosene reservoir. It can be taken apart and cleaned instantly. It has a bright, clear lens in front and large red semaphore in rear; red



Neverout Lamp—No. 55

and green side lights. Height 6¼ in. Diameter of front lens, 2½ in. Diameter of rear semaphore, 2 in. Furnished nickel plated or black enamel finish. The braket in illustration is packed with each lamp and can be used on right or left hand side of windshield or on bows of top.

Catalogs and Publications

The Paxton & Gallagher Co., wholesale hardware, Tenth Street Viaduct, Omaha, Neb., have issued what they believe to be the most complete automobile supply catalog published in the United States. Motorcycle and bicycle supplies are also listed. There is much information in the book for accessory dealers.

Counter Display

The Raybestos Co., Bridgeport, Conn., is offering a new dealer help

Raybestos counter display

to the trade. It consists of a large colored cardboard base for displaying the product on the counter. One of these cutouts is packed in each carton of 20 boxes of genuine Raybestos without wire for Ford cars, but any dealer who has purchased a quantity of the product can obtain one free on request.

Magnetic Rectifier

Most light and power current is alternating, that is, it reverses direction about sixty times a second and cannot be used to charge batteries. It is the purpose of the new F-F Rectifier, made by the France Mfg Co., Cleveland, Ohio, to change alternating current to direct charging current as it flows into the battery. This is done by a new, patented principle.

In the full wave type the line voltage is reduced to the proper charging voltage by a special transformer, and both the positive and negative halves of the alternating currents wave are rectified into a steady, unidirectional charging current, which makes the cost of charging so low that the rectifier quickly pays for itself, it is asserted.

The F-F makes every lamp socket a charging station and it takes only a minute to screw the plug on the end of wire into a lamp socket and connect the other two wires to the bat-

Rectifier as attached

tery—and the battery will be charged in a few hours, without it being necessary, in the case of an automobile, to remove it from the car—and at no more expense than for burning a 100 watt lamp for the same length of time. It is claimed a complete charge for the average starting and lighting battery costs about 6 cents, which is at the rate of ½ cent an hour.

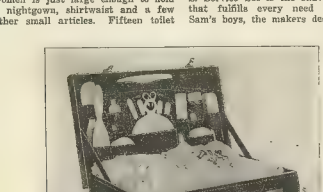
There is no wiring to be installed, nor is any technical skill required to operate the F-F Rectifier. Simply connect the Rectifier by the plug attachment and it will charge your batteries, automatically adjusting the rate of charge.

There are four portable types, ranging in price from $24 to $44.

Overnight Bag

For the business woman or, in fact, any woman who travels there is no gift more acceptable or better appreciated than the "overnight bag." It was designed particularly for use on business trips entailing an overnight stay and for week-end visits.

This handsome, convenient and compact traveling accessory for women is just large enough to hold a nightgown, shirtwaist and a few other small articles. Fifteen toilet necessities made of ivory pyralin are fitted inside the cover. The case is made of high grade fabrikoid, a pyroxylin coated leather substitute of great durability. This material is quite as beautiful as leather; is water, dirt, grease and stain-proof and can be kept immaculate with soap and water.



Overnight bag

The case is lined with either fabrikoid or cloth of a harmonizing color It is made by the E I. du Pont de Nemours Co., Wilmington, Del.

Keep Your License Dry

If you are a hunter or fisherman you know the problem of carrying your license, which is usually a mere "scrap of paper." When carried in the clothing, it is often hard to find when wanted. It gets wet, soiled, torn and wrinkled and the printing or writing soon becomes illegible. Here is a convenient, inexpensive holder which attaches to the belt and can be made by anyone in a few minutes. The holder is made of fabrikoid, which is an absolutely water and dirt proof material.

Get a piece of fabrikoid about 8 in. long by 3 in. wide; double it in the center and sew up the edges to form the pocket. Across the top of the pocket sew on two or three common snap fasteners for closing the pocket. Above the snaps cut a horizontal slit for a pocket opening and protect it with a flap, to keep out the rain and dirt. Two vertical slots in the upper half of the material permit the belt to pass through.

The holder lies flat against the person, is easy to get into and keeps the license dry and clean. It also serves as an ideal carrying place for matches.

Service Shaving Sets

United States war service regulations require a shaving outfit, and the soldier and sailor must provide his own razor. The new Gillette U. S. Service Set is the shaving outfit that fulfills every need of Uncle Sam's boys, the makers declare.

It is constructed with a metal case —built to withstand the roughest handling. An indestructible mirror fits snugly in the lid of the case. Thumb tacks for securing the mirror for use regardless of surroundings are included. Size complete, 4 in. long, 1⅞ in. wide, ⅝ in. thick. Slips

U. S. service set

into the breast pocket of the coat or shirt, takes up no room in the soldier's kit or the sailor's ditty box. Regular Gillette blades used with this set. Retail price, $5.

In roll case of U. S. Regulation khaki is a compact Gillette set to slip into the soldier's pocket or pack. Gillette Safety Razor and metal blade box containing 12 double-edged Gillette blades. Indestructible Trench mirror inside pocket. Razor and blade box nickel-plated. Size of set com-

Khaki set

No. 18—Military set

plete—4¼ in. long, 2 in. wide, ⅝ in. thick. Weighs next to nothing and takes no room. Retail price, $5

For Uncle Sam's officers, there is a Gillette Combination Set, in case of U. S. Regulation Khaki—nickel-plated Bulldog Razor, indestructible trench mirror fitted in pocket in lid; shaving brush and stick Gillette shaving soap in nickel-plated holders; nickel-plated blade boxes, 12 double-edged Gillette blades. Retail price, $7.

Publications

The Columbian Crew, successor to "Salesmanship of the Columbian Crew," appeared for July in a new size and with a cover in colors. It measures 7⅞ x 5¼ in. and is attractively printed and illustrated. It is issued by the Columbian Rope Co., Auburn, N. Y., which offers cash for suitable photographs

DAZEY PRINCIPLE

Sanitary—Because Nothing to Absorb the Cream and become Rancid as with Wooden Churns. Can be Sunned Without Warping and Without Handling Entire Churn. Just lift the Receptacle out.

Cleaning—Is as Easily Accomplished as Cleaning an Ordinary Tin Pail, Because there are No Cracks or Complicated Gearings Inside. Not a Single Bearing Inside of Receptacle.

Temperature—Correct for Churning is Quickly Obtained by Placing the Receptacle or the Whole Churn in Hot or Cold Water.

Time—The Powerful Dasher Aided by the Square Corners of Receptacle, Produces a Scientific Agitation, Making it Possible to Churn in from 2 to 5 Minutes.

Yield—More Butter is Produced with the Dazey Dasher by Rolling All Butter Making Properties up with the Butter Fat into Grains.

Labor—Working of Butter is Eliminated by the Dazey; Because the Globules in Building up in their Natural Condition have Squeezed out all the Milk and Formed into Hard Uniform Sized Grains. To Wash off Outside of Grains is all that is Necessary.

CROSS CUT SAWS

E. C. ATKINS & CO.

Made of High Grade Crucible Steel, Evenly Tempered, Carefully Ground, Sharpened and Set; Polished and Etched; Segment Grinding Consists in Grinding Away the Central Portion of the Plate, Extending from the Back to Within about Two Inches of the Cutting Edge, Leaving the Saw Strong at the Ends and Allowing for Wear on the Tooth Side, Without Making the Saw Thinner in the Center than at the Ends.

No. 5—Perfection Lance Tooth, Perforated

Made in Silver Steel Only; 14 Gauge at Cutting Edge; 16 Gauge at Ends on Back; 20 Gauge at Center of Back Edge.

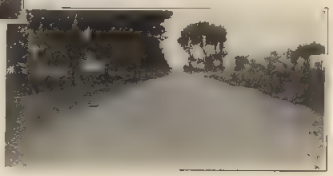
THE STANDARD METHOD of SURFACE TREATMENT

Below is a water bonded Gravel Road treated with Stanolind Paving Asphalt at 300°F., 45 pounds pressure, applied one-half gallon to the square yard by special pressure tank wagon shown in other illustration.



One application of Stanolind Paving Asphalt on Macadam and Gravel Roads has given three years' service with practically no expense. Builds more substantial surface at half the cost of light oil treatment for three years. Can be applied on roads previously treated with Road Oil.

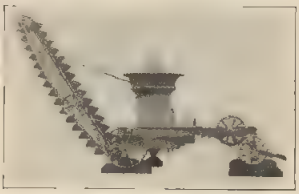
Austin Portable Gyratory Crushers



are the economical solution of many difficulties arising in street, sewer and bridge or building construction; in fact, any job entailing broken stone supply within city limits.

Austin Gyratory Crushers, both fixed and portable types, have been used on such work as New York Subway and Water Tunnels and Chicago city streets to crush old paving blocks and in the water tunnel under Lake Michigan. Their reliable working and excellent construction saved thousands of dollars on these projects of first importance.

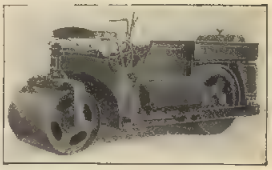
MACADAM

PAVING



TANDEM

of city streets, whether with brick, asphalt or other methods, requires a dependable roller to roll the sub-grade, consolidate the material or finish the surface. Steady running, smooth reverse, flexible range of speeds, all under the instant command and control of the operator, are the features of the Austin Tandem and three Wheeled Rollers.

Established for ten years on the market, Austin Rollers are used by the best authorities on road building, not only in the United States, but in almost every civilized country throughout the world.

Using gasoline, kerosene or distillate, these rollers show a large saving in cost of operation and will average 25% more work than any other type.

Set-on-Top cases are constructed entirely of polished plate glass, with cemented joints. Fitted with plate glass shelves full length and width of case. Provided with rubber bumpers on bottom to prevent marring top of floor case. Set-on-Top cases will increase sales, has the advantage of getting goods right in line with the customers vision. Is a desirable case for all kinds of cutlery and small hardware

FLOOR CASE EXTRAS

Mirror Doors—For American mirrors add 45 cents net per foot of case. For German plate mirrors add $1 50 net per foot of case.

Glass Shelves—For ribbed plate shelves with ground edges, add 50 cents net per foot. For polished plate shelves with plain cut edges, add $1 00 net per foot. For polished plate shelves with ground edges, add $1 25 net per foot. For polished plate shelves with polished edges add $1.50 net per foot. These prices are for one 10 inch, and one 14 inch shelf.

Electric Lights—Any of our floor cases can be wired for electric lighting at $3 00 per light additional. No case wired for less than two lights. Includes switch, nickel plated reflectors, and all wiring ready to connect with your city service.

Special Finishes—All our prices are based on quarter-sawed oak framework but we can furnish genuine mahogany, or birch finished in imitation mahogany or cherry. Prices quoted on application.

—yes, some twenty years ago

Twenty years ago, we made a big lot of Enameled Iron Street Signs for the City of Baltimore, but we haven't sold the City many since—only because

THE TOWN HASN'T NEEDED THEM

The signs we sold them twenty years ago are still doing business—that's the economy of "BALTO" Guaranteed Porcelain Enameled Iron Municipal Signs.

That's the proof that there is no "just-as-good."

If you can afford to experiment with low prices (?) you're fortunate, but the taxpayer pays the freight. Our product is the one absolutely dependable out-of-door municipal sign on the market, and we can prove it if given half a chance.

GIVE US THE CHANCE TODAY

Quotations and a sample of our finished product upon request—this involves no obligation on your part whatever.

May we send it to-day?

BARCALO "S" WRENCH

The Wrench and The Parts

This wrench will operate in many places where a straight handle or monkey wrench will not go.

Note how few the parts and how simple. The drop-forged movable jaw, the adjusting pin, screw and nut are all guaranteed strong and perfect in workmanship. These parts are interchangeable.

Engineers machinists and garage repair men are all possible customers.

Sizes 6, 8, 10, 12 and 14 inch. Write for catalog and prices.

Barcalo Mfg. Company, **Buffalo, New York**

RELIABILITY and accuracy, superiority of material and workmanship, are characteristics which have distinguished our Measuring Tapes for years.

One of the many features of excellence is our method of numbering—"Ready Reading." It enables the user quickly and accurately to read our tapes.

Send for Tape Catalogue and discounts.

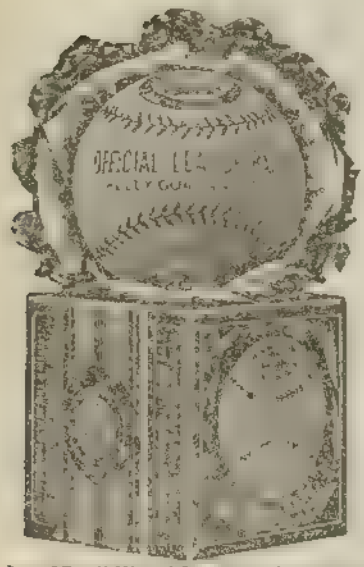
GOLDSMITH OFFICIAL LEAGUE BALL

The Original Eighteen inning Guaranteed League Ball



Is guaranteed to conform to the requirements and specifications of The National and American Leagues, and is official for use in any game played under The National Agreement Rules.

The rubber center imparts a liveliness unequalled by any other center. The finest pure wool yarn and specially tanned horsehide combined with our double needle lock-stitch linen thread hand stitching and scientific manufacture, enable us to guarantee it for **Eighteen Innings** against ripping, softening, losing its shape or elasticity.

Each ball is wrapped in tissue paper and tinfoil, packed in a separate box, and sealed according to league regulations.

Adopted and used as their Official Ball by

Pacific Coast League	**Western League**
Texas League	**Wisconsin-Illinois League**

One in a Box

BIG GAME HUNTER TOYS

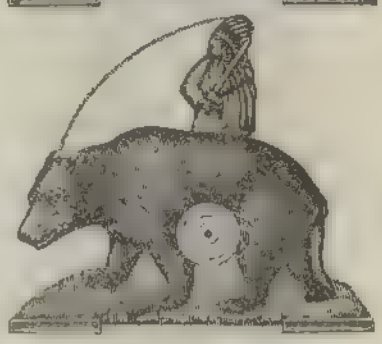
Each Set Consists of One Spring Gun 13¼ inches Long, Canvas Cartridge Belt with Brass Buckle and Eight 1½ inch Wood Cartridges; Target 12 inches Long on Wood Base with Lithographed Front in Rich Colors Exactly Illustrating the Big Game Animal in His Natural Surroundings; Behind the Animal is Concealed the Figure of a Hunter or Native, Held by a Device Connected with a Bull's Eye Target so that, when Set, Figure is Entirely Concealed but when Bullet Strikes Bull's Eye, Figure is Released and Springs Up behind the Animal which Announces a Perfect Hit and Adds a Thrilling Animation to the Target.

A Set of Each Variety Offers a Fine Gallery and Affords an Enchanting Entertainment for a Group of Children or "Grown Ups."

Per Dozen

No. 516—Stag; with Concealed Hunter; Including Gun, Belt and Ammunition; Weight per Dozen 12 lbs. **$12 50**

One in a Box



Per Dozen

No. 517—Grizzly Bear; with Concealed Indian Warrior; Including Gun, Belt and Ammunition; Weight per Dozen 12 lbs. **$12 50**

One in a Box

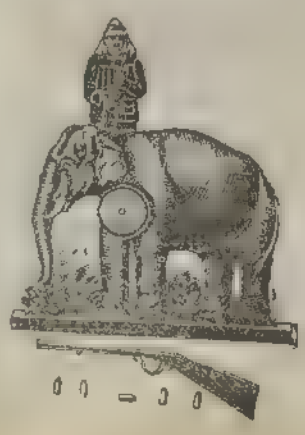
BIG GAME HUNTER TARGET TOYS

Less Expensive Set than No. 512; Hunter is Concealed Behind the Target in the same manner as No. 512 Series; Lithographed Figures are not Quite so Brilliant as the more Expensive Sets; Spring Gun 9¼ inches Long with Five Wooden Projectiles, and a Cork Attached by a Cord; the Cork is Adapted for Short Range Shooting; when the Bull's Eye is Struck the Hunter Leaps into Position behind the Game, which Announces a Perfect Score.

Per Dozen

No. 1251—African Lion; 9¼ x 9¾ inches; Complete with Gun and Ammunition; Weight per Dozen 9 lbs. **$8.00**

One Set in a Box



Per Dozen

BASE BALL BATS

*BINGLER

Bingler Bats are the Combined Results of Suggestions of some of the Big Leagues' expert Batters. They embody all the good features essential to hard and scientific work. Their Driving Power is unsurpassed. We use nothing but the best selected straight grained second growth Ash, open air dried and thoroughly Seasoned before turning. All Timber is Hand Split (not Sawed), thereby preserving a continuous Grain. Each Bat Hand Turned to Gauge. Used by Professional Ball Players and wherever the best is wanted.

MODEL BATS

There seems to be a tendency on the part of the trade to order Bats of certain Models as used by professional players. Ball Players autographs and pictures on Bats cost money, for which the trade must pay.

We have considered it wise in our regular Bingler line of Bats to exclude from our Customers selection [illegible] but to enable our Patrons to successfully cope with it we have decided to make our Bingler Bats according to several Models. These Models will be exact in length, weight, shape and balance with the official Model of leading players.

Customers ordering according to these Models will receive Bats of the highest quality (as possible to produce) and in exact duplicate, as far as Measurements, Dimensions, Weights, etc., are concerned of the Bats used by the celebrated players.

The Models that we will carry regularly will be as follows:

No. 151—Wagner Model; Plain Handles, Natural Finish; Orange Body, Assorted Lengths, 32 to 34 inches; Average Weight per Dozen 30 lbs. ..... Per Dozen **$20 00**

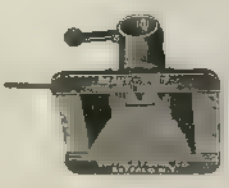
Duck Neck

Cast iron, single faced

No. 20—Weight each 15 lbs.. .....Each $1.00

Packed as Ordered



Eccentric blast valve is a new invention of inestimable value to the smith. The rising and falling action of this valve gives as large and as small a fire as desired, and affords a larger clearance for ashes and clinker than is obtained with any other device. It will heat a bar fully 12 in. long as quickly and with the same blast as a 7-in bar in the best standard tuyeres heretofore made. Fire pot is deep and heavily reinforced with metal to insure against burning out.

VULCAN

Size 12½x14x4⅛ in., weight 56 lbs. Each $6 00

BLAST GATES

Heavy cast iron frame, heavy gauge steel plate slides. Designed for opening, closing and regulating the blast in air-conveying pipes for various duties.

DOUBLE BIT AXES

★ DIAMOND EDGE

Hand Made; Black Forge Finish; Etched

DIAMOND EDGE Axes are Recognized as Being the Best Made. They are **Hand Tempered** by an Improved Process. Every Axe **Carefully Tested** Before Leaving the Factory. This practically Prevents Axes with Flaws or Soft Cutting Edges Reaching the User. It Also Insures Uniformity of Temper Without which an Axe will not Hold a Fine Sharp Cutting Edge. Highest Grade Crucible Steel Bit, Carefully Tempered and Ground; Soft Steel Body. The Eyes are Punched from Solid Steel and [illegible] Axes with Rolled or Welded Eye. **The Eye is Tapered** from the Outer to the Inner Opening; this Holds the Handle Firmly and Prevents its Splitting.

★ BLACK PRINCE

Hand Made; Dead Black Finish; Labeled

Black Prince Axes are Hand Hammered, **Hand Tempered** and **Hand Whetted.** The Bit is of Highest Grade, Crucible Steel, Drawn Thin and **Tempered Hard** to Hold a Fine Cutting Edge. Soft Steel Body. The Eye is Punched from Solid Steel, and will not Stretch nor Break, as Occurs with Axes Having a Rolled or Welded Eye. **The Eye is Tapered** from the Outer to the Inner Opening; this Holds the Handle Firmly and Prevents its Splitting.

LAWN MOWERS

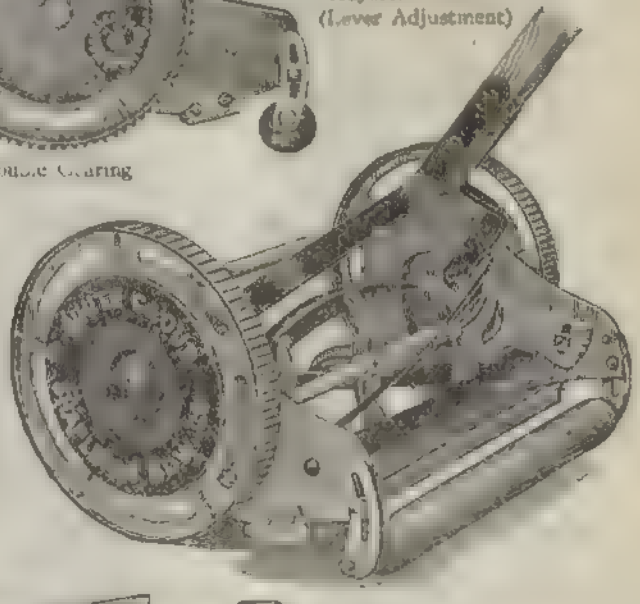
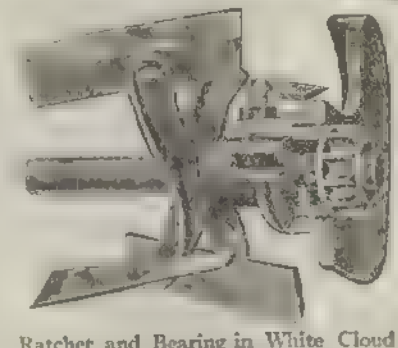
*WHITE CLOUD—PLAIN BEARING

Adjustable Reel—
(Lever Adjustment)

Double Gearing





Ratchet and Bearing in White Cloud

Adjustable Reel; Crucible Tool-Steel Knives; Malleable Iron Reel Braces; Solid Steel Reel Axle and Tubular Front Brace; Heavy Cast Iron Drive Wheels, Gear Casings and Bed Plate; Steel Side Plates; Malleable Iron Reel Braces and Roller Brackets; Tool-Steel Bed Knife Riveted to Stationary Bed Plate; Hardwood Roller, Wrought Steel Handle Braces, Fitted with Combination Clutch and Pinion with One Sliding Pin on Each Side of the Machine; 3½ foot Varnished Hardwood Handle with Cross Bar Set in Malleable Iron Socket and Bolted. All Bearings Carefully Machined. The Drive Wheels are Made with an Open Space between Rim and Gear Part, which Not Only Improves the Appearance but Makes the Machine Practically No Less when in Operation. On the Inside of each Side Plate there is a Grass Shield which Knocks Down the High Grass and Prevents its Winding Around the Journals.

*WHITE CLOUD—PLAIN BEARING

High Wheel; Four Blades

Blue and White with Gold Bronze Stripes. The Perfection of Lawn Mower Construction in Plain Bearing Machines.

Diameter of Driving Wheels 10 inches; Diameter of Reel 6 inches. Reel Axle ½ inch. Front Brace ¾ inch with ⅜ inch Rod Inside of Pipe. Adjustable to Cut Grass to Lengths of ¾ to 1½ inches. Cuts Grass Standing 5 to 7 inches High.

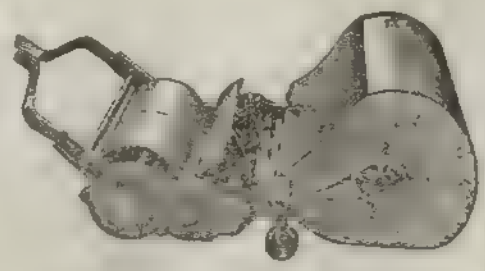
†PUTTING GREEN MOWERS

PENNSYLVANIA

Heavy Cast Iron Side Plates, Wheels and Gear Casings; Crucible Tool Steel Self Sharpening; Revolving Reel Blades and Stationary Knife, Malleable Iron Roller Brackets and Roller Brackets, Adjustable Hardwood Handle, Painted Green and Red with Gold Bronze Striping.

Complete With Grass Box

Cut Shows Mower with Grass Box Detached



Cut Shows Mower with Grass Box Attached

Note

The Grass Boxes or Catchers which are furnished with these Mowers are composed of two parts, the box proper [illegible] and the Detachable Clip [illegible] the Grass Box [illegible] Both [illegible] made of Steel Metal with Wood [illegible] and are Quickly Attached and Detached.

The method of making putting greens with Golf Links wavy or undulating has revived a demand for [illegible], originally in Great Britain, and more recently in this country, for the old roller type, forward cut lawn mowers.

The Pennsylvania Putting Green is an exact model of the **Pennsylvania Grand Horse Mower,** modified only to operate by hand.

The Stationary Knife is Bolted Rigidly to the Frame, making the Adjustment entirely with the Cylinder. The Journal Boxes or Cylinder Bearings are Self-Aligning, Insuring a Perfect Cutting Edge the Entire Length of the Blades. This Mower can be set to cut 3-16ths of an inch, and is ideal for Putting Greens, Tennis Courts, Cricket Creases, and other work requiring an exceptionally close and smooth cut. It can also be used as an edge trimmer for the ordinary lawn. The Front Wood Roller better supports the Machine in mowing terraces, but can be readily removed if desired, leaving only the casters as supports.

All Blades in this Mower are Crucible Tool Steel, Oil Tempered and Hardened.

Diameter of Rollers 7 inches; Diameter of Cylinder 5½ inches; Six Blades.

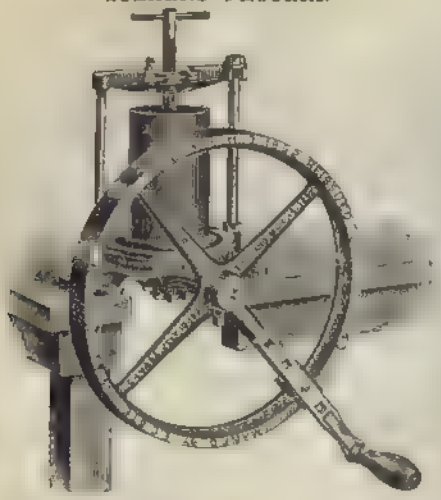
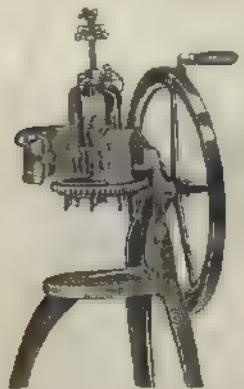
BONE CUTTERS
STEARNS' PATTERN



No. 4BW—For small flocks. Hopper holds 2½ lbs., enough for 60 to 70 hens. Cuts a hopper full of bone in two or three minutes. Is quickly attached to bench or table. Automatic feed with balance wheel. Each $14.50

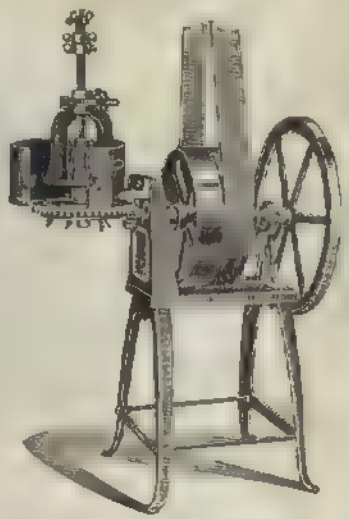
MANN PATTERN

No. 5BM—For flocks up to 100 hens. Has a large heavy balance wheel and improved automatic feed. Mounted on strong stand, with shelf. Cylinder 6 inches diameter, 4 inches deep. Four perfectly tempered knives. .....Each $17 50



No. 7M—For flocks up to 200 hens. Has heavy balance wheel which gives it a great momentum, making it easy to cut very hard bone. Has hinged hopper and strong iron stand, with shelf. Cylinder 7¼ inches diamter, 5¼ inches deep. Six perfectly tempered knives. .....Each $20.00

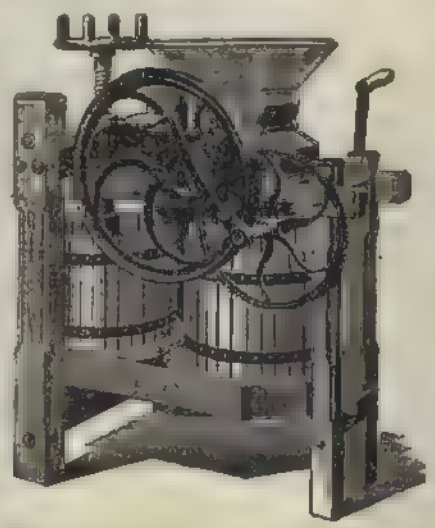
BONE CUTTERS
MANN PATTERN



No. 11M—For either hand or power. Has large hopper and table. Cylinder 9 inches in diameter, 7 inches deep. Capacity about 100 pounds per hour at 350 R. P. M., 1 to 1½ H. P. Diameter of pulleys 15 in., 3½ in. face.....Each $44 00

EAGLE CIDER MILLS

Varnished hardwood frame securely bolted, removable hopper and lever, cast iron yoke, balance wheel and journals. Steel press screw with cast iron socket and top wheel with hand grips, steel shaft, cast iron roll casing with one plain and two corrugated adjustable rolls, triple geared, cast iron crank with wood grip. Two plain hardwood tubs with heavy staves riveted to wrought iron bands, hardwood trough, neatly painted striped and varnished

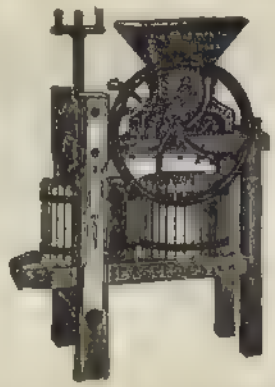


Senior—Capacity 6 to 8 barrels of cider per day. 48 in. high, 19½x40¼ in. trough, 15½ in. inside diameter tubs, 2x22 in. press screw, 40 in. lever, 13x15 in. hopper. Floor space required 29x45 in. Weight 420 lbs. Each $32 00

One in a Crate

EAGLE CIDER MILLS

Medium—Capacity 3 to 6 barrels of cider per day. 40 in. high, 14⅛x29½ in. trough, 12 in. inside diameter tubs, 1⅜x20⅛ in. press screw, 30 in lever, 14x14 in. hopper. Floor space required 22x35 in. Weight 240 lbs Each $24 00



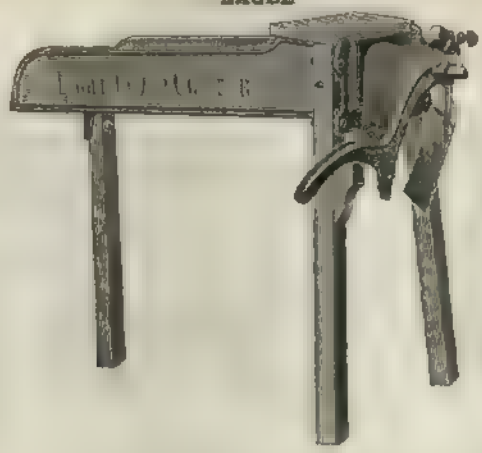
Junior—Capacity 2 to 4 barrels of cider per day. 43 in. high, 12⅛x28⅛ in. trough 10⅛ in. inside diameter tub, 1⅛x18⅛ in. press screw, 29 in. lever, 13x14 in. hopper. Floor space required 20x34 in. Weight 190 lbs. Each $18 00

CAN'T CLOG CIDER MILL AND WINE PRESS

Can't Clog Single Tub. Grinds either small or large apples. Roller can be removed for washing, by simply removing the two cap screws and sliding the roller out. Capacity 1 to 2 barrels a day. Tub 12 in. high, 12 in. inside diameter, 1¼ in. steel press screws. Weight 145 pounds. Each $12.50

FEED CUTTERS

EAGLE

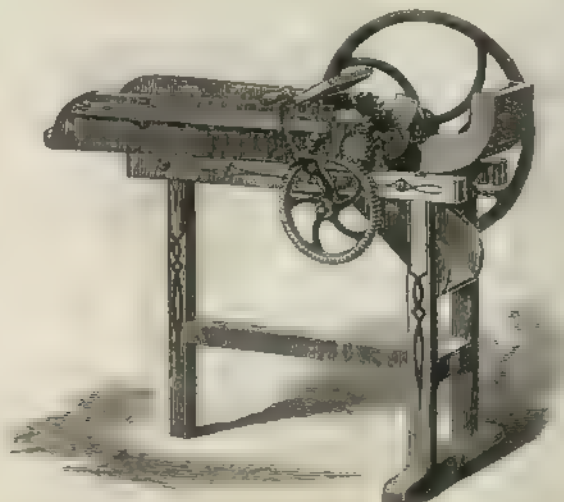


No. 00—Lever, heavy hardwood frame, steel knife, with 10½ inch cutting edge, adjustable gauge to regulate any length up to 2¼ inches.....Each $5 00
Shipped Knocked Down

EAGLE

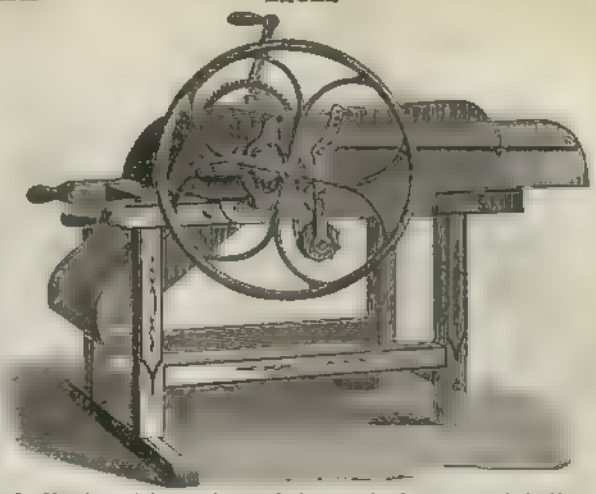
No. KD—Heavy hardwood frame, 11 inch spiral knife, heavy balance wheel, makes three cuts to one turn of the crank. By simply changing the ratchet, cuts four different lengths. Each $15 00
Shipped Knocked Down

EAGLE

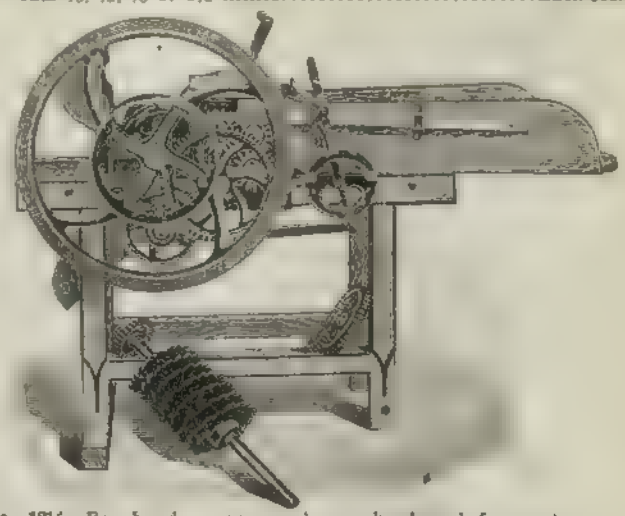


No. 0—Hardwood frame, heavy balance wheel, 8 inch knife; has self-feed geared motion 4 to 1, is a light-running cutter for hay or straw; cuts ½ or ⅝ inches.....Each $14 50
Shipped Set Up
NOTE—No 0 is not adapted for cutting corn stalks or fodder.

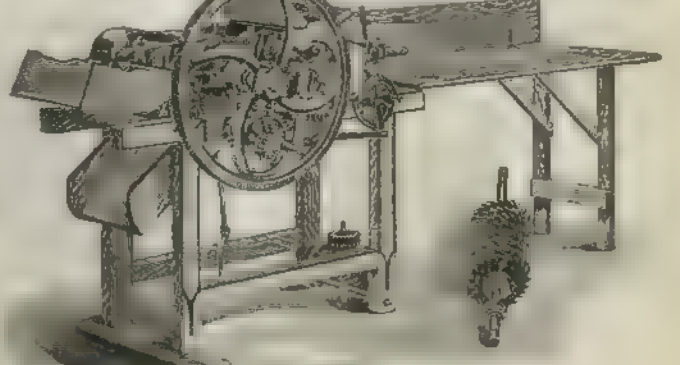
EAGLE



No. 8—Hardwood frame, heavy balance wheel, one 8 inch knife, cuts ⅜, ⅝, ⅞ or 1⅛ inches.....Each $18.00



No. 12½—For hand or power; heavy hardwood frame, two heavy 11 inch knives, heavy balance wheel with pulley attached, cuts ⅛, ¾ and 1⅛ inches.....Each $32 00



No. 13—Has two 13 inch knives. Capacity two to three tons green fodder per hour. Lengths of cut ⅝ to 1⅛ inches. Speed required 350 to 500 revolutions per minute. Safety flywheel and gear controlled by lever. Pulley 8" by 6" face. Power required from 2 to 4 horsepower.....Each $40 00

No. 15—Similar to No. 13 but larger, has two 15 inch knives. Capacity three to four tons green fodder per hour....Each 50.00

No. 20—An extra large machine for cutting large quantities of feed. Has two 20 inch knives, with 1⅝ shaft, safety flywheel geared and controlled by lever. Knives have long downward shearing cut. Cuts ⅝ to 1½ inches. Power required 4 to 6 horsepower. Capacity six to eight tons green fodder per hour.....Each 75.00
Shipped Set Up

MOTO METER.

BOYCE.

The Boyce Moto Meter is fast becoming a necessity to the man who is careful with his car. Not only is it a beautiful ornament but its practical use is at once apparent to the driver. It is a guaranteed thermometer so protected that the danger of breaking is practically eliminated. By observing this device from the driver's seat one can ascertain at a glance the running condition of his motor, making it easy to know the temperature of water in radiator in cold or warm weather and gives ample warning of inferior lubrication, insufficient water in radiator or improper gasoline mixture.

	Each

PRIMERS.

ENGINE DASH.

Designed to prime motor from dash and facilitate starting in cold weather. Will keep motor running until warm or until it picks up from carburetor.

Sight feed, which may be regulated by means of needle valve, shows exact amount of gasoline being used. Primer may be utilized for decarbonizing cylinders by feeding kerosene through intake manifold while motor is in action.

Easily attached by tapping manifold for ¼-inch standard iron pipe, inserting coupling and then connecting primer. No soldering required.

	Each
No. EDP—Complete with tubing and compression coupling; finished in polished brass; weight, ¾ lb.	$2.80

AUTO HEATERS. 5259

UTILITY.

How UTILITY PROTECTED HEATER Is Attached to the Exhaust

The Utility Auto Heater converts the heat of the exhaust into use in heating your auto. The heater core is protected by a handsome nickel plated rail, which serves as a foot rail and at the same time makes it impossible to burn or scorch wraps, robes, etc. By means of a conveniently located damper the amount of heat desired can be easily gauged. Easily installed, only two small holes have to be cut in floor of car.

A practical, well made heater which assures warmth for winter driving; safe from any danger of back pressure or disagreeable odors so common in heaters where the fittings are not accurately machined and trued to insure tight connection.

	Each
No. 20—Utility Protected Heater; for all cars; length, 29 inches; weight, 14 lbs.	$28.50
No. 125—Utility Front Seat Heaters; especially designed for roadsters or driving compartments of large cars or trucks, or for the tonneau of small cars; length, 17 inches; weight, 10¼ lbs.	17.80
No. 9—Utility Jr. Heater; designed for use on Ford and other small cars; finished in black enamel; length, 17 inches; weight each, 10¼ lbs.	12.80

STEER WARMS.

Steer Warms consist of two neat leather covered grips, one for each hand, which lace on to the steering wheel at any place convenient for driving. Special resistance wires are cleverly arranged between two copper plates in such a way that a very small current is sufficient to keep the grips warm. Safety demands a firm grip of the steering wheel which you cannot get with cold fingers. Steer Warms keep your fingers limber with only a pair of light gauntlets on, which enables you to grip the wheel tight on the coldest winter days, giving you a safe feeling even while driving over pavements slippery with ice.

	Per Pair
No. FSW—Steer Warms; special type for Ford car	$7.00
In lots of 10 pair or more	6.50
No. RSW—Steer Warms; for all cars with standard 6 or 12 volt battery	10.50
In lots of 10 pair or more	9.75

Half Dozen in a Box

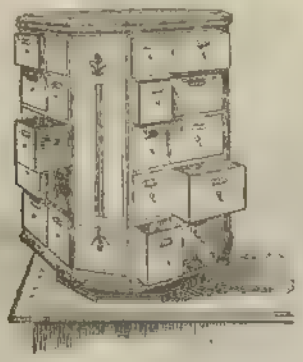
✠BOLT AND SCREW CASES

✠BROWN'S PERFECTION

Will Hold More and Longer Bolts than Other Cases of Similar Sizes, Because the Drawers are Square, with no Waste Space at the Center. Each Drawer is Labeled with the Size of Screw or Bolt, which it is Intended to Contain; Each Drawer will Hold a Full Package of the Size Indicated; the Case Revolves Easily, whether Empty or Full.



Plan

Made of Good Quality Tennessee Oak, Hard Oil Finish, Drawers are Made Square, with no Waste at Center

BOLT CASES

Each

No. 40—Forty Drawers; Height 37 inches, Diameter 22 inches; Weight Each 180 lbs..... **$30 00**

No. 40 Cases Labeled as Follows:

¼x1½, 1¾, 2, 2¼, 2½, 3, 3½, 4, 4½, 5.
⅜x1½, 1¾, 2, 2½, 3, 3½, 4, 4½, 5, 6.
⅜x2, 2½, 3, 3½, 4, 4½, 5, 6, 7, 8.
½x3, 3½, 4, 4½, 5, 6, 7, 8, 9, 10.

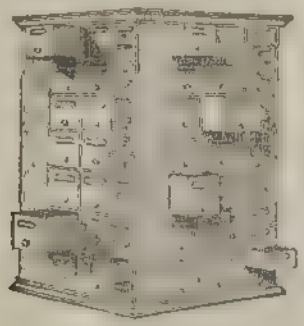
SCREW CASES

Each

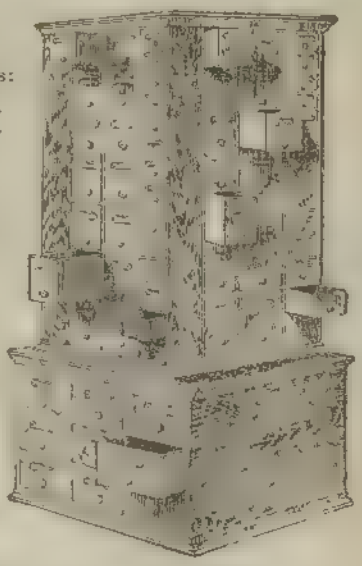
No. 80—Eighty Drawers; Height 37 inches, Diameter 22 inches; Weight Each 180 lbs..... **$40 00**

No. 80 Screw Case is Labeled as Follows, Can be Changed to Suit Your Own Selection of Screws:

¼ inch—1, 2, 3 (in One Drawer).
⅜ inch—2, 3, 4, 5.
½ inch—2, 3, 4, 5, 6.
⅝ inch—4, 5, 6, 7, 8.
¾ inch—5, 6, 7, 8, 9.
⅞ inch—5, 6, 7, 8, 9, 10, 11, 12, 13, 14.
1 inch—5, 6, 7, 8, 9, 10, 11, 12, 13, 14.
1¼ inch—7, 8, 9, 10, 11, 12, 13, 14, 15, 16.
1½ inch—7, 8, 9, 10, 11, 12, 13, 14, 15, 16.
1¾ inch—9, 10, 11, 12, 13, 14, 16.
2 inch—9, 10, 11, 12, 13, 14, 16.
2½ inch—12, 14, 16.
3 inch—14, 16, 18.



The Plan of Nos. 112 and 130 is the Same as Nos. 40 and 80, Shown Above, Except the Corners are Left Square and Filled in with Small Drawers for Screws.



COMBINATION BOLT AND SCREW CASES

Made of Good Quality Tennessee Oak, Hard Oil Finish

UPPER CASE, ONLY—WITHOUT BASE

Each

No. 112—With 112 Boxes; 56 for Bolts and 56 for Screws; Height of Case 50 inches; Diameter 24 inches; Weight Each 300 lbs..... **$60 00**

CASE AND BASE—COMPLETE

Each

No. 130—Base is 30 inches Square, 20 inches High and Contains 18 Drawers; Upper Case has 112 Boxes, 56 for Bolts and 56 for Screws; Height Over All 70 inches; Weight Each 480 lbs..... **$74.00**

No. 112 Cases Leave the Factory Labeled as Follows:

Washers, ⅝-10, ¾-12.
Bolts, ¼x1, 1¼, 1½, 1¾, 2, 2¼, 2½, 2¾, 3, 3½, 4, 4½, 5.
Bolts, ⅜x1½, 1¾, 2, 2½, 3, 3½, 4, 4½, 5, 6.
Bolts, ½x2½, 3, 3½, 4, 4½, 5, 6, 7, 8, 9, 10, 11, 12.
Screws, ¾—5, 6, 7, 8, 9. (in One Drawer).
Screws, ⅜—4, 5, 6.
Screws, ½—4, 5, 6, 7.
Screws, ⅝—5, 6, 7, 8, 9.
Screws, ⅜—6, 7, 8, 9.
Screws, 1—7, 8, 9, 10, 11.
Screws, 1¼—8, 9, 10, 11, 12.
Screws, 1½—9, 10, 11, 12, 13, 14.
Screws, 1¾—11, 12, 13, 14.
Screws, 2—11, 12, 13, 14.

This Leaves 4 Small Drawers with Blank Labels, which Can be Used for Tire Bolts or Stove Bolts, etc.

No. 130, Case Labeled as Above, with the Following Added in the Base:

Washers, ⅝, ¾.
Bolts, ⅝—5, 6, 7, 8, 9, 10, 11, 12.
Bolts, ¾—7, 8, 9, 10, 11, 12, 14, 16.

Labels Can Easily be Changed to Suit Your Own Selection

✠REVOLVING SCREW AND BOLT CASES

AMERICAN

Tops and Bottoms are Made of the Best of Kiln Dried Oak Lumber and Screwed Together, and Braced with Iron Rods, which Bind the Whole Firmly Together, thus Making it Impossible for Them to Get Out of Order. The Weight that Can be Put into Them, and by which Means they Revolve Perfectly True and Easy.

Iron Standards, Screwed Firmly into an Iron Hub in the Bottom, Make them Perfectly True and Solid.

Each Case is Supplied with the Best Selected Thoroughly Dry, Clear Poplar Drawers. We Furnish Cases of Oak when so Ordered. The Fronts of Drawers are Made of the Best Norway Pine, with the Sizes they Contain Nicely Printed on. No Store that Handles Bolts and Screws is Complete Without One of these Cases, as they Prevent Mixing of Screws and Bolts, thus Enabling Dealers to Keep their Stock in Good Shape, Making it a Pleasure Instead of a Task to Handle them. The Drawers are All Provided with Stops to Prevent their Removal from the Case; Each Drawer Holds a Full Pound of Bolts or Screws of the Size and Number Indicated on the Front of the Drawer.

All Numbers on Bolt and Screw Cases will be Changed to Suit Purchaser Without Extra Charge.

SIZE 1—SCREW CASE

Contains Labeled Drawers for Following Sizes of Screws:

Inches, ½x3, 4, 5, 6, 7.
Inches, ⅝x5, 6, 7, 8.
Inches, ¾x5, 6, 7, 8, 9.
Inches, ⅞x7, 8, 9, 10.
Inches, 1x6, 7, 8, 9, 10, 11, 12, 13, 14.
Inches, 1¼x7, 8, 9, 10, 11, 12, 13, 14, 15.
Inches, 1½x8, 9, 10, 11, 12, 13, 14, 15, 16.
Inches, 1¾x9, 10, 11, 12, 13, 14, 15, 16, 17.
Inches, 2x10, 11, 12, 13, 14, 15, 16, 17, 18.
Inches, 2½x12, 13, 14, 15, 16.
Inches, 3x16, 18, 20, 22.

SIZE 2—SCREW CASE

Contains Labeled Drawers for Following Sizes of Screws:

Inches, ⅜x2, 3, 4.
Inches, ½x3, 4, 5, 6, 7.
Inches, ⅝x5, 6, 7, 8.
Inches, ¾x5, 6, 7, 8, 9, 10.

1—Automatic Tire Connection	1.00
1—25 ft. Drop Line ⅜ in. Air Hose	4.00
No. 1 Outfit—Complete	$77.25

MOTOR DRIVEN COMPRESSOR

This Compressor is intended for service in garages housing up to 60 cars and in connection with tanks up to 50 gal. capacity. The compressor has a capacity of 2½ cu. ft. of free air per minute, has an adjustable safety valve on each cylinder and is driven by ⅓ H. P. motor, by noiseless rawhide pinion gear. The motor will readily start the compressor against 130 lbs. and drive it up to 175 lbs. Height 16½ in., floor space 18½x11 in.

No. 42 A. C.—110 or 220 V. 60 cy. A. C. 1 Phase Motor . . . . . Each $135.00
No. 42 D. C.—110 or 220 Volts . . . Each 120 00

MOTOR DRIVEN GARAGE OUTFIT

For Garages Housing 75 Cars when Model "L" Controller is Used, and up to 50 Cars Without Model "L"

1—No. 42 Compressor, 110 or 220 V 60 Cy. A. C.	$135.00
1—40 gal. 16x48 in. galv. Air Tank	18.50
1—Model B Air Gauge	2.00
1—No. 75 Vertical Check Valve	1.25
1—No. 72 Safety Valve for Air Tank	2.00
1—No. 83—¾ in. Needle Valve	1.25
1—No. 83—⅝ in. Needle Valve	1.25
1—No. 82—⅝ in. Needle Valve with swivel hose connection	1.50
1—Automatic Tire Connection	1.00
1—25 ft. Drop Line ⅜ in. Hose	4.00
	$167.75
1—Model "L" Controller to make outfit automatic (optional)	40.00
No. 6 Outfit—Complete	$207.75

MOTOR DRIVEN OUTFIT

Outfit consists of a standard No. 102 Brunner Air Compressor geared to a ½ H. P. motor and mounted on a 32 gal. welded steel tank tested to 300 lbs. Equipment includes air gauge, check valve, needle valves, hose line and tire connection. Recommended for garages housing up to 50 cars, or in gasoline stations where available space is limited. Height 34 in., floor space 18x36 in.

No. 542—110 or 220 Volt, Direct Current Motor . . . . . Each $160 00
No. 543—110 or 220 Volt, A. C. Motor, 60 Cy. 1 Phase . . . . . Each 170.00

This outfit is of exactly the same size and design as the No. 542 except for the compressor which is a standard No. 101 Brunner Air Compressor. Recommended for garages housing up to 35 cars.

No. 541—110 or 220 Volt, Direct Current Motor . . . . . Each $140 00
No. 541—110 or 220 Volt, A. C. Motor, 60 Cy. 1 Phase . . . . . Each 150 00

PORTABLE TIRE INFLATOR

This is a well built Motor Driven Portable Outfit for inflating tires without storage tank, and operates from any lighting circuit. Has a heavily built two-cylinder air cooled compressor, bore 1⅝ in., stroke 1½ in., pistons equipped with three metal rings and geared to a ¼ H. P. electric motor by means of a cloth pinion, and mounted upon a substantial cast iron sub-base with three wheels. A substantial handle of convenient height is supplied. Gloss black enamel finish. 20 ft. electric cord and plug and 20 ft. heavy air hose, tire connection and gauge supplied. Also furnished as a stationary outfit, but not intended for use in connection with a storage tank.

Portable Outfit

	Each
No. 66 A. C.—110 or 220 V. 60 Cy.	$90 00
No. 66 D. C.—110 or 220 V. Motor	88 00

Stationary Outfit

	Each
No. 66 A. C.—110 or 220 V. 60 Cy. A. C. Motor	$85 00
No. 66 D. C.—110 or 220 V. Motor	83 00

PORTABLE ELECTRIC OUTFIT

This is a very high grade, practical portable air compressor outfit, entirely complete with all fittings and accessories ready to operate. It has a powerful ¼ H. P. electric motor that can be operated from any lighting circuit and which will readily start the 1 cu. ft. compressor against a pressure of 130 lbs. and drive the pressure to 175 lbs. The tank is 12x30 in. and of seamless drawn steel construction. Height 32 in., floor space 20½x36 in.

	Each
No. 50 A. C.—110 or 220 V. 60 Cy. 1 Phase Motor	$145 00
No. 50 D. C.—110 or 220 V. Motor	130 00

Traffic Sign Supremacy

The largest single order ever placed by any city for traffic signs has been placed with the Buffalo Municipal Equipment Company.

The contract was awarded by the Traffic Ordinance Committee of the City of Buffalo after inspection and tests of samples submitted by the leading traffic sign makers in the United States.

THE B.M.E. TRAFFIC SIGN

was adjudged the most artistic, to be made of the most serviceable materials for permanent street service, and it was the lowest in price.

You will find suggestions of practical value for municipal traffic regulation in our latest catalogue. Mailed on request.

SANITARY KITCHEN SETS

SANITARY

Comprises Twelve Useful Kitchen Articles, all made of Best Heavy Crystal Glass.

Contents

One Graduated Jug	One Clothes Dampener
One Butter Dish and Cover	One Pepper
One Egg Separator	One Salt
One Lemon Extractor	One Measuring Cup
One Graduated Measure	One Fruit Jar Filler
One Rolling Pin	One Funnel

Per Set

No. 12KS—Complete as Described above; Weight 15 lbs.... **$2 30**

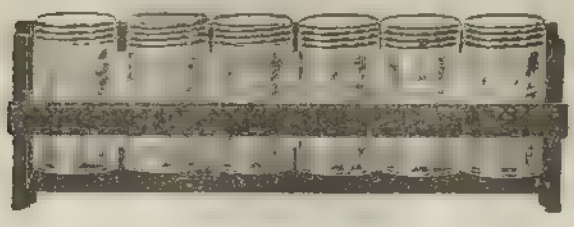
One Set in a Carton

SPICE JARS

Per Dozen Sets

No. 7G—Consists of 7 Jars; Crystal Glass, Octagon Shape with Aluminum Screw Caps; Size of Jars 5½x2½ inches, with Exception of Coffee Jar which is 7⅛x4½ and Tea Jar which is 5½x3¼; Salt and Pepper Jars Perforated, Names Enameled; Weight per Dozen 66 lbs..... **$21 00**

One Set in a Carton

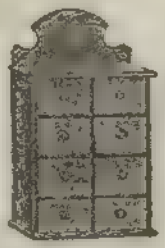


Per Dozen Sets

No. 6G—Hardwood Rack, Mission Finish, 16¼ inches Long, 5¾ inches High, 3 inches Deep; Contains 6 Glass Jars with Nickel Screw Caps; Names Enameled; Weight per Dozen Sets 60 lbs..... **$28.00**

One Set in a Carton

SPICE CABINETS



Per Dozen Sets

No. 5—With 8 Dust Proof Drawers; Size 16¾x9¾ in.; Made of Hardwood, Varnished and Attractively Lettered; Wt. Each 5 lbs..... **$12 50**

Six in a Crate

SALT BOXES

Per Dozen

No. PW — Plain Wood; Weight per Dozen 6½ lbs..... **$2.50**

Loose

POTATO MASHERS

Per Dozen

No. PPM—Plain Hard Maple; Length 10¾ inches; Wt. per Dozen 12½ lbs.... **$1.70**

Two Dozen in a Crate; Weight per Crate 12 lbs.

ROLLING PINS

STANDARD KITCHEN

Best Quality Clear Selected Stock.

Per Dozen

No. PRP—Plain Maple; Size 12x2⅝ inches; **Revolving Handles;** Weight per Dozen 29 lbs..... **$3 50**

One Dozen in a Box

SCHOOL ROLLING PINS

No. SRP—Plain Maple; Size 7½x1¾ inches; Solid Handle; Weight per Dozen 5 lbs..... **1.40**

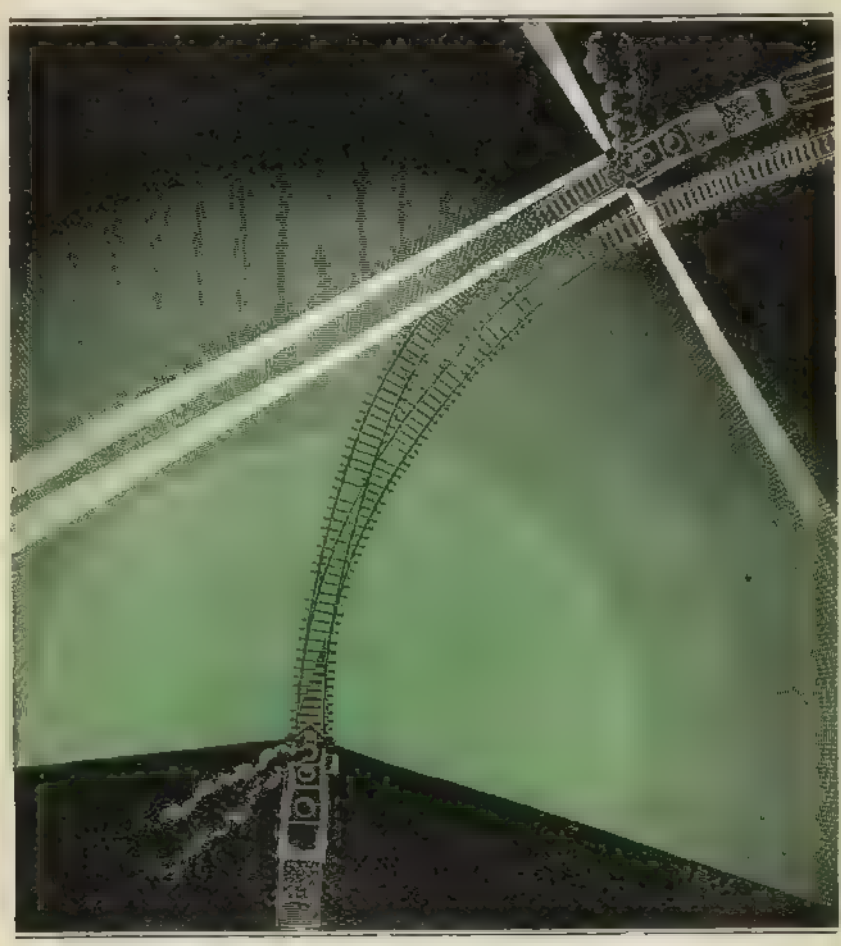
Handlan Radius Engine Lamps

For Oil For Most Efficient Service For Electricity



Displaying green signals, illustrating their uniform divergence compared with the narrow shafts of light when standard lenses are used as on the extra See page 140, describing lenses.

Handlan Radius Engine Lamps

Radiate a uniform amount of light instead of A narrow beam that is only visible when Directly within its limited scope. Radius lenses Insures greater opportunities for employes to Understand and remember these important Signals, especially when sections are following

Handlan No. 26 Radius Lamp

Showing full view of green radius lens; white lens of same size on opposite side, each lens display covers a radius of 130 degrees.

See page 140, describing lenses.

Handlan No. 26 Radius Engine Lamps

Are constructed of heavy material and combine simplicity of operation with elimination of all complicated parts, such as removable interior glasses exterior triggers and other intricate devices, which have caused endless trouble besides the continual expense for replacement and repairs

Side View of No. 26 Lamp

Both Lenses Extend as Far on Opposite Side as Shown in this Cut

The lamp bracket is so arranged that it is not necessary to specify rights or lefts, as the lamps can be used upon either side or front of locomotive These lamps can be focused to any position required. Changes in display signals are made by exterior movement. The lens not in use remains obscured by a steel blind.

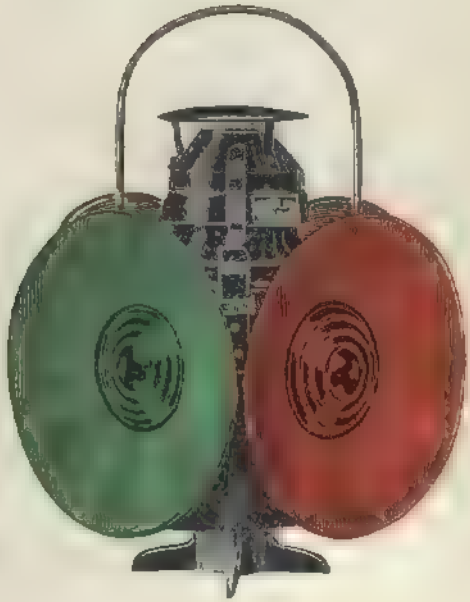
See page 140, describing lenses

Handlan Switch Lamp

Wind Proof, Rain Proof

Perfect Ventilation

No. 151



Top cover operating easy to clean, mounted iron lens targets same color as lenses

No target on switch stand required. Furnished with 28-ounce fonts, with one way or long time burners, $4\frac{3}{8}$, $4\frac{1}{2}$, 5 or $5\frac{3}{8}$ inch lenses any color, outside wick raiser

For parts, see pages 54 and 55

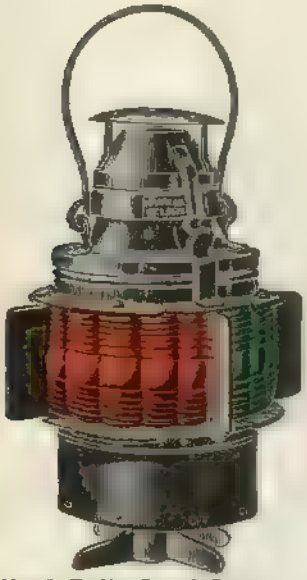
Handlan Radius Switch Lamp and Enameled Iron Target Switch Lamps



No. [illegible] Radius Switch Lamp

No. 17 Radius Switch Lamp, Top View

The spread of light not only covers a radius of 79 degrees, but radiates above and below the center line of lense thereby displaying clear indications on grades, and on stands where at times lamps do not fit perfectly

In view of so many inquiries and requests from railroads for a more efficient switch lamp on curves we have, after considerable experimenting perfected a type of radius lamp that has thoroughly met the extreme requirements for this particular service

A service test will determine if greater efficiency and greater safety is obtained on curves, and we suggest a comparative test with your present standard switch lamp

Very substantial construction throughout. Built of No 18 gauge cold rolled steel, retinned The special lenses are well protected All parts riveted seamless drawn oil pot, No 1 signal burner or long time burner solid malleable iron base, and Handlan top draught ventilation, wind proof, rain proof, rust proof, easy to clean

No 159

8-inch, 180° Pier Signal with 8-inch fresnel.

Manufacturers of steamboat lanterns signal lights, masthead lights side lights, pier lights and special lamps, for electricity or oil

Automatic Highway Crossing Watchman

Red lights are seen only when signal is in operation or with track circuit interrupted; lights may be seen when signal and bell circuits are out, or signal may be in operation when bell and light circuits are out, or bell may be ringing when lights and signal circuits are out It is not likely with proper maintenance that all these units can be out of order at the same time, and with signal arms waving in such a distinct flagging manner, and bell ringing and lights blinking, the best possible warning is given at dangerous crossings

The apparatus is so simply constructed that it is next to impossible for the mechanical parts to get out of order, and is therefore, a matter of maintaining circuits

We have a crossing signal which we invite you to examine in detail before deciding just what design you will install for highway crossing protection. We wish to call your attention to its simple yet strong and effective construction

The signal consists of two arms, operated from the horizontal to 60° position below the

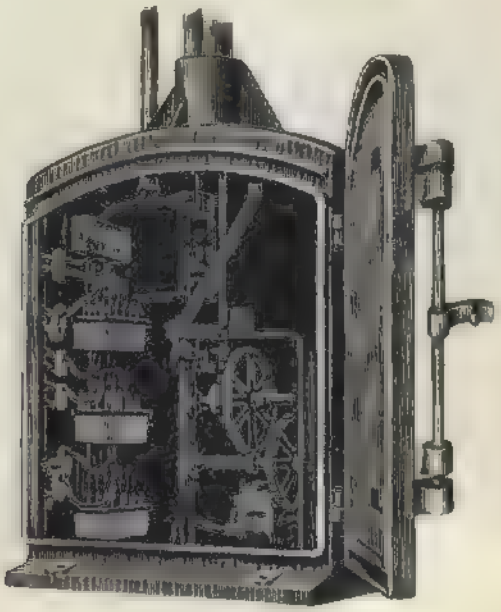
(Continued on page 91)

Automatic Highway Crossing Watchman

(Continued from page 90)

horizontal, motor driven, geared to thirty complete movements per minute. The arms and spectacle castings are so evenly balanced on center shaft, and bearings, that they can be operated by one hand.

Red lights are so arranged that signal arms and spectacle castings passing in front of them gives four perfect blinking lights with each complete movement of signal arms. These blinking lights are accomplished mechanically without opening or closing contacts which may become easily corroded or out of order from other causes.



Section View of Relay Case

Can be operated either on 110 volts A. C. or primary battery. On 110 volts A. C., the apparatus complete, signal arms, two 2-candle power lamps and bell consumes less than minimum rate charged by most cities and towns. When primary battery is used, it operates on 22 cells R. S. A. battery.

Call at our factory when in the city and see the signal in operation, or write us for any further information you may desire.

Handlan Top Draught Ventilation

Signal lamps in railroad usage are of such great importance in obtaining safe operation of trains that unusual efforts have been put forth by us in the last twelve years to perfect a type of ventilation that will "stand up" and not sweat under the most severe weather conditions, viz: High winds driving rain, snow and sleet storms, also extremely hot and humid weather.

We have been building our semaphore lamps, switch lamps, marker lamps, in fact all of our signal lamps with the well known type of Handlan top draught ventilation which has proven to be rain proof, cinder proof, wind proof and frost proof.

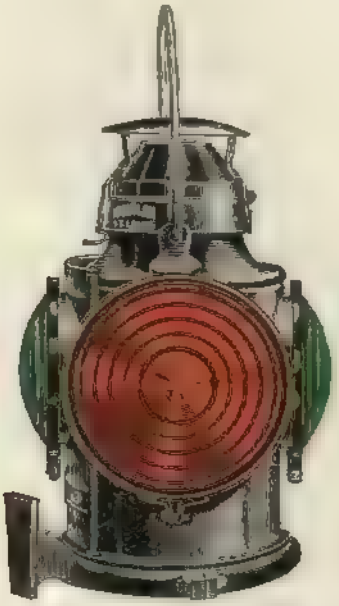
As lamp manufacturers we thoroughly realized the necessity of constructing a lamp with a ventilator of greatest simplicity, and of a type that really equalizes the air currents. We employ no solder in joining the parts in our ventilation, we use no metal screening or perforated metal as we used formerly on the old pattern of signal lamps, as we found it corroded and rust formed very quickly. We also found that insects, cinders, road bed dust, in fact foreign matter were drawn into and would cling to the metal screening, restricting the passage of air and necessitating continual cleaning to insure results. Our ventilation is not exposed, being well protected with a solid drawn shield, which strong winds accompanied by rain or snow drive against our lamps, the exterior shield over the outer inlets divert the elements, insuring protection for the flame.

Ventilation of our signal lamps is constructed so as to entirely prevent high winds from extinguishing the light by neutralizing the overcharge. Violent blasts of air or high winds are thus counteracted and dispelled before entering interior of lamp body and take the course of least resistance and pass again to the outer air additionally attracted by the escaping hot air.

After the required amount of air passes through the ventilator and while entering the body it is diffused by the flanged cone which causes the cold air entering the body to work down the sides of the lamp before it reaches the flame. When lamps sweat, the fact is, air is forced into the ventilator and with no other egress available the excess supply enters warmed interior of lamp and condensation is the natural result. Our system of ventilation eliminates the formation of vapor prevents the sweating of lenses, and assures a uniformly steady burning light under every atmospheric condition.

Handlan Tail End Markers

Optical lenses are constructed so as to force the reflected light a great distance, but in narrow restricted beams. It naturally follows that unless markers "stand up" when in car sockets that the full benefit of the lenses penetrating qualities will not be obtained if the lamps 'droop over' and bury the protecting long distance rays in the ground.



Handlan No. 79 Straight Body Tail End Marker

Equipped with any number, size, or color of lenses requested

Handlan Tail End Markers 'stand up' in the socket and afford the greatest possible protection to the rear end of trains, by using to the fullest advantage the principle embodied in optical lense construction.

Handlan Tail End Markers

Nearly every railway that we supply with marker lamps have abandoned the purchase of the flaring style and specify the straight body type on their orders.

Our experience has shown that the flaring base markers "sag" in the socket especially after they have been in use for some time, while our straight body style "stand up" in service as well when they are old as when new, because their turning ring and grooved bind support are both made of malleable cast iron, lathe turned to perfect uniformity. Besides having a circumference three times greater than the flaring base style

Our Old Flaring Base Style

One of our old style flaring base markers intentionally damaged to show disadvantages.

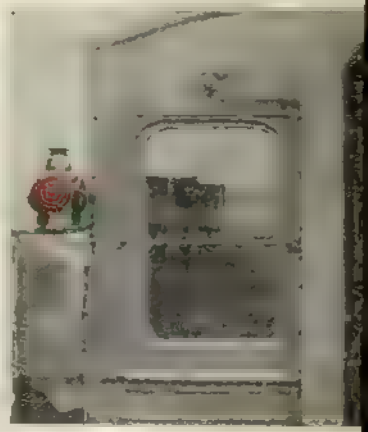
We also found that the flaring base style would not withstand the ordinary rough usage they are subjected to and when accidently dropped or struck against any obstruction the flaring base would bend and prevent lamp being turned, thereby rendering them useless and difficult to straighten or repair

Handlan Tail End Markers

A contrast showing the protection afforded by the focal plane of our straight body No. 79 markers, compared with the waste of light and diminished safeguard of markers which droop over, as shown by the flaring base style

Handlan No 79.

Photographed on same car and socket.



Flaring Base Style.

We manufactured both markers, but soon realizing the imperfections of the flaring base construction, we experimented until we perfected the straight body style known as HANDLAN NUMBER SEVENTY NINE

(See Next page.)

Handlan No. 79 Tail End Markers are popular because they **"stand up"** in the socket and withstand more rough usage than the flaring base style.

Flaring Base Style.

Handlan Cupola Lamps

No. 60

Four-lens lamp, with steel blinds covering lenses not in use, operated from inside of caboose, equipped with 4½-inch lenses

No. 83

Two-lens lamp, one 6⅞-inch red lens and one 5⅞-inch green lens, and interior steel blind obscure lens not in use, lamp is stationary; shield operated by device in base of lamp

No. 83

No. 62

Four-lens lamp, with steel blinds covering lenses not in use, operated from inside of caboose, equipped with 6¾-inch lenses

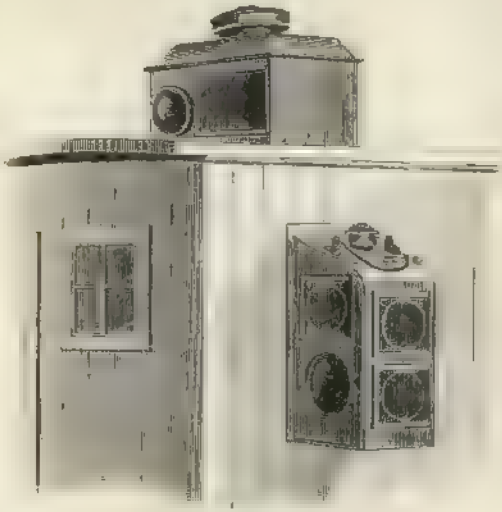
No. 68 Cotton Belt Cupola Lamp

Two-lens lamp, one red and one green lens, operated from inside of caboose; equipped with 4½-inch lenses

No. 68

Watts' Caboose Lamps and Tail Markers

In Position as a Cupola Lamp on Top of Car



In Position as a Side Lamp on Side of Car

No 30 **Cupola Lamp**

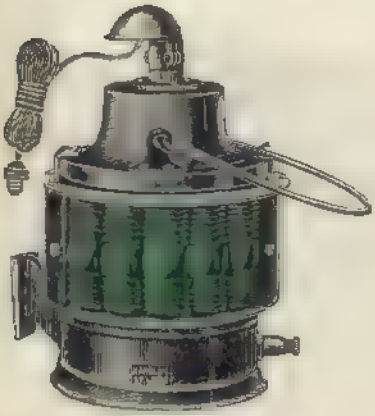
Their special merits are a steady, powerful light and comparatively low cost; light up the interior of the car very well and can be extinguished without being instantly discovered

No 47 **Side or Marker Lamp**

Interior of Lamp Showing the Two Combustion Chambers

Signals are transmitted by means of a simple lever from one platform to another [illegible] the inside of the car

Handlan Electric Radius Engine Lamps



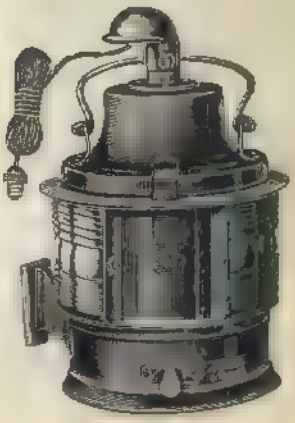
No. 88

No. 88

Maximum Efficiency and Safety

When electric headlights are used radius lens lamps are more reliable.

Showing full view of green lens; white lens of same size on opposite side, an interior steel blind obscures the lens that is not showing indication; brackets arranged to place lamp on right or left side or front end of locomotive. Advise location of lamps on locomotive



No. 91

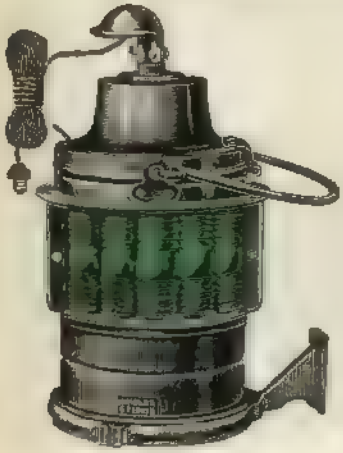
No. 91

Side view, showing part of white and green lens; an adjustable steel blind obscures the lens not showing indication. This lamp can be placed on either side of locomotive, no rights or lefts; simply and durably constructed; no interior parts to cause expense; no inner glasses to replace

See page 140, describing lenses

Handlan Electric Radius Engine Lamps

Safe and Sure Indications to Trainmen and Dispatchers



No. 89

No. 89

Showing full view of green lens, covering a radius of 130 degrees; white lens of same size on opposite side. This lamp, equipped with combination base and bracket, as above, is adaptable to either side or front, or rear end of locomotive; no right or left lamps; an adjustable steel blind obscures the lens not in use

Handlan Engine Lamps

No. 80 Engine Lamp

For Electricity Only

With two each 5⅜-inch white and green Spreadlite lenses; interior revolving steel blind obscuring lenses not in use; no inner glass or fixtures; simply and durably constructed; blind operated from outside of lamp

No. 80

Handlan Electric Switch and Signal Lamps

No 86 **Radius Electric Switch Lamp**

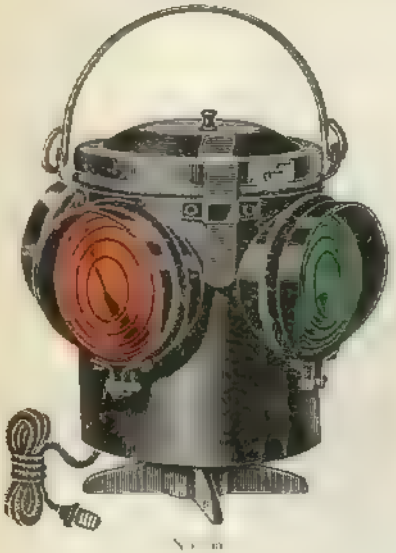
The spread of light not only covers a radius of 79 degrees but radiates above and below the center line of lense, thereby displaying clear indications on grades, and on stands where at times lamps do not lie perfectly

In view of so many inquiries and requests from railroads for a more efficient switch lamp on curves, we have after considerable experimenting, perfected a type of radius lamp that has thoroughly met the extreme requirements for this particular service

A service test will determine if greater efficiency and greater safety is obtained on curves, and we suggest a comparative test with your present standard switch lamp

Very substantial construction throughout. Built of No 18 gauge cold rolled steel, retinned The special lenses are well protected All parts riveted, solid malleable iron base, rust proof; easy to clean

Handlan Electric Switch Lamps



No. 55

No. 20 gauge steel, retinned equipped with 4⅛, 4½, 5 or 5⅝-inch lenses, hinged cover; large opening at top; very convenient for cleaning lenses and interior of lamp, all parts electric welded or riveted

Complete with electric socket

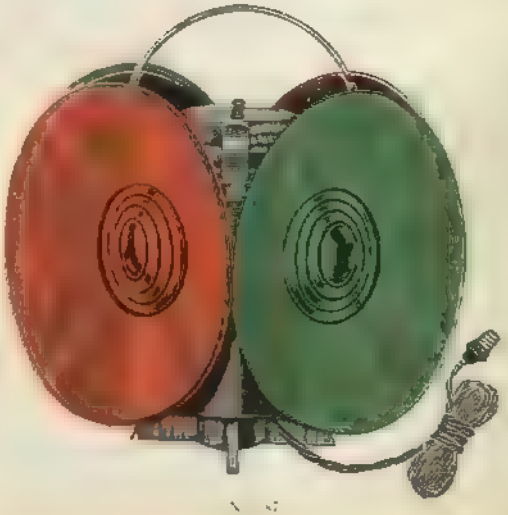
No. 87

Top cover opening easy to clean, enameled iron lens targets

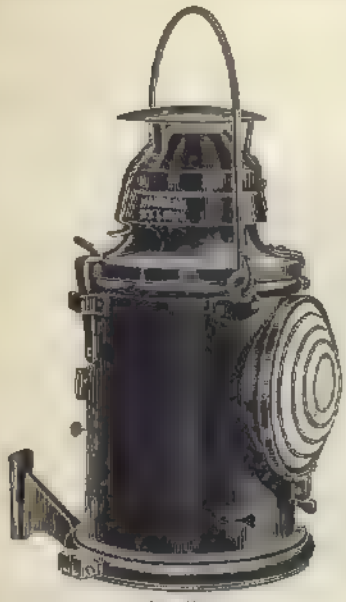
No target on switch stand required

No. 20 steel, retinned, equipped with 4⅛, 4½, 5 or 5⅝ inch lenses

Complete with electric socket.



Handlan Signal Lamps

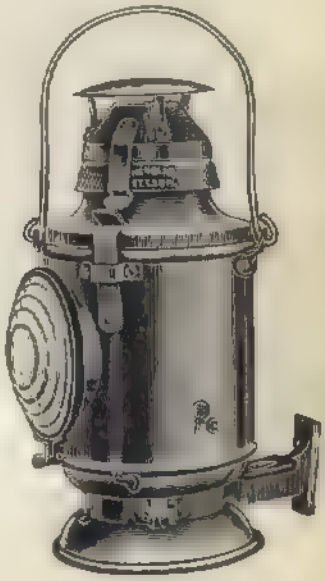


Handlan Front and Rear Signal Lamps for Electric and Interurban Roads

Made of cold rolled steel, retinned, seamed, riveted and soldered, seamless drawn oil pot; no leakage or rust

Straight body with Handlan combination base and bracket. This lamp has the Handlan arrangement for instantaneously changing the signals without opening the lamp or removing it from the socket. Shows a combination of three signals, red, white or green. Safe and sure. Repairs reduced to a minimum. Can be used on sides or end of car

Equipped with one 5⅜-inch white lens and one red and one green glass on inside. Can also furnish with any color lens and without interior glass



No 118

Handlan Signal Lamps for Street and Interurban Railroads

Shows either a red, white or green signal by simply turning small lever at base of lamp

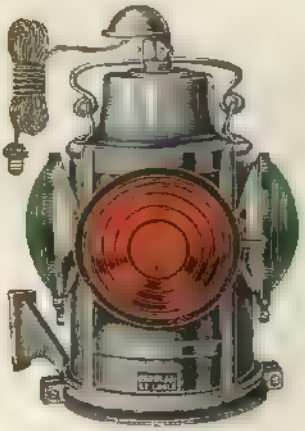
The adjustable brackets allow the lamp to be used on either the dash or side of car

Signals are changed and flame is regulated without removing, lifting or opening the lamp

Equipped with one 5⅜-inch white lens and one green and one red glass.

Special lamps with any number of lenses of any color and size can be furnished to meet special requirements.

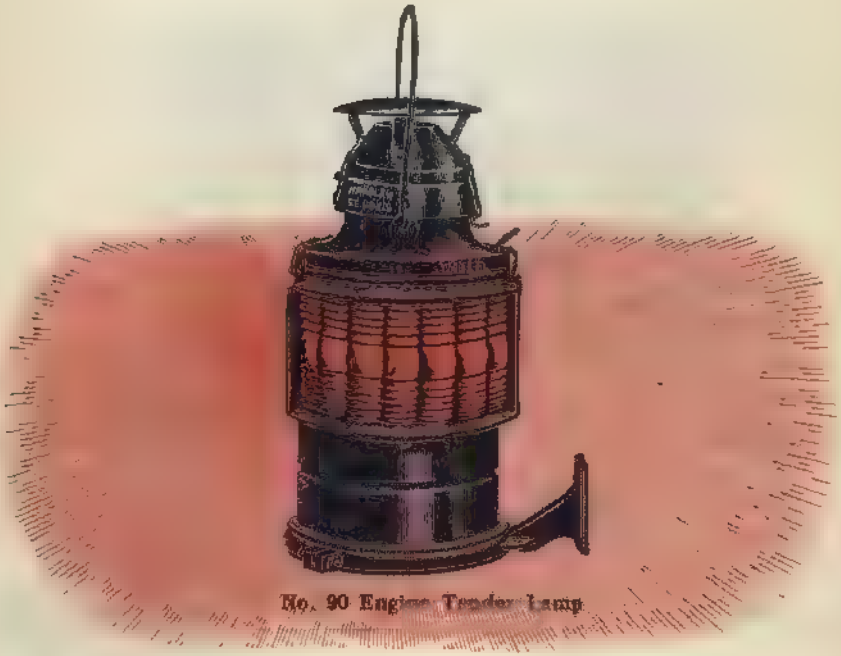
Handlan Electric Tail End Markers



No. 92

Anticipating the demand for markers to be lighted by electricity the above cut shows the arrangement for this purpose

Handlan Radius Engine Tender Lamps



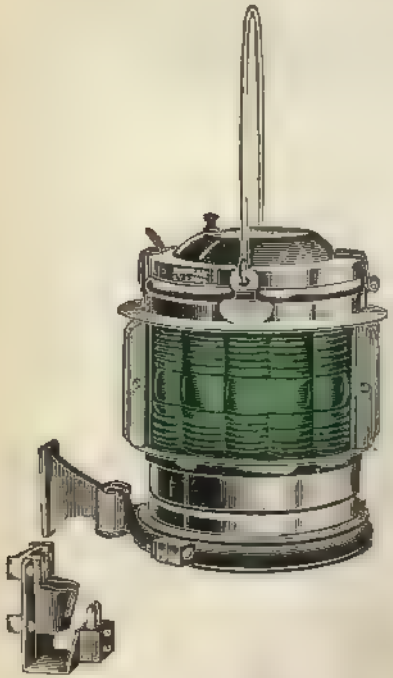
No. 90 Engine Tender Lamp

Showing Full View of Red Radius Lens Covering a Radius of 130 Degrees

Lamps are equipped with the Handlan top draft ventilation, which is so constructed as to prevent rain cinders, road dust or snow from entering interior of lamp or of clogging up the free passage of air. The intake air passages are constructed so as to prevent sudden gusts or high winds from entering interior of lamps. Such overcharges are forced into the outer air through the hot air vents.

See page 140, describing lenses

Handlan Engine Lamps



No. 114

No. 114

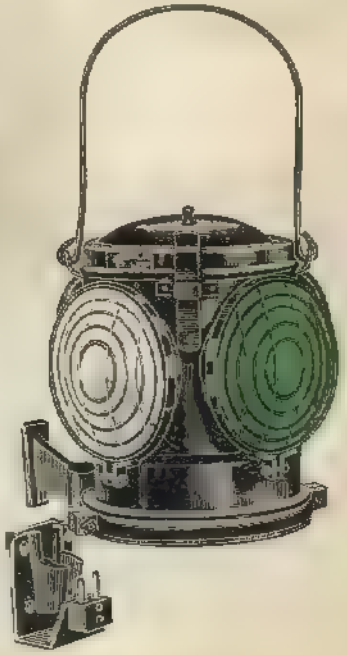
For Electricity Only

With one white radius lens and one green radius lens; interior blind obscuring lens not in use; no inner glasses or fixtures; blind operated from exterior of lamp at base; automatic electric connection made when placing lamp in socket.

See page 140 for description of radius lens

No. 85 Engine Lamp

With two each white and green Spreadlite lenses; interior shield obscuring lenses not in use; no inner glasses or fixtures; shield operated from exterior at bottom



No 85

Handlan Engine Lamps

No. 24

No. 24 Radius Engine Lamp

With one green and one white radius lens, an interior steel blind obscures one lens while other lens is displaying the desired indication, No. 00 Signal burner, outside wick raiser.

No. 109 Tender Tail Lamp

With one 5¾-inch red lens; No. 1 signal burner, outside wick raiser

No. 109

Handlan Emergency Headlights

No 127

No. 127 Emergency Headlight

With one 6¾-inch white semaphore, 31-ounce oil fount, No. 1 Signal burner and nickel plated reflector; has sheet steel pocket for attaching to bracket on engine or with two wrought iron hooks instead of pocket.

No 117

No. 117 Electric Tender Tail Lamp

With one 4½-inch red lens

Handlan Engine Lamps

No 68

No. 68 Engine Lamp

Flaring Base — For Oil Only

With two 5⅜-inch white lenses and two 5⅜-inch green lenses, interior steel blind obscuring lenses not in use.

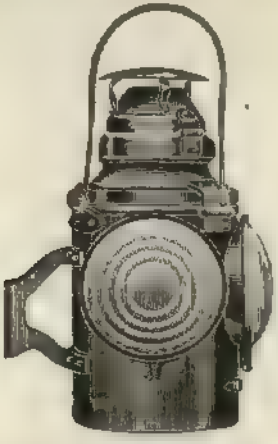
No. 82 Engine Lamp

For Oil Only. One-Piece Body

With two 5¼-inch white Spreadlite lenses and two 5⅜-inch green Spreadlite lenses, interior steel blind obscuring lenses not in use; no inner glasses or fixtures; simply and durably constructed; steel blind operated outside of lamp

No 82

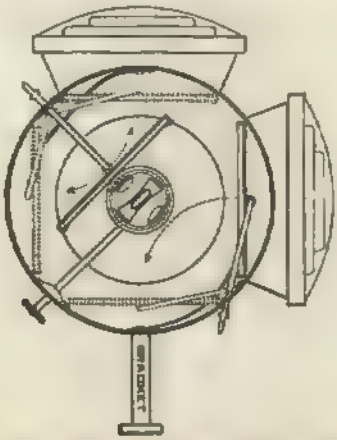
Handlan Engine Lamps



No. 157 Wells Engine Lamp

For Oil Only

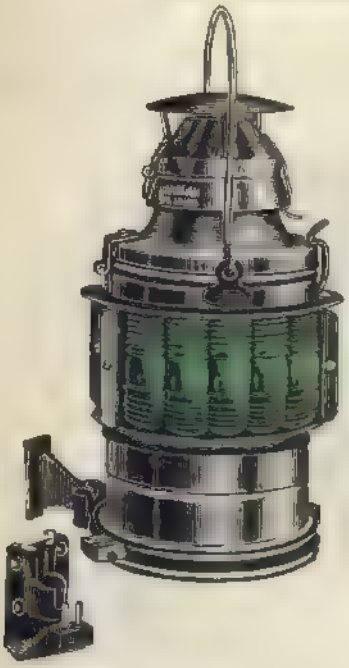
The special features of this improvement are the use of lenses of required size and color, together with wings, or frames, holding colored glasses which when not in service are retained inside of and against the casing of the lamp, but may be revolved from the outside and interposed between the lens and burner by simply moving the smaller levers projecting outside the lamp, avoiding any necessity for turning, removing, or even opening the lamp—the action being simple but positive, and readily understood by reference to the sectional cuts.



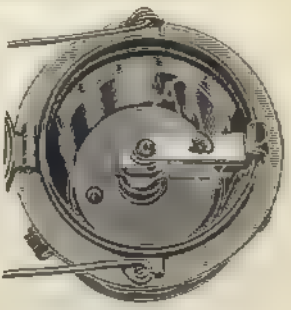
Sectional View of Two-Lens Lamp, Showing Action of Wings with Colored Glass in Changing Signal from White to Red or Green as Desired

Handlan Engine Lamps

Combination Oil and Electric with Radius Lenses



No. 73



No. 73

Electric connection is made automatically when placing lamp in socket; top opening easily to clean; equipped with radius lenses, one each green and white; interior steel blind obscuring lens not in use

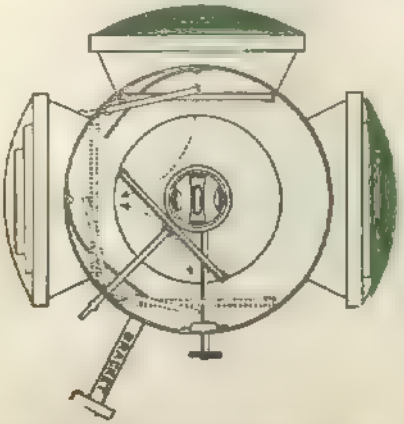
Handlan Tail Lamps

Handlan No. 161 Tail Lamp

Lamps are made with lenses of any desired colors or sizes, and arranged to effect any combination of signal wanted

Workmanship strictly of the highest character, and materials the best obtainable, cases being of cold rolled steel tinned and japanned.



Sectional View of Three-Lens Lamp Showing Action of Wings with Colored Glass in Changing Signal from White to Red or Green as Desired.

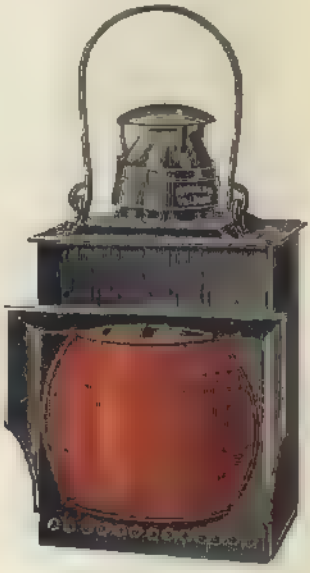
Handlan Tail Platform Lamps

No. 63 Tail Platform Lamp

With 8-Inch 90-Degree Red Lens and Standard Handlan Ventilation

Plainly visible on the sharpest curves. Reliable and efficient rear end protection

No. 63
Side View



No. 63
Front View

For Passenger Service

Our lamp is equipped with a special radius lens, which is vastly more efficient than the old type of fresnel lens as used aboard ships and steamboats. It displays a powerful red signal covering 90 degrees. The surest and safest protection for rear end of train

Handlan Cupola Lamps

No. 64. Caboose Cupola Lamp

No. 64
Front or Rear View

No. 64
Side View

With 8-Inch 90-Degree Lenses

Displays an indication around the sharpest curves. Reliable and efficient rear end protection.

For Freight Service

Lamp is equipped with a special radius lens of the same type as used on our No. 63 tail platform lamp. It throws a wide shaft of light, spreading illumination covering a radius of 90 degrees. The lamp is made of heavy cold rolled steel and is mounted on top of cupola permanently. Signals are made by adjustment from inside of caboose.

American-LaFrance Motor Fire Apparatus at Camp Dix, Wrightstown, N. J.

THE NATION'S EFFICIENCY IN THE PRESENT CRISIS

The nation's efficiency in the present crisis depends upon the ability of its industries to produce war materials and supplies, and to continue to do so without interruption.

The burden of protecting the industries of the country against delays and stoppage of production by fires rests upon the Fire Departments. Fire Departments efficiency depends largely upon the reliability and quality of its Fire Fighting Apparatus. *The Best is None too Good.*

Up to this date this company has furnished the United States Government with the following motor fire apparatus:

18 Pumping Cars
38 Chemical Engines
6 Combination Cars
1 Service Truck

—as well as some 200 hand-drawn chemical engines and several thousand hand extinguishers.

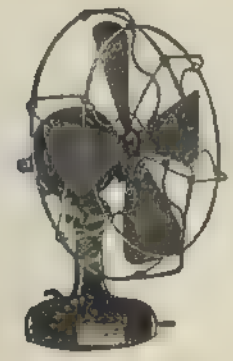
ELECTRIC FANS

"CARLETON"

The breeziest small fan on the market for the money. Electrically and mechanically perfect. Construction is the best possible Bronze bearings finished in black enamel Blades, guards and all bright parts heavily nickeled on brass. Unique joint permits every conceivable adjustment, including swiveling when used in wall bracket position Has Universal Motor using either direct or alternating current



Desk and Bracket

Three Speed

No. 8DB—8 in., 100 to 120 volt...Each $15 00

No. 6DB—6 in., 100 to 120 volt...Each 12 50

Packed One in a Case

Oscillating

Noiseless gear drive and oscillates on ball bearing.

No. 80—8 in., 100 to 120 volt.....Each $21 50

Packed One in a Case

ELECTRIC FANS

"DURABLE DAYTON"

Will throw more air and has a greater efficiency than any other fan of equal size. Has bronze bearings and switch, giving three speeds of wide range. The motor frame and base are black enamel. Blades and guard polished brass. The "Desk and Bracket" type have simple adjustment, so they can be turned to bracket position without the use of additional parts They also swivel to any angle sidewise The "Oscillating" type is same as the "Desk and Bracket" with the addition of the oscillating mechanism, which is simplicity in itself being only two worms and worm wheels, a crank plate and crank rod with necessary shafts, bearings, etc "Durable Dayton" fans will operate on voltages within 10% of rated voltage

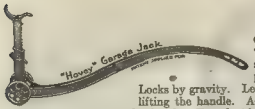
All the lamps listed above are selected for amperes and are labeled for use, five in series, on above Voltages.

All shipments of Hygrade lamps are guaranteed to pass the U. S Government specifications as given in latest bulletins of the Bureau of Standards.

HOVEY.

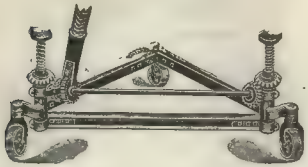


Operates by merely "kicking up" movable head and depressing handle. Locks by gravity. Lets down by merely lifting the handle. Adjustment is made by the foot and not the hands. Four foot handle gives ample leverage. No screwing or lever-pumping on hands and knees. Not conveniently carried away as a souvenir. No springs or delicate parts to break or wear. Made of malleable iron and open hearth steel.

Each

No. H—Garage Jack, weight each, 18 lbs. **$16.00**

PRATT THREE WHEEL.

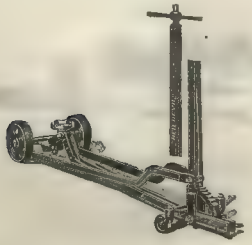


Constructed throughout of steel and malleable iron. Ball bearing, strongly built to stand hard service. Simple and easy to operate by ratchet lever device. Equipped with hinged joints so that when not in use or in shipping may be folded into small, compact package.

Each

No. 12—Garage Jack and Turn Table; shipping weight, about 50 lbs. **$23.50**

RED DEVIL.



Operates with any car at front, rear or side, regardless of bumpers, tires, tanks, tops or running boards, or any projections. Adjustable to any height of axle or differential housing by foot control from standing position.

Each

Red Devil Dolly Jack; weight each, 125 lbs. **$72.00**

WEAVER AUTO TWIN JACK.

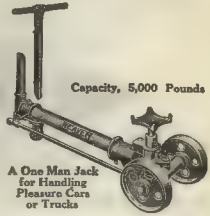
The Weaver Twin Jacks are scientifically constructed, substantial and safe. Ball bearings are used where friction is liable to occur. A malleable iron and steel construction insures the maximum of strength.

Each

No. W1—Garage Track and Turn Table; weight each, 45 lbs. **$30.00**

WEAVER NEW-WAY JACK.

The wheels pivot and are guided and controlled by the handle. It is possible to manipulate it in a very limited space and to place it quickly and accurately in any desired position under the car. Easy of operation and ideal for truck service. Operates on the ratchet principle and the long lever handle provides ample leverage. The wheels are large and equipped with roller bearings.

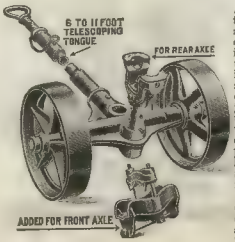


Each

Weaver New-Way Jack—Weight each, 100 lbs. **$70.00**

AUTO AMBULANCE.

WEAVER.



The Weaver Auto Ambulance is the only thoroughly practical and universal device ever perfected for pulling disabled cars to the repair shop. Readily attached to either axle; easily handled by one man; quickly adjusted. The height of the standard may be varied as conditions demand by a heavy pin or key and the length of the tongue may be varied at will from 6½ to 12 feet.

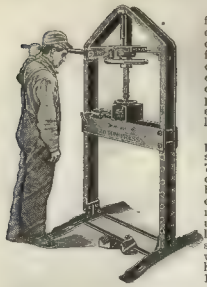
Cars cannot bounce off. The wheels are of cast steel and very strongly designed. They are 14 inches in diameter with 3-inch face. Can be used on country roads with entire satisfaction. Broad roller bearings permit heaviest loads to be towed with little energy. The construction throughout is extremely strong but designed so as to eliminate all unnecessary weight. The telescoping tongue is of double strength steel tubing; 1¼-inch steel axle extends entirely through the frame; malleable iron saddles; 20-inch tread.

Each

***Weaver Auto Ambulance**—Weight each complete, 135 lbs. **$72.00**

FORCING PRESSES.

WEAVER 20-TON.



Used in auto repair shops for straightening shafts or axles, pressing bearings or hubs in or out of wheels, forcing gears or bushings on or off and for many other operations which are usually crudely performed by improvised means at a great expenditure of time and labor.

Frame constructed of one piece heavy 5-inch channel steel, painted green; height, 74 inches; floor space required, 36x36 inches; width between frames, 32 inches; cast iron hand wheel 15 inches in diameter carried upon ball bearings; pressure leverage is 1500 to 1; the screw is 2 inches in diameter with 3 pitch Acme thread, has a range of movement of 12 inches; the thrust of the screw is direct against heavy bronze thrust bearings; the screw does not revolve; the bolster which carries the plate is adjustable up to 48 inches which permits work 44 inches long to be placed between the bolster and the screw. Each press furnished complete with a pair of vise blocks for holding round and irregular pieces and two channel blocks for supporting gears, etc.

Each

Weaver Forcing Press; capacity, 20 tons; weight each, 425 lbs. **$153.00**

PULLER CLAMP.

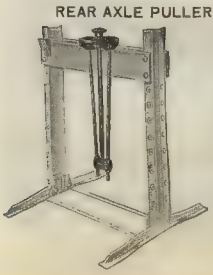
Designed especially for service with the Weaver 20-ton forcing press. An extremely simple device which can be used to particular advantage and with safety in pressing off ball races, delicate gears, etc., which are so situated that they cannot be handled by the usual method of supporting them from underneath.

Each

No. PC8—Weaver Puller Clamp; small size; 9-inch plate; weight each, 10 lbs. **$12.00**

No. PZ16—Weaver Puller Clamp; large size; 16-inch plate; weight each, 24 lbs **20.00**

REAR AXLE PULLER FOR FORDS.



Designed exclusively for service with the Weaver forcing press and is an item of equipment which is almost indispensable in the shop doing Ford repair work.

Each

Weaver Ford Rear Axle Puller; weight each, 35 lbs. **$20.00**

AUTO HOISTS.

WEAVER.

Heavy 5-inch channel steel with the arch reinforced on either side by heavy steel plates ⅜x4 inches. The lifting chains are extremely heavy and carefully tested 5-inch casters, full roller bearing, spindles revolve on two sets of ball bearings. Lifting leverage, 200 to 1. Minimum height, 7½ feet, maximum height when extended, 9 feet; width between frames, 6½ feet. Recommended capacity, 3,000 lbs. with double suspension and 2,000 lbs. with single suspension.

Each

Weaver Auto Hoist; weight each, 560 lbs. **$250.00**

TRUCK HOIST.

WEAVER.

Made of very heavy "I" beam stock. Lifting capacity, 6,000 pounds for double suspension and 4,000 pounds for single suspension. Worm gear lifting leverage, 400 to 1. An auxiliary lever operated directly onto the drum enables the chain to be adjusted to the load very rapidly. Width between frame, 8 feet 4 inches. Minimum height, 8 feet 4 inches; maximum height, 10 feet.

Each

Weaver Truck Hoist—Weight each, 900 lbs. **$500.00**

AXLE STAND.

WEAVER.

A stand which will handle any of the many different types of rear axles now in service and will facilitate convenient and rapid work. The cast brackets are made to withstand severe abuse. The design throughout carries extreme strength and simplicity.

Each

Weaver Universal Axle Stand; weight each, 135 lbs. **$72.00**

WIRE REPAIR STAND.

WEAVER.

For facilitating replacing broken spokes, tightening loose spokes and properly aligning and truing the wheel. Convenient revolving cabinet on the center standard of the stand will accommodate a great variety of spare spokes. Main standard is heavy steel tubing supported by a broad iron base, which gives ample foundation for handling the heaviest wheel. A tool tray carried directly under the wheel keeps the necessary wrenches, etc., within convenient reach.

Each

Weaver Wire Wheel Repair Stand; weight, 60 lbs. **$60.00**

5346 MOTOR STAND.

CONTINENTAL.

F. O. B. Columbus, Indiana.

Can be securely locked at any desired position or angle. It is a universal stand and will handle all types of motors. An engine on the stand is properly supported so that the mechanic can turn it to any position so that work is convenient and good light available. There are no parts to interfere with getting at the motor. Everything is in easy reach, and as you will note in the illustration, any part of the motor may be removed without shifting or changing. Both ends of the motor are instantly available. The stand being portable, is easily moved from place to place.

Each

***Continental Motor Stand**—Length over all when fully extended, 48 inches; width, 35 inches; extreme height, 37 inches; minimum height, 32 inches; weight packed for shipment, 290 lbs. **$108.00**

***Continental Motor Stand with Ford Attachment**—A complete Ford unit power plant can be fastened in motor stand with this attachment. **116.00**

ENGINE STAND FOR FORD.

CONTINENTAL.

You can place a complete Ford unit power plant and tear it down to the stripped cylinder block and rebuild it without having to change its position in the stand. After the complete motor is placed in the stand it can be turned to any position and firmly locked. The complete engine is held absolutely rigid and is firmly clamped to the stand by a bracket on each side of the motor.

Each

***Continental Ford Engine Stand**—Height, 34 inches; weight packed ready for shipment, 115 lbs. **$68.00**

AXLE STAND.

CONTINENTAL.

The axle is placed on the Continental Axle Stand and clamped firmly in position on the adjustable vise. The taper of the housing is taken care of by this adjustment. The axle is at a convenient height to work on and the mechanic has everything at his finger tips. The axle may be torn down, whether semi-floating, three-quarter floating or full floating construction without unclamping it from the stand. The grease pan takes care of the old grease and oil and the tool tray makes a convenient place for the operator to keep wrenches and other small tools. The chain vise will take care of all sizes and types of axles and being adjustable conforms to the shape of the housing. The support opposite the vise locks in position when in use and when separating a semi-floating axle it may be unlocked and dropped down so as to allow one housing to be readily removed.

Each

***Continental Axle Stand**—Heavily constructed; height, 34 inches; takes up floor space 12x22 inches; shipping weight each, 145 lbs. **$76.00**

Shipped knocked down, crated flat.

RADIATOR STAND

CONTINENTAL

To repair and solder radiators it is necessary to get them to practically every possible position. The Continental Radiator Stand was designed with this in view. With the radiator turning in two different directions it is possible to get any part to a level position. In getting the radiator to any desired position, the outer frame revolves with its axis of rotation in one direction while the inner frame revolves with its axis of rotation in the opposite direction, and either frame can be firmly locked in any position. Being portable, it is not necessary to take the radiator off the stand in testing for leaks.

The clamps are covered on the ends with rubber so as to not injure the most highly finished radiators and the supports are made of wood for the same reason. There are no obstructions whatsoever in the mechanic's way. It is constructed of structural steel, and although light, is amply strong to handle the heaviest truck radiator.

Each

***Continental Radiator Stand**—Height, 34 inches; occupies floor space 24x26 inches; portable and easily moved from place to place; shipping weight each, 150 lbs. ... **$55.00**

Shipped knocked down, crated flat.

***For factory shipment only.**

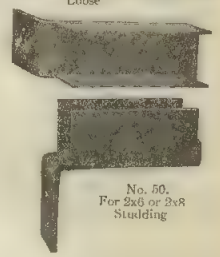
WAGNER STUDDING SOCKETS

The All-Purpose Sockets for Cement Floors

The Only Way to Attach Studding to Cement Floors and **Do It Right** is to Use Galvanized Iron Sockets. This Method Unfailingly Assures Strong Windproof Buildings that Cannot be Undermined by Rot.

The Wagner Studding Socket is the Only All-Purpose Socket on the Market. One Style of Socket is Used for Corners, Intermediate Studdings, etc.

No. 10.
For 2x4 or 2x6 Studding

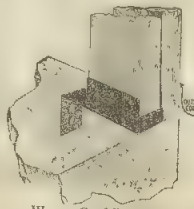


No. 50.
For 2x6 or 2x8 Studding

The Wagner Socket Gives Perfect Results anywhere it is Used. No. 10 will Take a 2x4 or a 2x6 equally well, and No. 50 is Used for 2x6 or 2x8 Studding.

Socket is Set in Place on the Soft Cement with the Elbow or Angle Inside. Spikes are then Driven Through the Holes in the Bottom into the Cement.

When the Cement is Hard, Timbers are Inserted Between the Uprights "B" and are Bolted or Screwed Solidly into Place Through the Three Holes in the Side.



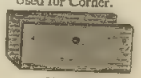
Wagner Studding Socket as Used for Corner.

For Corners the Studding is Set in the Wagner Socket two inches Away from the Corner, and the Corner Piece then Spiked or Bolted onto this studding which Brings it Flush with the Edge, and the Result is a Strong, Sturdy Corner that will Stand all Kinds of Strain.

These Sockets are Made of Tough Iron, **Galvanized** with High Grade Zinc Spelter and will Resist Rust for Years.

No. 50 is the Same Type of Socket as No. 10, but is Somewhat Heavier and Larger, being Intended for Building Barns and Large Buildings where Either 2x6 or 2x8 Studding is Used.

No. 25 is the same as No. 10, Except it is Made without the Elbow or Angle that Extends Down into the Cement and is Intended for Holding the Studding of Partitions where so Strong a Brace is not Required as for the Outside Frame of a Building. It is Set on Top of the Fresh Cement and Firmly Held by Spikes.



No. 25.
Studding Socket for Partitions

	Per Dozen
No. 10—Wagner Studding Sockets, for 2x4 or 2x6 Studding, Weight per dozen, 21 lbs.	$5.00

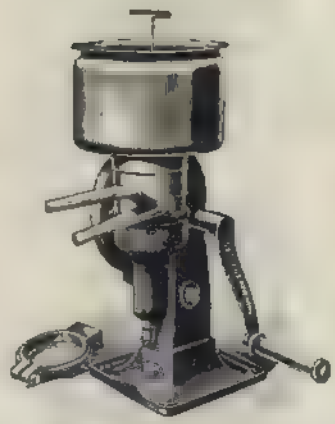
CREAM SEPARATORS

CHAMPION



No. 25

Nos. 30 and 50

Nos. 70 and 85

The Champion centrifugal cream separator represents equal uniformity in the feeding of the whole milk from the supply to the disks or the thin spaces between the disks to the extent that each and every disk in the bowl does its equal and full proportion of skimming. The Champion patented perforated distributing and equalizing sleeve, (see illustration below) brings these results.

The Champion perforated distributing channels consist of a corrugated sleeve placed over the central slotted hollow feeding post, through which, as is usual, the whole milk is fed in at its upper end. The milk then descends in the hollow feeding post through the slots until it enters the distributing and equalizing perforated channels, formed by the corrugations in the sleeve; and with the centrifugal action the whole milk is forced uniformly over the surface of the inner side walls of the corrugations or channels, and through the length of the channels before it reaches the perforations through which the whole milk is introduced to the separating disks, or the thin spaces between the separating disks.

Thus it is uniformly and evenly distributed through the entire length of each channel before reaching the perforations, and the pressure and supply of the whole milk will be uniform at each perforation which insures an equal supply of milk to the spaces between each and every separating disk in the bowl which positively prevents the fault of some of the disks obtaining more milk under greater pressure than other disks, as found in other separators, which is bound to occur in a centrifugal separator where the whole milk has a direct body flow to the disks in the bowl.

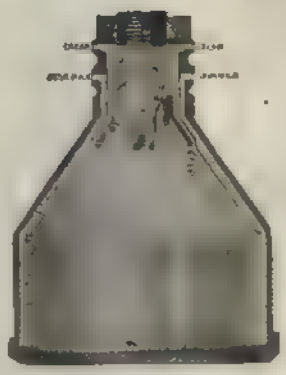
This wonderful invention revolutionizes the centrifugal cream separator in many respects:

First, with every disk skimming its equal and full proportion of milk, the separation of cream is more complete, and besides it requires less disks to skim clean our guaranteed specified rated capacities.

Second, with less disks, the size of the bowl is lower, smaller and lighter, therefore is positively lighter running.

Third, with less disks, smaller bowl, lighter weight, and with the bowl loosely connected on the upper end of the spiral shaft, practically eliminates all danger of the bowl ever getting out of balance.

Fourth, with a skimming device of simplicity, solidity, and compactness that represents when in operation practically one solid piece of metal at the same time, the most hygienic and sanitary for each and every piece can be separately washed with water and brush.



The Champion "Patented" Separator Bowl, as shown in the above transparent interior sectional illustration, represents and shows the whole milk flowing equally and uniformly through the perforated distributing channels to each and every separating disk from the top to the bottom of the bowl, illustrating as nearly as possible the action of the whole milk, entering the bowl, with the cream and skim milk leaving the bowl.

This illustration shows the Champion gearing clutch, spiral shaft and spiral gear. The gearing in its entire construction is the very highest grade of materials and highest skilled workmanship. The large gear, as well as the pinion, are cut with helical teeth, thus guaranteeing the best possible gearing that can be produced for strength, quiet running and ease of operation.

The pinion and entire clutch is made of the best grade steel case-hardened. The spiral shaft is also high-grade tool steel. The spiral wheel is the best grade of phosphor bronze, and is cut with helical teeth, insuring the longest possible life by being able to adjust.

Automatic Side Crank Engines

Trimmings—A complete set of nickel-plated glass oilers, sight-feed lubricator, throttle valve and two cylinder cocks.

This engine, like our side crank throttling governor engine, is built for heavy duty and for continuous service. It is automatically governed by an improved device within the fly wheel. The speed of the engine is regulated either by increasing or diminishing the tension of the spring or by changing the position of the weights upon the arms. The best regulation possible can be obtained and the governing of the motion is at all times reliable.

This engine has balance valve.

The valve must be well lubricated with high grade oil, and the gland at end of steam chest evenly and well packed, otherwise the wearing parts will become dry causing an uneven motion of engine.

This engine has extra heavy shafts and long bearings.

GASOLINE GAS LAMPS

✣COLEMAN AIR-O-LITE

The Light that comes from common gasoline. No smoke, no smell, no dirty chimney, no greasy wicks. Fill them once a week; clean them once a year.

They give a very Bright White Light, no Danger if upset, so Constructed that they cannot explode. Simple and easy to operate, no delicate parts to get out of order.

READING LAMP

Brass, Heavily Nickel Plated; Fitted with a Special Size Holder that accommodates most [illegible] with 10 inch Opal Ribbed Shade; Capacity [illegible] Pints; Burns 16 to 18 hours; quick Removeable Filler Cap; Automatic Cleaner with Gas Tip; Universal Shade Holder; Equipped with Pump, Torch, Wrench, Hanger, Extra Strainer, Extra Wick and Tools for inserting.

Each

No. M307—Weight 10 Lbs. $12.00

One in a Carton

READING LAMP

Designed for Lighting Stores, Churches, Schoolhouse, Home [illegible] It is Composed of two separate Air-O-Lite Burners, Either One or Both of which can be lighted as desired.

Each

✣No. P307—Fount made of 18 Gauge Brass Heavily Nickeled; Capacity 6 Pts.; Supplies both Burners 16 to 18 hours; Opal Ribbed Shades; Equipped with Pump, Torch, Wrench, Hanger, Extra Wick and Instructions; Weight 16 Lbs. $21.50

One in a Carton

KEROSENE GAS LAMPS

COLEMAN KER-O-LITE

Ker-O-Lite is a pressure lamp making its gas from kerosene instead of gasoline. It operates on the same principle as the Air-O-Lite, uses two small rag mantles and gives just as bright a light. It requires more frequent cleaning because kerosene is a heavier oil, but to make this easy the Ker-O-Lite is constructed with a quick detachable generator.

Equipment furnished with each lamp—2 Mantles, Lighter, Pump, Wrench, Hanger, Extra Generator and Set of Cleaning Tools for removing old and inserting new filter.

Each

✣No. K307—10 inch Ribbed Opal Shade; 8 in. Nickel Plated Brass Fount; Fount Capacity 4 Pints; Height 22 in.; Produces a light equal to 300 Candles; Shipping Weight 10 Lbs..... $11.00

One in a Carton

One in a Box

COLT AUTOMATIC PISTOLS

The Action of all Colt Automatic Pistols is Automatic, Except the Gun Must be Pulled to [illegible] by the Hand, Bringing the First Cartridge into the Chamber. On Pulling the Trigger the Gun is Fired, the Empty Shell is Extracted, and a new Cartrige Loaded into the Chamber, All These Operations Taking Place Automatically Without Manipulation of the Parts. The Automatic Operation of the Pistol Does not Relax the Grip of the Hand, and Does Away with the Recoil Motion, Thus Enabling Repeated Shots to be Fired Quickly Without Disturbing the Aim. The First Shot can be Discharged More Quickly than from any Arm Made, as this Pistol can be Carried with Perfect Safety while the Hammer is at Full Cock.

POCKET MODEL

HAMMERLESS

Safety—Besides the Safety in the Action, which Does not Permit Hammer to be Released Unless Action is Fully Closed, this Arm has Two Additional Operating Safeties.

(1) The Slide Lock Indicates When the Arm is Cocked and, when Engaged in the Slide Cut, Disconnects the Trigger from the Operating Mechanism, but can be Readily Drawn Down by the Thumb When One Desires to Shoot.

(2) An Automatic Safety, also Acting as an Indicator, Locks the Action Until the Handle is Firmly Grasped when Pulling the Trigger.

It will thus be seen that here are Two Indicators Showing when the Hammer is Cocked; and there are Two Safeties, Either of which is Absolutey Positive, One of which is Automatic.

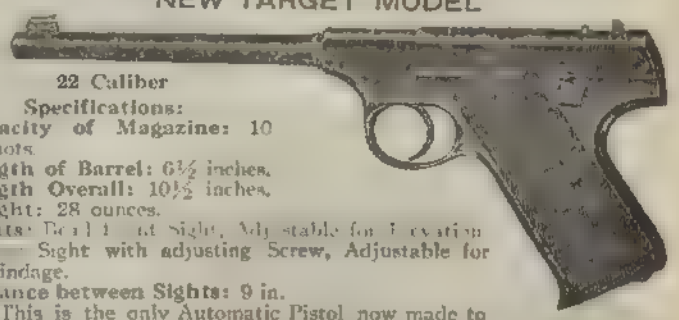
NEW TARGET MODEL



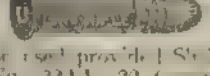
22 Caliber

Specifications:

Capacity of Magazine: 10 Shots.
Length of Barrel: 6½ inches.
Length Overall: 10½ inches.
Weight: 28 ounces.
Sights: Bead Front Sight, Adjustable for Elevation. Rear Sight with adjusting Screw, Adjustable for Windage.
Distance between Sights: 9 in.

This is the only Automatic Pistol now made to handle the Standard Caliber .22 Long Rifle Cartridge, and will prove most popular with Sportsmen, Target Shots, Experts and Beginners desiring a High Grade Pistol for Practice, Amusement and Recreation.

The Pistol is equipped with a Safety Lock which, when the Arm is Cocked, may be Applied thus preventing Lock, Hammer and Slide from Moving. A Magazine Safety is provided with a Thumb Grip or Pin which Projects on the Right Side of the Frame to the Operator to Compress or Remove the Lower End of the Magazine Spring so that, loading the Magazine, a feature that will be appreciated by those who know the difficulty of loading small Cartridges.

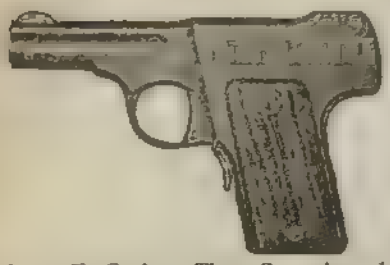


Cartridge: .22 Long Rifle, Rim Fire (Greased Cartridge, only), either Lesmok, Semi-Smokeless or Smokeless. Note: Greaseless Cartridges may be used provided Shells are Properly Lubricated.

	Each
No. 22AA—22 Caliber; Shoots the Standard .22 Long Rifle Cartridges; One in a Box	**$32 00**

AUTOMATIC PISTOLS

SMITH & WESSON



The Action of This Pistol is Automatic, Except that the Trigger Must Be Pulled to Fire Each Shot; the Cartridge Being Supplied from a Detachable Magazine in the Handle of the Pistol. On Pulling the Trigger the Cartridge is Fired, the Empty Shell Extracted and a New Cartridge Loaded into the Chamber, All These Operations Taking Place Automatically without Manipulation of the Arm. To Perform These Operations the Recoil is so Absorbed in Being Utilized that it Has no Disturbing Effect.

There are two Safeties on this Arm; one a Hand Operated Non-Automatic, engaging with and Locking the Sear, when the Arm is cocked but not fired; this safety is so located that it can be conveniently operated by the thumb of the Right Hand. The other Safety, one of the Salient features of this Pistol, being Automatic and rendering the Arm inoperative till depressed by the middle Finger by two distinct motions, one Transverse, the other Inward. Capacity of Magazine 7 shots. Full Blued Finish with Walnut Stock, with a Backing of a Steel Plate. Length of Barrel 3 inches; Length over all 6½ inches; Weight 28 ozs.

Each

One in a Box

SAVAGE

The Savage Automatic Makes the Shooting of the Novice Safe and Sure when in Combat or Hunting. **It Puts into His Hand Eleven Shots at Once and the Ability to Reload "10 Shots Quick" in One Second's Time. The Savage is of the Automatic Type in which the Recoil of Firing the Cartridge Extracts and Ejects the Empty Shell, Cocks the Pistol, Reloading it in Readiness for the Next Shot. The Trigger Must Be Pulled to Fire Each Shot. The Savage Possesses Many Points of Superiority Over Other Pocket Arms, Namely: Aims Easy as Pointing Your Finger; Fires Ten Shots Quick; Action Unusually Simple; Entire Arm Can Be Easily and Quickly Taken Completely Apart and Put Together with the Hands; Weighs from Three or Four Ounces Less than Other Automatics; Operation is Always Positive and Can Be Operated with Thumb of Firing Hand. The Only Automatic that Has an Indicator which Tells at All Times Whether Pistol is Loaded**

Capacity of Magazines 10 Shots; 4 inch Barrel; Rubber Grips; Weight 19 ozs.; Length Over All 8 ½ inches; Full Blued.

Each

No. S32AA—32 Caliber; Shoots 32 Rimless, Smokeless Cartridges..... **$27 00**

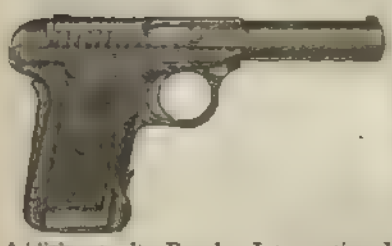
SAVAGE

With Grip Safety



The 1915 Savage Automatic Pistol in its New Form is Entirely Hammerless, with the Upper End of the Cocking Lever Covered and the Entire Top of the Breech Plug Enclosed, which Prevents the Necessity or Possibility of Cocking or Uncocking the Pistol without Retracting the Bolt.

The Pistol is Also Fitted, in Addition to its Regular Intercepting Independent Safety with a Grip Safety which Positively Locks the Trigger and Makes it Impossible to Discharge the Arm Unless the Handle is Grasped Firmly by the Shooter's Hand, and it is also Provided with a Simple and Effective Button Slide which Locks the Action of the Pistol Open when the Last Cartridge is Fired.

Each.

No. S32A—32 Caliber; Capacity of Magazine 10 Shots; Length of Barrel 3 ¾ inches, Length Over All 6½ inches, Weight 19 ozs. **$28 00**

One in a Box

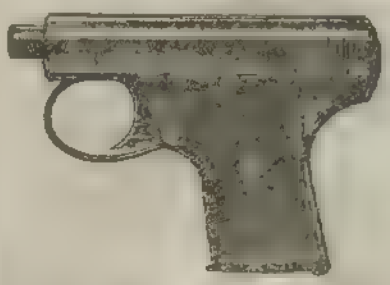
H. & R. SELF LOADING



This Pistol is Styled Self Loading, Although the Action is Automatic Except that the Trigger Must be Pulled to Fire Each Shot; Cartridges Are Supplied from a Magazine Placed in the Chamber of the Pistol. Hammer is Cocked by Pulling the Breech Lock Back Once by the Hand. On Firing a Cartridge the Empty Shell is Extracted and a New Cartridge Loaded in the Chamber; this Operation Takes Place Automatically and without any Manipulation of the Arm. To Perform These Operations the Recoil is so Absorbed Being Utilized that it has No Disturbing Effect.

A Positive Safety Lock in Pistol Lever Locks the Firing Mechanism and is Operated by the Thumb of the Right Hand. When in Normal Position the Word Safe is Visible and the Pistol can not be Discharged; By Throwing the Safety Lever up with the Thumb the Safe is Obscured and the Pistol is Ready for Instant Use. Very few parts, and so Constructed that Coil or Spiral Springs throughout Reduce Liability of Breakage to a Minimum. Capacity of Magazine 8 Shots. Full Blued Finish with Checkered Walnut Stock; Length of Barrel 2 inches; Length over all 4½ inches; Weight 12½ Ounces.

Each

No. H25A—25 Caliber; Shoots 25 Colt Automatic Rimless, Smokeless Cartridges..... **$21.00**

One in a Box

With a Filled Magazine in Place and First Cartridge is Moved into Position and the Firing Pin Cocked, the Breech Lock Back by the Hand. After the Shooter Lever is Moved Up with the Thumb the Pistol is Ready for Firing and Can Be Discharged by Pressing the Trigger. After the First Cartridge Has Been Fired the Chamber. Another Cartridge Can be Loaded into the Magazine Which Has Nine Shots at the Disposal of the Shooter. [illegible] Cartridge the Empty Shell is Extracted, the Firing Pin Cocked, and a Cartridge from the Magazine is Moved into the Chamber, the Breech Closed, all Automatically and without Manipulation of the Arm. To Perform these Operations the Recoil is Utilized, with the Result that the "Kick" usual in a Powerful Pocket Weapon is Reduced and Increased Accuracy and Rapidity of Effective Fire is Secured.

The Third Safety, Operated by the Magazine, makes Discharge Impossible when the Magazine is Removed from the Pistol. In the Automatic Pistols the Hammer or Firing Pin is Cocked after the First Shot has been Fired and there is always a Cartridge in the Chamber until the Last Cartridge Contained has been Shot. In this Pistol the Possibility of Unintentional Discharge after Removal of Magazine is Eliminated.

Each

No. H32A—32 Caliber; Shoots 32 Colt Automatic Cartridges; Length of Barrel 3½ inches; Length Over All 6½ inches. Capacity of Magazine 8 Shots; Weight Each 22 ozs..... **$26.00**

THE AUTOGLAS

PATENTED MAY 2, 1911

In our patented Autoglas we have what has proved to be the only comfortable goggle and only efficient eye protector. On the market only two years, it has taken its place throughout the world as the most desirable article of its kind ever made and every one sold is an advertisement that sells others.

The Only Comfortable Goggle — The Only Efficient Eye Protector

The Autoglas is made to conform to the shape of the face and nose, all dust and even wind is excluded, and absolutely unobstructed vision is provided. There is no uncomfortable elastic or cheek binding, the goggle being of glass except the hinged center piece and temples, which are made of good quality of gold filled and the temples are then covered with a specially prepared lining to make them easier on the ears.

THE PATENTED FEATURE—THE HINGED CENTER PIECE

which can not be procured on any other glass, in connection with four different curves of the inner edge of lenses, allows of exact adjustment to individual requirements. Being open at the sides these goggles do not heat the eyes, thereby giving the maximum ventilation and at the same time excellent protection. These goggles were originally designed as shooting glasses and are peculiarly adapted for that purpose and are used extensively by the leading trapshooters of the world as well as the leading automobile drivers. They are supplied regularly with amber colored lenses of periscope shape, with an inner grinding meniscus curve of 6 dioptres instead of best glass, and are absolutely without fuses. They may be procured also with Rx lenses, having the ordinary wearer's correction if so required, and it is in this form that we particularly recommend them to our refracting customers as **an extra item of profit** that we have created for them because no further examination is necessary when form that is already known and a copying of the Rx is all that is called for.

The Autoglas is made in four shapes, two large and two medium and a set of four for trial purposes is recommended.

Autoglas, complete with case	Each $3.50
For Plano Meniscus Autoglas dark amber and smoke	Extra, per pair 1.75

The minimum retail price on this glass, complete with case, as above described and not sold for less than $14.00, our catalog list

Automobile Goggles and Eye Protectors

ILLUSTRATIONS ARE REDUCED SIZE. PRICES EACH.

No. Z1W. The Zylbex Eye Protector. Shell frame with ventilated leather side guards and rust-proof flexible cable temples of white metal. 1¾-in round amber lenses. Much worn for motoring. A spring-lid covered steel case with each goggle.. Each $2.30

No. Z5. Zylbex Eye Glass. An unusually distinctive design in shell rims with long spring and black metal guards. 1¾-in round amber lenses. A much preferred style by women who like protection without temples Each $1.90

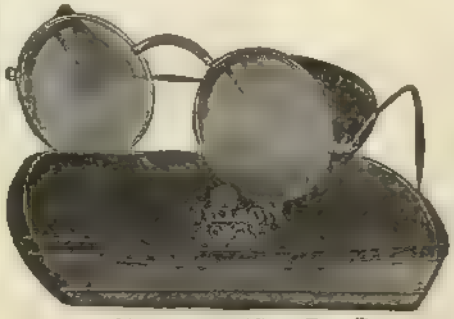
Smoke, Green, Blue or Amber Glass.	
Extra on Boston Goggles	Each .50

The Engineer's Goggle.
No. 722S

This well-known goggle is extensively used as a protector by railway men and engineers. It has the largest possible range of vision and fits all around the eyes and face, excluding all dust, cinders, etc., although fully ventilated.

With white lenses	Each $2.50
With extra heavy white lenses for stone cutting	Each 2.50
With electric smoke lenses for furnace workers	Each 2.50



No. A1 The famous Albex Eye Protector. The most popular style ever designed, ventilated leather side guards, flexible cable temples, adjustable brace ridge, and 1⅜ inch round lenses in amber and clear. Used by autoists, machinists, grinders and railroad men everywhere. Each goggle in a spring lid covered style case. Each $1.90

Albex Folding Goggle, each pair packed in a seal grain case for vest pocket. This new folding goggle is self adjusting and perfectly comfortable. While affording the best protection from glare, dust and wind, it is so light in weight that it can be worn constantly without discomfort. Glazed with Fieuzel, amber, smoke and clear mi-coquille lenses, 2 inches in diameter.
Each $1.00

CONCRETE MIXERS

LANSING

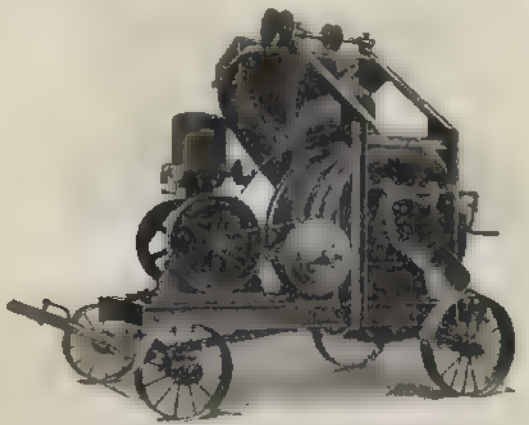
No. 10 with Power Side Loader and Water Tank. Gasoline Power.

Capacity of drum—Wet-mixed concrete per batch 8 cu. ft.; unmixed materials 10 cu. ft. Rating: Mixed concrete per hour, 40—8 cu. ft. batches 12 cu. yds.; 50—8 cu. ft. batches 15 cu. yds.; 60—8 cu. ft. batches 18 cu. yds.

Regular equipment: On steel trucks, standard wheelbarrow hopper, steel engine housing, team pole and set of tools. For optional equipment see below. Weight 4200 lbs.

No. 10 Regular—With 5 H.P. gasoline engine.....Each $1075.00

No. 10 Power Side Loader—With 6 H.P. gasoline engine and closed automatic water tank, weight 5540 lbs.....Each $1400.00



Housing removed to show power Connection.

No. 15 with Power Side Loader and Water Tank. Gasoline Power

Capacity of drum: Wet-mixed concrete per batch 12 cu. ft.; unmixed materials per batch, 15 cu. ft. Rating: Mixed concrete per hour, 40—12 cu. ft. batches 18 cu. yds.; 50—12 cu. ft. batches 22 cu. yds.; 60—12 cu. ft. batches 26½ cu. yds.

Regular equipment: same as No. 10. Weight 5500 lbs.

No. 15 Regular—With 8 H.P. gasoline engine.....Each $1600.00

No. 15 Power Side Loader—With 8 H.P. gasoline engine and closed automatic water tank, weight 7000 lbs.....Each 1975.00

Optional Equipment on Nos. 10 and 15 Mixers

Power side loader batch charging hopper, automatic water tank 8 ft. gravity distributing chute, loading platform, on skids or trucks less power, magneto, electric motor, steam engine and boiler

LIGHT WEIGHT STEEL PAVER

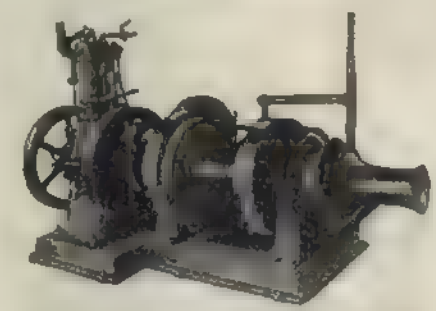
LANSING

One Bag Size

Traction forward and reverse. Cut steel sprockets, diamond roller steel transmission chain, gear driven drum, 20 gal. pressure tank. All operations—charging, mixing, discharging, spouting and moving are under one man's control. Novo or Ideal engines. Weight 5900 lbs.

No. 7—With 6 H.P. gasoline engine.....Each $1485.00

HOISTING OUTFITS



Single Drum, Single Speed, Reversible

Suitable for operating double platform material elevator and for general hoisting purposes. Drum or sheave can be operated alone in either direction, or both can be operated together. Steel cut gears, babbitted bearings, 2¼ in. steel shafting, semi-steel cast iron base, double friction clutches, foot brake with ratchet, etc. Weight 2775 lbs. Floor space 49 x 62 in. Choice of Bull Dog, Ideal or Novo engine.

No. C7—With 6 H.P. engine, drum holds 700 ft. ½ in. cable will lift 1600 lbs. 100 ft. per minute.....Each $600.00

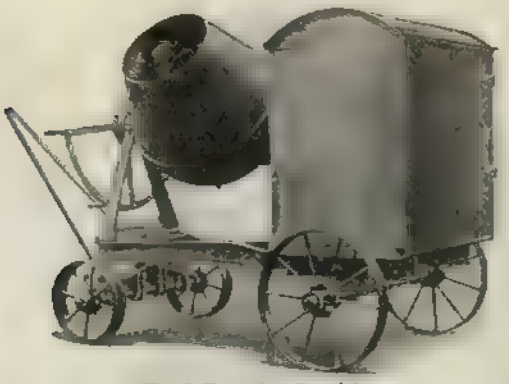
Non-Reversible Belt Hoist

For hoisting wheelbarrow loads of brick, mortar, concrete, timber and other materials. Drum will run in either direction. Its maximum lifting capacity is 1500 lbs. Operated by a belt drive, A 2 or 3 H.P. engine will run it. Gear is furnished instead of pulley, when desired, for direct connection with engine. Pushing lever forward engages the main drum, throwing it backward applies the brake. The weight on end of cable causes drum to reverse and unwind, under brake control. Weight 300 lbs. Floor space 28x38 in.

No. C8—Drum holds 250 ft. 1 in. cable, will lift 1600 lbs...Each $90.00

CONCRETE MIXERS

LANSING



No. 5 Broncho Special

This mixer is a dual purpose mixer suitable not only for the ordinary run of concrete, but equally well adapted for cinder concrete, top dressing and cement or lime mortar. For the average contractor or builder, who puts in a foundation today, a sidewalk tomorrow, and lays brick the next day, this mixer is indispensable, as it can be carried about from one job to another, doing away with slow, expensive hand mixing. Costs very little to operate and has a good capacity, as the drum holds five cubic feet of loose material at a batch, and the machine is rated at 40 yards of mixed concrete in 10 hours. This may be exceeded, depending on the size of the crew, and how far the material and concrete have to be moved. One man can run the mixer alone, although two work to better advantage, and three or four constitute a full crew.

The wheels are high, with 3 inch tires, cast hubs, staggered steel spokes, has draw pole for moving about on rough streets or country roads behind a wagon, buggy or even by hand. Weight about 1500 lbs. The engine is the powerful, reliable Novo or Ideal, and is covered with a substantial steel housing, completely covering the engine and all drive sprockets and chain, which keeps the dirt, dust, and weather away from the vital parts.

Capacity per batch: Unmixed materials, 5 cu. ft.; mixed concrete, 4 cu. ft.

No. 5 Broncho—With 2½ H P. engine.....Each $410.00

No. 5 with Standard Wheelbarrow Hopper

For sidewalk construction, curbing, small foundations, or any job not requiring over 30 or 50 cubic yards a day. The illustration shows regular equipment, but can be furnished with all practical attachments as specified below.

Capacity per batch: Unmixed materials, 5 cu. ft.; wet mixed concrete, 4 cu. ft

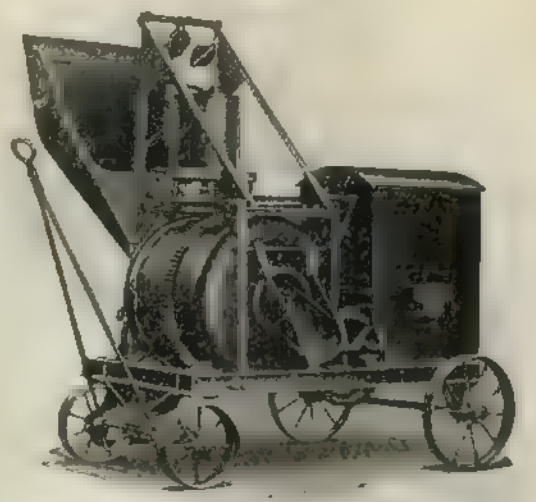
Capacity per hour of mixed concrete—with standard wheelbarrow hopper 4 cu. yds. Weight 2000 lbs

No. 5 Regular—With 2½ H.P. gasoline engine.....Each $475.00

Extras

Power side loader (4 H P. engine furnished), batch measuring hopper, automatic water tank, silo hoist, rotary pump, 8 ft. gravity discharge chute, magneto, team pole, higher wheels, wagon tread for country use, electric motor.

LANSING



No. 5 with Power Side Loader and Water Tank

Where speed and big capacity is an object, or where help is scarce and expensive, the power loader is a great time and labor saver. It nearly doubles the output, as one batch is prepared while the other is mixing. No lost time or waiting, as one batch follows the other through the drum in quick succession. The water tank is of the open type and 11 gal capacity It automatically measures the amount of water required for each batch, and should be specified on every mixer equipped with power loader.

Capacity per hour with power loader or batch charging hopper, 7 cu. yds. Weight 2400 lbs. The same extras as on No 5 Regular can be furnished

No. 5 Power Side Loader—With 4 H.P. gasoline engine and open automatic water tank.....Each $675.00

No. 7 with Power Side Loader and Water Tank. Gasoline Power.

A very portable mixer, well balanced and handles a bag of cement at each batch. Popular on small and medium sized jobs, where the expense of moving and operating a larger mixer is prohibitive The levers are so grouped that one man, without changing his position, can readily attend to the charging, discharging and water supply.

Capacity of drum: Wet mixed concrete per batch, 5 cu. ft.; unmixed materials per batch, 7 cu. ft. Rating: Mixed concrete per hour, 40—5 cu. ft. batches 7⅛ cu. yds.; 50—5 cu. ft. batches 9¼ cu. yds.; 60—5 cu. ft. batches 11 cu. yds.

Regular equipment: On steel trucks, standard wheelbarrow hopper, steel engine housing, hand pole and set of tools. Weight 3000 lbs

No. 7 Regular—With 4 H.P. gasoline engine.....Each $660 00

No. 7 Power Side Loader—With 4 H.P. gasoline engine, and open automatic water tank, weight 3860 lbs.....Each 875.00

Optional Equipment

Batch charging hopper, automatic water tank, rotary water pump, loading platform, 8 ft. gravity distributing chute, team pole, wagon tread wheels for country use, silo hoist on mixers equipped with wheelbarrow or batch charging hoppers; on skids or trucks less power, magneto, electric motor.

Twelve in a Case

Weight per Case 135 lbs.

Curtis Model B Air Compressors

Fully Enclosed Controlled-Splash Oiling

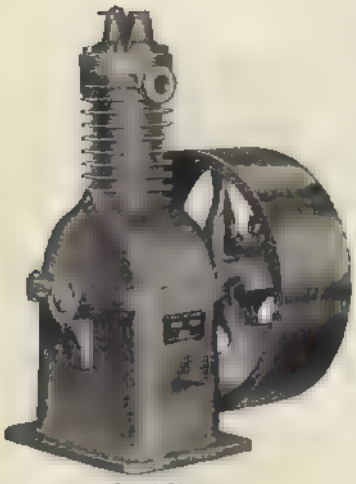

Fig. 1474

Model "B" compressors differ from our Model "A" compressors principally in the cylinder oiling feature, the Model "B" having a permanently regulated feed instead of a regulatable sight feed as the Model "A". The heads, valves, connecting rods, pistons, crankshafts and other features are exactly alike in both models The difference, however, simplifies the manufacture and reduces the cost and therefore, the selling price of the Model "B" is lower than the Model "A". The Model "B" is air cooled only and, as will be noted from the table, includes smaller size machines than the Model "A" line. These compressors are particularly adapted to such application as automobile garage and filling station service, pneumatic water systems, gas engine starting, air brush work, or anywhere where a comparatively small amount of air is required intermittently at high pressure and where a less expensive machine is desired than the Model "A"

A special bulletin on Model "B" compressor and outfits will be sent on request.

Curtis Model "B" Compressor—Data

Bore and Stroke	Standard Speed	Cubic Feet Capacity	Horsepower at 100 Pounds	Horsepower at 200 pounds	Maximum Speed	Cubic Feet Capacity	H. P. at 100 Lbs.	Size Pulley	Shipping Weight

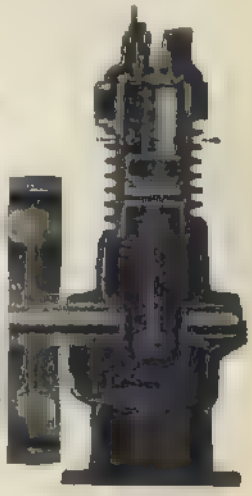

Fig. 1475

Curtis Model "A" Air Compressors

Fig 1476

Controlled Splash, Oiling Regulatable, Sight Feed

Design: The design of the Curtis compressor is the result of, and has been proven by, over twenty-five years of experience, featuring simplicity, durability, economy and efficiency. It has 80 per cent more cooling surface than any double acting compressor of the same capacity. The heads and valves being water cooled as well as the cylinder walls, increase the volumetric efficiency. The machines are self-contained, considerably heavier than other compressors of similar capacity, assuring freedom from vibration, admitting of light foundations and withstanding the excessive strains due to speed and high pressure. The automatic unloader makes the Curtis compressor especially economical and desirable for intermittent service. The controlled-splash oiling system with its regulatable sight feed of the oil fed to the cylinder, its consequent saving in oil and attention is another feature found only in the Curtis compressor. The discharge for the water circulation is taken from the heads at the other words at the highest point of circulation so that there is never any possibility of the hot water becoming pocketed or trapped in the heads, and there is no possibility of water circulating without passing through the heads.

SKIS

★DIAMOND BRAND

Whenever the Snowfall is sufficient to make good, steady Sleighing, the use of Skis in work and play is becoming popular, and in those Regions where the Snow becomes deep as it does in the Mountains and Hilly Country and occasionally on the Prairies of Dakota and Minnesota, Skis are recognized as necessities.

More Durable than Snow Shoes and allows the Wearer to cover more Ground in less time and with less fatigue.

All Diamond Brand Skis are made of Best Selected Material, thoroughly Kiln Dried, and free from Knots and Blemishes; Covered with several coats of Best Waterproof Varnish. Each Ski provided with Suction Tread Rubber Foot Rests and Best Quality Black Harness Leather Toe Straps.

All Diamond Brand Skis are patterned after the Latest Approved Norwegian Models.

Cut Shows Suction Tread Rubber Foot Rests used on all Diamond Brand Skis

Modeled on Practical, Proven Lines, Always Uniform throughout and will never Lose their Shape.

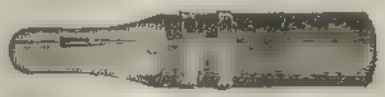
DUCK CALLS

★DIAMOND

This Call Is Made on the Same Principle as the Finest Reed Band Instruments and is One that will Call and not Scare the Ducks. A little Practice and Patience will Result in Any Novice Producing an Exact Imitation of the Call of Wild Ducks. Finest Quality; Hand Made. Each Call Tuned by an Expert. Per Dozen

No. 600—Rock Maple Shell and Reed Holder, Chemically Prepared so as to Produce a Resonant Sound, Oil Finished; Pure Silver and Bell Metal Alloy Reed; Length 6¾ inches; Weight per Dozen 1¾ lbs. **$27.00**

One Dozen in a Box

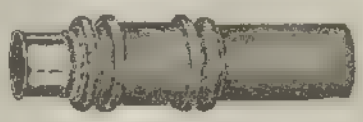


BROADBILL

Will Produce with Perfect Accuracy any Call of our Native Ducks, from the Short, Choppy Call of the Teal to the long, dignified call of the Mallard Drake. It will not Break in Tone by Loud Calling. The Call is made in Two Pieces, allowing the Reed to be Fastened Securely to One Side by the Use of a Metal Clamp. The Reed, which is Made of Select Mica, is Carefully Treated, Rendering it Practically Indestructible. Per Dozen

No. 700—Hardwood, Length 5¼ inches; Enameled Black and Yellow to Represent Duck Bill; Weight per Dozen 1½ lbs. **$15.00**

One in a Carton

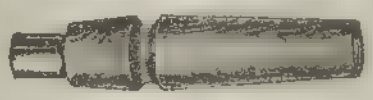


EUREKA

The Correct Principle for Calling Water Fowl is Involved in the Design of this Call. Unlike Other Calls it has a Molded Rubber Reed Holder which is Unaffected by Atmospheric or Thermal Conditions. Will Produce a Correct Quack of Ducks. Per Dozen

No. 400—Rock Maple Shell; Shellaced Finish; Molded Rubber Reed Holder, Contained in a Brass Nickel Plated Tube; Rubber Reed, not Affected by Moisture; Brass Ferrule; Length 4½ inches; Weight per Dozen 1¾ lbs. **$18 00**

One Dozen in a Box



ALLEN

DIAMOND EDGE POCKET CUTLERY

Our DIAMOND EDGE Pocket Knives are celebrated for their superior quality, style and finish. They are unsurpassed by any others. The blades are forged from The Celebrated Thomas Firth & Sons English Pocket Cutlery Steel, and are hardened and finely tempered by the most skilled and experienced cutlers. Their walk and talk is of unusual ease. Every knife is sharpened ready for use and is guaranteed free from flaws and imperfections. Any not proving so will be replaced; but we will not redeem knives that are worn out or that show abuse or when more than one blade is broken. In whetting a pocket knife use a good oil stone, holding the blade at an angle of twenty degrees, and draw towards you from heel to point. Oil the joints occasionally, as they are liable to wear rough and the blade points protrude.

Shapleigh Hardware Co., St. Louis, U.S.A.

The Above is a Fac-Simile of the Wrapper Placed Around Each DIAMOND EDGE Pocket Knife

POCKET KNIFE ASSORTMENTS

SINGLE BIT AXES
*DIAMOND EDGE
Full Polished and Etched

DIAMOND EDGE Axes are Recognized as Being the Best Made. They are Hand Tempered by [illegible] Axe Expert, by Test before Leaving the Factory. This Practically Prevents Axes with [illegible] Breaking the User. It also Insures Uniformity of [illegible] Axes Will not Hold a Fine Sharp Cutting Edge. [illegible] Cast Steel [illegible] Properly Tempered and Ground. Soft Steel Body. The Eye is punched from Solid Steel and will not Stretch nor Break, as Occurs with Axes Having a Rolled or Welded Eye. The Eye is Tapered from the Cutting to the Inner Opening; this Holds the Handle Firmly and Prevents its Splitting

SINGLE BIT AXES

*DIAMOND EDGE

(FILO DE DIAMANTE)

MEXICAN IRONWOOD

(PALOFIERRO)

DIAMOND EDGE Axes are Recognized as Being the Best Made. They are **Hand Tempered** by an Improved Process. Every Axe Carefully Tested Before Leaving the Factory. This Practically Prevents Axes with Flaws or Soft Cutting Edges Reaching the User. It also Insures Uniformity of Temper, without which an Axe will not Hold a Fine, Sharp Cutting Edge. Highest Grade **Crucible Steel** Bit, Carefully Tempered and Ground. Soft Steel Body. **The Eyes are Punched** from Solid Steel and will not Stretch nor Break, as Occurs with Axes Having a Rolled or Welded Eye. **The Eye is Tapered** from the Outer to the Inner Opening; this Holds the Handle Firmly and Prevents its Splitting.

In Ordering Axes on this Page, Give Numbers and Weights Only

DIAMOND EDGE Axe Wedge Used in All Our Handled Axes. Full Description on Page 3.

SKIS

★DIAMOND BRAND

Whenever the Snowfall is sufficient to make good, steady Sleighing, the use of Skis in work and play is becoming popular, and in those Regions where the Snow becomes deep as it does in the Mountains and Hilly Country and occasionally on the Prairies of Dakota and Minnesota, Skis are recognized as necessities.

More Durable than Snow Shoes and allows the Wearer to cover more Ground in less time and with less fatigue.

All Diamond Brand Skis are made of Best Selected Material, thoroughly Kiln Dried, and free from Knots and Blemishes; Covered with several coats of Best Waterproof Varnish. Each Ski provided with Suction Tread Rubber Foot Rests and Best Quality Black Harness Leather Toe Straps.

All Diamond Brand Skis are patterned after the Latest Approved Norwegian Models.

Cut Shows Suction Tread Rubber Foot Rests used on all Diamond Brand Skis

Modeled on Practical, Proven Lines, Always Uniform throughout and will never Lose their Shape

HANGING LAMPS

A powerful outside lamp, not affected by wind or storm. It requires no chimney and gives a steady light double that of an ordinary gas street lamp at mush less cost. Has a stamped base and bail. May be filled, lighted and regulated without removing globe, and has self-extinguishing device. Gives a 22 candle power light and burns 24 hours.

Dietz Pioneer Cold Blast Hanging Lamp

No. 636—No. 3 burner, No. 9 globe, 1¼ inch wick, height over all 21½ in., green enamel finish.....Each $7.50

One in a Case

STREET LAMPS

A perfect street and platform lamp, not affected by sudden draughts or heavy winds. Produces a brighter light than gas and at a less cost. May be filled, lighted and regulated without removing the globe. Has a self-extinguishing device and may be set to burn for a certain number of hours. Gives a 22 candle power light and burns for 24 hours.

Dietz Pioneer Cold Blast Street

No. 634—No 3 burner, No. 9 globe, 1¼ in. wick, height over all 25½ inches, green enamel finish.....Each $6.50

One in a Case

PORTABLE ACETYLENE LIGHTS

MILBURN

No. 3X No. 2

The most perfect portable light ever devised. Cost from 4 to 6 cents an hour to operate. Burns more than half air, is smokeless, incandescent, absolutely storm proof, and unaffected by vibration, wind or weather. The flame can be regulated from the maximum light to a needle point. It lights instantly and requires no attention during use. Is furnished with a 15 inch non-tarnishing aluminum reflector, having a stamped steel back, which may be swung at any angle by means of a swing joint.

5,000 to 12,000 candle power. Lights 1500 feet, tank 12 x 12 x 36 inches, total height 6 ft., carbide charge 16 lbs., burns 9 to 18 hours

No. 3X—Weight 90 lbs.....Each $142.00

With Extra Cylinder.....$166.00

Similar to No. 3X except for its smaller size and candle power. Has a 12 in. non-tarnishing aluminum reflector. Cost from 3 to 5 cents an hour to operate. 5,000 candle power. Lights 1,000 feet, tank 10 x 10 x 30 in., total height 5 ft. Carbide charge 9 lbs., burns 6 to 12 hours.

No. 2—Weight 50 lbs. .. ...Each $100.00

With Extra Cylinder. 124.00

This is one of the most widely adaptable carbide lamps. The burner point is universal so it may be swung either horizontally or vertically. It is very easy to charge, due to wide mouth carbide chamber and funnel top water chamber. The lamp body is made of two seamless steel stamp ings, galvanized. The handle yoke and small parts are malleable castings. Has 6 in. reflector. Operating cost ½c per hour.

Height over bail, 11 in.; diameter, 6 in.

100 candle power, burns 6 hours.

No. 22—Weight 3 lbs.....Each $15.00

Where several small distributed lights are desired in preference to the highest power lights, or where the working area is not large, the Flarette is recommended. It is light in weight and very convenient for small work or supplementary lighting on large work. It is equipped with Standard Milburn burner and air mixing reflector holder, giving greater candle power and efficiency than any similar light of equivalent size. The burner standard is also fitted with a swing point for directing the light. Additional superior features are the Milburn carbide cylinder, which removes the spent sludge in recharging, making dumping of main tank unnecessary. Operating cost 3c per hour

Has 12 in aluminum reflector

Height over all, 7 ft.; tank 10¾ in. diam

3000 candle power, burns 12 hours.

Flarette

No. 6—Weight 43 lbs.....Each $70.00

This is one of the most useful and popular of Milburn lights. For building construction, small foundations, pits, trenches and tunnels, it is the most powerful light of its size to be found on the market. It is also extensively used in mining, by railroads and industrial plants. The clear, white acetylene light focused by its 10 in. polished aluminum reflector, may be directed at any angle by means of a double swing front on the burner pipe. An area of 40 ft. radius is brightly lighted by this lamp. The light is very simple to operate and is instantly recharged. Operating cost, 1c per hour

Height over all, 19 in.; tank, 7 x 14 in.

500 candle power, burns 10 hours.

Builders—Weight 11 lbs.....Each $40.00

EXTRA CYLINDERS

The extra cylinder comprises a set of trays, an inner receptacle and cover complete. Its use enables one to recharge the light instantly, thus doubling the burning capacity

No. 3X—Extra Cylinders.....Each $36.00

No. 2—Extra Cylinders. .. ..Each 24.00

MINERS' CARBIDE LAMPS AND LANTERNS

Justrite lamps are constructed on scientific principles. They are made in two parts, water reservoir and carbide container—drawn from seamless brass. The lever water feed consists of a valve enclosed in a ¼ inch tube, so constructed that it increases or decreases the supply of water, enabling the user to burn the flame at any size desired. The valve is operated by a lever sliding back and forth over notches, and held firmly in place by a small spring. The spiral water feed consists of a spiral valve stem, which fits snugly in the water tube and forces the water to travel around the spiral a distance of 7 inches. This increases the gas resistance about six times, prevents waste of gas, and produces an even, steady burning flame.

The reflector is polished and is part of the lamp. The water cap has water chamber to prevent leakage. Fits snug and is easy to open and close. The hook is riveted and soldered and will fit all caps.

CAP LAMPS

No. 85 No. 121

Round Hook

Polished brass, lever feed, lighter attachment, 2¼ in. reflector, 16.7 candle power, weighs 5 ounces.

No. 85—With No. 77 Carbide Can. Each $1.50
One in a Carton

Same as No. 85, except it has spiral feed

No. 121—With No. 68 Ex. Bottom.
Each $1.75
One in a Carton

Flat Hook

Polished brass, lever feed lighter attachment, 2¼ in. reflector, 16.7 candle power, weighs 5 ounces.

No. 414—With No. 77 Carbide Can
Each $1.50
One in a Carton

Polished brass, spiral feed, lighter attachment, 3 in. saucer shape reflector, 16.7 candle power, weight 5 ounces.

Northern Special, Flat Hook

No. 597—Lamp only.....Each $1.60
One in a Carton

SUPERINTENDENTS' LAMP

3 in. reflector, lever feed, lighter attachment. Large hook and folding handles, riveted and soldered inside. No. 76 extra carbide can included. Burns 4 hours on one filling of 3 ounces of carbide. 20 candle power. Weight 7 ozs.

No. 95—Nickel plated, highly polished.
Each..... $3.00
One in a Carton

HEAD LIGHTS

For Drivers, Motormen, Miners, Inspectors, etc. Made of brass, nickel plated, held firmly in cap shield by hook and clasp. Strong lens, 2⅛ in. diameter, ⅛ in. thick, set in hinged frame. Has self lighting attachment, German silver reflector. Burns 10 hours on one charge of carbide and water.

No. 44—Without cap.....Each $6.00
One in a Carton

INSPECTORS' LANTERN

20 candle power. Burns 5 to 6 hours with 3 ounces of carbide. Flame is controlled by the valve and can be turned high or low or extinguished, as desired. Made of brass throughout, nickel plated and highly polished. Removable German silver reflector.

No. 10—Weight 1½ pounds.....Each $6.00
One in a Tin Case

INTERCHANGEABLE CONTAINER

The 3 bottoms on container and bottom of lamp are carried into the mine half full of carbide, sufficient for a full day's work. When the bottom on lamp is exhausted, unscrew and put on a fresh bottom, screwing the used bottom into the container. Can be fastened on the belt or pants by the spring clasp.

No. 20—Polished brass.....Each $1.10
One Dozen in a Box

CARBIDE CONTAINERS

Drawn from seamless brass, small size.

No. 68 Brass Container
Per dozen $3.50
One Dozen in a Box

Carbide Cans

Made of light steel, tin coated, ribbed, double seamed, sliding air tight cover. Concaved to fit the boot or hip pocket. Lithographed in three colors.

No. 76—Capacity 7 oz. carbide..Per doz. $1.70
No. 77—Capacity 10 oz. carbide. Per doz. 1.70
One Dozen in a Box

MINERS' CAPS

Made of white canvas with metal and fibre shields.

No. 235—Sizes 6¾, 7 and 7¼ inches.
Per dozen $1.00
One Dozen in a Box

EXTRA PARTS FOR JUSTRITE LAMPS

No. 26 Reflector

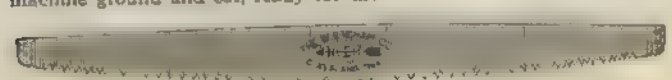
EXCEL

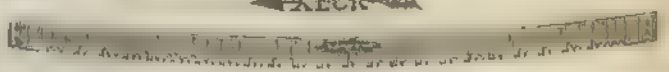
Extra quality saw steel, polished and etched, specially tempered, machine ground and set, ready for use.



Thin back, 14x16 gauge

Tenon or Common Tooth

No. 148—Length, feet	4	4½	5
Each	$2.40	2.70	3.00



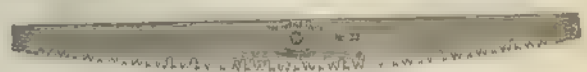
Width 3¼ inches, 14 gauge

Narrow Hollow Back, Tuttle Tooth

No. 14—Length, feet	5	5½	6	6½
Each	$1.80	1.98	2.16	2.34

ATKINS'

Made of special steel, polished and etched. Each blade accurately taper ground from cutting edge to back, carefully tempered, ground and set, ready for use.



Extra thin back, 14x18 gauge, diamond point

Tuttle Tooth

No. 881—Length, feet	5	5½	6	6½
Each	$2.60	2.86	3.12	3.38

Extra, extra thin back, 14x19 gauge diamond point

No. 882—Length, feet	5	5½	6	6½
Each	$3.10	3.36	3.62	3.88

Segment ground, 14 gauge on tooth edge, 17 gauge on the end of back, and 20 gauge at center of back, 7 inches wide at center, 3¼ inches wide at ends. Especially adapted for cutting soft woods.

Rex Silver Steel

No. 549—Length, feet	5	5½	6	6½
Each	$4.10	4.80	5.60	6.40

ONE MAN CROSS CUT SAWS

DISSTON'S

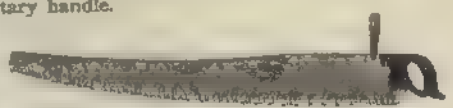
Skew back, high grade crucible steel, taper ground, tempered and set ready for use. Handle fastened with four screws, and with supplementary handle which can be used either at point or near the main handle

Two Cutter

No. D10—Length, feet	3½	4	4½
Each	$3.15	3.60	4.05

SIMOND'S

High grade crucible steel, sway back, straight ground, evenly tempered, ground and set, ready for use, hardwood handle with wood supplementary handle.

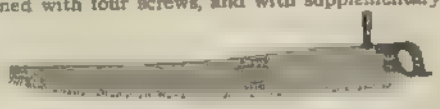


Two slim cutting teeth and raker

No. 112—Length, feet	3½	4	4½
Each	$2.65	3.00	3.40

ATKINS' "CEDAR KING"

Skew back, high grade special steel, taper ground. Easy grip handle fastened with four screws, and with supplementary handle.



Two cutting teeth and raker

No. 389—Length, feet	3½	4	4½
Each	$2.45	2.80	3.15

EXCEL

Crucible steel, straight back, taper ground and etched, even temper, ground and set, ready for use, hardwood handle with three screws, wood supplementary handle.

Tuttle Tooth

No. 1415—Length, feet	3	3½	4	4½	5
Each	$2.10	2.45	2.80	3.15	3.50

HAND OR WAGON ICE SAWS

Crucible steel blade, ground and tempered ready for use. Malleable iron handle, large V shape teeth.

Disston's

No. 73—Length 30 inches....Per dozen $22 00

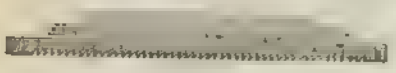
POND ICE SAWS

Crucible steel blade ground and set ready for use.

With 7 inch butt, 5 inch point, 11 gauge, complete with tiller handles.

No. 7511—Length, feet.....	4½	5
Each	$4 95	5.35

TURNING OR CHAIR WEBS



Set and sharpened ready for use.

15	12—14	8.50
16	12—14	10.00
17	12—14	14.00
18	12—14	18.00

Saws of odd widths, not listed, take price of next wider size listed. Saws of heavier gauge than listed, add 5% to list for each gauge heavier. No extra charge for saws one or two gauges thinner than list. When more than 2 gauges thinner, add 5% to list for each gauge.

DOUBLE EDGE BAND SAWS

List price per foot, all widths, advance 10% over list price on single edge saws in gauges as shown above.

INSTRUCTIONS FOR ORDERING

When ordering band saws, state whether right or left hand, gauge or thickness, space, depth and shape of teeth, straight or crown back. If the saws are to be crowning on back, they are finished 1/32 inch crowning to each five feet in length unless otherwise ordered.

HANDY SAW KITS

The combination of blades in this set provides a handy kit for the mechanic, householder, farmer, etc. Hardwood handle, carved and polished, special adjustable lever and bolt. The plumbers' saw blade is specially tempered for cutting nails, bolts, gas pipe, soil pipe, etc.

Contents as follows:

1 only 20 inch, 10 point cross-cut saw blade.
1 only 20 inch, 7 point rip saw blade.
1 only 18 inch plumbers' saw blade.
1 only 14 inch compass saw blade.
1 only 12 inch keyhole saw blade.
1 only adjustable handle. Put up a durable canvas case, leather bound, separate compartments for each blade and extra pocket for handle.

Disston's

No. 102—Five blade set complete..Each $4.00

This set is especially adapted for plumber's use. The handle and case are the same as in the No. 102 set.

Contents as follows:

1 only 20 inch, 10 point cross-cut saw blade.
1 only 18 inch plumber's saw blade.
1 only 16 inch special blade for cutting lead pipe
1 only 14 inch compass saw blade.
1 only adjustable handle.

Disston's

No. 201—Four blade set complete..Each $3.50

COPING SAWS

Polished nickel plated tubular frame, through which runs cable, which, by turning handle, blade can be adjusted to any angle, hardwood handle depth of cut 4 inches.

Jones' Cable

No. 1—Blade 6 inches, complete with 6 blades .....Per dozen $15.00
Sixth Dozen in a Box

COPING SAWS

Heavy steel wire nickeled frame, polished cocobolo handle. Frame may be locked rigid or can be adjusted to swing free. Ball bearings under outer head.

Millers Falls

No. 62—Complete with three No. 60 blades to each frame.....Per dozen $14.00
Quarter Dozen in a Box

EXTRA BLADES

No. 60—6x⅝ inches, with pins in the ends for above frame, or can be used with any frame requiring 6 in. blades .....Per gross $5.50
One Gross in a Box

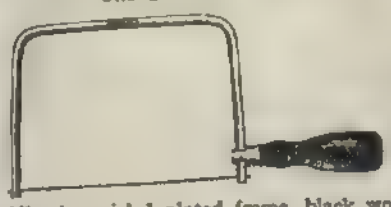
Atkins

Back made of cold rolled steel, ⅝ in. wide and ⅛ in. thick, nickeled and buffed. Frame 7¼ in. long by 4⅝ in. deep, fastened to handle by malleable iron threaded ferrule. Handle, carved and polished hardwood, easy grip pattern.

No. 50—Complete with one 6½ in. blade .....Per dozen $10.00
Sixth Dozen in a Box

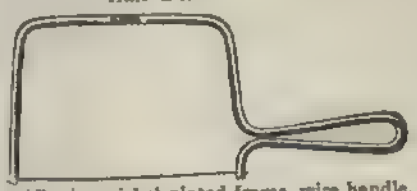
EXTRA BLADES

No. 50B—6½ inch.....Per dozen $0.85
One Gross in a Box



All wire nickel plated frame, black wood handle.

No. 110—6 in. bent end blades, complete with 12 extra blades .....Per dozen $4.00
Half Dozen in a Box



All wire nickel plated frame, wire handle.

No. 100—6 inch bent end blades, complete with 12 extra blades.Per dozen $3.25
Half Dozen in a Box

EXTRA BLADES

No. 6—6x1/16 inches, for Nos. 110 and 100 Coping Saw frames....Per gross $1.50
One Gross in a Box

JEWELERS' SAWS

Forged spring steel frame nickel plated, cocobolo handle. Adjustable from 4 to 6 in.

Millers Falls

No. 10—Without blades.....Per dozen $14.00
Quarter Dozen in a Box

EXTRA BLADES

No. 10B—Assorted.....Per gross $1.25
One Gross in a Box

FRET SAW SETS

Spring steel frame, polished and nickeled, 12x5 inches, rosewood handle, patent clamps. Other contents of set are as follows: 12 saw blades, 1 awl, 1 sheet of impression paper and 3 sheets of designs.

Millers Falls

No. 2—Set complete.....Per dozen $12.00
One set in a Box

SCROLL OR FRET SAWS

NEW ROGERS

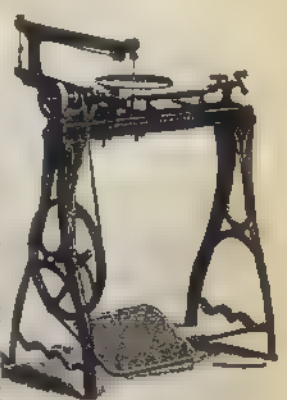
Automatic dust blower, jointed stretch rod, drilling attachment, 12 blades, 1 wrench 3 sheets of designs, 4 awl, impression paper and drill points with each machine

No. 1—Japanned tilting table and iron balance wheel .....Each $6.00

No. 2—Nickeled tilting table and emery balance wheel .....Each 6.50

One in a Wooden Box

COMPANION LATHE



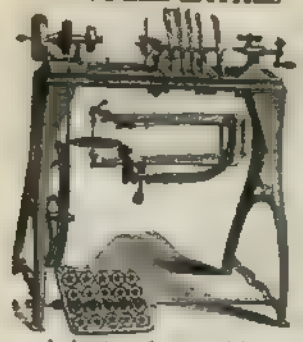
Lathe and saw attachments, japanned iron castings, drive wheel and cone pulley with two grooves for change of speed, long and short tool rests, three turning tools. Lathe head, with 2 inch face plate, spur center and screw center for turning caps, emery wheel 4½ x⅞ inches. Swing of lathe 5 in., between centers, 13½ in., bed from floor, 27 in., length of bed 24 inches.

No. 3—Lathe and lathe tools without saw attachment .....Each $10.50
No. 3SA—Scroll saw attachment..Each 3.00
No. 3CA—Circular saw attachment, saw table 6x7 inches, saw blade 3 inches diameter .....Each 1.25

Note—In ordering, state whether either or both saw attachments are wanted.

One Each in a Wooden Box

GOODELL LATHES



Long and short tool rests, drive wheel and cone pulley with two grooves to permit change of speeds, lathe head with 2 inch face plate and spur center and screw center for turning cups, emery wheel 4½x⅝ inch, five turning tools, wrench, drill points, etc. Swing of lathe 5 in., length of bed 24 in., distance between centers 13½ in.

The scroll sawing attachment, as shown in the cut, is secured to the lathe bed by one bolt, and can be put on or off at pleasure. This attachment has all of the improvements found in any scroll saws.

The circular saw attachment consists of a saw table 6x7 in., a saw 3 in. in diameter, and a saw arbor. The lathe rest socket is used to support the table.

This lathe is thoroughly built and highly finished, the polished parts being nickel plated.

Each

No. 5—Lathe and lathe tools $13.00
No. 58A—Scroll saw attachment..... 3.00
No. 60A—Circular saw attachment..... 1.25

In ordering please state whether either or both of the saw attachments are wanted.

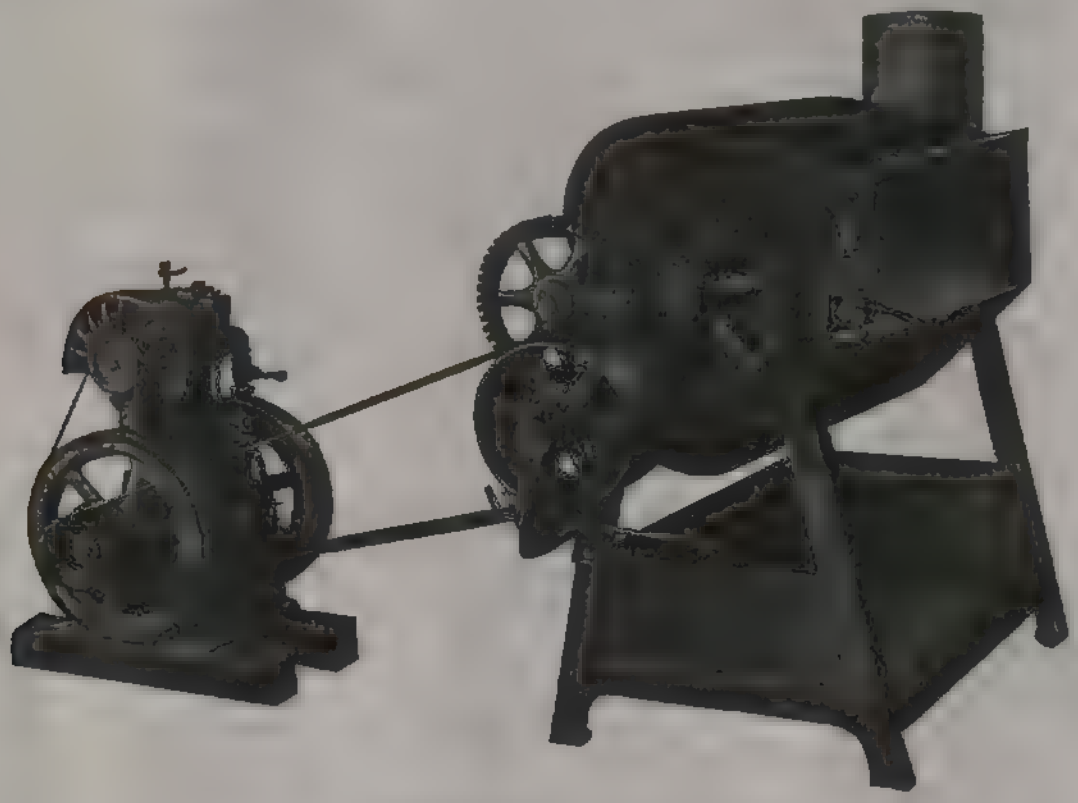
CONCRETE MACHINERY

For Direct Shipment only from Near-by Wisconsin Factory

CONCRETE MIXING MACHINES

We can furnish Concrete Mixing Machines in any Style, Size and Description made. Rotary Drum Mixers (cone shape) can be furnished for the contracting trade in sizes from 7 to 40 cubic feet and with Steam, Gasoline or Electric Power, or without Power. Continuous Mixers can be furnished for those preferring Continuous Type. Special Sidewalk Mixing Machines can be supplied for small crews in Light, Medium, Powerful and Compact Types. Special Catalog sent on request.



STATIONARY POWER MIXING MACHINE

This machine is practical, thorough and rapid, and will be found unexcelled for small block plants, Tile Works and Brick Plants. It is made entirely of iron and steel. The drum is triangular shape, having two cast iron drum heads and cold rolled high carbon sheet steel shell. The drum heads are held together by four heavy rods which are located outside the drum, leaving the inside entirely free from any inside rigging. The door is hinged to the shell and swings inward. It is controlled by a lever allowing same to be opened while machine is running. The wetting device consists of a galvanized tank of about 5 gallons capacity and connected to this is a perforated pipe which runs through a hole in the journal and extends through the center of the drum. A half inch globe valve connects the tank and the perforated pipe and the flow of water can be regulated as desired. The holes in this perforated pipe can be made large or small according to the nature of work machine is intended for, but unless otherwise specified they are made for ordinary work. For extreme wet work large holes are ordinarily used, which wets the material in three or four revolutions of the drum. The gear wheels work smoothly and a loose and tight pulley is provided so that the power can be thrown off and the mixer stopped in any desired position for loading. These machines are furnished without engine or with either 3 H. P. Air Cooled or 2½ H. P. Water Cooled Engine. The engines are guaranteed to be free from any defects in material or workmanship, and to develop the full rated horse power.

CASTING MINNOWS

DOWAGIAC

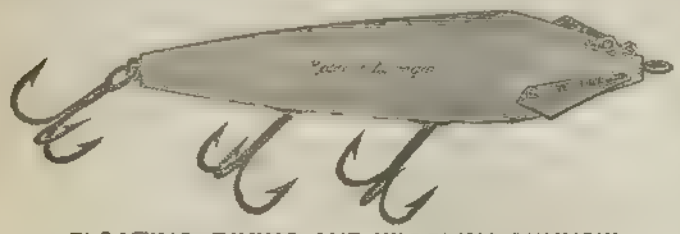
Bodies Made of Select Cedar, Chemically Treated to Prevent the Absorption of Water; Covered with Nine Coats of Waterproof Enamel, which cannot be Worn off; Nickel Plated Hooks; the Patented Method of Attaching the Hooks enables the Fisherman to Detach them Instantly (if Broken Through Accident), by Giving the Screw Hooks a few Turns to the Left; the Hook Sockets Always hold the Hooks Outwardly so that the Points are Always Presented to the Fish; Hooks Cannot Become Entangled or Mar the Enamel on the Body; Large Glass Eyes; Correctly Weighted so They will Always Float in an Upright Position; No Swivels Necessary as Bodies will not Revolve; Spinners Revolve in Opposite Direction.



FLOATING, DIVING AND WIGGLING MINNOW

When Cast Out upon the Water these Baits are Buoyant enough to Float Themselves and the weight of the Line, and the instant They are Retrieved will Dive under the water to a successful Depth for an under water Bait, describing a Wabbling or Swinging movement as it is reeled in.

The instant Retrieving is stopped, instead of sinking to the bottom, where the Bait may become caught upon weeds, snags, etc., it will rise to the surface.

The newly invented Variable position for fastening the Lines enables the angler to Control the Swimming movement, making it greater or less as seems to be most attractive to the Fish.

The forward fastening should be used when reeling against the swift current of a River; whereas in still waters the lines should be attached to either of the upper fastenings, the forward or Central one giving a nicely balanced attractive movement; If a more violent movement is desired or if the Bait is trolling at a very slow speed, the third or last point of fastening should be used.

Length of Body 4½ inches; Three No. 1/0 Bright Spear Point Treble Hooks; Weight each 1¼ ozs.

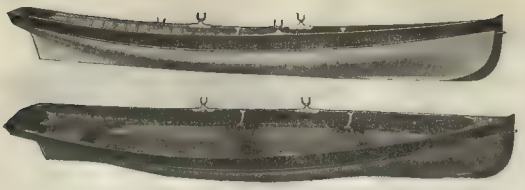
ROW BOATS.

LADY OF THE LAKE.



Square Stern.

Beautiful in outline and finish. Thoroughly well made.

This is the handsomest and finest boat that skilled labor can produce. It is a smooth built boat, being made up of narrow strips 1⅜ inches wide by ½ inch thick with half-round joints (see cut). This makes a strong and durable boat. The strips are nailed together with galvanized nails. The half-round fender on outside of boat is not nailed on as usually done by other builders, but is a solid piece of oak built in when planking is put on and therefore cannot come off, as is often the case where it is put on after boat is finished.

After the boat is planked it is planed and sanded to a smooth finish. Then it is clamped and drawn together with chains every thirty inches, under several thousand pounds pressure. Then the ribs are fastened in place, which holds the planking firm. This is what keeps our boats from leaking.

Grade A—Keel stem stern, gunwales and ribs of selected white oak, planking selected cedar. The false bottom is fastened down with buttons and can be taken out, which makes it very convenient in cleaning or repairing the boat. Finished inside and out with three coats best grade spar varnish. Removable false bottom, adjustable foot braces, two pair oar locks, one pair taper handle spruce oars, copper tipped, leathered and varnished.

Grade B—Same material as Grade A, but painted inside and outside, except seats, seat fenders, gunwales and shear streak, including half-round fenders, which are finished in natural wood with three coats best grade spar varnish. Removable false bottom, adjustable foot braces, two pair oar locks, one pair 7½ foot taper handle spruce oars, copper tipped, leathered and varnished.

There are so many calls for a row boat suitable for the detachable row boat motors that we are building all the Lady of the Lake style boats so they may be used for this purpose. The stern is reinforced and quite wide so as to stand the strain and extra weight of motor.

	Each.
Grade A46—Length 15½ feet, beam 46 inches, depth 16 inches; weight, 170 pounds	$140.00
Grade B46—Length 15½ feet, beam 46 inches, depth 15 inches; weight, 170 pounds	125.00
Rudder, Extra	$6.00
Lazy Back, Extra	4.70

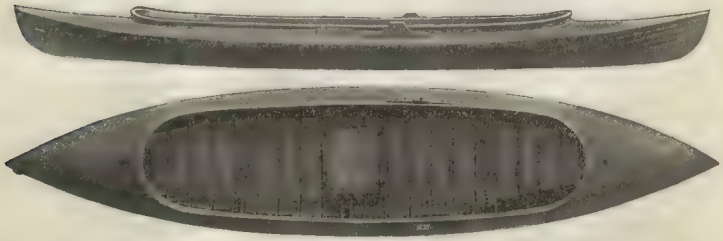
F. O. B. Alexandria, Minn.

Note—Row boats take four times first class freight.

HUNTING BOATS.

STILL HUNTER.

DUNPHY.



Interior View.

Bottom and planking is made from selected cedar or white oak. Thickness of bottom ¾ inch, planking ⅜ inch, which consists of four strakes on each side. Ribs are ⅞-inch x ⅞-inch spaced 6-inch center, securely fastened through bottom and planking with clout nails.

In connection with the bent ribs, each boat is provided with three sawed oak frames ⅞-inch x 1-inch. Decks and covering boards are of ⅜-inch selected cedar. Coaming is of selected oak extending 3 inches above the decks. Each boat is provided with a galvanized anchor tube through each deck.

Fittings consist of one pair of 6-foot oars, one push paddle, oar locks and one seat.

Nos.	15SH	46SH

Length cockpit, feet	6½	8½
Approx. weight each, lbs.	75	85
Each	$68.00	75.00

F. O. B. Eau Claire, Wis.

IMPROVED STILL HUNTER.

The Improved Still Hunter is the most practical and convenient boat for marsh shooting ever produced, and at the same time is perfectly safe for use upon open water

The bottom of this boat is slightly rounding, the floor being carried well fore and aft, the sides are brought to the gunwales in a sharp curve. This gives us the lightest draught boat possible, drawing as it does when fairly loaded only two inches of water.

Specifications—Beam, 36 inches; cockpit, 6 ft. long, 22 inches wide and 10 inches deep. Planking basswood, put on in wide pieces, joint meeting on longitudinal strips of elm, into which elm ribs are mortised. Seams being sealed with water-proof tape. Combing, floor strips and deck beams, ash. Deck, cedar, covered with 8 oz. canvas. One removable seat. One paddle, any length, stave length wanted. Entire boat finished dry grass color, with one coat wood preserving, water resisting oil, and two coats best lead paint.

	Each
*No. 12SH—Length, 11¾ feet; weight each, 70 lbs.	$62.00
*No. 14SH—Length, 13½ feet; weight each, 80 lbs.	70.00

EXTRAS—Tubes passing through deck and bottom of boat through which poles can be passed, for firm anchorage. If wanted, $3.60 extra. Oars and oarlocks, fitted, if wanted, $6.50 extra.

THOMPSON.

For all around use on lakes, rivers and marshes where many varying conditions are encountered the Thompson Duck boat cannot be excelled.

Light Weight—The method of construction enables us to make this boat very light and still have a boat that is strong enough to stand the hardest kind of use.

For Marsh Use—The bottom is perfectly flat which enables the boat to go in very shallow water and the boat being very light it is easy to push it through heavy rice or weeds.

Rough Water—A very important point about this boat and the point in which it differs from any other hunting boat on the market today, is that the bottom at the ends are V shaped. This not only makes it a very easy running boat under all conditions, but the V shaped bottom at the ends, split the waves and enables it to ride a very rough sea with perfect safety, and to glide smoothly and noiselessly through a choppy sea.

Specifications The bottom, sides and decks are of cedar. The frame is made of elm. Although the boat is very light, it is very strong and durable and with ordinary care will last a life time.

One paddle and removable seat included with each boat.

	Each
*No. T14—Length, 14 feet; beam, 32 inches, weight each, 60 lbs	$70.00
*No. T12—Length, 12 feet; beam, 30 inches; weight each, 50 lbs.	62.00
Oars and oarlocks fitted to boat	$6.50 extra
Anchor tubes	3.60 extra

*For factory shipment only.

MULLINS, GET THERE.

STAMPED SHEET STEEL.

it i/t% F. O. B. Salem, O.

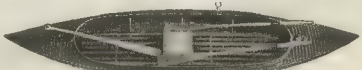
One of the most popular duck boats ever placed on the market, fitted front and back with air chambers, strong and safe. Painted dead grass color

Each.

"Get There"—Galvanized steel, securely braced by steel ribs; length 14 ft., beam 36 inches, height to top of deck, 11 ins,. to top of comb, 14 ins.; cockpit, 9 ft. x 30 in.; net weight, 100 lbs.; complete with seat, bottom slat, short or long paddle and one pair oars. $55.00

Shipping weight, 130 lbs.

BUSTLE.



This boat is similar to the "Get There" except wider at the beam and fitted with side air chambers, which adds to its buoyancy.

Each.

FLEET OF GRAMM BERNSTEIN TRUCKS COMPOSING THE FIRE DEPARTMENT OF LIMA, OHIO

BLASTING POWDER.

Great care and attention have been given to the manufacture of this powder, and it is as perfect as skill can produce or money can buy. We carry it in stock in five different sizes, which are illustrated in the following cuts. Packed 25 lbs. in a metal keg.

	Each.
CC, C, F, FF, FFF,—Kegs, 25 pounds each, F. O. B. Minnesota Transfer	$4.60
CC, C, F, FF, FFF—Kegs, 25 pounds each, F. O. B. Bismarck, N. D	5.00

DYNAMITE.

DUPONT. AETNA.

For mining, well boring, railroad construction, stump blasting, etc.

The cartridges are 8x1¼ inches and weigh 8 ounces; 25 and 50 lbs. in a case.

Per 100 Pounds.

No. 3—30 per cent nitoro-glycerine. For coal mining, etc. $

No. 2—40 per cent nitro-glycerine. For medium hard rock stumps, etc.

No. 1½—50 per cent nitro-glycerine. For hard rock.

No. 1—60 per cent nitro-glycerine. For very hard rock, iron and copper ore.

No. 75—75 per cent nitro-glycerine

We do not sell less than a box of 25 pounds.

RAILROAD POWDER.

JUDSON.

Per 100 Pounds.

Judson Railroad Powder—A grade between dynamite and blasting powder, especially adopted to railroad work, excavating, etc. $

12½ lbs. in a sack; 4 sacks in a box

STUMPING POWDER

DUPONT AND AETNA.

LOW FREEZING.

A low freezing powder especially adapted for stump blasting. Absolutely guaranteed by the powder companies for the work for which it is intended—blasting stumps. Comes packed in a one style package only, 50 pound cases each containing five 10 lb. cartons, one size of cartridge 1¼x8 inches. Best results can only be obtained with this powder by using a No. 6 cap.

Per 100 Pounds

Stumping Powder $

50 pounds in a case.

FARM POWDER.

DUPONT AND AETNA.

LOW FREEZING.

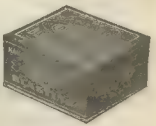
A low strength powder made especially for farm work. Recommended for subsoiling, tree planting, earth excavating, etc.

Per 100 Pounds.

Farm Powder $

50 pounds in a case.

BLASTING OR DYNAMITE CAPS.



Blasting Caps are small copper cylinders closed at one end containing a sensitive and highly explosive compound. They must be handled carefully and kept away from heat and sparks. They should never be stored or carried with dynamite.

	Per 1,000
No. 6—Blasting Caps, Dupont or Aetna Lion Brand	$36.75
5,000 lots	35.20
10,000 lots	34.15
20,000 lots	33.15

	Per 1,000
No. 8—Blasting Caps, Dupont or Aetna Lion Brand	$57.65
5,000 lots	55.90
10,000 lots	54.05
20,000 lots	52.45

100 in a tin case; 1,000 in a case.

Blasting Caps are always shipped separate from dynamite.

NOTE—Dynamite, Stumping, Farm Powder and Blasting Caps can be shipped by freight only.

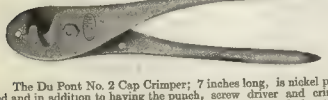
FUSE.

	Case Lots	Per 1000 feet
Cotton		$10.00
Anchor or Crescent, white finish, for use in wet ground		12.75
Single Tape, waterproof		10.70
Double Tape, waterproof		13.40
Triple Tape, waterproof		15.30
Gutta Percha, waterproof		14.30

Cotton fuse, 12,000; others 6,000 ft, in a case.

Average weight per case, 130 pounds.

CAP CRIMPERS AND FUSE CUTTERS.



The Du Pont No. 2 Cap Crimper; 7 inches long, is nickel plated and in addition to having the punch, screw driver and crimp jaws, is provided with an efficient fuse cutter protected by two over-lapping projections which prevent the fuse cutting feature from being used accidentally.

Each

No. 2—Cap Crimper and Fuse Cutter $2.00

In bulk.

ELECTRIC BLASTING CAPS.

COPPER WIRES.

These fuses are superior to all others for exploding any make of dynamite or blasting powder. Equal to double quintuple force. All tested and warranted.

Length	Per 100	Length	Per 100
4 foot wires	$9.30	12 foot wires	$14.60
6 foot wires	10.60	16 foot wires	17.25
8 foot wires	11.95	20 foot wires	19.90
10 foot wires	13.25		

Up to and inc. 16 foot, 50 in a box; 20 foot, 25 in a box.

ELECTRIC SQUIBS.

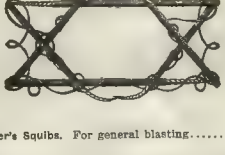
COPPER WIRES.

Contain no loose powder which may become shaken out in handling. Similar to Electric Blasting Caps (fuses) except that the charge is a powder composition that does not detonate but merely shoots out a strong flame. The shell is paper and is open at one end. They are used for firing charges of blasting powder electrically.

Length, feet	4	6	8	10	12
Per 100	$5.45	6 69	7.92	9.16	10.40

MINERS SQUIBS.

POWELLS.

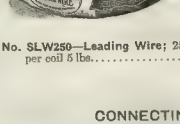


Per 1000

No. 2—Miner's Squibs. For general blasting $3.30

100 in a box, 10,000 in a case; weight per case, 33 lbs.

LEADING WIRE.



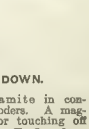
At least two hundred and fifty feet double of leading wire should be provided, so that the blaster will be out of danger when he fires the shot. If the blast is a large one, it will probably be necessary for the blaster to be 300, or even 500, feet away.

Per Coil

No. SLW250—Leading Wire; 250 feet in a coil; weight per coil 5 lbs $5.30

CONNECTING WIRE.

Connecting wire is used to connect electric fuse wires in adjoining bore holes when the wires are not long enough to reach each other.



Per Pound

No. CW1—Connecting Wire; 1 pound on a spool, about 250 feet; a pure copper insulated wire $1.10

BLASTING MACHINE.

RELIABLE, PUSH DOWN.

Used for exploding dynamite in connection with electrical exploders. A magnetic-electric instrument for touching off a series of holes at one time. To fire, draw the handle up until it stops, then push down quickly with full force.

For railroad construction, quarrying and mining work, submarine blasting, etc. Hardwood, varnished; corners strongly screwed; leather strap handle.

Each.

No. 2—1 to 10 Holes, weight each, 15 lbs $35.70

No. 3—1 to 30 Holes, weight each, 30 lbs $51.00

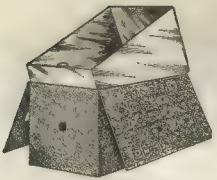
CAMERA.



Open, showing tray.

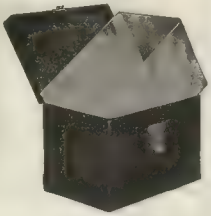
This box is made in exact imitation of a kodak or camera case. It is covered with art linen, closely resembling pebbled leather, with removable tin box; easily cleaned and always looks well.

Per Dozen

No. 160—Camera Lunch Box, size of box, 7x5x5 ins... **$11.00**

Weight per doz., 12 lbs.

Half dozen in a pkg.



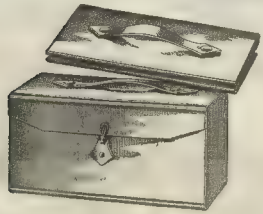
Made to fill the demand for a well-made, respectable looking case; covered with imitation leather and contains a removable tin lining, allowing the same to be removed and cleaned. Equipped with a good leather handle, a special catch, which is secure and four polished nickel metal corners.

Per Dozen

No. 200—Size of box open, 7½x5x5 inches; weight per dozen, 15 lbs..... **$15.00**

Half dozen in a package.

KODAK.



This box is covered with a water-proof finished material, thoroughly riveted with a cowhide one piece collapsible handle. When folded box will fit pocket.

Per Dozen

No. 2H—Kodak Folding Lunch Box; size 4½x4½x9 ins.. **$5.00**

One dozen in a carton, K. D.

EGYPTIAN.

Adapted to the needs of harvest and field hands, lumbermen, prospectors, surveyors, railroad men, boatmen, automobilists and everyone who goes to the woods, desert or on the water.

Made of imported specially constructed flax duck, specially adapted for this purpose, enough moisture oozing through the pores for the air to come in contact with and keep the contents cool.

Round bottom corners, seams inside, metal nozzles.

CLOSED TOP.

Per Dozen

No. 1-CT—Water Bag; sewn top; capacity, 1 gallon; size, 10x11½ inches; weight per doz., 6 lbs... **$21.80**

No. 2-CT—Water Bag; sewn top capacity, 2 gallons; size, 12¾x15½ inches; weight per doz., 9½ lbs.. **31.20**

In bulk.

OPEN TOP.

Is equipped with a metal clamp slide at top which is removable, whereby the interior of the bag may be cleaned and all sediment removed, always keeping the contents clean and fresh

Per Dozen

No. 2-OT—Water Bag; sanitary or open top; capacity, 2 gallons; size, 15¾x12¾ inches; weight per dozen, 12 lbs..... **$33.60**

No. 5-OT—Water Bag; sanitary or open top; capacity, 5 gallons; size, 17½x32½ inches; weight per dozen, 20 lbs..... **61.20**

In bulk.

AUTO STYLE.

Has open top making it easy to fill and keep clean. A closing device not impaired by shrinking or swelling of fabric. Full standard size and capacity.

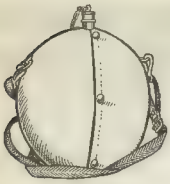
Per Dozen

No. AS-2—Water Bag; open top; capacity, 2 gallons; size, 17x12 inches; weight per doz., 9½ lbs **$33.60**

In bulk.

CANTEENS.

CELLO BOY SCOUT.



The Cello Canteen is regulated to Boy Scout requirements with one side concaved so that it will not "bang" against the hip. Made of high grade tin plate, all parts heavily tinned; strongly constructed throughout and built to give the maximum of service.

Per Dozen

No. 100 — Cello Canteens; complete with heavy adjustable sling strap and removable khaki cover with snap buttons; capacity, 1 quart; wgt. each, 1 lb. **$21.60**

U. S.

Made of high quality charcoal tin, seamed and soldered. The mouthpiece is fitted with a cork which is fastened with a brass chain. The canteen is covered with a very heavy quality of olive green duck with an interlining of heavy felt. The detachable strap is made of heavy duck to match the cover and has a snap hook on each end to fasten to the canteen. Each canteen is air tested.

Per Dozen

No. 1—U. S. Canteen; capacity, 3 pints..... **$41.00**
No. 2—U. S. Canteen; capacity, 5 pints..... **48.00**

Weights per dozen, No. 1 12 lbs.; No. 2 24 lbs.

In bulk.

GOVERNMENT.

Made of galvanized steel, seamed and soldered and has a zinc mouthpiece. It is covered with heavy, dead grass colored duck and has an interlining of heavy blanket. The strap is made of heavy duck to match the cover. Each canteen is air tested.

Per Dozen

No. 3—Government Canteen; capacity, 3 pints; weight per dozen, 3 lbs.... **$24.00**

In bulk.

CAMP GRIDS.

ELECTRIC WELDED.

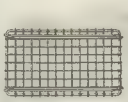
Per Dozen

No. 485—Camp Grid; 13¾ inches long, 8⅝ inches wide; has 12 inch legs of No. 6 wire; cross-bars are of No. 10 wire; frame ½ inch No. 12 flat steel; finished in black; weight per dozen, 5 lbs..... **$6.50**

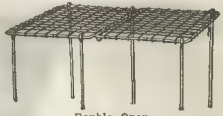
One dozen in a carton.

CAMP BROILERS.

SACKETT'S.



Single Closed.



Double Open.

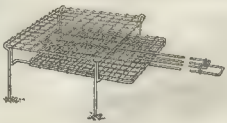
Light, strong and compact. Thoroughly reliable and satisfactory. The standards are made of No. 3 and the mesh of No. 13 wire, tinned.

Per Dozen.

No. 375—Single, 9x14 inches, weight per dozen, 24½ lbs.. **$10.00**
No. 800—Double, 18x14 inches, weight per dozen, 48 lbs... **15.00**

In bulk.

SACKETTS GRATE-BROILER.



A grate for the coffee pot and skillet and a broiler for steaks or game, giving double capacity for cooking a meal and keeping it hot until ready to serve.

Per Dozen

No. 1214—Camp Grate Broiler; size, 12x14 inches; weight per dozen, 48 lbs **$37.50**

In bulk.

MILLERS.

A Folding camp stove and boiler. When open has a grate surface 14x20 inches, strongly constructed of wrought iron. Takes up about the same space as a fish rod; can be carried in a suit case.

Each

No. MKK—Camp Broiler; shipping weight each, 5¾ lbs.. **$2.50**

One in a neat canvas bag.

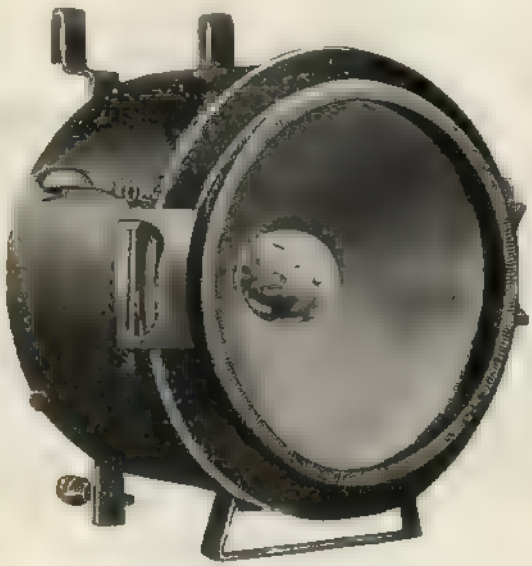
Improved Electric Incandescent Headlights for Interurban Electric Railway Service

No. 1638

12-Inch

Suspended From Dash or May Be Installed on Canopy of Car

Accommodates a range of railway type concentrated filament Mazda lamps, G18½ to G30, inclusive



Electric cars operating modern high-speed interurban service will appreciate the necessity of a dependable headlight. It presents the ideal design, which may be relied upon to give "Golden Ray" parabolic glass or copper silver plated reflector. A headlight of the utmost efficiency is available with renewals limited to the incandescent lamp only.

Its construction permits of absolute focusing of standard railway type concentrated filament, Mazda lamps, G18½ to G30, inclusive.

The case is neat, compact and of light weight consistent with strength. It is provided with detachable weather proof door securely fastened. Electrical contact with car circuit is established by means of plug and cord arrangement.

For complete specifications, see page 191.

For shipping weights and export measurements, see page 191.

Quotations cover the headlight as shown, including dash straps and plug sockets for each end – but does not include the incandescent lamp.

For prices, see page 191.

Improved Electric Incandescent Headlights For Interurban Electric Railway Service

No. 1644

16-Inch

Designed to be mounted on canopy of car
Accommodates a range of railway concentrated filament Mazda lamps G18 ½ G30 inclusive

In remote sections it is sometimes necessary to provide a maximum of light and in such cases as has been demonstrated the selection of the larger type headlight as illustrated has been attended with perfect satisfaction The interior carrying a 16 inch copper silver plated reflector may be entirely withdrawn free of cumbersome wires. Electrical connection with car circuit is established automatically by merely sliding the interior in place

View of interior—is provided with means for properly focusing the lamp

For complete specifications, see page 191.

For shipping weights and export measurements, see page 192

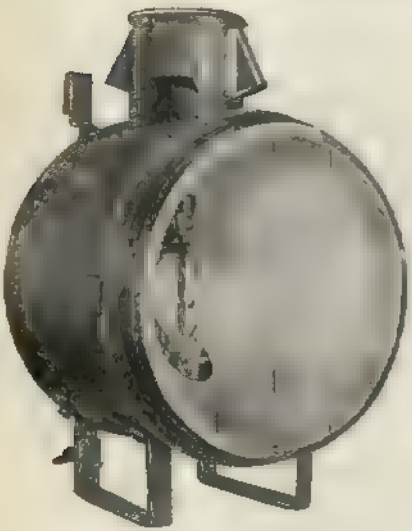
For prices, see page 193.

Quotations do not include the incandescent lamp

Arc Headlights for Interurban Electric Railway Service

Mosher No. 1477

Made in 10, 12 and 14-inch sizes

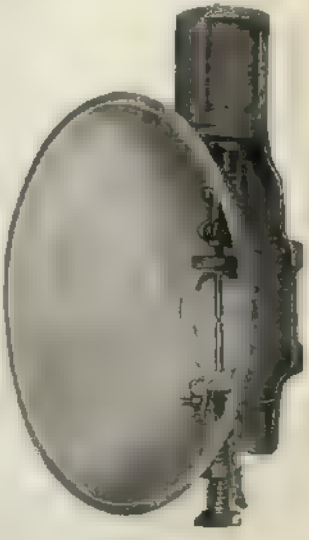


Non-metallic circuit, direct current, straight arc headlight for outside of dash

Plug and cord connections to car circuit

When ordering, give maximum and minimum line voltage

The "Mosher" Arc Headlight is so well known and established that little comment is necessary, as there are thousands in use in all parts of the country, as well as abroad It is the cheapest headlight produced in point of maintenance and is low in price—simple in operation, of neat appearance and being of light weight is easily handled and requires but little attention



A wire screen dimmer may be furnished at a slight additional cost.

The 10 and 12-inch sizes may be supplied with the Osgood Deflector Lens

For complete specifications, see page 191
For shipping weights and export measurements see page 192
Unless otherwise ordered one resistance, one plug connector, two plug sockets and dash brackets for both ends of car will be furnished with each headlight
For prices, see page 193

TWINE BOXES AND HOLDERS

FOR TUBES

Per Dozen

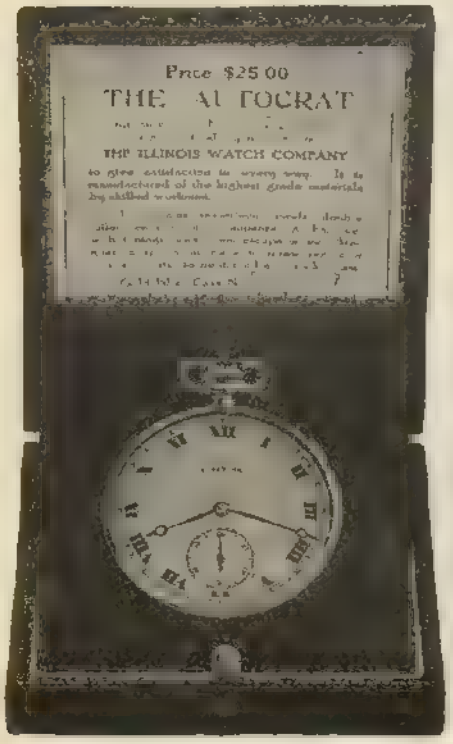
THE AUTOCRAT

12-Size Latest Model

Illinois - Springfield Watch

Complete in Gold Filled Case
Guaranteed for 25 Years



The Autocrat—is a smaller and thinner watch than the railroad movements, but is made with the same care and is up to the celebrated Illinois-Springfield standard for accuracy and durability.

The Autocrat — a remarkable watch value to retail for $25. The movements are adjusted, have 17 jewels, and are cased in plain polished, engine turned and engraved 25 year cases — the narrow bezels of which permit of unique widespread dials.

Each watch is put up in a beautiful display case with guarantee card.

THE IMPROVED 1918 MODEL ELITE ELECTRIC CLEANER

NOTE OF INTEREST. We are again advertising this Marvelous Cleaner, because we emphatically know that it is the best cleaner on the market today. Not only from the standpoint of its remarkable low (unheard of) price, but that the service it performs, and the tests of durability we have known it subjected to, convinces us that it is truly a WONDER.

BUILT TO ENDURE

YOU MAY PAY MORE BUT YOU CANNOT BUY A BETTER CLEANER THAN THE ELITE AT ANY PRICE. IT'S A POWERFUL CLEANER MADE TO LAST

SAVE YOUR RUGS—keep them always clean and fresh by using the ELITE a few minutes each day. It preserves their luster and makes them last longer.

IMPORTANT

When ordering, be sure to state whether for direct or alternating current and give voltage. If for alternating current, state also the number of cycles.

SUPERIOR FEATURES

MOTOR—1-6 H. P. high speed, air cooled.

OILING—Constant feed oil cups.

FAN—5-inch cast aluminum, unbreakable.

BODY—Built entirely of cast aluminum.

FLOOR NOZZLE—12 inches long, 3-inch opening. Friction reverse driven brush.

HANDLE—Solid aluminum pistol grip design. Switch in pistol grip.

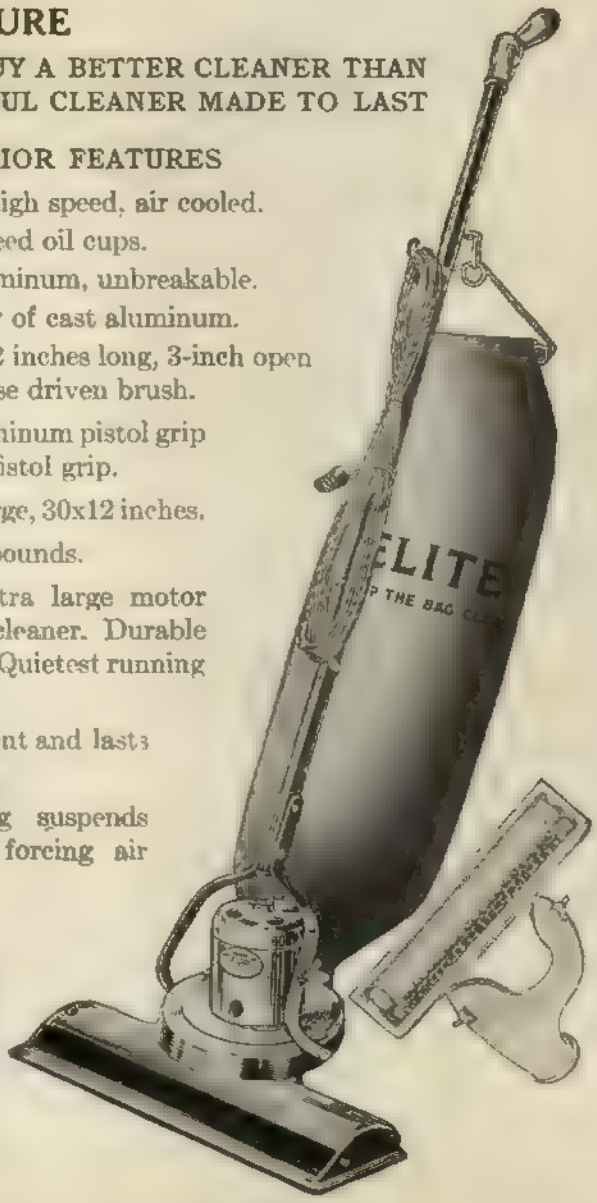
BAG—Khaki, extra large, 30x12 inches.

WEIGHT—About 9 pounds.

DURABILITY — Extra large motor makes for a long life cleaner. Durable and very powerful. Quietest running cleaner made.

Operates on any current and lasts a lifetime.

Wide nozzle opening suspends carpet from floor, forcing air through carpet.

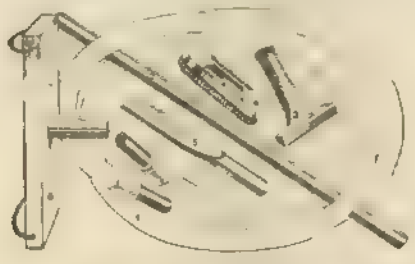


If you use the Elite Electric Cleaner you don't have to spend endless hours with broom, dusters and dust pan. Soiled hands, grimy dust caps, unpresentable work day dress, are things of the past. You are always ready to receive callers. Your home always presentable.

Just as the men folks in the office, store, factory or farm are surrounded by the best mechanical aids of all kinds, so women in the home should have those helpful labor saving devices.

Ordinary cleaning methods only remove a small portion of the surface dirt and raise clouds of germ laden dust to settle again. The drudge is never ending.

The ELITE sucks up all the dust and puts it in a dust proof bag to be taken out doors and emptied.



Extra Attachments

ARE AS FOLLOWS

No. 1—Braided Hose 10 ft. long
No. 2—30 in. Extension Tube
No. 3—Nozzle for Portieres, etc.
No. 4—Wall Brush.
No. 5—Radiator Cleaner.
No. 6—Hose Connector

Full Set of Attachments
List $14.70

BIG AND POWERFUL

YOU WILL FIND IN THE ELITE CLEANER MANY FEATURES SCARCELY TO BE EXPECTED AT SO MODERATE A PRICE.

ADJUSTMENTS These machines are adjusted at the factory for all work and need no further adjustment by purchaser. No vacuum cleaner will take up lint and threads that have been tramped into the nap of a carpet without a brush to loosen them. The ELITE is fitted with a brush driven the opposite way against the nap of the carpet to loosen them.

EVERY ELITE CLEANER IS SOLD UNDER A FULL GUARANTEE AND WE RECOMMEND THAT IT IS THE BEST BUY IN VACUUM CLEANERS. THE PRICE IS VERY LOW.

Elite Electric Cleaner . . . . . List $52.70

ELECTRIC FANS

BASE BURNERS

★NORLEIGH DIAMOND

For Hard Coal or Crushed Coke

Appearance.—Beautiful and Graceful Colonial Design. Perfect Proportion and Brilliance of Nickel Give it an Exceedingly Attractive Appearance

Construction.—Heavy Cast Iron Parts, Extra Large Magazine, Lower Part Casing Oil Pipe Prevents Leakage of Gas. Fitted with Automatic Gas Check that Fits Under Swing Top, Making it Gas Tight. Syphon Flue System with Extra Large Central Ventilator. Heart of Ventilator Makes Contact with Combustion Chamber. Down and Up Flues Extend Around Sides and Back of Stove Body. Top of Ventilator has Detachable Register, which may be Connected with Pipe to Heat Rooms on Second Floor. Down Flue at Top and Back of Magazine Carries all Gases Back to Combustion Chamber.

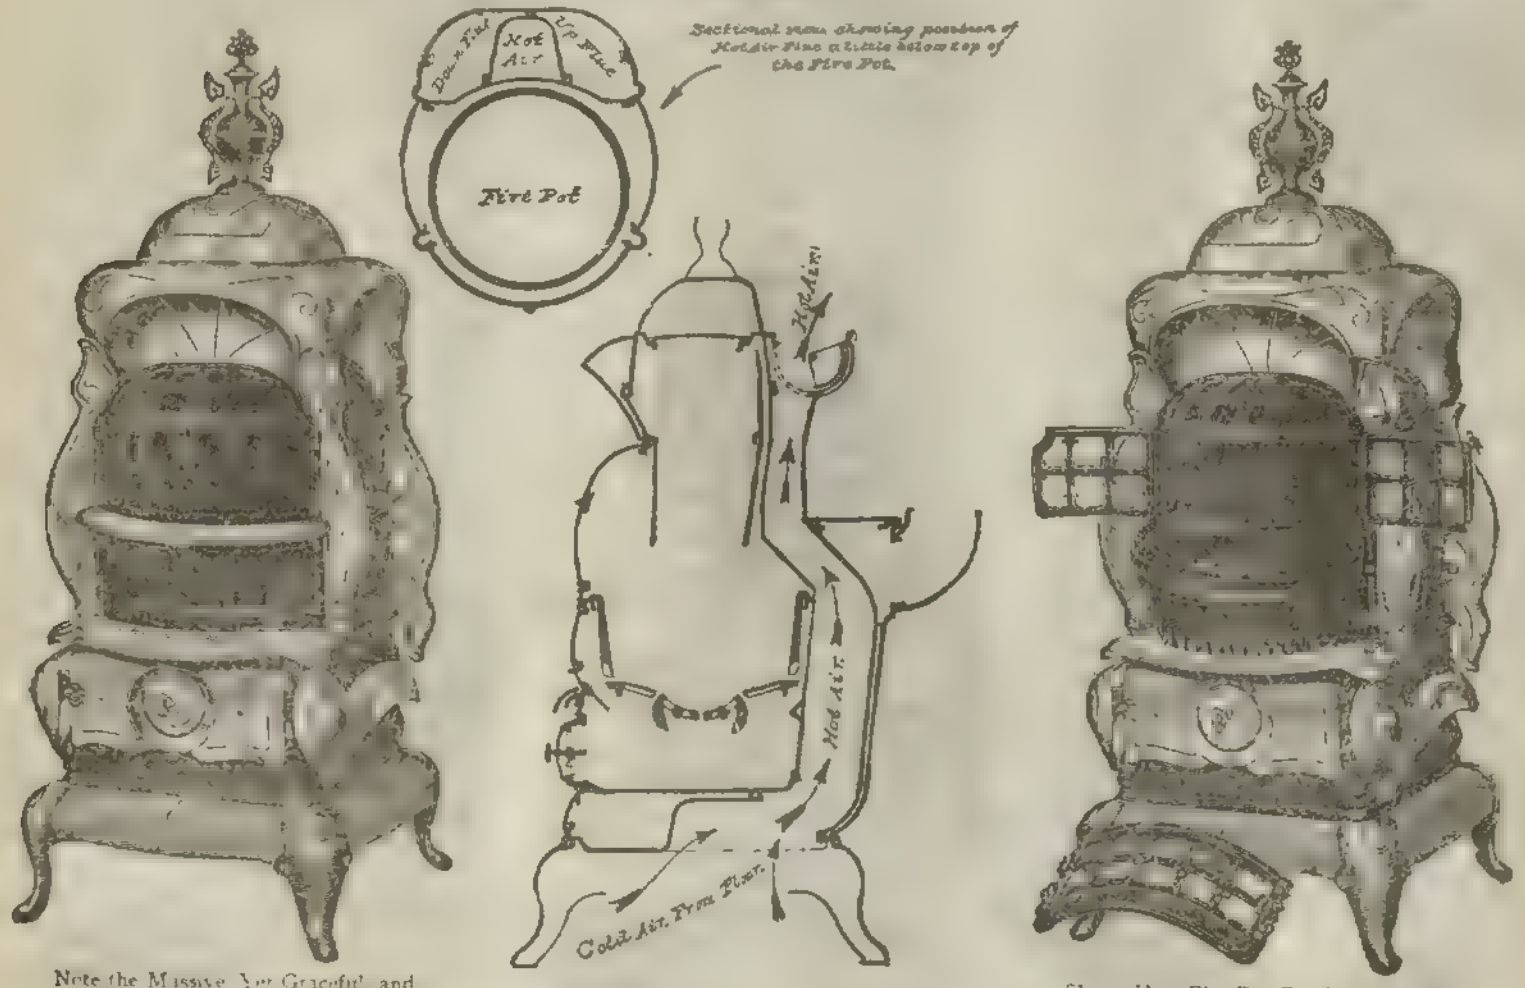
Fire Pot Construction, Etc.—Fire Pot Only Slightly Tapered, Giving Large Fire Surface on Grate. Long Contact on Bottom of Fire Pot Allows Air Ready and Insure Perfect Combustion. Can be Turned to Allow for Unequal Wear. The Loose Lining and Expanding Joint Permit Lengthening of Stove Body to Allow for Expansion of Fire Pot at Overheated. Fire Pot and all other Internal Parts can be Removed Only by Simply Opening the Front Door Frame. (See Cut.)

Grate Consists of Duplex Center Bars, which Quickly Crush all Clinkers. Has Bevel Sifting Ring that Forces Ashes, etc., to Duplex Center. Extra Wide Ash Guard Guides all Ashes into Ash Pan, Insuring Cleanliness.

All Heat Leaving the Fire Pot Makes Complete Circuit of Base, Heating All Corners Evenly, as the Circulation Forces Heat Currents to Sides and Corners of Base Flue.

Cleanout for Base Flues is in Front and Convenient.

Mica Doors, etc., have Bolts with Brass Nuts, which Insure Easy Removal.



Note the Massive Yet Graceful and Perfectly Proportioned Appearance

Shows How Fire Pot Can be Removed Through the Front Door

Double Heating Base Burner; for Hard Coal or Crushed Coke

The Above Illustrations Convey Reasonably Correct Outside Appearance and the Inside Construction of Our Popular Norleigh Diamond Base Burner.

The Following Parts are Super Nickel Plated. Dome and Deflector Top, Swing Cover, Corner Columns, Ash Pit Door, Name Plate, Side Rails, Leg Base, Draft Handles, Knobs, Hinge Pins, Turn Keys and Crank.

Third Dozen in a Carton

F·O·K·C

COLD BLAST.

Absolutely wind proof; gives bright light; has an inside lift that cannot get out of order.

The fluted globe plate prevents the wind from striking the flame, which burns without flickering.

It is our aim to furnish the trade a line that will give the best light possible to be had from kerosene, best in brilliancy and best in withstanding the wind.

Our lanterns have our **F. O. K. & Co.** trade mark and the number of the lantern stamped in the fount, and the **F. O. K. & Co.** blown in the globe.

F. O. K. & Co. lanterns are made by a factory whose goods have been favorably known for the past ten years, through the construction of the ONE PIECE TOP and FLUTED GLOBE PLATE.

F. O. K. & Co. lanterns are fitted with the **latest lifts, larger oil founts and extra large fillers and flush filler screw caps** and in their construction only the best grade of tin plate, wire, burners and globes are used.

BURNERS are high grade tinned steel with brass wick tubes.

Per Dozen

HORSE LAWN MOWERS

+FENDEN

Four Blade Reel; Drive Rollers 15 inches in Diameter; Diameter of Reel 8 inches; Finished in Green, Gold and Red Paint and Varnished; Handsomely Ornamented.

Guaranteed to give the best satisfaction of any Horse power mower on the market. The frame construction is the strongest that is possible to build and is reinforced at each end with heavy steel bars. All parts accurately machined and fitted. Equipped with the **only graduated** raising and lowering device, enabling the operator to instantly adjust the cutting height or allow the knives to pass over a stone.

Both the bottom knife and the reel are domountable without disturbing the frame of the mower. Reel bearings turn in adjustable split brass bushing. Four revolving blades 5/16 of an inch in thickness and made of the best knife steel obtainable, vanadium-crucible analysis, oil tempered. Double riveted malleable reel braces throughout.

Fitted with a train of three gears and durable triple pawl ratchets. Diameter of drive rollers 15 inches. Reel [illegible] in diameter and is quickly adjusted to the [illegible]tionary or [illegible], the adjusting screws being easily accessible and seldom require attention.

Fully equipped with driver's seat, shafts and side-draft attachments.

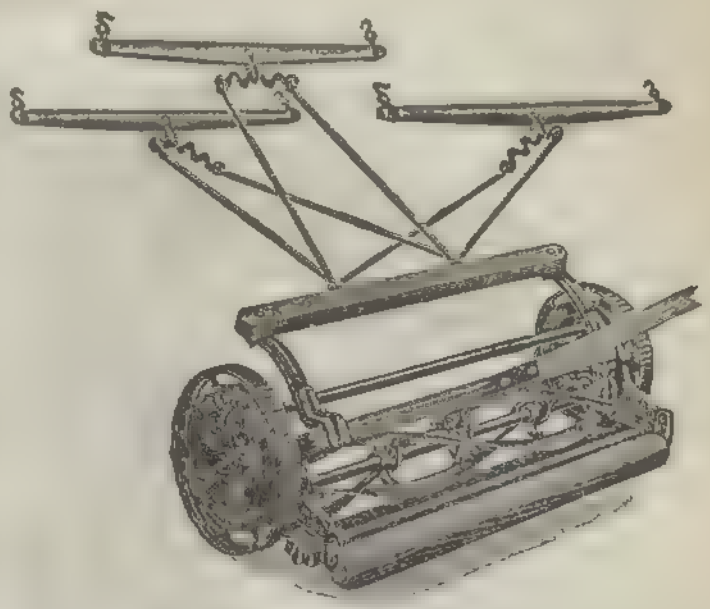
Items Marked + Not Carried in Stock; Can Only be Furnished by Shipping Direct from Factory, Richmond, Ind.

THE MERCHANT USING OUR MAIL ORDER SERVICE ACCOMPLISHES MANY TURNS OF STOCK, BECAUSE HE CARRIES A SMALL STOCK OF MANY ITEMS, RATHER THAN A LARGE STOCK OF A FEW ITEMS.

THE MORAL IS: BUY SMALLER LOTS. BUY OFTEN BY MAIL. KEEP EVERY DOLLAR TURNING AS MANY TIMES AS POSSIBLE DURING THE YEAR. OUR MAIL ORDER SERVICE WILL HELP YOU DO IT.

PONY LAWN MOWERS

CRESTLAWN—BALL BEARING



The Construction of this Machine is Positively the very best on the Market and is as near perfect as can be made. The parts making the Frame are all Lathe Turned and the Cast Bed Plate is Machined Into the Side Plates, Forming an Automatic Interlocking Adjustment which cannot be Jarred or Twisted out of Alignment.

Pony Mowers are often used by Hand Power and the Crestlawn is particularly Good for this Purpose, as it has **Ball Bearing Drive Wheels.** This makes the Machine Easy Running and very little harder to operate than many hand machines.

The Reel is made with Four Revolving Cutters and is Ball Bearing. The Ball Bearing Parts are Automatic in action and never need to be touched by the Operator. The Revolving Cutters are, therefore, held [illegible] conditions and will give a Clean Shear Cut at all times.

The Steel Bed Knife is made with Raised Lip, which adds Strength and Rigidity.

All material is first grade and the very best that money can buy

Drive Wheels 10½ inches high. Diameter of Reel 6 inches. Reel Axle ¾ inch. Adjustable to cut grass to lengths of ¼ to ½ inch. Cuts grass standing 7 inches high.

Handle and Roller of Hardwood Maple, thoroughly Seasoned and Finished.

Horse Attachment

Each Mower is equipped with our Patented Horse Attachment. This can be Adjusted Quickly and in such a manner that in operation the Mower is held to the ground and the disagreeable "tipping up" of the rear of the Mower is impossible. The draft of the Mower is just the same when operated by either horse or hand. With out Attachment the horse can walk in the middle, front or to either side of the mower and yet maintain a central draft at all times.

PYREX OVEN-WARE.

TRANSPARENT.

HAS THE NAME ON EVERY PIECE.

Pyrex ware is a serviceable and beautiful transparent glassware useful for either baking or serving. It is clear as crystal, nothing can penetrate its hard surface, it will not chip, bend or dent. Pyrex will not stain nor does it break from oven heat, it retains heat and completes the cooking of food quickly and in a satisfactory manner. Pyrex has a color that is appetizing; the shapes and designs are the latest; owing to the absence of cracks or seams it is easily washed or cleaned and is absolutely sanitary.

FISHING TACKLE

BASS-ORENO BAITS

This bait possesses the combined merits of all baits known as the wobbler type. It is a combination of the under-water and surface type. It floats when not in motion. The instant it is reeled, however, it dives, zig-zags, and darts in a very minnow-like course. The faster it is reeled the deeper it travels. The body of this bait is 3½ inches long, weighs ⅝ oz. High grade enamel guaranteed not to crack.

Bass-Oreno Assortment No. 373

This assortment as shown above contains two each of the following numbers: 973RH 973W, 973Y, 973F, 973 Rainbow, 973RHA. Each $12.00

The Fitchburg Lathe, 24 Inches Swing

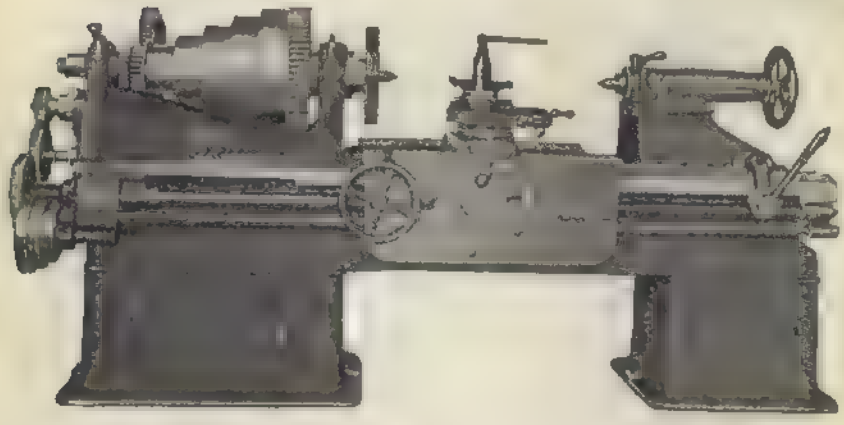

Fig 1555

Engine Lathe, 24 inches swing, bed 10 feet long

This screw cutting engine lathe represented in our New 24 inch swing engine lathe with compound rest carriages swing over carriage 15½ inches

Bed 12 feet long, there are 7 feet 4 inches between centers, has cross ribs the whole length and connecting the inner rails. Bed can be furnished any length desired. Beds 16 feet and longer are furnished with center legs and rod and screw supports.

Spindle has 1¾ inch hole through its entire length is made of hammered high grade steel and runs in bronze boxes.

Cone has 5 steps, largest diameter 16" inches for 3 inch belt, back geared 11½ to 1, giving 10 uniform changes of speed, ranging from 3 to 240 revolutions per minute

Feeds provided are power longitudinal and cross. Chapman patent feed used, which gives roughing and finishing cuts without removing gears and makes lead screw entirely independent. Lead screw never revolves, except for screw cutting. A locking device prevents the lead screw nut from being locked and the feed thrown in at the same time

Furnished with face and small face plates, stationary and traverse rests, extra side block for turning pulley, oil cups, large gears with swing over ways, full set screw gears, attachment to take out the moving gear forward and back or ways quickly and with ease, compound rest and friction pulleys, wrenches, etc

All bearing surfaces are large and carefully hand-scraped to a bearing

Countershaft pulleys 16 inches diameter, 4 inches face, should make 90 revolutions per minute

Weight 6,000 pounds. Can be furnished with taper attachment at extra cost

Lathes

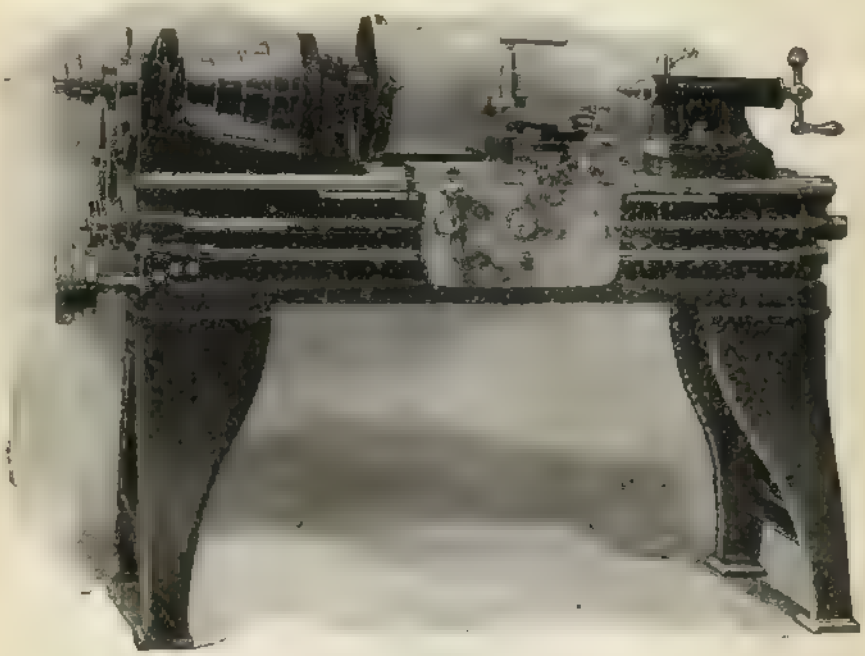

Fig 1556

16-Inch Engine Lathe

Modern, practical, high-grade, low price

This lathe is of the latest and most approved design The workmanship, material and finish are of the highest order throughout It is in fact a modern practicable high-grade tool at a low price All parts are heavy and substantial, the fittings are accurate and the appliances convenient

This lathe is provided with both screw and rod feeds as well as with power cross feed which is graduated Either plain or compound rest will be furnished also gears to cut all standard threads from 5 to 36, steady and follower rests, large and small face plates and friction countershaft go with each lathe

Dimensions Etc

Swings over bed, 15 inches swings over carriage 9½ inches, length of bed, 6 feet, takes between centers, 40 inches front bearing, 2⅞ inches diameter x 3½ inches long, hole through spindle, 1⅛ inches

Cones are 8, 6½, 5 and 3½ inches in diamater, pulleys on countershaft 9 x 3 inches. Speed 190

We can furnish any length of bed up to 12 feet long

Taper attachment, $30 00 extra

Set of 10 metal turning tools, ground and sharpened, ready for use $5 00

Hand rest, $3 50 extra Extra gears, $1 75 each weight 1200 pounds

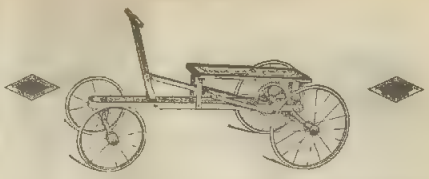
HAND CARS

★NORLEIGH DIAMOND



In our Norleigh Diamond Hand Cars we have embodied all essential features in an Article of this nature—Strength, Light Weight, Minimum Number of Parts and Ease in Running.

It is constructed entirely of Wrought Steel and Malleable Castings except the Seat Board, which is of Hard Wood, firmly Bolted to the Frame.

All Parts are either Bolted or assembled with Cotter Pins, so that the Car may be easily set up or knocked down for transportation.

While the Gearing is of a High Ratio to insure speed, a minimum amount of Power is required to operate owing to the Ingenious System of Levers, the Driving Rod being connected low down on the Lever Handle so as to insure ease in Operating.

Frame and Driving Mechanism Finished in Green.

Wheels and Handle Finished in Vermilion.

Seat Board Finished in Vermilion, Black and Gold, Gloss Varnished

Wheels are constructed with Extra Large Barrel Hubs with Outer Bearings; Ten Gauge Spokes are used instead of Fourteen Gauge, as our ordinary Hand Cars

Rubber Tires are thoroughly shrunk on to prevent opening up at Joints.

Extra Large Steel Axles—Steel Tubing Handle; Wrought Steel Fifth Wheel with Extra Heavy Braces—Large Brass Plated Steel Automobile Hub Caps—Gearing Riveted in two places to each Side Bar of Frame instead of only One Side as on ordinary Cars.

Note—Our object in bringing out the Norleigh-Diamond Hand Car was to have a Companion for our Norleigh Diamond Boys' Steel Wagon, a Car possessing distinctive Features and without the faults possessed by the old style Cars. In this we have succeeded and feel sure that no better like Article can be purchased for the money. Everything in its Construction is of Best Quality, made by Skilled Mechanics and built to stand hard knocks.

Each

HARNESS AND NEATSFOOT OIL.

HORSE HEAD BRAND.

HORSEHEAD HARNESS OIL.

It is a well known fact that harness kept reasonably clean and occasionally oiled will give much better service than harness which is neglected in this respect Any leather exposed to wear and weather will gradually lose its pliability and wearing qualities unless occasionally oiled

Before oiling a harness it should always be washed with warm water and good soap which does not contain alkali. Our F. O. K. Soap Dressing is an excellent article for this purpose. Any good Castile Soap or first quality Auto soap can be used with good results.

After thoroughly washing and cleaning the harness it should be allowed to become almost but not quite dry before applying the oil. Oil will penetrate leather that is slightly damp much better than if dry. If the oil is to be applied with the hands or cloth it should be thoroughly rubbed in and afterwards carefully dried

Harness should not be exposed to the sun to dry after being oiled but kept in a moderately warm place until the oil is thoroughly soaked into the leather so that it will not rub off on the hands

After oiling it is always a good plan to apply some good harness dressing to restore the finish as it also helps to retain the softness and pliability of the leather F O K Harness Dressing is a good article for this purpose and has been manufactured and sold under a manufacturer's name for many years.

We are prepared to furnish various grades of Harness Oil to suit all requirements and in quantities suitable for convenient use by retailer or consumer. Dealers may find it to their advantage to buy a quantity of Harness Oil in steel drums which we furnish complete with the faucet ready to draw off. This prevents waste and gives the customer the oil at a very moderate price as the expense of the cans and cases is eliminated

Oil sold in wooden barrels is a little cheaper than in steel drums. All shipments of oil in containers holding over ten gallons will be shipped direct the day after the order is received. Enter such orders on separate sheets. Less quantities can be shipped with other goods as ordered. None of our various grades of Harness Oil contain any ingredients which will injure leather

For prices and further description, see page 4521.

The Celebrated Foley and Williams Highest Grade Pianos

Strictly the Highest Grade throughout at prices of medium grade—Remarkable Values

STYLE 24

88 Note Player Concert Grand

This Player Piano represents the best in players with metal tubing being fitted with the famous Standard Pneumatic action.

Description

Made of carefully selected veneer; double veneered inside and out; hand-polished; duet extension music desk; rolling fallboard; continuous hinges, levers, pedals and other metal parts used inside and out are made of highly polished nickel plate; full composite bell metal frame; acoustic grooved sound-board; pin block of seven-ply hard rock maple, cross banded, warranted to withstand any climatic changes; three strings; overstrung bass; full copper-wound bass strings; double repeating, quick responsive action; patent brass flanges; tuning pins bushed with hard white maple; highly finished hammer rail; best quality felt hammers; empire top; genuine ivory keys; 7 1-3 octaves.

Player Action

Standard Pneumatic, which plays 88 notes or entire keyboard of the piano. Uses all standard music rolls whether with pin or socket ends. Has solid brass music roll flanges recessed out to receive edges of music sheet when swollen by dampness. This prevents the tearing or wearing of the edges of the sheet. All the metal parts of the player are solid brass.

The entire player mechanism is made of solid mahogany thoroughly dried and then preserved, and made permanently air tight by the forcing of chemical solutions into the parts of the wood.

The tubing (air ducts) is made of METAL instead of rubber used in other makes. These metal tubings are connected from tracker to primary action in an ingenious manner, fully covered by patents, and it is impossible for them to ever become loose.

The valve system, the heart of the player, is so constructed that it is self-adjusting to all conditions that can arise, and this fruitful cause of repairs in other players is entirely absent from ours.

Has the wonderful "Soloist" attachment, controlling the bass and treble sections of the piano either individually, altogether, or in any desired combination, giving the performer control over the accompaniment, no matter in what part of the scale it may come or how many notes it may include.

Height, 4 feet 7½ inches; width, 5 feet 2 inches; depth, 2 feet 4½ inches. Fully guaranteed.

Mahogany, Oak. Weight boxed, about 900 lbs.

Style 24—88 Note Player with Player Bench and Ten (10) Rolls of Music. Price.....$950.00

STYLE 26-B

CONCERT GRAND—7 1-3 OCTAVES

THE FINEST PIANO THAT MONEY AND SKILL CAN PRODUCE

The Case

This instrument is a genuine work of art and will add to the beauty of any home. Its massiveness is impressive and stately, while its richness is typified by its beautiful hand-carved truss and pilaster caps; by its heavy round corners on the sides, surmounted with appropriate cornice mouldings, and by its harmonious outline in general. Nothing but the choicest, selected veneers of Walnut or Mahogany of superb coloring are used, and the pilasters' trusses and heavy mouldings are veneered to match, as also are the three-inch arms and the toe-blocks, which are made of built-up (laminated) stock. The whole instrument is both time and wear-enduring, inside veneered in White Maple. Equipped with Empire top and "Grand" hinges.

Back and Frame

Construction is extremely strong and massive. Has six heavy, straight grained hardwood posts specially tapered. Ribs and sounding board of choicest spruce thoroughly air-seasoned and kiln dried, the latter being properly crowned to sustain power and pressure of strings to give tone quality; bridges, acoustic rims, pin block and key-bottom of laminated (built-up) stock, consisting of numerous layers of Rock Maple glued up with grains running at right angles to each other.

Interior

Full plate of bell metal thoroughly bronzed, beautifully finished; bushed tuning pins; fourteen pound hammers; selected ivory keys; triple repeating brass flange action; copper wound bass strings of best German quality; music wire best imported stock, absolutely noiseless metal trap-work, three pedals, full over-strung scale, seven and one-third octaves. Has a powerful rich and sonorous tone of great sweetness. The touch is perfect—very light and responsive.

Warranted for ten years. Height, 4 feet 9¾ inches, width, 5 feet 3 inches, depth, 2 feet 3½ inches. Weight boxed, about 900 pounds.

Style 26-B Concert Grand Piano with Bench and Scarf, Price.....$625.00

VIOLINS

These Violins quoted are guaranteed exactly as represented. They are exceptional good value and at prices quoted we know you will be perfectly satisfied that the intrinsic value is represented in article. We will be glad to entertain your valued order and should instrument not come up to your fullest expectation you are at liberty to return for credit

ANNOUNCEMENT

Owing to War conditions, in which connection, there are no Violoncello instruments to be had, we have refrained from advertising same. We believe this course exemplifies our policy in endeavoring to advertise only such merchandise which we are assured we can market.

However, conditions may improve, and in such an event, make known your wants to us, that we may serve you and save you money on your purchase. In cases of this kind, our policy will be to turn the merchandise over at a slight advance above factory cost, which in all instances will be lower than regular Wholesale selling prices.

Prompt shipments. Securely packed. Breakage entirely eliminated.

Prices quoted do not include bows. Bows quoted on following pages.

ANNOUNCEMENT

Make known your wants in Musical Articles not illustrated and quoted in catalog, as we have a limited stock on hand, hardly sufficient to warrant us cataloging same. But your wants may be in our stock and in such an event, we can save you money. Let us hear from you. Inquiries courteously and promptly attended to.

THE NEW FORT DEARBORN ELECTRIC PHONOGRAPH

Operates by Electricity. No Crank or Spring to Wind. No Noisy, Scratchy and Irritating Record Playing, but a Perfect, Natural and Soft Correct Reproduction is Attained.

A Remarkable, Perfect, High Grade Electric Phonograph, which will revolutionize the Phonograph Industry. Why pay $300.00 to $400.00 for an Electric, when you can purchase this strictly high grade machine for less than ONE-HALF.

We are so enthusiastic over this wonderful machine that we CONTRACTED with Manufacturers for entire output. Applied our own individual trade-name, as a Guarantee of Highest Quality.

CABINET

The best artist designers have produced the harmonious and beautiful lines which characterize this **Fort Dearborn Electric.** Genuine Mahogany, Massive, Solid Mahogany Trimmings, Handles, Solid Mahogany Veneered. Cabinet with Castors (though not illustrated) artistic grill front, Compartments for records and three countersunk Wells or Pockets for Needles, Mahogany inlaid, harmonizing beautifully with cabinet in general. Has a featured side, small, hinged door, thoroughly reinforced, which, when opened, has ample space permitting the resting of record albums, while remaining erect.

SOUND BOX

The **Fort Dearborn Electric** Sound Box, built with a free and easy floating motion, produces an even, rich and harmonious tone, and, being of the proper weight and balanced for the closest reproduction of tones, thus prolongs the life of the record.

TONE CHAMBER

Like the Stradivarius rare old Violins, the Amplifying Tone Chamber of the **Fort Dearborn Electric** is built of resonant wood, specially seasoned and prepared, and is designed on the latest scientific principles.

TONE ARM

New Improved Tone Arm, highly nickeled finish, skillfully designed and carefully reinforced, giving added strength is a feature in this machine. Plays any kind of record, Victor, Columbia, Pathe or Edison, with same attachment and without changing the equipment.

HEIGHT, 50 INCHES
WIDTH, 22½ INCHES
DEPTH, 22½ INCHES
PLAYS ALL RECORDS

Model No. 350 Fort Dearborn Electric Phonograph.

List Price.....$255.35

TONE QUALITY

Electrics when perfected as this **Fort Dearborn Electric** is, are the only Phonographs which reproduce correctly. The hum, and scratchy and irritating noise is completely eliminated, making its operation enjoyable and delightful.

TONE MODIFIER

No change of Needle is required in the **Fort Dearborn Electric** to produce tone modification to suit the most fastidious taste. The Volume of sound is increased by the simple moving of the modifier, or decreased in like manner, which is operated while the machine is playing, from outside of the cabinet.

THE MOTOR

The Motor is of the best material and workmanship, such as is found in only the $300.00 and $400.00 phonographs. Silent and smooth in operation and so much so, that there is no comparison with non-electric machines, which scratch more or less and do not reproduce correctly.

Universal slow speed, tap wound, operating through selective plug on

110-120 Volts.....DC
110-120 Volts.....AC 60 Cycles
110-120 Volts.....AC 25-50 Cycles

(which specify when ordering.)

No resistance required. Uniform speed of turntable under ordinary changes in voltage. 25-volt drop will not change speed of turntable. Suspension from metal base through shock absorbers. Hum of the motor completely isolated. All bearings hardened, ground and polished.

View Displaying Workings of this Highest Grade Motor.

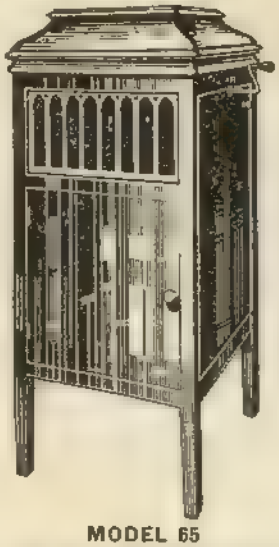
The SYMPHONY CABINET PHONOGRAPH

THE ACME OF SOUND REPRODUCTION



MODEL 65

Height, 45 inches; width, 18½ inches; depth, 21 inches. Equipped with Tone Modifier and Four Casters. Size of Top, 18½ x 18½ inches. Three Record Compartments. Made of Genuine Mahogany Veneer ⅜ inch wide, ⅝ inch thick, finished mahogany in gloss or flat finish and plain oak finished golden or fumed.

Price, each **$96.00**

Musical Features of the Symphony

PLAYS ALL DISC RECORDS

1. It plays every make of disc record with the same portrayal of tone quality as the instrument for which the record was made. See illustration below for method of simple adjustment necessary.

THE SOUND CHAMBER

2. The amplifier or sound chamber which for transmission of tone values, is the most important part of the machine, has a very large wood sounding horn starting from the tone arm and ending with the grill at front of cabinet. This amplifier is made of carefully selected, resonant and vibratory materials.

THE SOUND BOX AND TONE ARM

3. The sound box and tone arm used are of universal type. The sound box being a delicately adjusted bit of mechanism that responds with almost human sensitiveness to the slightest vibration. It will reproduce the proper tone value of any record consistent with the quality of the record used.

THE MOTORS

4. All motors used are of highest grade; are constant speed, non-vibrating and give an even sustained tone. Motors used on the two styles, No. 65 and No. 75, will run four 10-inch records without rewinding, while on styles No. 100 and No. 150, a still higher grade motor running five 10-inch records are used. Our motors are skilfully designed and positive in action.

SPEED REGULATOR AND TONE CONTROL

5. A speed regulator, properly sealed and conveniently located, and tone control maintained at the source of tone production, are features incorporated in our models.

WOODS AND FINISHES

6. First-class materials only are used; genuine veneered mahogany which is especially thick, permitting of proper tone retention is used throughout. Approximately 80 per cent. of all machines sold are in mahogany finish, balance in golden oak and fumed oak. However, if necessary can furnish other finishes, such as Jacobean, Silver Gray, Early English, etc.

MODEL 75

Height, 45 inches; width, 18½ inches; depth, 21 inches. Tone Modifier and Casters. Two Doors. Four Record Compartments. Made of genuine Mahogany Veneer, 13/16 inch walls and doors, finished mahogany, hand rubbed and quartered oak finished golden or fumed.

Price, each **$112.00**

MODEL 100

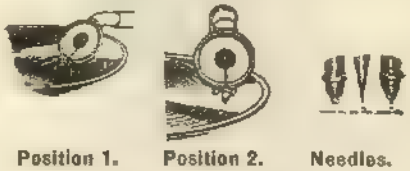
Height, 47 inches; width, 19½ inches, depth, 22 inches. Tone Modifier and Casters, two doors and Six Record Compartments. genuine mahogany veneered 13/16 inch walls and doors, hand rubbed and quartered oak finished golden or fumed.

Price, each **$140.00**

When ordering, state finish wanted. If omitted, most popular finish will be sent at your risk.

PLAYING POSITION

To Play All Records Just Loosen One Thumb Screw to Change the Sound Box.



Position 1. **Position 2.** **Needles.**

Position 1.

Set with steel needle. For playing any lateral cut record such as Victor, Columbia, etc., sound box meets the turntable at an angle of 55 to 65 degrees.

Position 2.

Set with Sapphire point. For playing Mathews and other Hill and Dale cut records, such as Edison, Domino, Rex, Pathe, etc.

NEEDLES

Steel Needles—Use any standard make.

Sapphire Ball—For Pathe Records. Each **$0.90**

Sapphire Point—For Edison and Columbia Records.

Each **$0.90**

Last two of above, play 200 to 400 records.

Diamond Point. **$8.00**

Lawn Beauty with Economy and Conservation of Labor

Under ordinary conditions, hand mowing is inefficient and expensive. This year, with labor at a premium and also at impossible to obtain, hand mowing is prohibitive

The solution to the lawn cutting problem is the

FULLER & JOHNSON
MOTOR LAWN MOWER

The Fuller & Johnson Mower combines the convenience of a hand mower with large cutting capacity In one day's time one man can cut five acres of lawn with the Fuller & Johnson. He can cut it so perfectly that no after-trimming around trees, shrubs or driveways will be necessary. He can cut it when needed instead of waiting, as with a horse mower, until the turf is solid so that the lawn won't be marred by the horse's hoofs.

This is what the Superintendent of the Park District of Oak Park, Ill., has to say about the Fuller & Johnson

"Replying to your inquiry of July 5th, we are glad to say that the Fuller & Johnson Motor Lawn Mower which we purchased from you a few months ago has been in constant use, has required very little repairs and has been in every way very satisfactory, so much so that were we in the market for another machine of this type, I am sure we would not hesitate to purchase another of this kind."

All over the country, in parks, cemeteries and on large estates, Fuller & Johnson Motor Lawn Mowers are fast replacing hand mowers, horse mowers and the heavier types of motor mowers. Where you find the most beautifully kept lawns there too you will find the Fuller & Johnson Mowers, for good business judgment as well as lawn beauty dictate their use. Let us send you complete details about the Fuller & Johnson. Write for a copy of our new book entitled "A Better Lawn."

What lies back of the brilliance of a MAZDA lamp? All the facilities of the world's greatest lamp-makers supporting the standards set by MAZDA Service. :: ::

MAZDA

"Not the name of a thing, but the mark of a service"

The Meaning of MAZDA

MAZDA is the trademark of a world-wide service to certain lamp manufacturers. Its purpose is to collect and select scientific and practical information concerning progress and development in the art of incandescent lamp manufacturing and to distribute this information to the companies entitled to receive this Service. MAZDA Service is registered in the Research Laboratories of the General Electric Company at Schenectady, New York. The mark MAZDA can appear only on lamps which meet the standards of MAZDA Service. It is thus an assurance of quality. This trademark is the property of the General Electric Company.

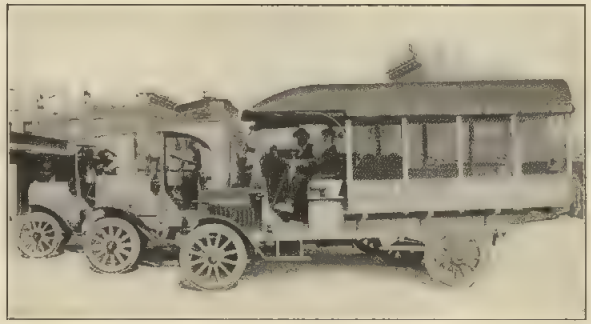
GMC
GENERAL MOTORS COMPANY
TRUCKS



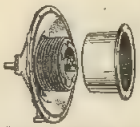
When Baltimore adopted GMC Trucks an unspoken testimonial was tendered the makers; for Baltiomre, as a municipality is authoritative.

Baltimore has made remarkable civic improvements; has "come back" after a ruinous fire; has taught her city neighbors valuable lessons in city government—has recognized the inherent worth of GMC Trucks.

In the water department, particularly GMC Trucks are serving the city with profit and satisfaction.

GMC Trucks are also doing public in thousands of other city departments over the country. This is because every resource is drawn on by the factory to build in satisfaction.

Seven parts exclusive of three small bolts and the plates make up the GMC Clutch. No lubrication is necessary.



In low gear, with the drive wheels locked the engine will stall before the clutch will slip.

GMC
TRUCKS

GMC Trucks provide pulley power

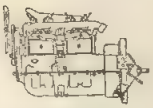
An interesting example of the versatility of the GMC Truck is the service it performs by means of the "take-off" winch attachment.

One of the practical uses of this feature is shown in the pole raising scene in the above picture which is reproduced from a photograph. The GMC Truck is being used for line construction at Camp Gordon near Augusta, Ga. Five other GMC Trucks have been purchased by the Southern Bell Telephone Company on the showing made.

The winch device can be attached to any GMC Truck, and it is very simply operated.

In loading heavy machinery on a truck and for many other uses, the winch will do the work of several men. It is a labor saver, a time saver, and a money saver.

Order your next GMC Truck with a winch attachment or add this inexpensive feature to your present equipment. You will find it a profitable investment.



Power Plant

The source of power the heart of the mechanism—a GMC engine is built for greater strength and endurance than will ever be called for during its life.

GMC engines are simple in construction and dependable in service. Three point suspension guarantees against strain. Adjustable parts are easily reached.

REPAIR PART OUTFIT

No. 2 Outfit—Contains 6 dozen No. 60 rubber gaskets, 3 dozen No. 62 felt packing, 1 dozen No. 64 felt holders, 1 dozen No. 74 tip cleaners, 12 dozen No. 66 burner tips.....Each $7.50

GASOLINE LAMPS

The Air-O-Lite gives five times the light of a big center draft oil lamp and twenty times the light of a common kerosene lamp, and does this at less than one-third the cost.

The fount of twenty gauge brass tested 200 pounds to square inch, has capacity of two quarts of gasoline. Burns 25 hours.

By air pressure the gasoline feeds from the bottom of fount up through the lamp stem. As the column of liquid rises, the heat of the mantles turns it into vapor, so we burn vapor, not liquid.

The burner is of solid rolled brass and nickel, the Air-O-Lite mantle is very durable- shade is 10-in. opal ribbed

Each lamp is equipped with 2 mantles, lighter, pump, wrench, hanger, extra asbestos filter, extra tip screen and set of cleaning tools for removing old and inserting new filter.

No. A307—Air-O-Lite.....Each $12.50
One in a Carton

GASOLINE LAMPS

This lamp is a trifle smaller, but in brilliancy, safety and all other essentials is equal to the No. A307 Air-O-Lite. It holds three pts. of fuel, burns 18 hrs, has automatic cleaner and filler plug. Has mellotone opal shade.

M322—Air-O-Lite .....Each $11.50
One in a Carton

This lamp is similar in construction and general appearance to No M322, only it lights with matches instead of being generated with an alcohol torch The burner is supported by the air intake tube, which takes in the air below the mantles, where it cannot be affected by heat. It holds 3 pints, burns 18 hours, and is equipped with 2 mantles, pump, wrench, hanger, and extra generator. Has 10 inch opal ribbed shade.

No. Q307—Air-O-Lite.....Each $10.50
One in a Carton

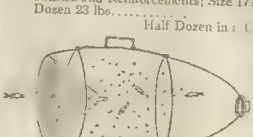
Half Dozen in a Crate



ORVIS PATTERN

The Ease, Rapidity and Certainty of Securing Live Bait with This Trap Has Placed it Far Ahead of the Old Method of Using a Minnow Seine.

Place a Handful of Cracker Crumbs Inside the Trap, Attach a Cord to the Handle and Lower Trap Where Minnows Frequent. When Lowering into Deep Water, Fasten end of Cord to a Float so Trap Can be Readily Regained. Per Dozen

No. G1 Heavy Flint Glass Galvanized Steel Wire Handle and Legs, Size 15x8 inches. Weight per Dozen 118 lbs. $60 00

Twelfth Dozen in a Wood Box.

GETZ 'EM KANT BREAK

Can be Set in Running or Still Water; only Weighs 15 ozs. and Won't Break; no Parts to Rust or Come Apart. In a Stream the Door Goes up Stream; Attach a 3-foot Cord in Loop on End the Door is on; Crush Three or Four Crackers and Put in the Funnel End. Turn Funnel End Down. Press Trap to Water until Full. Attached to an Weight that Will Hold Trap at Water. When Using Trap in Still Water Use a Longer Cord than Trap Depth and Tie. See that an Air is Left in Trap. Per Dozen

No. G2—Made of ¼-inch Pyralin, Reinforced at Both Ends with Galvanized Steel Bands, Riveted to the Pyralin; Galvanized Steel Door and Handle; Brass Legs; Size 12x6½x6 inches; Weight 15 ozs. $54 00

One in a Carton; Weight per Dozen 22 lbs

Gibraltar Bumping Post

These Solid Steel Shoe Castings are designed to fit the contour of any size rail and have ample bearing surface on the tie at the end of the rail—each casting is bolted to the rail through the web of the rail by six ¾-inch bolts. The shoe castings are tied together and kept from spreading by a 1¼-inch tie rod with double nuts.

We continue the use of the very strong features of our post, viz.: The 9-inch 21-pound I beam anchor, 10 feet long, and also the 1¼-inch diameter U-bolt

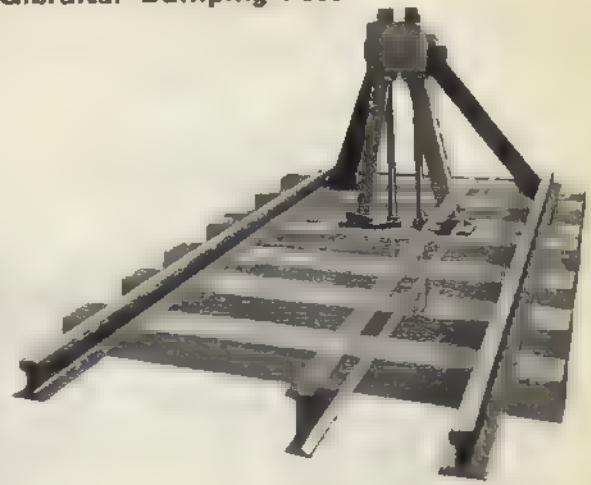


Fig. 44
Style B16 — Gibraltar Structural Steel Freight Post Side View

The whole combination is designed so as to make a perfect structure to resist shocks exerted on head casting without putting undue strain on any one part, whether same is in tension or compression.

Please note that this post will be shipped knocked down and one man can handle any of its parts. The installation is simple and the parts so fitted that no mistake can be made in setting it up

We have spent time and money in the production of an article that is strong, durable and efficient and meets all requirements at a price much less than any post offered on the market

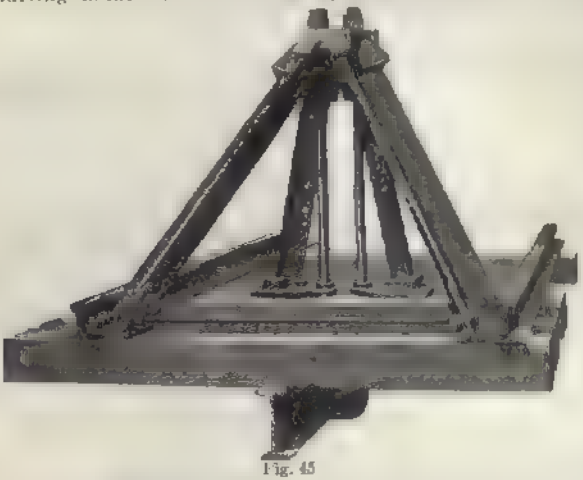

Fig. 45
Style B15 — Bumping Post — Rear View

The Gibraltar Bumping Post has a record of many years of service on a large number of the best railroad systems of this country and the same railroads continue to be our regular customers That answers the question of satisfactory service by the

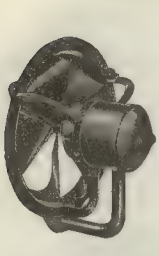
ILG VENTILATING.

SELF COOLED MOTOR.



For ventilating stores, offices, restaurants, theatres, lodge rooms, schools, industrial plants, etc. May be used either to blow in or exhaust air. Easy to install and positive in action.

The ventilation is accomplished by a vacuum created in front of the fan drawing air through a tube connecting the hood with outdoors. After passing around the motor the air is carried away with the general exhaust.

The fan motor is completely enclosed by a metal cover which protects it from dust, dirt and grease, which would destroy an open motor.

Every fan is given a careful heat and running test on the exact current, voltage and frequency on which it will be used.

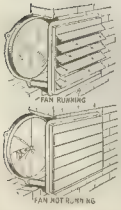
Finished in green enamel, very pleasing to the eye and very durable.

Each

*ILG—**Ventilating Fans;** size, 16 inches; 110 volts; Universal A. C. or D. C., approx. 1700 cubic feet of air per minute; uses 90 watts per hour; approx. weight each, 45 lbs $45.00

F. O. B. Chicago, Ill.

AUTOMATIC SHUTTERS.



ILG automatic shutters are used on the outside of propeller fans to protect fan when not running and to keep out wind, rain and cold.

Shutters are built of special hard rolled aluminum leaves pressed on Whiting alloy copper coated rod supported in cast iron frame.

When fan is running, shutter is held open by the force of the air current. When fan is shut off, shutter closes automatically by gravity.

Shutters are moisture proof and need no attention after they are installed.

Each

*ILG **Automatic Shutters;** size, 16 inches; weight each, 13 lbs $12.00

F. O.B. Chicago, Ill.

*For shipment from factory only.

POLAR CUB.

THE $6.85 FAN WITH TWO SPEEDS.

This new model will compare with the best fans that are being made. A staunch guard has been added to it and a stop having two speeds.

All parts are interchangeable. Frame is die cast. Cannot possibly get out of alignment. Bearings are integral part of the die-casting. Guard spot-welded, practically unbreakable. Fan adjustable to any angle. Breeze can be thrown in any direction. Base has hook for attaching to wall. Thoroughly insulated. Equipped with 8 foot cord and plug.

Lubrication (via wick). Light oil preferable; sewing machine oil best.

Shell. Standard die-casting. Material is special alloy which has been thoroughly tested.

Brushes. Square moulded carbon.

Switch. Made up with Ward Leonard Resistance Unit.

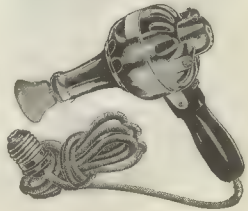
Voltage. Minimum 100, average 105 to 115, extreme 130 Safe-running at 125. Guaranteed from 100 to 130.

Speed. A. C. 110 volts, high speed 3000, low speed 2100. A. C. 125 volts, high speed 3500, low speed 2600. D. C. 110 volts, high speed 3400, low speed 3000.

Each

No. PC—Polar Cub; Height 8 inches, from base to top of guard, 6 inches to top of motor; diameter of blades, 6 inches; weight each complete, 3 lbs. $6.85

HOME VIBRATOR.



Vibrator complete with nickel plated motor, ebonized handle, plug and cord and three applicators. Will operate only on direct or alternating current, voltage between 100 and 130 and at a frequency of 60 cycles or less.

Each

No. B84 –Vibrator; height over all, 7 inches; width, 6 inches; weight each, 2¾ lbs. $6.85

NEW LIFE VIBRATORS.

The new Life Vibrator will relieve pain and give strength and vigor to the entire body. A few minutes application to the effected parts produces wonderful stimulation.

New Life Vibrators relieve headaches, neuralgia, indigestion, rheumatism, lame back, sore or stiff joints or muscles. If the scalp is full of dandruff or lacks life or lustre or if face is afflicted with blemishes, pimples, wrinkles, etc., New Life Vibrator is an excellent remedy.

Ten thousand electric impulses a minute may be obtained by simply attaching the New Life Vibrator to an electric light socket and switching on the current.

Electric vibratory massage has long been recognized as the most efficient remedy for ailments arising from congestion or imperfect circulation.

Vibratory massage applied to the effected parts quickly breaks up these obstructions in the blood channel and by stimulating the flow of blood causes the disease breaking toxins to be rapidly washed away.

TYPE "D"

Each

Type D.—Electric Vibrator; a light efficient vibrator for family use; may be instantly stopped or started by means of push button in handle; outfit consists of vibrator with 5 applicators nicely packed in black leatherette case; weight complete, 3½ lbs..... **$13.50**

All above for both direct or alternating current.

SEW-E-Z.

Here's the wonderful little sewing machine attachment which runs the machine for you. You can sew without foot-pedaling; absolutely without the slightest effort. This simple little wonder-worker changes any sewing machine (old or new) into an electric self-operating labor saver. No matter what the make or style of your machine or how old it is, Sew-E-Z will relieve you of the treadmill grind of running it.

The little self-starter enables you to sew as slowly as you do now without the motor or as fast as you wish, up to 800 stitches a minute. Speed is regulated entirely by the degree of pressure from your foot on the little self-starter.

Sew-E-Z never falters. No jerks, no snapped threads. Just steady, silent motion which stops the instant you remove your foot from the little self-starter.

Easily adjusted, no tools or screws. Just place Sew-E-Z on your machine so that the little cork pulley bears lightly against the hand wheel; attach the plug to any electric light socket, then place the little pedal on the floor. A slight pressure of your toe starts the wheel. You are through forever with the drudgery of treadling.

Don't work your foot. Just press a bit harder to go faster. No effort is required; no exertion whatever. You can sit and sew in any comfortable position. So simple a child can operate it. Makes such light work that Grandma can use it.

Take it to the neighbor's—you can pack Sew-E-Z in a small parcel. No extra bulk. Sew-E-Z does a big work in a simple way and comes in small, compact, convenient form.

Five-year guarantee by the manufacturers, Hamilton-Beach Mfg. Company, Racine, Wis.

Packed with every Sew-E-Z is our five-year guarantee, your absolute insurance of satisfaction.

Each

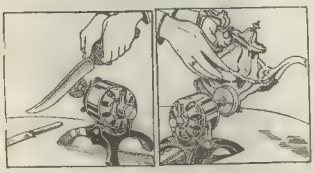
No. 12—H. B. Sewing Machine Motor, complete; weight each, 8½ lbs. **$15.75**

One in a box.

ELECTRIC MOTOR ATTACHMENTS.

TO BE USED IN CONNECTION WITH SEW-E-Z MOTORS.

GRINDER AND BUFFER.



The Carborundum grinder attached to Sew-E-Z motor will grind or sharpen all dull carving knives, kitchen knives, etc. It is easily attached and detached and does the work as quickly and easily as other power machines.

The buffer attachment may be used for all kinds of polishing; cleans and polishes silverware thoroughly. It is easily attached or detached to Sew-E-Z motor.

Per Set

No. GBA—Combination Grinder and Buffer Attachment Only; for use with Sew-E-Z motor **$1.25**

FAN.

Electric fan attachment for use with Sew-E-Z motor [illegible] easily attached or detached and are elegant air producers.

Equipped with four 8-inch polished brass blades.

Each

No. FA—Fan Attachment Only; for use with motor; diameter of fan, 8 inches **$2.50**

POLAR CUB HOME MOTOR
AND

THE MAN WITH THE MACHINE

Is the man who gets results in road and street making.

We furnish machines for every class of street work — Grading, Crushing, Rolling and Oiling.

The Little Winner Light Reversible Road Machine. Used with two, three or four horses. Keeps dirt roads and streets smooth and level at little expense.

Corrugated Metal Culvert Pipe. Easy to handle. Convenient to lay. Made in many different sizes, from 8" to 72" diameter.

Labor shortages and freight embargoes mean delayed shipments. The only remedy is to order early. If you would have your machinery on time, Order NOW.

Our catalogue, "Everything for the Road Maker" is an interesting and instructive book. A copy is yours if you ask for it.

The Monarch Pressure Distributor applies light oils and tar products. Capacity 600 gallons. Furnished for horse or auto truck power. We also furnish a complete line of Heating Kettles.

The Champion Portable Rock Crushing Outfit. Made in many sizes from 60 to 300 tons daily capacities.

Monarch Tandem Roller. Made in 5, 6, 9, and 10 ton sizes.

Inquiries will receive cheerful attention.

THE GOOD ROADS MACHINERY COMPANY

Kennett Square, Pa.

A *Little Giant* in the Garage

Saves Time—Labor—Expense

(Cuts both United States and S. A. E. Standard Threads)

BOLTS and nuts will become bruised, rusted or broken. But there's no need to send to the factory for new parts. With a set of Little Giant taps and dies a new bolt can be made easily and quickly or a bruised thread cleaned up so the nut will turn on.

The illustration shows a repairman running over a bruised spring shackle bolt with a bit brace die holder used in an ordinary bit stock—a convenient tool for hard-to-get-at places.

Curtailment of automobile production means increased repair work on old cars, consequently increased demand for tools for the work.

Private owners as well as garages find Little Giant taps and dies easy cutting and long lived tools.

Get in touch with our proposition for the sale of auto repair tools. Catalog free.

Wrenches for Every Industry

Car builders and car repairers find Whitman and Barnes Wrenches to be bigger than any wrench job—they take hold and hang on until released.

Whitman and Barnes Drop Forged Wrenches are made in all standard sizes to meet wrench requirements in all metal-working, mechanical and operating lines.

Sixty-four years' study of materials and methods goes into every Whitman and Barnes Wrench. It's because of the goodness that is put into them that greater wear and longer life come out.

The "W. & B." in the Diamond Trade Mark appears on every Whitman and Barnes Wrench. Discriminating workmen have insisted on this mark on wrenches for a lifetime.

PORTABLE OVENS

Fully Guaranteed

FOR GAS, GASOLINE, ALCOHOL AND OIL STOVES

Asbestos Lined Throughout—Full Tin Lined Large Mica Window Alaska Door Handle—Perfectly Ventilated

Made of Polished Blue Steel, Highly Polished Surface, Uniform Blue Color, Heat will not discolor or change appearance.

Ovens are Full Lined, this Lining forming a Wide Flue or Air space between the Outer Body of the Oven and the Lining itself, the Side and Back Linings are Corrugated and Stamped out of One Piece, making them Extra Strong and Durable. This system of Ventilating insures the greatest possible **Economy of Heat and the most thorough Ventilation.**

The Grates are made of Heavy Straightened Wire, securely Fastened together at the ends, making the most Durable Grate for this purpose of any on the Market.

The Glass Doors are Patented and we claim to have the only Correct Method of holding the Glass in position so as to secure the proper Expansion and Contraction when Oven is in use. We Guarantee every Glass Door Oven against Breaking from Heat, should a Glass be broken accidentally, it is a **very simple and inexpensive matter to replace it.**

Patented Heat Deflector distributes the Heat to all parts of the Oven, insuring a uniformity of Heat which permits Baking to be done on the Upper Shelf as on the Lower Shelf. It also prevents burning the Bottom of Articles to be Baked. Deflector is Removable and can be replaced in a few **Seconds without removing a Single Bolt or Screw.**

The Sun and Holophane Alike
In Some Respects

JUST as the sun distributes its rays evenly over the earth, so the Holophane system of illumination diffuses the light evenly over the street, covering a wide area.

The Holophane Street Lighting Refractor, by a scientific arrangement of prisms, utilizes every ray from the source and floods the streets with a strong, full, non-glaring illumination.

You will not get the best results from your lighting system unless you utilize the Holophane unit. It makes a good lighting system *better*, regardless of style, type, make or design.

It can be used with any type of standard, either gas or electric.

Ideal for city and suburban streets, parks and play-grounds.

Holophane cuts the cost of operation, and effects a saving which should not be considered lightly, in view of the present coal crisis.

If you want to prevent the waste of light on your streets, you ought to have our free literature. Why not send your address today?

HOLOPHANE GLASS CO., INC.

340 Madison Avenue Dept. A-22 New York City

Hamilton 16-Inch Screw-Cutting Engine Lathe

Style "A"

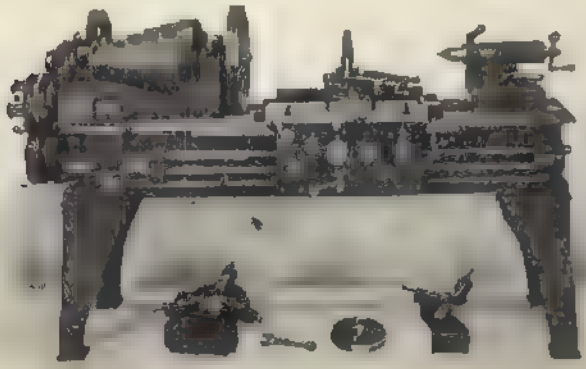

Fig 1550

This lathe is illustrated above. It has back gears, hollow steel spindle, bronze spindle boxes, power cross feed, universal screw cutting and feeding arrangement, positive geared feed, automatic stop for both screw cutting and feeding, reverse movement controlled from apron, chasing dial, gear guards, etc. For complete description, see special circular.

Hamilton 16-Inch Screw-Cutting Engine Lathe

Style "B"

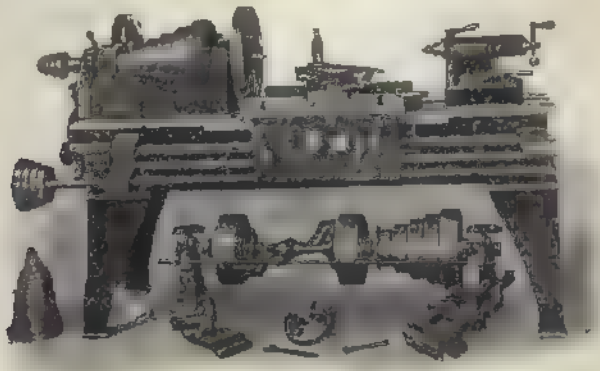

Fig 1551

This lathe is illustrated above. It has back gears, hollow steel spindle, bronze spindle boxes, power cross feed, independent screw and roll feed, automatic stop for feed, chasing dial, gear guards, improved feed belt tightener, etc. For complete description, see circular

Handlan ventilation, Handlan bail stiffener Handlan construction, Handlan efficiency

Care of Signal Lanterns

General Rules

1 Lanterns are equipped for burning good signal oil.

2 The lanterns should be thoroughly cleaned inside and out.

3 The wicks, when charred, should be broken off with the fingers or with a stick Do not trim them with a shear unless the wick has frayed

4 Fill the fount ¼ inch from the top. This allows for expansion and will prevent the flooding of the oil pot receiver.

5. The oil pot should be cleansed thoroughly and all sediment removed daily otherwise if sediment is left in the cup it will deteriorate the new oil when refilled. The wick acts as a strainer and in time accumulates considerable quantity of foreign matter and the oil becomes gummy and this will prevent the smooth flow of oil which is necessary for a clear steady and uniform flame As soon as the wick becomes dirty throw it away and replace it with a new one

There are no adjustable parts in the lantern to become misplaced and if the above rules are followed there will be absolutely no reason to remove the wind break as this is the repair part that is properly fitted to the lantern in the factory.

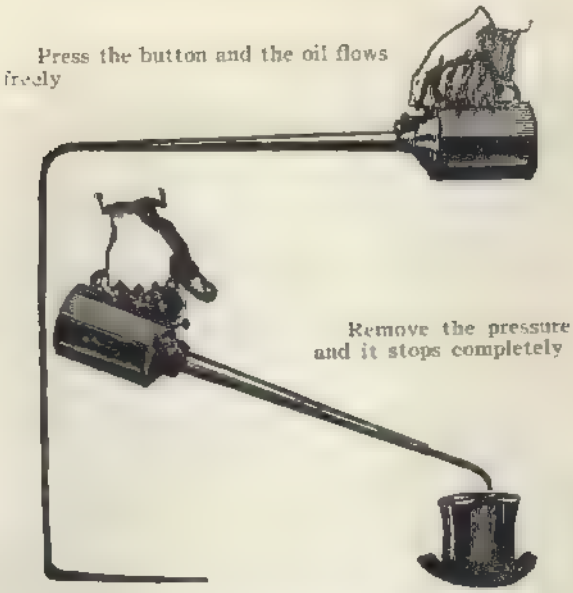
Handlan Perfection Valve Oiler



Perfection Valve Oilers

Handlan Perfection Valve Oiler

The Waste of Oil

seems necessary with the ordinary oiler, it being impossible to reach many parts without pointing the spout downward and so dribbling all over the machinery and floor, but there is a way of avoiding this waste and annoyance, which is simplicity itself.

Perfection Valve Oilers

The world's favorite on land and sea. Used by the United States warships, trans-Atlantic and Pacific steamship companies, automobiles, boats and private yachts, largest manufacturing plants, city water departments, pumping stations and railroads. Particularly adapted for automobiles. The oil cannot flow until you press the button. No dirty tool boxes. No greasy tools.

We manufacture special pattern for automobile tool boxes and special purposes.

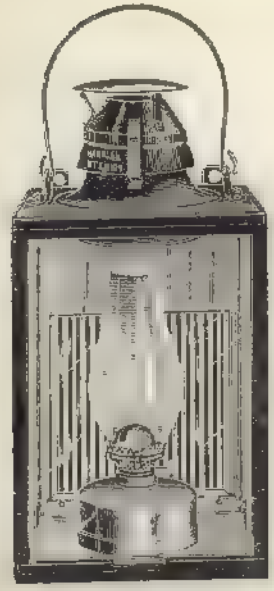
Handlan Square Station Platform Lamps



No. 208

No. 208

Made of No. 24 sheet steel, tinned, with standard signal lamp ventilation, very much more durable and efficient than the regular 12 x 14 reflector lamps with silvered glass reflectors

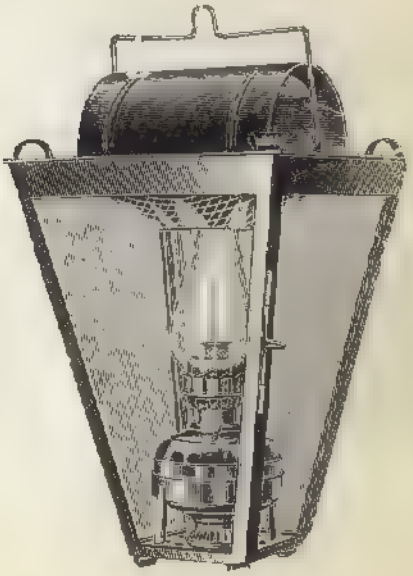
This lamp is made of heavy sheet steel throughout, has seamless drawn steel fount, no leakage, the ventilation is the same as on signal lamps, and will remain lighted; equipped with fluted glass mirror-reflector and a No. 2 standard chimney burner. No 76 chimney burner gives about twenty-five candle power

Size 10 inches square, 20 inches high; with bail and wall brackets

No. 198 New Mill Lamp

Brilliant light, improved ventilation. Specially designed for lighting mills, factories, compresses ware houses, etc. The peculiarly constructed deflector diffuses the light downward and in every direction around, while the electric fount used is the same powerful light we have manufactured for years

This lamp will give satisfaction where no other will serve the purpose



No. 198

Handlan Square Station Platform Lamp

No. 197

No. 197 Square Station Platform Lamp

Made of tin and lacquered; size 12 x 14 inches. No. 2 burner. 6-inch glass reflector.

No. 196 Square Station Lamp

Made of cold rolled steel; rigid or swinging bail; no chimney; No. 2 Zenith brass burner; corrugated glass reflector, extra heavy guards; no tubes to fill up with insects, etc.; makes a most serviceable station lamp.

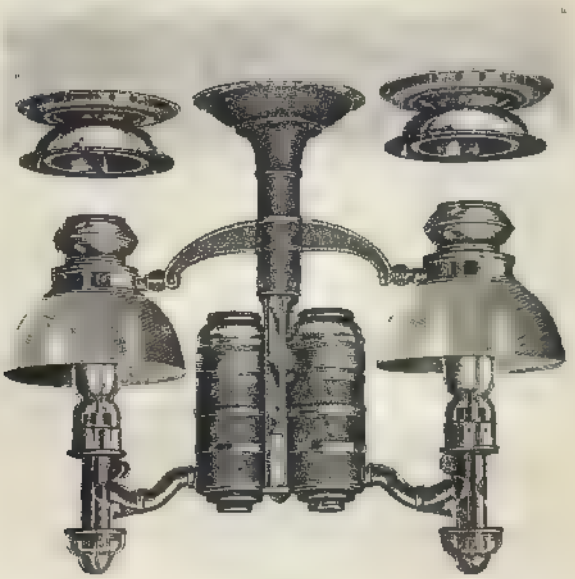
Handlan Car Lamps

No. 62

No. 62 Center Hurricane Lamp

Is a two-light patent center Hurricane lamp, 16 inches spread and made any required length, throwing no shadow and emitting a clear, steady and brilliant light. The wicks can be kept fully turned up at all times. The lamp is of the most substantial construction, while by means of a cam movement the movable portions can be readily removed or restored to their places as desired. This lamp has been established as the standard in the Pullman passenger cars and in the cars of the Metropolitan Elevated Railroad.

No. 124 Center Lamp



No. 124

Standard drop over all, 26 inches, distance from center to center of burner, 20½ inches; drop at center over bell cord, 23 inches.

Used extensively in baggage, express and suburban cars. In ordering, state finish and drop over all required.

Above lamps any finish.

No 283

Size 9x14 inches per dozen $11.50

Indestructible, Reliable, Economical

Special attention is called to the spring cover to protect the flag at the staff when laid across the back of wood staff. Metal staff is not affected by heat. In the flag and cover is a perforated steel plate which can be painted any color. By the adoption of this design only two sizes to be carried in stock and any number of colors to contain all the different color requirements required for road and yard use. Metal staff is the most durable and strongest known and is not affected by heat or cold as wood is.

Running flags cannot wind the staff and are hard to distinguish when in motion as standing staff flags or when moving, fly straight back so that persons in front can only see them with difficulty, while the metallic flag, being firmly held by its springs, is always practically at right angles with the direction of the train's motion, and can be readily seen from any point of view.

Handlan Metallic Flags

Single, Showing One Color

No. 280
Round Bracket
For Round Socket

No. 281
Flat Bracket
For Flat Socket

The above cuts show our latest patterns. The flag is made of sheet steel, the bracket of malleable iron. Exhaustive tests by some of the largest railroad systems have proven this flag more efficient and far more economical than the fabric flag.

All Metal No Wood Staffs Practically Indestructible

Will Not Fade, Tear or Soil

Always in view. The spring arrangement in the bracket keeps them constantly in motion. Are easily distinguished and can be seen at a greater distance than fabric flags. They do not droop or fly directly behind the staff, making it hard for the eye to detect them or their color.

DISPLAY BOARDS.

RIVERSIDE TOOLS.

TWO-INCH OAK FRAME.

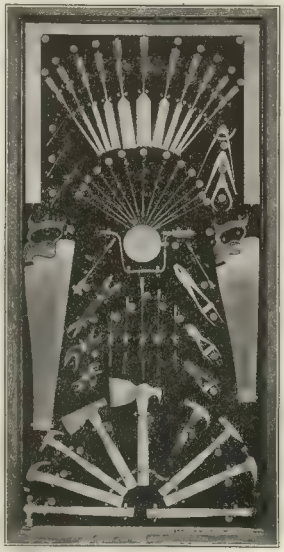
NO CHARGE FOR BOARD OR MOUNTING.

We are prepared to make special display boards of our Riverside Tools or of any other line of General Hardware, Builders' Hardware, Paint Brushes, Cutlery, Fishing Tackle, etc.

We will mount any or all of the items your customers may choose on boards covered with green or black felt and framed with heavy 2-inch oak. No glass cover is used as they invariably break and do not permit the goods to be examined as does the open face board. Any size or shape that your customer may desire.

FOR THE WINDOW.

As a display board for the window, as a background, or as an attraction for some special article on sale, this board is not only a psychological medium demanding the attention of the passer-by, but it is an article well placed and in harmony with any hardware window of any size—then after the board has been taken out of the window, it may be put to use in many different ways, always selling the goods it displays.



IN THE STORE.

There are always some spots on the walls of the hardware store that are vacant. This space is worth time and money. It affords a splendid opportunity for Mr. Merchant to show what he has to offer.

It does not require a long line of sales talk to sell a customer after she is in the store. He has come in with an object in mind—to purchase. It is up to Mr. Merchant to show him the goods and not sell him, but let him select by placing one of these attractive display boards up on the wall in front of the customer. You will be saving the salesmen in the store the work of getting out the stock, littering up the counter and putting it back again.

AN ATTRACTIVE BOARD.

We will mount on boards as illustrated above, any of our Riverside Tools, Builders' Hardware, Paint Brushes, Cutlery, Fishing Tackle, or any articles desired in an attractive manner, giving either a full line or just a representative line of each kind of article. We will furnish the boards and do the mounting, the customer to pay our regular wholesale price for the tools. You may give us a list of tools that the customer may select or you can leave it to us.

No Board will be prepared that contains less than $12.00 worth of tools.

HARMOGRAPH TALKING MACHINES

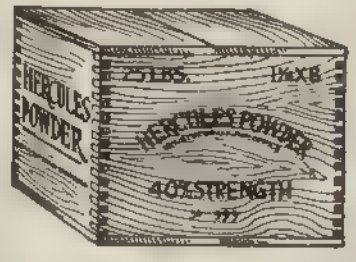
DYNAMITE

Shipped from Magazine Only



In making Hercules dynamite the nitroglycerin is so compounded with fine wood pulp and other material, that the sensitive nitroglycerin is robbed of much of its dangerous quality. When the process of manufacture is completed, the product closely resembles a slightly damp and very fine sawdust It is then packed into cylindrical shells of tough paraffined paper known as cartridges. The standard size of a cartridge is 1¼ inches in diameter and 8 inches in length. This weighs about one-half a pound, and there are 50 pounds, net weight, of dynamite packed in a shipping case.

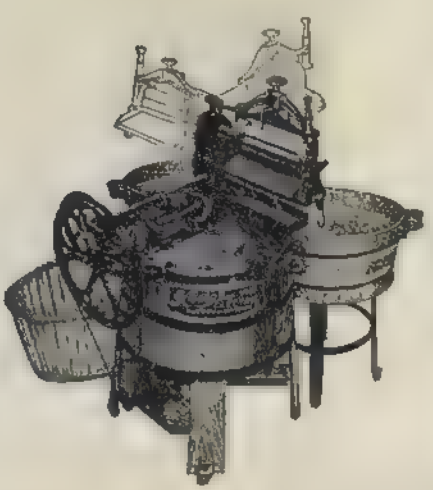
HORTON WASHING MACHINES

ELECTRIC



Has machine cut gears throughout, all exposed gears are covered, self-locking lid, tub made of high-grade cypress, attractively finished and fully corrugated on inside. Has a ball bearing steel frame wringer attached, guaranteed for five years, with a reversible water board and a convenient lever to swing same, enabling wringing of clothes between tubs and basket. Safety trigger separates wringer rolls instantly, a lever starts stops or reverses same. Attachment for hand operation when necessary

110 Volts, 60 Cycles

No. 32—Direct Current.....Each $100 00

No. 32—Alternating Current.....Each 100 00

One in a Crate

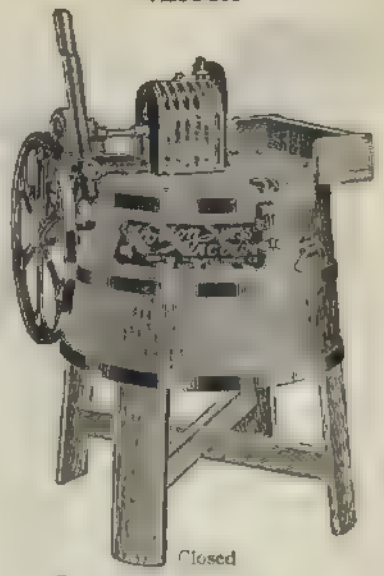
POWER

Same general construction as No. 32 Washer, only equipped with a pulley for gasoline or steam engine power

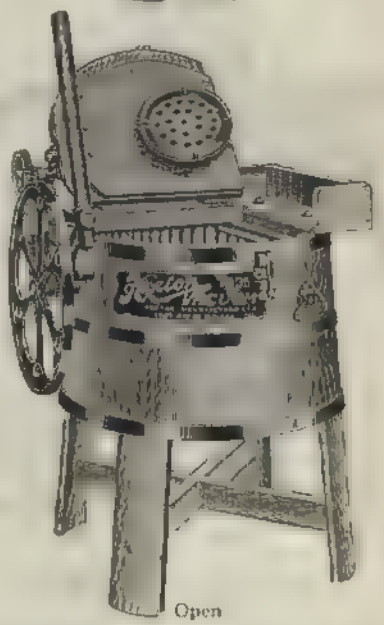
No. 31.....Each $52 80

One in a Crate

VACUUM



Closed



Open

The plunger, or agitator, does 50% more work with the same effort than on other machines, because it makes 2½ strokes to each stroke of the operating lever. This high speed, without more power, is made possible by the frictionless machine-cut gears and the perfectly balanced mechanism. The high speed of the plunger, with its many perforations or air valves, causes so much agitation that the clothes are thoroughly cleaned in less time than by any other vacuum type machine. It can be operated with power of any kind, by simply exchanging the large fly-wheel for an 8 in. flat belt wheel. This valuable feature is possible because of the mechanism being disconnected when the lid is opened, and this also eliminates the need of tight and loose pulleys. The operating lever can be used in either one or two positions, to suit the convenience of the operator. Cypress tub, fully corrugated on the inside finished in natural wood, fly-wheel and hoops green enamel, balance of mechanism in gold bronze. Plunger heavily galvanized. All gears are covered

No. 36 Vacuum.....Each $20 10

One in a Crate

Extra Pulleys for Power.....Each $2 25

PEERLESS WATER MOTOR

A motor which is a new departure in water motor construction. Instead of having poppet valves like other motors, it has an automatic sliding valve which is not dependent on springs to operate. This does away with all spring and valve trouble.

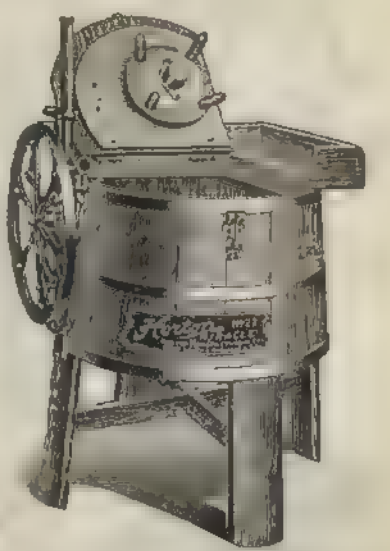
It will operate nicely on as low as twenty pounds water pressure. It is equipped with high grade wire wound hose

The tub is the stave leg type finish in natural wood. Motor, hoops and trimmings in green and red.

No. 30—Peerless . . . .Each $26 50

One in a Crate

MIRACLE



The tub is (extra large) and is made from Louisiana cypress thoroughly seasoned, fully corrugated on the inside. The fly wheel and hoops are green enameled, the balance of the mechanism is gold bronzed, the tub has three coats of coach varnish.

The fly wheel can be removed easily and a belt pully attached, making it a power machine. The operating lever can be placed in either one of two positions, convenient for a short or tall person. The dolly post is guarded by a galvanized cup, eliminating all possibility of tearing clothes

No. 23 Miracle.....Each $19 00

One in a Crate

Extra Pulleys for power .....Each $2 25

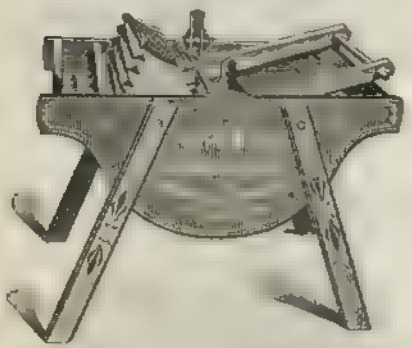
WASHING MACHINES

AMERICAN

Lever motion, tub made of the best grade of Louisiana cypress, 22 inches in diameter at top, 25 inches at bottom, 14 inches deep, finished in natural wood. The post connecting dasher with gearing is made of iron. All metal parts galvanized.

No. 4, American . . . . . Each $7.30
One in a Crate

SUPERIOR



Made of kiln dried Arkansas cottonwood and will not warp, split or decay. It has a removable bottom rubber, which gives an opportunity for thorough cleansing.

No. 15—Superior. . . . . . Each $5.30
One in a Crate

ADVANCE

Ear Movement

Select dry lumber, cast ears. Length 28 inches, depth 14 inches, width 19 inches height 25 inches, inside measure.

Removable Bottom

No. 2 —Red finish. . . . . Per dozen $60.00
Twelfth Dozen in a Crate

ADVANCE

Ball Movement

Same size and construction as No. 2, only with ball movement which makes it easy to lift rubber out of machine

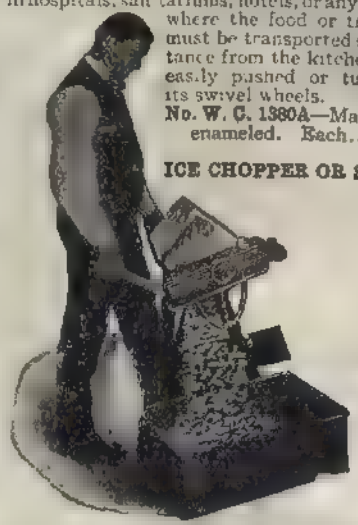
FOOD WAGONS

This wagonette is equipped with 8 inch solid rubber, clinched-on, tired wheels. It has a push handle at each end and is supplied with two metal reinforced wood carrying trays, which slide on tracks. The trays are 30½ inches long, 18⅝ inches wide and 4 inches deep and have handholds on each end. The entire stand to the top of the upper tray is 39 inches high. This wagonette is exceedingly popular in hospitals, sanitariums, hotels, or any building where the food or the dishes must be transported some distance from the kitchens. It is easily pushed or turned on its swivel wheels.

No. W. C. 1380A—Maroon enameled. Each... $67.20

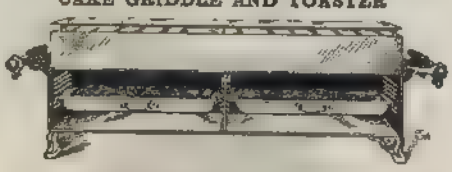
ICE CHOPPER OR SHAVER



Materials and workmanship the best, knives of best tool steel, wearing parts heavily galvanized. Galvanized iron tank furnished. Does its work clean and nothing scatters around. Instantly adjusted for cutting ice coarse or fine. Chops 100 pounds in a few moments. Weighs 75 pounds, takes little space, and anybody can handle it.

Gem ..... Each $38.00

CAKE GRIDDLE AND TOASTER



The top baking surface is made of very heavy steel plates carefully polished. The toasting racks are of extra heavy standard wire, so made as to rest in the top of the sheet iron drip pans. A very economical stove, as the waste heat from the toasting compartment is utilized for baking griddle cakes. Either kind of gas.

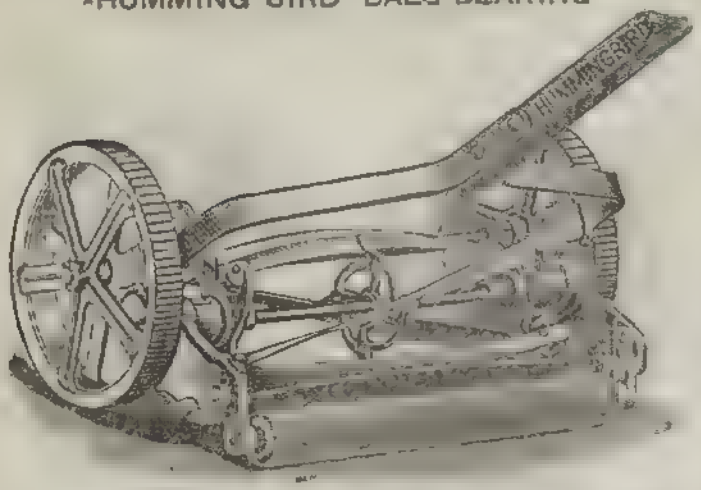
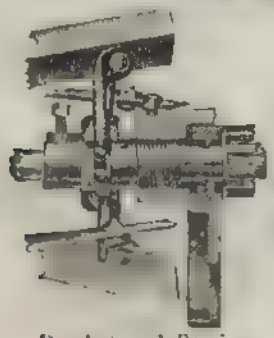
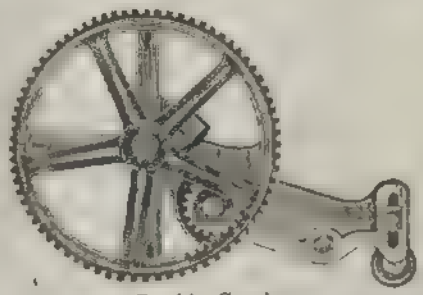
LAWN MOWERS
*HUMMING BIRD—BALL BEARING





Ratchet and Bearing



Double Gearing

This Mower is the Latest Design of the new Open Type Construction. Very Light and Easy Running, yet Built with Refined Castings that are Thoroughly Strengthened. Wheels, Side Plates and Cutter Bar Castings of Good Quality of Gray Iron, Malleable Iron Reel Braces, Perfectly Fitted and Riveted to Reel Shaft, which makes it Impossible to Spring the Reel. Adjustable Malleable Iron Roller Brackets. The Shrub Bar and Reel Shaft are of the Best Cold Rolled Steel Shafting, and they will not vary .001 of an inch from Size. Steel Ball Bearing Cup or Race Securely Set in each head, with Tempered Cones Inserted in the Side Plates of the Machine. One of the Cones is made with Four Holes, into which a Wrench can be Fitted to take up any Lost Motion in the Reel Shaft. Double Geared both sides; Double Steel Sliding Pin Ratchet; Adjustable Hardwood Roller; Wrought Steel Handle Braces; 3½-foot Varnished Hardwood Handle, with Cross Bar set in Malleable Iron Bracket and Bolted.

*HUMMING BIRD—BALL BEARING

High Wheel; Four Blades

Handsomely Finished in Silver and Gold Bronze; Blue Trimmed.

Diameter of Wheels 9 inches. Diameter of Reel 5¼ inches; Width of Blades 11/16 inches; Reel Shaft ⅝ inch, Front Bar ⅝ inch.

Adjustable to Cut Grass to Lengths of ½ to 1¼ inches. Cuts Grass Standing 5 to 6 inches High.

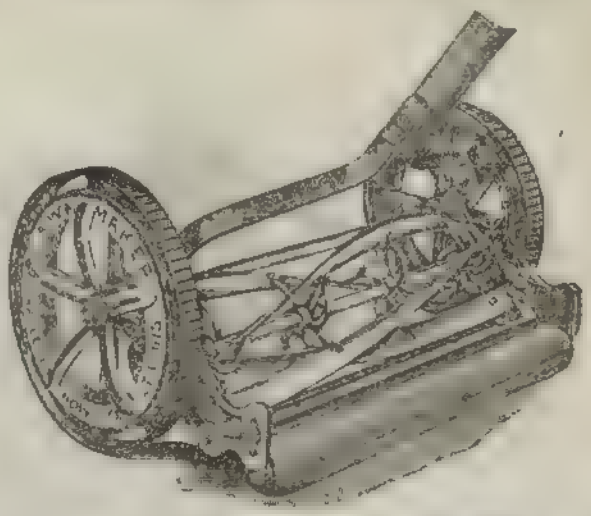
LAWN MOWERS
*LAWN MAKER—PLAIN BEARING



Ratchet and Bearing

Wheels, Side Plates and Cutter Bar Castings of Good Quality of Gray Iron. Malleable Iron Reel Braces Perfectly Fitted and Riveted to Reel Shaft, which Makes it Impossible to Spring the Reel. The Roller Bracket is Malleable Iron, Eliminating the Possibility of Breakage, and is Built with a Gudgeon Entering the Roller 2¼ Inches Instead of an Iron Pin Driven Into the Roller, Running in a Hole in the Bracket. This Does Away with the Roller Splitting, after it is Subjected to Weather conditions, and Runs Noiselessly.

The Shrub Rod and Reel Shaft are of Best Cold Rolled Steel Shafting, Each Being ⅝ inch in Diameter and are Guaranteed Not to Vary .001 of an Inch from Size. The Axle for the Wheels is Formed by the Shrub Rod Passing Through the Center of the Side Plates, Enabling the Wheels to Turn on Steel Bearings which Add to the Easy Running Qualities of this Machine.

Reel Bearings are Equipped with Brass Bushings and Lock Nut Set Screws for Taking up any Lost Motion. Geared on Each Side, the Pinions Having Deep Cut Teeth, which Engage Strongly and Firmly in the Gearing of the Wheel, Giving Long Life and Durability.

The Flat, Lipped Steel Pawls are Extra Large and Thoroughly Tempered to Prevent Wear or Breakage

Cutter Bar Adjustment—Most Screw Adjustments Have Two Screws Acting Against Each Other on Either Side of the Pivotal Point. With This Construction the Cutter Bar Bushes Are Sure to Be Sprung when a Close Adjustment is Attempted. To Obviate this Some Manufacturers Have One Screw Operate from the Top and the Other from the Bottom, with the Objection that the Mower Must be Turned Upside Down for Adjustment. Both Difficulties are Overcome by a New Patented Device which Permits Both Screws to be Operated from the Top and Against a Finger Extended from the Main Body of the Bar.

*LAWN MAKER—PLAIN BEARING

High Wheel; Four Blades

Aluminum Body; Gold Wheels, Trimmed in Dark Blue and Silver.

Diameter of Drive Wheels 10½ inches; Diameter of Reel 6 inches. Four Heavy Cutting Blades of High Grade Crucible Steel, Oil Tempered, Shear Cut and Self Hardening; Ground Under Running Water to Preserve the Temper. All Bearings Carefully Machined and Fitted.

Adjustable to Cut Grass to Lengths of 5-16 to 1½ Inches. Cuts Grass Standing 7 Inches High.

A Durable Handle and Roller of Hard Maple, Thoroughly Seasoned and Neatly Varnished.

Width of Cut, Inches. . ..	14	16	18

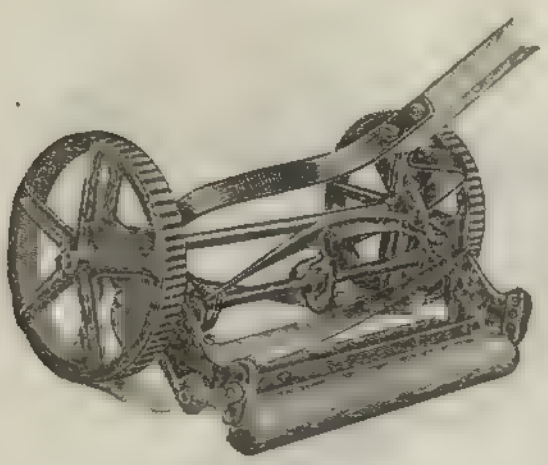
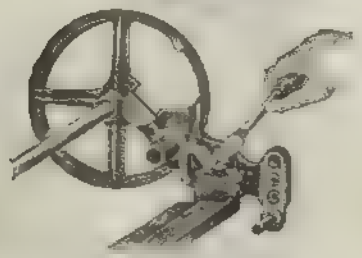
LAWN MOWERS
*RED CLIPPER—PLAIN BEARING





Bed Plate Adjustment

This Mower is a Popular Design of the New Open Type Construction, very Light and Easy Running, Yet Built with Refined Castings That are Thoroughly Strengthened. Holes are Drilled Through the Center of the Side Plates, by Two Operations to Insure Exact Dimensions, Through which a Piece of Accurately Rolled Steel Shafting Passes, Forming a Shrub Guard and an Axle for the Drive Wheels, Enabling them to Turn on Steel Bearings. The Fit between the Shafting and Side plate Holes is so Perfect that there is Absolutely no Play and with a Set Screw Passing Through a Lug on Each Side Plate and Fastening into Recesses in the Shafting, Makes a Strong and Immovable Frame Construction. These Recesses in the Shafting are Accurately Placed, so that the Side plates will be at Right Angles with the Cutter Bar, Making a True "Four-squared" Frame. The Drive Wheels are Held in Place by a Malleable Lock Washer and Spring Cotter.

Adjustable Malleable Iron Roller Brackets. Reel Braces are of Malleable Iron Securely Riveted to the Cutting Blades and Steel Shaft, which Passes Entirely Through the Reel, Producing the Strongest and Most Rigid Reel that is Possible to Build. The Reel is Equipped with Adjustable Brass Bearings and Device for Taking Up all Wear.

Screw Adjustments Throughout. A Positive and Durable Ratchet Geared on Each Side. Good Quality of Materials and Workmanship. Fully Guaranteed. For Better Quality and Value for the Money is Offered in this Machine than in any other Lawn Mower Made.

*RED CLIPPER—PLAIN BEARING

High Wheel; Four Blades

Empire Red with Gold Bronze Wheels and Decorations.

Diameter of Drive Wheels 9 inches; Diameter of Reel 5½ inches; Shrub Rod ⅝ inch; Reel Shaft 9-16 inches; Three Cutting Blades of Crucible Steel, Carefully Tempered, Water Ground and Self-sharpening.

Adjustable to Cut Grass to Lengths of ¼ to 1¼ inches. Cuts Grass Standing 5 to 6 inches High.

A Varnished Handle and Roller of Hardwood Maple.

Incandescent Electric Headlights

No. 1638R Incandescent Headlight

12-inch

Accommodates a range of railway Mazda concentrated filament lamps—G18½ to G30 inclusive

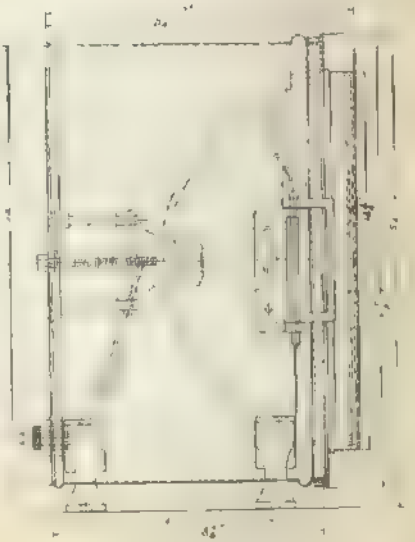
The case is neat, compact and of light weight, consistent with strength is provided with a detachable, weather-proof door, securely fastened—can be furnished with Golden Ray parabolic glass reflector, or of copper, silver-plated if desired

Attention is directed to line drawing opposite given for the purpose of demonstrating simplicity of the focusing device.

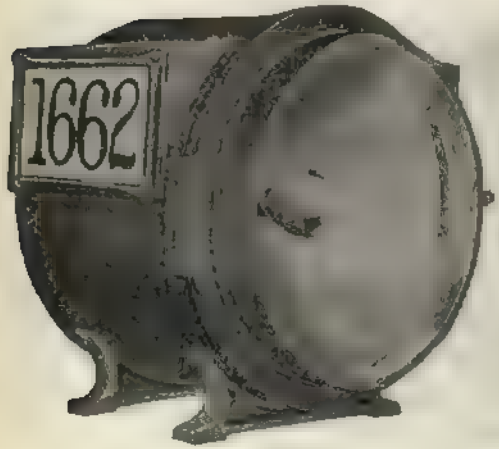
Prices quoted do not include lamps

With glass reflector..each $28.00

With copper S. P. reflector.....each 24.00



Incandescent Electric Headlights



No. 1662 Incandescent Headlight

12-inch

Accommodates a range of railway Mazda concentrated filament lamps—G18½ to G30 inclusive

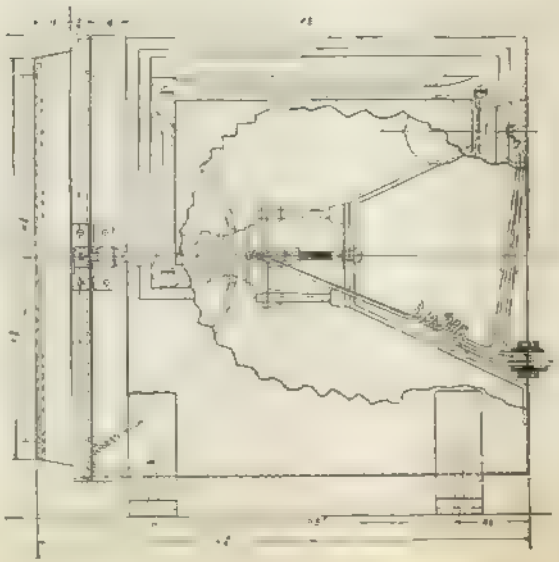
Is very similar to the style shown on opposite page, but fitted with side number frames to meet conditions where such is a necessity—An auxiliary lamp is properly placed to give ample illumination to the side numbers

Attention is directed to line drawing opposite given for the purpose of demonstrating simplicity of the focusing device

Prices quoted do not include lamps

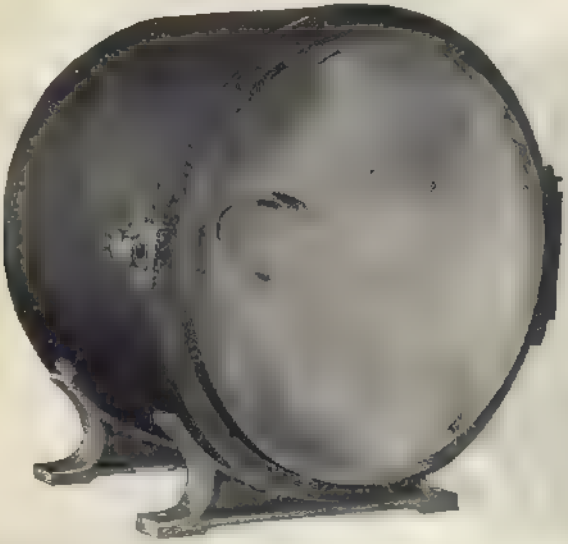
With glass reflector.....each $33 00

With copper S. P reflector.each $28 00



Incandescent Electric Headlights

No. 1644R Incandescent Headlight

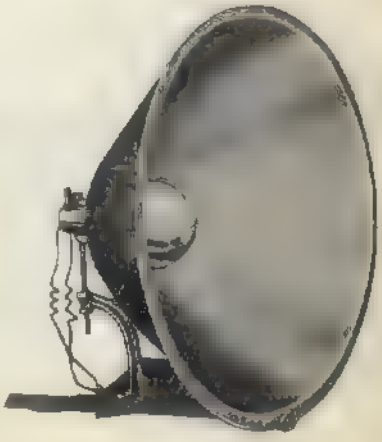


16-inch

Accommodates a range of railway Mazda concentrated filament lamps—G18½ to G30 inclusive.

The above cut illustrates a somewhat larger headlight than those shown on the preceding page, and may be found advantageous in certain locations where a greater volume of light is required. It is furnished with a copper silver-plated reflector.

Prices quoted do not include lamps. Price . . . . . each $38 00



Interior for Above Headlight

Incandescent Electric Headlights

No. 1665 Incandescent Headlight

16-inch

Accommodates a range of railway Mazda concentrated filament lamps—G18½ to G30 inclusive

Is very similar to the headlight shown opposite, using the same reflector, but furnished with side number frames and auxiliary lamp to properly illuminate same—electrical connections are made automatically by blade contacts

Prices quoted do not include lamps

Price .... each $40.00

Interior for Above Headlight

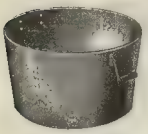
INDURATED FIBRE WARE.

List adopted March 29, 1918

FIBROTTA.

"Fibrotta" Ware is moulded from a mass of fibre, hydraulically pressed. The care that is taken in the manufacture of each article makes it impervious to moisture; is brown in color and highly polished; it is a non-conductor of heat and electricity and is not affected by action of ordinary acids.

WASH TUBS.



Bottoms chimed; No. 6 gauge galvanized wire handles; galvanized steel ears, copper riveted; black enameled wood grips; wringer attachment with every tub.

Nos.	F0	F1	F2

Two dozen in a crate.

Industrial Horn Signals

Heavy Duty Interior Type

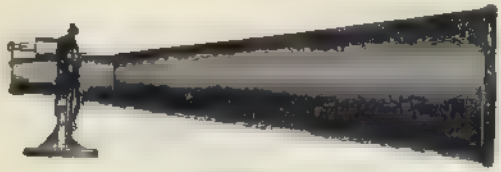

Fig 1077

Interior fire alarm, factory calling, etc. All-steel construction. Heavily japanned. Will replace large gongs. Approved by Underwriters Laboratories. 11½-inch diaphragm, 18-inch projector, 24 inches long over all. No contact points, no springs, no adjustments. Outside connections.

No 660. A. C., 110 volts, ¼-amp., 40-60-cycle $8 00
No 665. A. C., 220 volts, ¼-amp., 40-60-cycle 9 00

Designed for intermittent service. Made to order, any voltage 10-230.

Arranged for direct current, same class and dimensions as above.

No 680. D. C., 110 volts, ⅓-amp. $9 00

Made to order, any voltage 6-115). Used with resistance unit on 230 volts.

Leader for Industrial Calling Systems

Suitable for interior fire alarm, start and stop, automatic alarms, time switch, watchman, job limit systems, and other uses. Will replace electric bells up to 12-inch. All-steel construction, heavily japanned. Designed for intermittent service. Approved by Underwriters Laboratories. 4-inch diaphragm, 7-inch projector, 10 inches long over all. No contact points, no springs, no adjustments. Outside connections.

No 440. A. C., 110 volts, ¼-amp., 40-60-cycle $6 00
No 445. A. C., 220 volts, ¼-amp., 40-60-cycle 7 00

Fig 1078

Made to order, any voltage (10-230).

Arranged for direct current, same class and dimensions as above.

No 480. D. C., 110 volts, ⅓-amp. $7 00

Made to order, any voltage (6-115). Used with resistance unit on 220 volts.

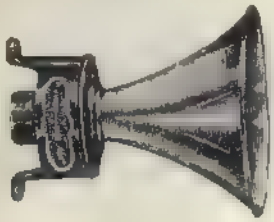

Fig 1079

A. C. Utility Signal

Designed for semi-noisy locations. Suitable for all forms of industrial signal systems. Intermittent service. Switch and sidewall type. 3-inch diaphragm, 4-inch projector, 7 inches long over all. No contact points, no springs, no adjustments. Brass flange japanned. Pigtail connections.

No 500. 110 volts, ⅛-amp., 40-60-cycle $4 50
No 505. 220 volts, ⅛-amp., 40-60-cycle 5 00

Special windings (10-230 volts to order).

A. C. Hummer

Designed for office, house, and other quiet noisy conditions. Suitable for all signal systems. 2¼-inch diaphragm, 2¾ inches long. No contact points, no springs, no adjustments.

No 300. A. C., 11[illegible] volts, ¼-amp., 40-60-cycle $1 50

To order, any voltage (10-230).

Fig 108[illegible]

Steel Gongs

Rotary Multiple Ringing Roof or Hood Gong

Fig. 1081

The alarm given by this gong can be varied from a single blow to a continuous ring. The tone is excellent. The mechanism is simple and durable. All exposed parts are highly nickel plated. The gong requires absolutely no attention after once being installed. It will ring perfectly in all temperatures and will not crack, break or lose its tone, no matter what conditions of the sphere or atmosphere it may be subjected to.

No. 1960

8-inch diameter	each	$18 00
10-inch diameter	each	20 00
12-inch diameter	each	23 00
14-inch diameter	each	25 00

Chief's Buggy Bell, Rotary Multiple Ringing Type

Fig. 1083
Back

The movement of this gong contains no springs. It is simple and durable, and once installed will require no further attention to keep it in working order. The alarm given by this bell can be varied from a single tap to a continuous alarm. Fifteen to twenty rings with each depression of push pin. All exposed parts are highly nickel plated.

No. 1970

10-inch diameter	each	$12 00
12-inch diameter	each	14 00
14-inch diameter	each	16 00

Single Stroke Roof or Hood Gong

Fig. 1082

Loud clear ring. Simple in construction. Gong shell steel. Attachment iron.

Furnished with nickel plated gong and black japanned attachment unless otherwise specified.

No. 1490

8-inch diameter	each	$ 50
10-inch diameter	each	65
11-inch diameter	each	75
12-inch diameter	each	4 50

Conductors' Signal Gong

Fig. 1084

No. 17. Gong shell nickel plated steel. Attachment bronzed.

No. 18. Gong shell polished brass. Attachment polished brass.

Nos. 17 and 18

4-inch diameter	each	$2 25
5-inch diameter	each	2 50
6-inch diameter	each	2 75

Same list applies to both Nos. 17 and 18.

INGERSOLL WATCH DISPLAY CASE

Each

No. 8—Triangular, Hard Wood Frame, Varnished, Heavy Glass Front and Side, Plush Lined, Height 9 inches, Width 8½ inches; Depth 9 inches **$2 00**

Each

Pathfinder—One Day Time; Open Face; Nickel Case, with Compass set in Stem; Heavy Bevel Crystal; Stem Wind and Stem Set; 1½ inch Dial; Accurate Movement; Wt. Each 3 ozs. **$1.90**

One in a Box

PEDOMETERS

For Measuring Walking Distances

To attach, slip over the top of your pocket or over your Belt, will then occupy an upright position, which is necessary to the working of the Lever Mechanism. If not carried in an upright position the works will not operate—it will not register your step. Can be regulated to the step of the wearer. The figures on the scale on the back of the works represent inches and each notch intervening between the numbers represents one inch. Can be regulated for any step between 15 inches and 41 inches. To regulate, measure the distance you take at each step or stride from (heel to heel.) If your step measures 27 inches, set the Indicator at Figure 27. If your step measures 28, move the Indicator one notch forward to "fast." If your step measures 24 inches, move the Indicator back three notches toward "slow," etc. The average step of persons measures 27 inches, therefore is now set for a 27 inch step Thoroughly tested and regulated and it is warranted to be reliable and accurate. The hand can be set by removing the back and turning the hand set backward or forward.

Per Dozen

No. A100—100 Mile; Nickel Case; Cardboard Dial Spaced off in Quarters, Halves and Three-quarter Miles; Heavy Beveled Glass; Pendant Clasp; Weight Each 2 ozs.....**$42 00**

IRON BENCH PLANES

BAILEY ADJUSTABLE

The cutter is adjustable endwise by means of the adjusting wheel at the back of the frog. It is also adjustable sidewise by lever located near the top and at the back of cutter.

The width of the mouth may be regulated and made wider or narrower as coarse or fine work may require. First remove the lever and cutter and loosen the two frog screws that fasten the frogs to the seat. With a screw driver turn the center adjusting screw (see cut) to the right to close the mouth and to the left to open it. When the frog is in the position desired tighten the frog screws and replace the cutter and lever.

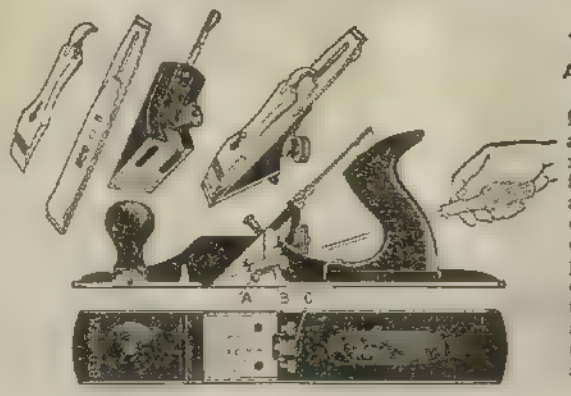
IRON BENCH PLANES



STANLEY "BED ROCK" ADJUSTABLE

The cutter, frog and bottom are so designed, machined and fitted that they are practically one solid piece of metal, thus preventing any chance of vibration. Particular attention is called to the shape of the side. This new and distinctive feature adds greatly to the strength of the plane as well as affording large bearing surfaces when the plane is used on its sides.

The frog may now be adjusted either forward or backward without removing the lever and cutter, simply slacken the tension of the two frog clamping screws "B," and with a screw driver adjust the frog as desired by means of the frog adjusting screw "C" in the center, and then tighten the frog clamping screws.

The cutter is adjustable endwise by means of the adjusting wheel at the back of the frog. It is also adjustable sidewise by lever located near the top and at the back of the cutter

JOINTER

Corrugated Bottom	Each
No. 607C–Length 22 in.; 2⅜ in. Cutter; Wt. 8¾ lbs	$9 70
No. 608C–Length 24 in.; 2⅜ in. Cutter; Wt. 9¾ lbs	11 50

One in a Box.

A Smooth Plane is for finishing or smoothing off flat surfaces. Where the uneven spots are of slight area, its short length will permit it to locate these irregularities, leaving the work with a smooth surface when finished.

A Jack Plane is used to true up the edges of a board in the rough and prepare it for the Fore or Jointer.

A Fore Plane is simply a short Jointer, and being lighter, is preferred by some workmen to the longer plane.

A Jointer is a finishing Plane for large surfaces and is invariably used to true up the edges of boards so that they can be closely fitted or joined together.

*JERSEY ICE CREAM FREEZERS

DOUBLE ACTION

Showing Hinged Cover and Locking Device

The Can and Dasher Revolve in Opposite Directions; Automatic Twin Scrapers.

Enclosed Gearing

The Revolving Dasher Forces the Cream from the Center to the Sides of the Can, where, as it Freezes, it is Removed by the Scrapers.

Extra Heavy, XXXX Tin Can, with **Drawn Steel Bottom;** They will not Leak, and the Bottom will not Break or Fall Out of the Body of Can; Not Liable to Injury, as are Tin Plate or Cast Iron Bottoms.

The Top of Can is Strongly Wired and Turned Over, while the Lower Part is Made to Fit Over and Under the Drawn Steel Bottom by Machinery; The Cans are the Strongest Made, and are not Liable to Collapse or to be Crushed Out of Shape.

Sectional View Showing Interior Construction

The Gears are Completely Covered so that Neither Ice nor Salt Can Get in Cogs Nor the Fingers be Accidentally Caught in Them. **The Hinged Cover** Can be Raised Out of the Way Without Removing it From the Tub. **The Locking Device** is Controlled by a Single Cam, is Simpler and Easier to Operate than Any Other, and Locks the Cover Immovably.

All Inside Parts Coming in Contact with the Cream are **Heavily Tinned;** all Outside Parts are Smoothly and **Heavily Galvanized;** The Ice Space is Arranged to Use The Least Possible Amount of Ice to Freeze in the Least Possible Time. Selected White Pine Tubs, with Electrically Welded Galvanized Steel Wire Hoops, which Will not Fall Off Nor Break.

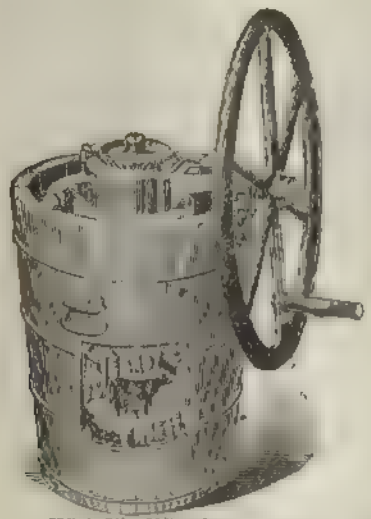
Loose Stock; Wrapped in Heavy Paper

GIANT JERSEY



With Fly Wheel

For Use of Confectioners, Ice Cream Parlors, Soda Founts, Hotels, Restaurants and Boarding Houses.

The Construction is Similar to the Freezers Above, but Heavier and Stronger; The Gear and Shaft are Connected by Clutches which Engage or Disengage by Simply Raising and Lowering the Cross Bar; The Fly Wheel or Pulley Remains Stationary at the Side of the Tub.

The Cross Bar is Made to Swing Up Out of the Way to Take Out Cream or can be Entirely Removed.

The Cans are made of **Heavy Tinned Steel** with Tinned Malleable Iron Bottom; The Tub is Made of Selected White Pine with Electrically Welded Steel Wire Hoops, which will not drop off or break.

✣ICE CREAM CABINETS

Used at Ice Cream Parlors, Soda Fountains, Candy Shops, Hotels and Restaurants for Convenience and Economy in Serving and Selling Ice Cream at Retail

They will Keep Ice Cream Uniformly Hard from 24 to 36 Hours with One Packing of Ice (See Foot note). They are Small, Light of Weight and Most Durable.

Construction

These Cabinets are Constructed **Entirely of Wood,** California Redwood in Solid Pieces being Used for the Outer Case, and Virginia White Cedar for the Circular Independent Compartments. The Compartments are Separated from the Outer Walls, and from Each Other, by Granulated Cork. **Drain Pipes are of Heavy Brass Tubing,** and are Secured by Brass Lock Nuts.

The Cork Insulation Extends Along the Bottom, as well as at the Sides and Ends of the Cabinet.

The Redwood Outer Casing is Light and Very Porous, and the Outside is Treated with a Heavy Coat of Penetrating Varnish, while the Cedar Inner Wall is Covered on the Inside with a Heavy Coating of White Lead, Forming an Impenetrable Wall of Dead Air Space Between.

Sides and Bottom are Each Made of One Piece of Wood and Have No Joints or Panels to Swell, Crack or Become Loosened.

Sold Without Cans. Cans Priced Extra at Bottom of Page

Unseen Service

We appreciate the service to society of utilities that are visible—things like automobiles, trolley cars, etc., etc. But how many think of the infinite mileage of underground piping upon the service of which we all are so dependent? Under the streets of many up-to-date cities ORANGEBURG Fibre Conduit performs its faithful, unseen service—unthought of by the public at large, but fully appreciated by the companies whose wires and cables it protects.

The *quality* of this service is the explanation of the great *quantity* of ORANGEBURG *Fibre Conduit* now in use.

GOOD ROADS AT SMALL COST

SOLVAY is a remarkably satisfactory and economical road-binder. Its effects are immediate and lasting. It quickly incorporates with the road bed, hardens the surface and keeps it free from ruts, weeds and dust. It is simple to apply, and easy to maintain. Its application need not interfere with traffic.

SOLVAY Granulated **Calcium Chloride**

is a clean chemical salt. It is odorless, and will not "track" or ravel. It has many advantages and no objectionable features. Its durability, its economy of material and labor—the reduction it makes in the cost of upkeep, are extremely important to those who are seeking to establish better roads at small cost.

All interested in good roads are invited to write for the "Solvay Road Book," mailed free, upon request.

SEMET-SOLVAY CO.
410 Milton Avenue, Solvay, N. Y

(An "Armco" Iron Culvert being placed under the California State Highway near Fresno, California.)

When War Makes Labor Scarce

it is a satisfaction to know that unskilled men can install

"ARMCO" IRON CORRUGATED CULVERTS

quickly and efficiently. They are shipped without delay, hauled easily, placed quickly, and will last a generation.

Their unfailing durability is their chief recommendation. They are made of "Armco" Iron—the purest and most rust-resisting iron that can be used.

For full information on Rust-Resisting "Armco" Iron Culverts, Flumes, Siphons, Sheets, Roofing, and Formed Products, write.

Resists Rust— **Armco Iron Culvert & Flume Mfrs. Association, Cincinnati, Ohio**

Grading Streets in Dallas, Texas

Moves More Dirt With Less Power

The Adams Leaning-Wheel Grader, or Scarifier-Grader, which leans against the load, can grade and shape up a gravel or MacAdam street, with greater ease and use less power, than any other type of grader. The

ADAMS ADJUSTABLE *Leaning-Wheel* GRADER

is guaranteed in actual road building or maintenance, to move more dirt with less power (mold board scouring and without side draft on the power) than any other grader of same length of blade.

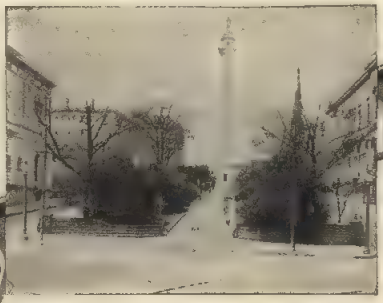
The economy and efficiency of the ADAMS Adjustable Leaning-Wheel Grader can be PROVED by TEST on your own road, before a sale is made. Write for free illustrated catalog showing ADAMS Adjustable Leaning-Wheel Graders at work under various conditions. Ask for Catalog C.

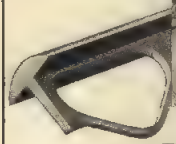
The ADAMS Leaning-Wheel Grader leans against the load just as you'd do if you were pushing a wheel-barrow up a hill. Catalog C gives full information.

J. D. ADAMS & CO.
Road Building Machinery
INDIANAPOLIS, IND.

BACK OF THE PERFECT CURBING ARE KAHN CURB BARS

They provide the best and most economical method of protecting and reinforcing concrete curbing for either business or residential streets. There is no separating or splitting of the concrete at the corners, on account of the open spaces in the anchorage, which is absolutely positive.





Kahn Curb Bars are manufactured from special rolled steel sections, and are heavily galvanized after forming. They are furnished in either straight or curved bars and provide a protection of 1½ inches. Standard lengths 8, 10 and 12 feet

TRUSSED CONCRETE STEEL COMPANY

KAHN Building Products

Monarch Tandem Roller

Because of Labor and Material Shortage Machinery will be the Dominant Factor in Building and Maintaining Streets and Roads

We furnish a complete line of Street Building Equipment for Cities, Counties and Towns, including Steam Road Rollers, all sizes, Portable and Stationary Crushing Plants, Oil Distributors, Heating Kettles, Street Sweepers, Road Graders, Rooter Plows and Culvert Pipe. Catalog and prices on application.

Made in 5, 6, 9 and 10 ton sizes. A small portable crushing plant, like the Champion, will enable cities to secure crushed stone from local deposits. Crushed stone will be hard to get in any other way during the coming year.

Write today for prices. Don't wait.
Delays this year will be dangerous.

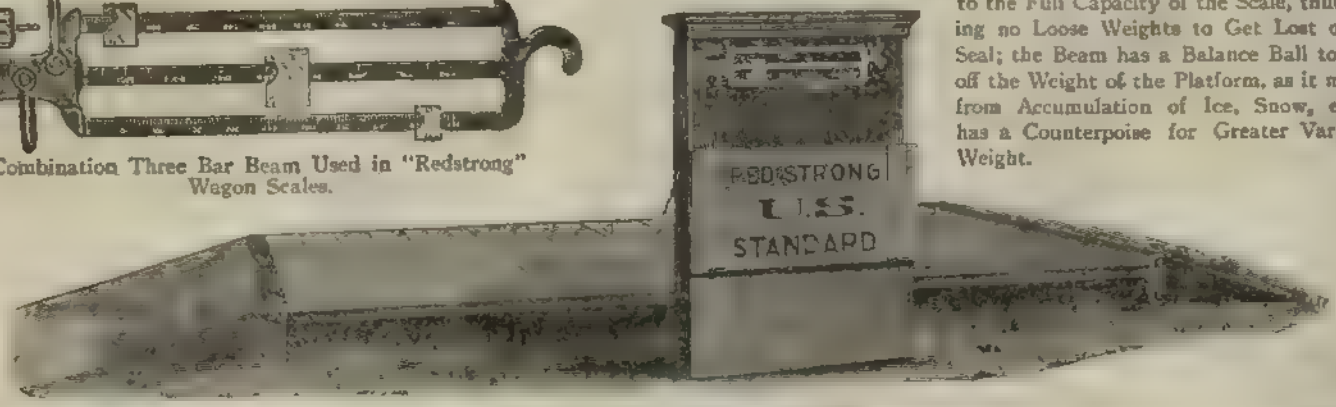
✣PITLESS HAY AND WAGON SCALES

Combination Three Bar Beam Used in "Redstrong" Wagon Scales.

The Scale Beam is Accurately Graduate to the Full Capacity of the Scale, thus Requiring no Loose Weights to Get Lost or out of Seal; the Beam has a Balance Ball to Balance off the Weight of the Platform, as it may Vary from Accumulation of Ice, Snow, etc.; also has a Counterpoise for Greater Variation in Weight.



★REDSTRONG STEEL PITLESS

With Solid Brass Combination Three Bar Beam

The Upper Bar is Graduated by 10 lb. Marks to 2000 lbs; it has a Brass Faced Sliding Poise, with Set Screw for Fastening at any Point when Used for Tare Purposes, the Lower Bar is Graduated to 500 lbs. by 2½ lb. Marks and has Steel Brass Shoing Poise; the Middle Bar is Graduated to Balance of Capacity of Scale by 500 lb. Notches and has a Brass Faced Sliding Poise, Fitted with Pin which Drops in the Notches; the Poise is Sealed on Each Notch, Making any Variation in Weight Impossible.

	Each
✣ No. R4T—Capacity 4 Tons; Size of Platform 8x14 feet; Weight Each About 1000 lbs.	$180 00
✣ No. R5T—Capacity 5 Tons; Size of Platform 8x14 feet; Weight Each About 1050 lbs.	200 00

The "Redstrong" Scale has the Direct Steel Lever Construction, Which Gives it the Advantages and Many of the Special Features of a Pit Wagon Scale; this Important Combination of Improvements Makes it a Very Desirable Scale, as well as a Very Economical One to Erect.

Corner Connection

SPECIAL FEATURES OF REDSTRONG WAGON SCALES

The Illustration on the Left Shows the Remarkably Strong Corner Connection; Each End of the Frame is Made of Heavy Steel Channel Beam; these Beams are Connected by Tubular Steel Cross Pieces which are Secured at Each Corner by a Strong Bracket Bolted to the Channel Beam in the Most Secure Manner Possible. The Heavy Hardened Loops Shown on the Right Support the Steel Levers on which the "I" Beams and Platform with Load are Carried; the "I" Beams are Held in Place by Hardened Bearing Feet Supported on Levers, by Tempered Tool Steel Pivots.

The Levers are Held in the Loops by Tempered Tool Steel Pivots.

Long Lever

Short Lever

Both Levers are Made from a Single Piece of Heavy T-Shaped Rolled Steel.

The Long Levers are Reinforced with **Heavy Steel Trusses,** Making Them Perfectly Rigid Under any Strain; the Short Lever Supports are Riveted to the Center of the Long Lever Between the Lever and the Lever Truss, as Shown Above; the Saddle is Heavy and Swings from a Hardened Steel, Cone Shaped Pivot, Making it Impossible for the Long and Short Lever Connections to Bind or Rub. Both Levers are Provided with a Hardened Steel, Cone Shaped Pivot, which Rests in a Tempered Tool Steel Cup. **The Bearings are Protected from Mud, Dust and Water.** The Beam Box is Made of Selected 1 inch Tongued and Grooved Lumber with Heavy 1½ inch Moulded Top; Painted 2 Coats; it is Braced by Steel Rods; the Beam Box Door has Heavy Wrought Hinges and Flat Key Lock.

Long and Short Lever Connection

We Furnish this Scale Complete, Except Lumber for Platform.

Building Plans, Giving Full Directions for Installing, Furnished with Each Scale.

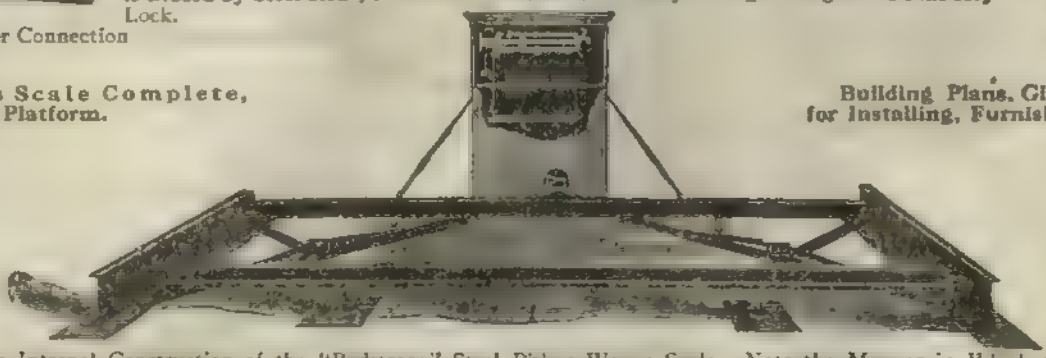


Illustration Shows Internal Construction of the "Redstrong" Steel Pitless Wagon Scale. Note the Manner in Which the Steel Channel End Beams are Connected by Tubular Steel Cross Pieces, the Scale is Sealed to U. S. Standard Weight and Carefully Boxed and Crated for Shipment. Each Scale Packed in Two Boxes; Four Pieces Levers and Six Pieces Structural Iron, Separate.

Items Marked ✣ Not Carried in Stock; Can Only be Furnished by Shipping Direct from Factory, Southern Michigan.

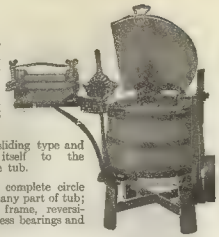
LIBERTY BELL.

POWER.



Liberty Bell Power Washers are fitted with an absolutely new type of mechanism. When lid is lifted the dolly is thrown out of gear and does not move, lowering the lid starts the dolly.

The dolly is of the sliding type and automatically adjusts itself to the amount of clothes in the tub.

Wringer swings in a complete circle and is easily available to any part of tub; it has a strong malleable frame, reversible drain board, frictionless bearings and enclosed cogs.

Tub is corrugated, stave leg type, made from Louisiana cypress, stained and highly varnished; fitted with metal drain faucet.

Washers are geared to a speed of 175 R. P. M. and are fitted with a 10-inch pulley for a 2-inch belt. Mechanism and metal parts finished in aluminum and black.

Each

No. LBP—Washer; diameter of tub, top 21 inches, bottom 24 inches; height over all, 30 inches; wringer rolls, 1¾x10 inches; weight crated, 175 lbs. **$45.00**

One in a crate.

ELECTRIC.

Liberty Bell Electric Washers are fitted with compact, simple and efficient motor that has ample power to operate both tub and wringer at the same time. It is fully protected from interference by dirt or water, but easily accessible if necessary. Furnished complete with belt tightener, cord and plug; supplementary pulley 1¼x8 inches.

The dolly is of the sliding type and automatically adjusts itself to the amount of clothes in the tub.

Wringer has strong malleable iron frame and is supplied with reversible drain board; rolls are of the best pure rubber, 1¾x10 inches.

Tub is corrugated stave leg type, made from Louisiana cypress, fitted with metal drain faucet and casters; natural wood finish highly varnished; mechanism and metal parts finished in aluminum and black.

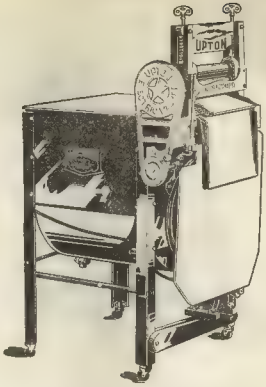
Each

No. LBE—Washer; diameter of tub, top 21 inches, bottom 24 inches; height over all, 32 inches; weight crated, 225 lbs. **$81.00**

One in a crate.

NOTE—Our stock is 110 volt, 60 cycle, alternating current; other voltage or current will be shipped from factory and charged for on basis of cost at factory on date of shipment.

UPTON.



The Upton principle of washing by electricity is considered the easiest and most economical.

The cylinder makes three-fourths of a complete circle and returns, clothes while washing describe a rough figure eight, getting two complete plunges.

The capacity of the Upton is six sheets and fifty towels. It washes a full load clean in six minutes and washes for family of six in ninety minutes.

The Upton system abolishes rubbing. Laces, rugs, curtains, etc. may be washed without the slightest injury. It does not have projecting ribs to wear; no metal to cut nor pegs to twist clothes. Plunging and that only, coupled with good hot soapy water does the work.

Has four unobstructed sides for the operator with controls all on one side.

The Upton is scientifically built, strains are equally distributed, motor is of the General Electric type; maximum current consumption costs about two cents per hour.

Has steel rods to support body; ball bearing casters; two roll reversible wringer with safety devise; angle iron legs bracing entire structure; made from well seasoned cypress; highly finished in dark oak; all metal parts are galvanized and are enameled gray.

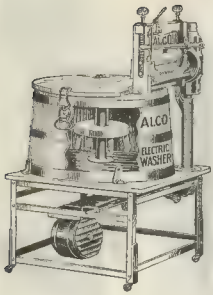
Each

No. 1G—Upton Electric Washer; capacity, six sheets, fifty towels; height over all, 52 inches; width, 26 inches; weight crated, 225 lbs. **$90.00**

F. O. B. St. Paul, Minn

NOTE—Our stock is 110 volt, 60 cycle, alternating current; other voltage or current will be shipped from factory and charged for on basis of cost at factory on date of shipment.

ALCO.



Simple to operate, built strong and durable. Can be attached to any electric light socket. Cord and plug furnished with each machine. Dolly type washer with underneath drive. Frame is best angle iron, 1x1x⅛ inches; platform, 26x29 inches; adjustable extension legs for lowering or raising platform. Equipped with roller bearing casters. Has four-position, 11-inch, swinging power wringer with quick release, reversible drain board and clothes spreader. Wringer may be operated while washer is working, and from same power.

Frame aluminum finish, tub natural wood, varnished. The motor is of special design, Robbins & Myers make; furnished for either alternating or direct current. Special gearing insures maximum power at minimum cost.

POWER.

This model is same as the Alco Electric washer described above, except that it is operated by gasoline or kerosene engines or any other power.

Each

No. 50P—Alco Power Washer; diameter bottom, 26 inches; diameter top, 23 inches; staves, 1x14 inches; hoops, 1½x18 gauge; wringer rolls, 11x1¾ inches; shipping weight, 205 lbs. $50 00

ELECTRIC.

Each

No. 50E—Alco Electric Washer; diameter bottom, 26 inches; diameter top, 23 inches; staves, 1x14 inches; hoops, 1½x18 gauge; wringer rolls, 11x1¾ inches; approx. shipping weight, 250 lbs. $90 00

NOTE—Our stock is 110 volt, 60 cycle, alternating current; other voltage or current will be shipped from factory and charged for on basis of cost at factory on date of shipment.

One in a crate.

The Alco Twin Washer named "Twin" because it has two separate and distinct wash tubs. These tubs can both be used at the same time or each one operated separately. This gives double or large capacity and is particularly desirable for large households.

The Alco Twin Power Washer is smooth running, almost noiseless, has no complicated mechanism—nothing on the wash tub lids and is simple and easy to use. It is beautifully finished, the frame in aluminum enamel and the tubs natural wood varnished. The Alco is known as the dolly type washer with underneath drive. The frame is best angle steel, 41 inches long and 26 inches wide. Has adjustable extension legs for raising or lowering platform from floor. Also has floor fasteners. The Alco has a four-position 11 inch swinging power wringer with quick release, reversible drain board and clothes spreader. The tub is corrugated inside.

POWER.

Each

No. 250P—Alco Power; dimensions of tub, top 23 inches, bottom 26 inches; dimensions of frame, length 41 inches, width 26 inches; weight each crated, 300 lbs. $70.00

ELECTRIC.

Each

No. 250E—Alco Electric; fitted with specially designed ¼ h. p. Robbins-Meyers motor, otherwise same as No. 250P Alco power washer; weight each crated, 345 lbs .$112.00

NOTE—Our stock is 110 volt, 60 cycle, alternating current; other voltage or current will be shipped from factory and charged for on basis of cost at factory on date of shipment.

Piece

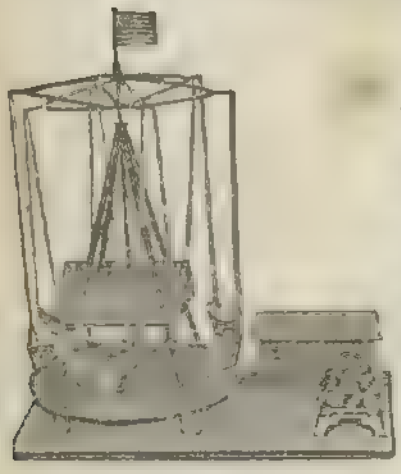
A real Automobile Race Course in Miniature. Cars are 8½ inches long. In exact models of standard racing cars. Bodies are richly enameled in various colors and differently numbered. Wheels have solid rubber tires. Spare tire is carried on the back of every car. Levers and hubs of wheels are nickel plated. Bodies may be removed from chassis; mechanism can be easily reached for cleaning and lubricating. Motor is mechanically and electrically perfect. Current is collected from insulated third rail in track by two revolving shoes, making perfect contact and consuming little current. Front wheels are mounted on flexible truck. Cars will not jump the track when traveling at high speed. Track is made up in circles of 30 inches and 36 inches diameter, one fitting inside the other. Drivers in regulation uniform and starting posts are included with every outfit.

These are novel and original outfits. A single track layout, when running around the base of an illuminated Christmas tree, produces a beautiful effect, while the double track outfits provide unlimited excitement as a race. For window or show-room attraction they are unsurpassed. The outfits can be operated on Dry or Storage Batteries, also from the house current in conjunction with Transformers.

Per Dozen

No. 984—Consists of 8 sections of Curved Track, making a circle 36 inches in diameter, together with 1 car, drivers and starting post; Weight dozen 68 lbs..... **$144.00**

No. 985—Consists of 8 sections of Curved Track, making a circle 30 inches in diameter, together with 1 car, drivers and starting post; Weight dozen 60 lbs..... **144.00**



REVOLVING AIRSHIP

Pressed Steel, Enameled and Decorated in Brilliant Colors and Gold Bronze; As Motor Causes Standard to Revolve, the Gayly Decorated Boats, held Suspended by Gold Steel Wire in Arrangement Design, give the Realistic Effect of Flying Air Ships; Mounted on Base with Rubber Feet, 16x10 inches, Complete with No. 1161 Reversible Motor; Operated with One Dry Cell or on Alternating Current through a Toy Transformer.

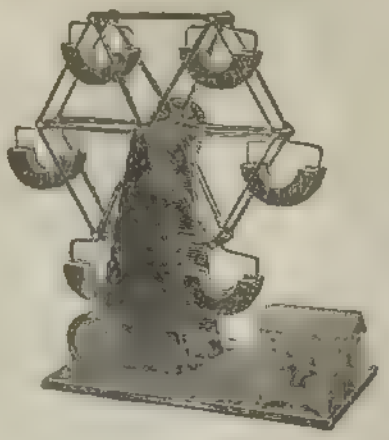
Per Dozen

No. 1162—Height over all 21 inches; Weight per Dozen 72 lbs..... **$78 00**

One in a Package

Batteries Not Included in Above; We Strongly Recommend The No. HD600 For Above.

ELECTRIC TOYS



FERRIS WHEEL

Pressed Steel; Enameled in Brilliant Colors and Decorated in Gold; Operated by Type B Motor, on one Dry Cell or on Alternating Light Current through a Toy Transformer; Wheel with Swinging Carriage, 18 inches in Diameter; Base 16x10 inches, with rubber base.

Per Dozen

No. 1165—Height over all 21 inches; Weight per Dozen 106¼ lbs..**$84 00**

One in a Box

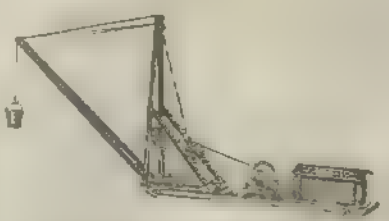
FREIGHT ELEVATOR

Pressed Steel; Enameled in Bright Colors and Gold Bronze; Motor and Counter Shaft are of Iron, Handsomely Finished in Red and Gold; Mounted on Base 20x5½ inches, with rubber base; Operated by Reversible No. 1161 Motor on One Dry Cell, or from Alternating Current through a Toy Transformer. 3¼x5 inch Elevator will carry small weights.

Per Dozen

No. 1163—Height over all 21 inches; Weight per Dozen 50¼ lbs...**$48 00**

One in a Box



DERRICK

Pressed Steel, Enameled in Bright Colors; the Mechanism permits the load to be raised or lowered at will and the arm of derrick to be raised or lowered without stopping Motor; the Power House is Lithographed Pressed Steel and Holds the Dry Battery; Mounted on Base 20x5x5¼ inches; with rubber base; provided with Wheels; Operated by Reversible Type L Motor from One Dry Cell or on Alternating Current through a Toy Transformer.

Per Dozen

No. 1164—Height with Derrick, raised 21 inches; Weight per dozen 48 lbs..... **$54 00**

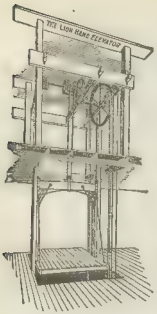
One in a Box

Batteries Not Included in Above; We Strongly Recommend The No. HD600 For Above.

HAND ELEVATORS.

LION.

F. O. B. St. Paul.



Important—In planning for an elevator, remember to keep the edge of the opening six inches from any wall. Opening must be 12 inches larger postwise than platform, and 2 inches from front to back. Pit at lower landing should be about 12 inches deep. Height in upper landing story should be at least 10½ feet, measuring from floor to ceiling.

When ordering, give following information:

Size of platform postwise; size of platform from front to back; number of landings to be served; distance from landing to landing, beginning with the lower one; distance in upper landing story, measuring from floor to ceiling; lifting capacity in pounds; class of goods to be handled; whether right or left hand is wanted; i. e., whether brake and pull rope is on right or left side as you enter the car, cut indicates right hand.

Prices made on Application.

Each

No. 1000—Hand Elevator; center lift, roller bearing, capacity 1,000 pounds; complete with gears, track, platform, rope, wheels and counter-weights; platforms 4x6, 5x6, 5x5 and 6x6 feet; weight about 1,800 lbs; fitted with 25 foot hoist. . . . . .

No. 1500—Hand Elevator; capacity, 1,500 pounds; platforms up to 5x5 feet; 20 foot travel, otherwise same as No. 1000. . . . . .

No. 2000—Hand Elevator; capacity, 2,000 pounds; platforms up to 5x5 feet; 20 foot travel, otherwise same as No 1000. . . . . .

For each additional foot of hoist, add per foot. . . . .
For larger platforms, add per square foot. . . . . .
Counterweights furnished with each car, 100 lb. over balance, additional weights per pound . . . . . .

WAGON JACKS.

COVERT.

Per Dozen

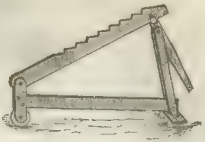
No. 475—Covert. All steel, japanned finish; compound levers: perpendicular hoist; capacity 1,000 pounds; weight per dozen, 66 pounds. **$12.50**

No. 476—Covert. Same as No 475: capacity 2,500 pounds; weight per dozen, 126 lbs . . . **16.00**

For Axle Grease and Axle Washers, see Harness section.

CARRIAGE JACKS.

WOOD.



Made of hard maple, with steel braces at the foot. Folds up close for shipment by removing one bolt.

Rests in front on a wheel and is pushed under the vehicle until the axle rests on the notched bar.

Pulling down the handle will raise from 1 to 3 inches, and locks by pass ng the center

Stained; natural finish.

Each

No. W1—1 inch thick; length 3 ft., height 2½ ft., will raise 1 ton; weight each 11 lbs. **$1.40**

No. W2—1¾ inches thick; length 3 ft., height 2½ ft., will raise 2 tons; weight, each 14 lbs **1.70**

No. W3—1¾ inches thick; length 3 ft., height, 2½ ft., will raise 3 tons; weight each, 17 lbs. **2.30**

Half dozen in a bundle.

LOCOMOTIVE JACK SCREWS.

VULCAN.

Each

Levers—For locomotive jack screws: length 18 inches; diameter, ⅝ inch; are cut from ⅝ inch round iron, we find that this length is most practical . . **$0.50**

In bulk.

SINGLE BIT AXES

LIPPINCOTT

Gold Bronzed and Labeled: Polished Bit and Head

Best Grade Cracible Steel Bit, Laid Forged; Hand Tempered and Ground, Soft Steel Body, the Eye is Punched from Soft Steel and will not Shrink nor Break, as Occurs with Rolled or Welded Eyes. The Eye Tapers from the Outer to the Inner Opening; this Holds the Handle Firmly and Prevents Splitting.

In Ordering Axes on this Page, Give Numbers and Weights Only

LOUIS XVI DESIGN

COMMUNITY PLATE

The Louis XVI with its graceful lines and delicacy of ornament well exemplifies the golden epoch of the French Renaissance—classic in its conception, but enlivened by just a touch of that spirit of blithe freedom which is France.

SEIBERT.

The Seibert Magic Fly Killer contains an effective fly poison. Flies and other insects are attracted to it by five sweetened wicks, partake of the liquid and soon die. Each killer is sufficiently charged with a fly killing material to last all season. The bottom and sides being made in one piece prevents leakage. It has a protective rim on top which prevents overflow. Without this feature a tin placed where exposed to the sun will draw excessive water and overflow

Directions—Uncork and fill with water.

Per Dozen

No. 1MFK—Magic Fly Killer; diameter, 4¾ inches; depth, ½ inch; packed one dozen in a counter display carton; weight per carton, 2 lbs. **$2.50**

POISON FLY PAPER.

SEIBERT.

A sure fly killer put up in an attractive display box, holding fifty envelopes, each envelope containing eight sheets of paper

Per Carton

No. 2PFP—Poison Fly Paper; size of carton, length 7½ inches, width 6 inches, height 5 inches; weight per carton, 3 lbs. **$2.50**

FLY TRAPS.

Mansfield Rigid Spout Water Column

Fig. 30

Reasons Why the Mansfield Column Fulfills the Requirements of Modern Railroad Service:

First The valve responds immediately to the operating lever, which together with the large area of passage, makes it possible to deliver a large tank of water quickly

Second Being balanced or nearly so, the valve operates easily and may be used under high pressure without water hammer

Third Under very high pressure as when connected direct to city mains we furnish a wheel handle attachment on the spout, making the motion of the valve uniform, and preventing water hammer

Fourth It is adapted to double as well as single track roads

Fifth When not in service it turns automatically to its position parallel to the track and locks itself in that position

Sixth The column is frost-proof, as the automatic drip valve drains the pipe when not in service.

Seventh The valve is simple in construction and does not get out of order easily but is, at the same time readily accessible

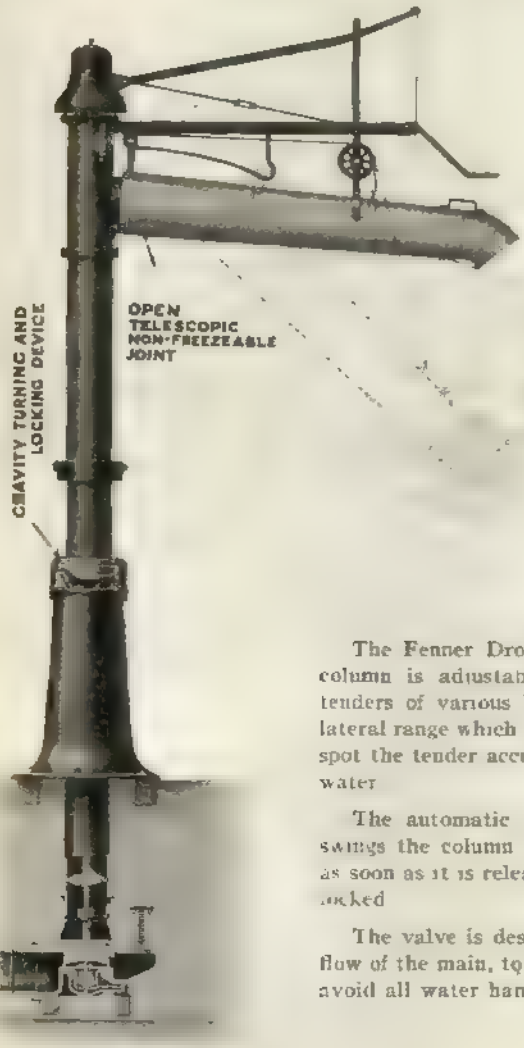
Eighth The stream of water flowing from the spout is solid and free from circular motion

Ninth -All operating parts are outside the valve, so that they can be replaced quickly in case of accident.

8 inch Mansfield Water Column to operate from tender	weight 1,800 pounds
10 inch Mansfield Water Column to operate from tender	weight 2,500 pounds
12 inch Mansfield Water Column to operate from tender	weight 3,000 pounds

Prices on Application

Poage Style "H" Automatic Water Column with Fenner Drop Spout



The Fenner Drop Spout shown on this column is adjustable vertically to reach tenders of various heights. It also has a lateral range which makes it unnecessary to spot the tender accurately in order to take water

The automatic gravity turning device swings the column parallel with the track as soon as it is released, and holds it there locked

The valve is designed to admit the full flow of the main, to shut off rapidly, but to avoid all water hammer.

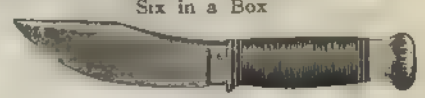
Marble's Ideal Hilt, Stag Handle

No. 48—5 in. blades.....Each $2.75
No. 48—6 in. blades.....Each 3.00
Six in a Box



The great advantage of this knife is that it is designed for all purposes. It has the weight and strength, and the sharp penetrating point necessary for sticking, curved blade is just the right shape for rapid skinning, the back of blade close to handle is checkered to give a firm grip with thumb or finger, the back of point is beveled for chopping, breaking bones, etc. The thick back, with tapering bevel blade, carries the strength from handle to point, allowing it to serve the purpose of a thin blade, and yet has a surplus of strength found only in much heavier knives.

Marble's Woodcraft

No. 49—4½ in. blades, laminated leather handle, with sheath.....Each $1.50

No. 50—4½ in. blade, staghorn handle, with sheath.....Each 2.00

Half Dozen in a Box.

Woodcraft

The great advantage of this knife is that it is designed for **all** purposes. Some knives are adapted for sticking but are not much good for skinning or cleaning. Some are adapted for skinning or cleaning but are not satisfactory for sticking.

It has the weight and strength as well as the sharp penetrating point necessary for sticking—the curved blade is just the right shape for rapid skinning—the back of blade close to handle is checkered to give a firm grip with thumb or finger—the back of point is beveled for chopping, breaking bones, etc. The thick back, with tapering bevel blade, carries the strength from handle to point, allowing it to serve the purpose of a thin blade, and yet it has a surplus of strength ordinarily found only in much heavier knives.

The 4½ inch blade is the length desired by most experienced hunters. Handy to carry and handle, with no superfluous weight to tire the hand or inconvenience the worker when cleaning inside an animal.

Per Dozen

No. 49—Laminated Leather Handle; Blade 4½ inches; Handle 3¾ inches; Weight each 5 ozs.; Complete with Russet Leather Sheath.....**$36.00**

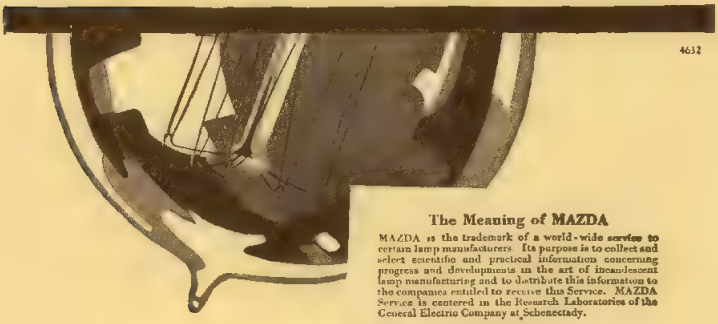
"Not the name of a thing, but the mark of a service"

No lamps can ever be marked MAZDA unless they embody MAZDA Service standards of excellence



4632

The Meaning of MAZDA

MAZDA is the trademark of a world-wide service to certain lamp manufacturers. Its purpose is to collect and select scientific and practical information concerning progress and developments in the art of incandescent lamp manufacturing and to distribute this information to the companies entitled to receive this Service. MAZDA Service is centered in the Research Laboratories of the General Electric Company at Schenectady.

The mark MAZDA can appear only on lamps which meet the standards of MAZDA Service. It is thus an assurance of quality. This trademark is the property of the General Electric Company.

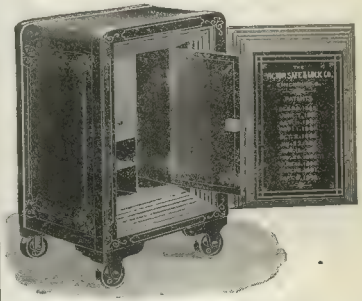
SAFES.

VICTOR.



The Victor Safes are made under several valuable patents, and are equal if not superior to any other safes on the market. These patents protect not only the original and important features of the safes, but also special labor-saving machinery with which they are manufactured and which materially reduces their cost, at the same time adding to their burglar-proof and fire-proof qualities.

Write for special catalog of safes containing descriptions, illustrations, testimonials and prices.

Prices F. O. B. Cincinnati, Ohio.

One in a Wood Box, Knocked Down; Weight 36 lbs.

HACK SAW FRAMES

★ *Diamond Edge*

BACK SAW STYLE HANDLE EXTENSION FRAME

Note—The Frame of these Saws are Positive Locking; absolutely no chance of Loosening while in use. Blade can be quickly released when desired

Extra Stiff Nickel Plated Steel Frame, 3-16x5/8 in.; **Varnished Applewood Handle** fastened with Nickel Plated Saw Screws; Saws can be Set to cut in any direction at any Angle; Depth from inside of Back to Cutting Edge 3½ inches.

Heavy, Rigid and Strong—The Floating Rivet. Makes adjustment Quick and Easy.

The Handle end of Frame engages with the Floating Rivet by means of Notches on the under side.

When the Blade is tightened up the Floating Rivet slides up the inclined Plane formed by the angular slot in the Tube. The Handle End thus has a bearing throughout its entire length against the Tube forming the back, making it extra strong and rigid and prevents Buckling.

This construction is not to be found in any other Frame on the market and will appeal to the mechanic as one of the most practical improvements made in the construction of Hack Saw Frames.

Adjustable Handle

The Handle on this Saw may be adjusted in different positions to suit conditions of ordinary overhead or work in low down or Cramped positions. Tension is controlled by a Wing Nut at front end of Frame.

Per Dozen

No. DR77—Without Blade; adjustable to take Blades 8 to 12 inches; Weight each 1½ lbs.; Weight per Dozen 18 lbs.....**$26.00**

One in a Box

Solid Handle

The Handle on this Saw is Securely Fastened to the Frame with Two Saw Screws. It is made exceptionally Strong and Rigid, has a comfortable Grip and is recommended for Heavy work. Tension is controlled by a Knurled Nut at Rear end of Frame.

BACK OF THE PERFECT CURBING ARE KAHN CURB BARS

They provide the best and most economical method of protecting and reinforcing concrete curbing for either business or residential streets. There is no separating or splitting of the concrete at the corners, on account of the open spaces in the anchorage, which is absolutely positive.

Kahn Curb Bars are manufactured from special rolled steel sections, and are heavily galvanized after forming. They are furnished in either straight or curved bars and provide a protection of 1¾ inches. Standard lengths 8, 10 and 12 feet.

TRUSSED CONCRETE STEEL COMPANY

Department C-43 **Youngstown, Ohio**

Representatives in Principal Cities

KAHN Building Products
TRUSSED CONCRETE STEEL CO.

Monarch Tandem Roller
Made in 5, 6, 9, and 10 ton sizes

Because of Labor and Material Shortage Machinery will be the Dominant Factor in Building and Maintaining Streets and Roads

We furnish a complete line of Street Building Equipment for Cities, Counties and Towns, including Steam Road Rollers, all sizes, Portable and Stationary Crushing Plants, Oil Distributors, Heating Kettles, Street Sweepers, Road Graders, Rooter Plows and Culvert Pipe. Catalog and prices on application.

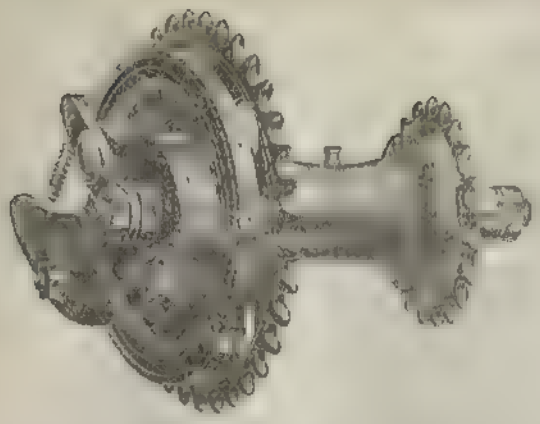
A small portable crushing plant, like the Champion, will enable cities to secure crushed stone from local deposits. Crushed stone will be hard to get in any other way during the coming year.

Write today for prices. Don't wait.
Delays this year will be dangerous.

THE GOOD ROADS MACHINERY CO.

Kennett Square, Pa.

✣MOTORCYCLE COASTER BRAKES



CORBIN DUPLEX BAND BRAKE

Construction of Great Strength; Intended for Use on Motorcycles only. The Brake is on the Band Principle Instead of being entirely Contained in the Hub, in order to Provide the Power Necessary to Stop These Heavy Machines when Under High Speed. The Band is of Great Strength and Lined with Raybestos. A strong and Quick Acting Spring Throws the Brake Band out of Contact Upon Pressure Being Removed. The Arm Connecting Band is provided with Two Projections, Forming a Nut Lock and prevents its Jarring Loose. A Bracket Attached to the Lower Side of the Brake Arm Serves to Keep the Brake Band from Dragging on the Drum or Sagging when Expanded, and thus Prevents Loss of Power or Overheating. Left Hand or Motor Drive Sprockets are not Included in Price of Brake.

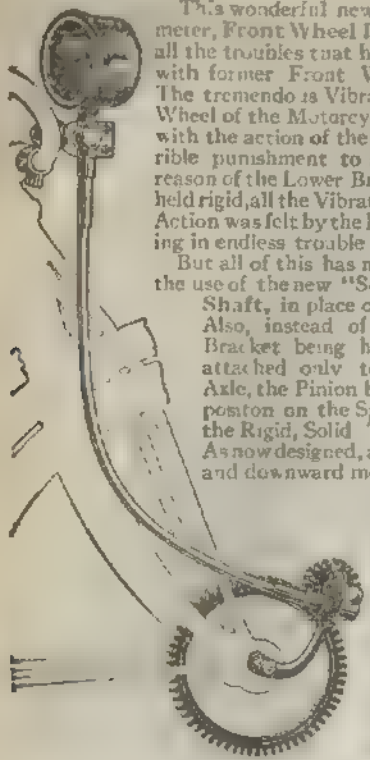
MOTORCYCLE SPEEDOMETERS

STEWART

When ordering Motorcycle Speedometers; give make, model and year of motorcycle, also diameter of tire.

LID TUBE FRONT WHEEL DRIVE, MODEL 101



This wonderful new Motorcycle Speedometer, Front Wheel Drive, does away with all the troubles that have been experienced with former Front Wheel Drive Models. The tremendous Vibration that the Front Wheel of the Motorcycle receives, together with the action of the Spring Fork was terrible punishment to a Flexible Shaft. By reason of the Lower Bracket formerly being held rigid, all the Vibration Shock and Spring Action was felt by the Flexible Shaft, resulting in endless trouble and breakage.

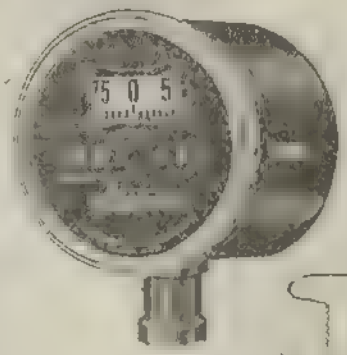
But all of this has now been obviated by the use of the new **"Solid Tube" Driving Shaft,** in place of the Flexible Shaft. Also, instead of the Lower Bearing Bracket being held Rigid, it is now attached only to the Front Wheel Axle, the Pinion being suspended in its position on the Sprocket by means of the Rigid, Solid Tube Driving Shaft. As now designed, all of the "Whipping" and downward movement on the Fork is taken up by the Bracket working free on the Axle. Any downward movement of the Fork causes the Solid Tube to push the Pinion down slightly on the Sprocket. This virtually makes a free connection of all of the Vibration and Springiness that any Motorcycle will ever experience have absolutely no effect upon this new Solid "Solid Tube" Driving Shaft equipment.

Each

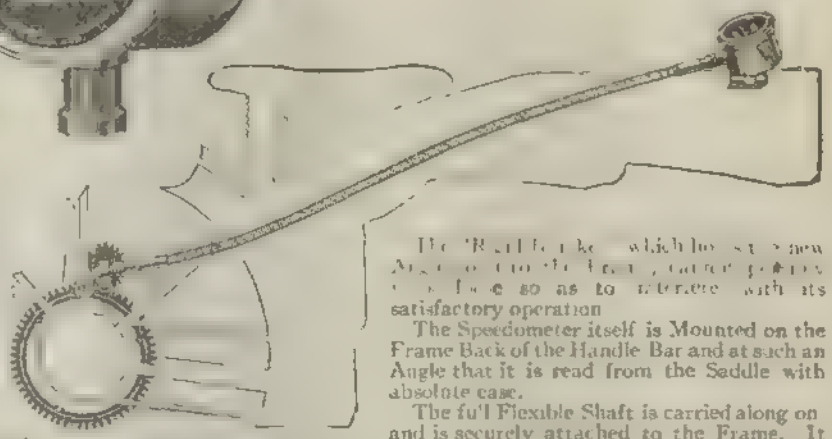
Model 101—Front Wheel Drive with 2½ inch Dial..... $14 00
One in a Box; Weight about 12 lbs.

REAR WHEEL DRIVE, MODE L101A

The most ruggedly built and equipped Motorcycle Speedometer made. Furthermore, it is more firmly attached than any other Motorcycle Speedometer in existence. It is absolutely unaffected by Vibration or Road Shocks.



Fastened to the Rear Wheel Hub is a big, Solid Case Sprocket, as strong as any part of the Machine. The Pinion being of Fiber, eliminates all Gear Grinding, as well as all the other noises which makes the ordinary Speedometer Drive so objectionable. The new Angle Joint, between the Pinion and the Flexible Shaft is a Stewart special design and is an entirely new Departure in this construction.



The Rear Bracket, which holds the new Angle Joint to the Frame, carries perfect [illegible] so as to interfere with its satisfactory operation.

The Speedometer itself is Mounted on the Frame Back of the Handle Bar and at such an Angle that it is read from the Saddle with absolute ease.

The full Flexible Shaft is carried along on and is securely attached to the Frame. It cannot work loose and get in the Riders' way. It is never subjected to any Whipping or Twisting Strains. It is always in the best possible position for correct operation.

The illustration shows one method of attaching it to the Frame. Because of the difference in the Designs of Motorcycles, a special Bracket for each make of Motorcycle is made.

Each

Model 101A—Rear Wheel Drive with 2½ inch Dial..... ..... $14 00
One in a Box; Weight 12 lbs.

BICYCLE CYCLOMETERS

✠CEDAR CANVAS COVERED CANOES

MULLINS IMPROVED CHARLES RIVER MODEL

SPECIFICATIONS

Ribs—The Ribs are of the Very Finest Grade of Selected White Cedar, ⅛ inch Thick; 2¼ inches Wide and Perfectly Spaced 1½ inches apart. These Ribs are Steam Bent and Shaped over Solid Moulds, Insuring Perfect Symetry and Uniformity of Model.

Planking—The Best Quality ⅜ inch Cedar in Long Strips, Laid Perfectly Smooth With Tight Joints, Copper Fastened Throughout with Copper Tacks, Carefully Clinched.

Stems—Ash, Steam Bent, Light yet Thoroughly Substantial.

Bang Plates—Half Round, Polished Brass, Pressed to Correct Form.

Gun Wales—Open Gun Wales of Clear Grained Spruce, One Piece Full Length of Canoe, Adding Strength and Insuring Ease in Washing and Draining.

Thwarts—Best Selected Ash, Two in 16-foot Model, Three in 17 and 18 foot Models.

Seats—Two Substantial Cane Seats, One at Bow and Stern of Each Canoe.

COLORS—Blue, Red or Coach Green, Be Sure to Specify what Color is Wanted when Ordering Canoes.

Keels—Oak Keels ⅛ inch Furnished on all Models Without Additional Cost.

Oiling Hull—The Wooden Hull, when Completed is Thoroughly Smooth and is then Oiled both Inside and Out. This Prevents Hull Absorbing Water.

Canvas—Seamless Canvas Duck, Made of Two or More Twisted Yarns in the Filling with Double Thread Warp, Which Makes the Canvas Closely Woven and Practically Waterproof Even Without Filler or Paint. One Piece of Gun-Wale to Gun-Wale and From Stem to Stem, This Material with a Special Method of Filling and Painting, Makes a Well-Nigh Indestructible Covering.

Long Decks—Clear Grained Timbers With Low Combing at Ends; 24 inches Long in 16-Foot Model, 26 inches Long in 17-Foot Model, 30 inches Long in 18-Foot Model; Only Furnished When Specially Ordered; and at Additional Prices Quoted upon Request.

Standard Grade—Embodies all the Desirable Features One Could ask for in a Canoe, viz., Correct Design, Best Selected Materials, Expert Workmanship in Construction and Finish at the Prices Given Below.

I. X. L. Grade—This is all that is best in Canoe Construction—Material, Workmanship and Finish. Every Rib, Every Piece of Planking and Lumber Entering into this Grade is Hand Selected and Matched to Secure Uniformity of Color. This Grade will Stand Comparison with the Highest Priced Canoe on the Market.

Prices Given Include Keel and Open Gun Wales
